DURHAM, NH – The races for New Hampshire’s two Congressional seats are heating up with Republican Jeb Bradley holding a narrow lead in the 1st District and Democrat Paul Hodes holding a wider lead in the Second District.

These findings are based on the latest WMUR / Granite State Poll, sponsored by WMUR-TV and conducted by the University of New Hampshire Survey Center. Five hundred fifty (550) randomly selected New Hampshire adults were interviewed by telephone between September 14 and September 21, 2008. The margin of sampling error for the survey is +/- 4.2%. Included was a subsample of 523 likely November voters (margin of sampling error, +/-4.3%). Two hundred fifty-two (252) likely voters lived in New Hampshire’s 1st Congressional District (margin of sampling error = +/-6.2%) and 271 lived in the 2nd District (margin of sampling error = +/-6.0%).

NH 1st District

In a rematch of their 2006 race, incumbent Democrat Carol Shea-Porter is trailing the man she defeated in 2006, Republican Jeb Bradley. Six weeks before the election, 45% of likely voters in the 1st District say they will vote for Bradley, 42% say they will vote for Shea-Porter, 1% prefer some other candidate and 12% are undecided. This race has narrowed slightly since July when Bradley held a 46% to 40% advantage. And while both Shea-Porter and Bradley hold 84% of their partisans, Bradley holds a slim 40% to 32% lead among 1st District independents.

Bradley runs strongest among Republicans, conservatives, and regular church goers. Shea-Porter gets her strongest support from Democrats, liberals, divorced and single voters, non-religious voters, and young voters.

There is a significant gender gap in this race with Bradley leading by 52% to 33% among men and Shea-Porter leading by 50% to 39% among women.

* We ask that this copyrighted information be referred to as the WMUR Granite State Poll, sponsored by WMUR-TV and conducted by the University of New Hampshire Survey Center.
Shea-Porter is viewed favorably by 44% of 1st District voters, 31% have an unfavorable opinion of her, 5% are neutral, and 20% say they don’t know enough about her to say. Shea-Porter’s net favorability rating is +13%, up from +3% in July but down from +26% in February.

Currently, 36% of 1st District voters have a favorable opinion of Bradley, 29% have an unfavorable opinion of him, 14% are neutral and 21% don’t know enough about him to say. Bradley’s net favorability rating in the 1st District has plummeted to +7% from +21% in July. “The hard fought primary battle between Bradley and John Stephen has hurt Bradley,” said UNH Survey Center Director Andrew Smith.
In the 2nd Congressional District, incumbent Paul Hodes leads his Republican challenger, Jennifer Horn, but many voters remain undecided as both candidates are not well known in the District. Hodes currently gets the support of 38% of 2nd District voters, 26% favor Horn, 2% favor some other candidate, and 33% remain undecided. Hodes led Horn by 43% to 23% in the July Granite State Poll.

Hodes appears to have been hurt by the criticism he has received from the four Republicans vying for the nomination in the 2nd District. Currently, only 28% of 2nd District residents say they have a favorable opinion of Hodes, 22% have an unfavorable opinion of him, 10% are neutral, and 40% say they know too little about him to say. Hodes’ net favorability rating is +6%, down significantly from +26 percent in July.
Horn remains largely unknown in the 2nd District. Only 16% of 2nd District voters have a favorable opinion of Horn, 12% have an unfavorable opinion of her, 7% are neutral, and 65% don’t know enough about her to say. Horn’s net favorability rating is +4%.

Favorability Ratings – Jennifer Horn NH 2nd District

Granite State Poll Methodology

These findings are based on the latest WMUR / Granite State Poll, sponsored by WMUR-TV and conducted by the University of New Hampshire Survey Center. Five hundred fifty (550) randomly selected New Hampshire adults were interviewed by telephone between September 14 and September 21, 2008. The margin of sampling error for the survey is +/-4.2 percent. Included was a subsample of 523 likely November voters (margin of sampling error, +/- 4.3%). Results reported for other subgroups have potential for somewhat larger variation than those for the entire population. Two hundred fifty-two (252) likely voters lived in New Hampshire’s 1st Congressional District (margin of sampling error = +/-6.2%) and 271 lived in the 2nd District (margin of sampling error = +/-6.0%).

The data have been weighted to adjust for numbers of adults and telephone lines within households, respondent sex, and region of the state. In addition to potential sampling error, all surveys have other potential sources of non-sampling error including question order effects, question wording effects, and non-response.
Favorability Rating – U.S. Representative Carol Shea-Porter - NH 1st District
"Next, I'd like to get your overall opinion of some people in the news. As I read each name, please say if you have a favorable or unfavorable opinion of this person - or if you have never heard of him or her. Congresswoman Carol Shea-Porter”
