PRICE 5 CENTS

BASKET BALL GAME GOES TO SENIORS

FACULTY DEFEATED 18-9 AFTER A GOOD EFFORT.

BENEFIT OF BLEACHER FUND.

Thirty-Three Dollars Taken In at Door Helps Out Total—Game Full of Amusing Features.

The seniors won the basketball game but Perley won the race. A faculty-senior basketball game was scheduled last Friday evening to be played between the halves of the two-year game, but Grady and Perley turned it into a track meet. The faculty had an all star team including Professor Ralph Brackett, B. V. D., a professional and the famous Wilson Brothers, incorporated. With the first blast of the referee's whistle "Chuck" Davis jumped for Perley in a wild attempt to pay off in 20 minutes the scores of four years. When Chuck and Perley clinched, Wilson popped a fly to center field but failed to score. Bartlett got the ball on fourth down and singled to first but died there. In the last part of the first half Corriveau, Perley and Davis started a free-for-all bout in one corner of the gym, in which all took part. During the third round Grady withdrew from the fight, picked up the ball and sauntered to the goal. Finding it to be the wrong one he turned, blew his nose, and strolled down to the right basket; shooting a goal with as much ease and nonchalance as he displays in shooting the biscuits over George Brackett's counter.

RACE BEGINS.

In the second half Grady entered the game with a thought of disappointment at their being no members of the engineering faculty to play against; but he soon found that they had an able representative. Having vanquished the only chem. man on the senior team, Perley entered the second half of the game in a bathing suit disguised as an engineer. "If I can't play, it's a cinch Grady won't," said Perley and he made good his words. For the rest of the game, Grady had as much show to get away from Perley as he would have in shaking his shadow in the Sahara desert on a cloudless day. In despair, Grady put in the notorious Bonardi in hopes of alienating Perley's affections, but there was nothing doing on that line. Perley stuck like a plaster. Perley finally won the race by two laps but Grady claims that the result would have been different if he had had his slide rule with him. The faculty should have won the game, they claim, if the referee hadn't blown his whistle just then. The money taken in at this game will be turned into the bleacher fund and amounts to thirty-three dollars:

SUMMARY:

Faculty	Seniors.
Perley rf lg	Corriveau (Bonardi)
M. F. Wilson lf	rg C. W. Davis
W. R. Wilson (Capt.) c	
	e Bartlett (Garside)
Ralph Brackett rg	If Hobbs (Fogg)
Cleveland lg	rf Grady (Capt.)
Baskets from floor: Hobbs 6, M. F. Wilson 2, Perley, W. F. Wilson., Grady, Corriveau, Garside. Baskets from fouls: W. R. Wilson. Referee: Bissell. Timers, Cutts and Dwight. Scorer, Nelson. Score, 1915, 18, Faculty 9.	

LADIES' AID HOLDS MEETING AND PREPARES FOR ENTERTAINMENT.

At the meeting of the Ladies' Aid last week final arrangements were made for the entertainment and sale which takes place at the church chapel tonight. The farce "A Country School" will be given as a part of the program and candy, ice cream, and Easter bulbs will be on sale. Admission will be fifteen cents.

Paramount pictures at the Lyric Theatre every Monday, Wednesday and Friday.

BLEACHER FUND HAS NOW PASSED THE \$250 MARK

Sale of Planks and Receipts from Basket Ball Games Add Materially—Statement of Receipts and Expenditures.

As a result of the sale of planks and the receipts from the Senior-Faculty and 1915 2 yr. 1916 2 yr. basketball games, the bleacher fund has been increased to over \$250. Below is printed a statement of the receipts and expenditures up to the present time:

Receipts from sale of planks	\$108.25
Receipts from basketball games	33.00
Total,	\$141.25
Expense of tags and printing,	2.00
Net proceeds,	\$139.25
Donations from Alpha Alpha	
Alpha,	\$50.00
Glee club,	30.00
Class of '08,	37.40

Grand total, 37.40
Grand total, \$256.65

An instance of the true alumni spirit was shown in a letter received from "Gib" Lane, '13 in which he enclosed one dollar to buy planks for himself and three others.

G. A. PERLEY TO GIVE TALK ON CHEMISTRY OF PHOTOGRAPHY.

George A. Perley will give a talk Friday, April 2 at 7.45 in the chemistry lecture room in Conant Hall on "Chemistry for the amateur photographer." The lecture will be illustrated with many lantern slides and will have much of practical benefit to those interested in this subject. This talk is the second of a series under the auspices of Alpha Chi Sigma and is open to the public.

PROFESSOR HEWITT SPEAKS TO SCIENTIFIC ASSOCIATION.

Prof. C. E. Hewitt spoke before the Scientific Association of the St. Paul's School, Concord, N. H., Wednesday evening, March 24. His subject was "High Frequency and High Potential Currents." The lecture was illustrated by several very pleasing experiments which were performed with a high frequency 110,000 volt current.

INFORMAL LASS ATURDAY EVENING ENJOYED BY ALL.

Last Saturday evening the Gymnasium was the scene of another of those dancing parties which are so much enjoyed by the frequenters of Informals. Although the number in attendance was smaller than usual everybody enjoyed a merry time. The matrons of the evening were Mrs. DeMerritt and Mrs. Sanders. The music was furnished by the College Orchestra.

MRS. ONDERDONK ENTERTAINS ALPHA SI DELTA AND FRIENDS.

On the evening of March 18, Mrs. Shirley Onderdonk entertained the members of the Alpha Delta Sorority and their friends at a dancing party at Fed Tower. The guests of the sorority were the following: Messrs Fettee, Colomy, Morgan, Allen, Bartlett, Watson, Learmonth, Hall, Blake, Grant, Bugbee, Rollins, Elliot, Groves, Dudley.

Dancing was participated in until half past o'clock. During the course of the evening delectable refreshments were served.

Mr. Ward furnished music for the occasion.

PROFESSOR WOLFF SPEAKS ON HORTICULTURAL SUBJECTS.

Professor W. H. Wolff attended a meeting of an Institute at Henniker, last Tuesday at which he spoke in the afternoon on "The Care of Apple Crabs," and in the evening on "Small Fruit Culture." On Wednesday he spoke at the Extension School at Rochester on "Strawberry Culture."

EARNING POWER OF COLLEGE EDUCATION

RELIABLE AND ENLIGHTNING INFORMATION COLLECTED

RESULTS ARE SIGNIFICANT

Graduate Class of Technical College is Canvassed—Members Engaged in a Variety of Callings.

The New Education reprints an interesting discussion on "Pay of College Graduates." The article was originally printed in the Boston Herald. "How much may a person earn after getting a college education?" The question is often asked and best answered by saying, "Any amount, it depends upon the person." There has been so much speculation regarding the salaries of college graduates and especially regarding the incomes of engineers and men of technical training that, at a recent gathering of a class graduated ten years ago, from one of the foremost technical colleges in the country, it was decided to collect reliable information on this point.

180 GRADUATES CONSULTED.

There were about 180 graduates in the class in question and as they had become scattered in all parts of the country and had taken up a great variety of business and engineering lines of work, it was evident that the results would be of a great deal of value. Of the 180 requests sent out, 151 replies were received.

LOWEST SALARY \$728.

The lowest salary received was \$728. The largest salary was \$20,000. The following table shows the salaries for the year, separated into divisions of \$500, each and the number of college graduates receiving salaries in each of these divisions.

(Yearly Salary)	
Below \$1,000	2
\$1,000 to \$1,499	15
1,500 to 1,999	30
2,000 to 2,499	27
2,500 to 2,999	19
3,000 to 3,499	18
3,500 to 3,999	11
4,000 to 4,499	7
4,500 to 4,999	0
5,000 to 9,999	15
10,000 to 20,000	7

Total 151
AVERAGE FOR YEAR \$3907.

The average received for the year was \$3107. The total amount of money received by the 151 graduates during the year, in their business work, was \$459,157 or nearly \$500,000.

MODEL OF ELIZABETHAN THEATRE UNDER CONSTRUCTION IN SHOPS.

How would you like an open air theatre in the pasture beside the library or in some other place where the lay of the land is suited for it?

A model of an Elizabethan theatre is being made in the wood-shop under the direction of Mr. Philbrick. This model is to be used in one of Professor Richards classes in English literature.

The Elizabethan theatre is an open air, woodens structure of three balconies, octagonal in shape. The stage occupies one end, with boxes on either side. The rows of seats are not unlike those in our own theatres.

In studying the Elizabethan plays and looking at the model, the thought has occurred to some that a similar structure might be built here if the students could arouse enthusiasm enough to do it. Besides being unique there would be many purposes for which it might be used to good advantage.

NELSON AND WHITTEMORE ARE ELECTED CLASS TEAM MANAGERS.

At a meeting of the sophomore class last Tuesday afternoon, R. L. Nelson was elected manager of the class baseball team and A. B. Whittemore, manager of the class track team.

GEORGE H. MAGOON TO BE BASEBALL COACH

Rochester Man Comes to New Hampshire (With Years of Experience—Has Played in Many Leagues.)

Mr. George H. Magoon of Rochester will be the baseball coach for the coming season. He will begin his duties April 1 and will remain for 9 weeks. In Mr. Magoon New Hampshire has a man who has had many years' experience in the National game. He has been in professional ball for 17 years and has been coach at the University of Maine for 2 years where he turned out a team that won the Maine Championship.

Mr. Magoon's record in professional ball is as follows: Portland, New England League, 2 years; Brockton, New England League, 2 years; Brooklyn, National League, 1 year; Baltimore, National League, 1 year; Chicago, National League, 1 year; Chicago, American League, 1 year; Indianapolis, American Association League, 1 year; Indianapolis, American League, 1 year; Toronto, International League, 1 year; Des Moines; Western League, 1 year; Trenton, Tri-State League, 2 years; and Savannah, South Atlantic League, 2 years.

PICTURES OF CLASS OF 1871 HUNG IN PRESIDENT'S OFFICE.

There have been hung recently in the president's office two pictures of the first class ever registered at the college.

This class was enrolled in 1871 with nine students, but at the end of four years it had decreased to three: Lewis Perkins of Hampton, Charles H. Sanders of Penacook and William P. Ballard of Concord.

Under the group picture taken at graduation are the individual pictures of the three men, which were sent to the president at his request.

PROF. RASMUSSEN TELLS OF BIG DAIRY CONGRESS

Prof. Free Rasmussen spoke at chapel today telling of his trip to Europe last summer when he attended the International Dairy Congress at Berne. He said the Europeans were amazed that the United States sent no official delegates and that the United States was represented unofficially by but three men.

Prof. Rasmussen told of the alarm in Denmark at the outbreak of the war and the preparations taken to defend Copenhagen. He illustrated his talk with the stereopticon.

BUREAU OF RECOMMENDATIONS BEGINS SECOND SEASON'S WORK.

The college Bureau of Recommendations, headed by Professor Guy C. Smith of the department of economics, is beginning its work for the season. The board is engaged in finding places for the New Hampshire College graduates of this year, for alumni who wish to make changes, and in finding men for the employers who are applying to it.

Letters have been written to the heads of all the secondary schools of the state and applications to the board have come from alumni and undergraduates. This season the work will be confined largely to the filling of teaching positions but industrial and other positions are considered. Men desiring places in engineering or agricultural work send their names to the board and the board turns them over to the heads of the departments.

The feature of the plan which appeals to the employer is that the men he gets in this way from the college are in a sense guaranteed. The board, as its name implies, recommends. In each case it ascertains the facts about a student's work and makes its recommendations accordingly.

This is the board's second season. Last year it met with success and undertakes the work his year on a larger scale.

WOMAN'S LEAGUE TO GIVE "MEN AND MICE"

CHARACTERS UNDER DIRECTION OF MISS BROWN OF BOSTON.

WILL BE PRESENTED IN DOVER

Murdoch and Miss Currier in Leading Roles—Play First Produced in England by Forbes-Robertson.

"Men and Mice," is the play that will be presented under the auspices of the Woman's League at the Dover Opera House, April 17. The cast of characters is as follows:

THE CAST.

Mack Embury,	A. L. Murdoch
Roger Goodlake,	R. C. Graham
Captain Lovell,	A. R. Morgan
Sir Harry Trimblestone,	R. J. Bugbee
Kit Barnigu	W. A. Dudley
Fete,	J. J. Harlow
Jonna Goodlake,	
	Mrs. Shirley Onderdonk
Mrs. Deborah,	Miss V. C. Hardy
Peggy (Little Britain)	
	Miss Elenora Currier
Matron,	Miss B. I. Fall
Beadle,	
Molly,	Miss N. L. White

The characters are under the direction of a professional coach, Miss Mary M. Brown of the Emerson School of Cratory, Boston.

FIRST PRODUCTION

The play was first produced in England by Forbes-Robertson and Gertrude Eliot, who took the parts of Embury and Little Britain. In this country Annie Russell was the Little Britain.

The committee in charge of the production includes Mrs. A. J. Morgan, Chairman; Mrs. C. W. Scott, Mrs. M. H. Scudder, Miss Gladys McKone and Miss Marian Giddings.

The play is to be given to raise money for the work of the league.

HOME ECONOMICS EXTENSION COURSE UNDER SARAH L. BATES.

In the near future the College Extension Department will begin a series of eleven lectures in Home Economics. Miss Sarah L. Bates will have charge of this work.

The course, which will last from eight to ten months, will include the following subjects: six lectures on Selection and Combination of Foods; one on Household Management; two on Textiles and Clothing and two on Care and Feeding of Children. Demonstrations will accompany the lectures.

These lectures will be given monthly at some convenient hall or private dwelling.

The necessary supplies, such as butter, eggs, etc., will be furnished by the class. Assistance will be required, by the instructor, from the members of the class at each meeting.

Interchange of ideas will be encouraged, and discussions will be held whenever possible.

RHODE ISLAND WANTS GAME WITH NEW HAMPSHIRE.

Rhode Island is now asking for a game next fall. Mr. Hitchcock has just received a letter from the faculty manager of athletics at Rhode Island saying that they had reserved the approval of two or three of the last games of the schedule until they had found out whether or not it was possible to arrange for a game with us. This matter will be taken up with the athletic council to see if an agreement between the representatives of the two colleges can be reached.

MEN OF DURHAM!

Are you interested in "Business"? Well then, come out and hear Mr. F. C. Folsom of the F. A. Foster Co., of Boston, Mass., talk on, "Business Standards of Today."

Where?—Church Chapel.
When?—Sunday at 5.00.

DURHAM, N. H., MAR 26 1915

LEISURE HOURS.

It is a truthful indictment that college men are particularly susceptible to the allurements of leisure. Some argue convincingly that to while away the time in the jolly companionship of worthless magazines is pleasing rest from weary toil of required work. This is a good argument but the rest theory is never sufficiently inclusive to excuse the ordinary college man's idleness. Some men there are, too, whose accomplishments are not self-satisfying and though they will not admit it, the familiar comradeship of genial friends is soothing lotion for their stinging consciences. A fellow who does not do creditable work in prescribed studies often consoles himself that he is receiving the liberal education of contact with men and the world. His conclusion is comforting but it is erroneous.

The error of the idle college man's ways is not in the fact that he has leisure, but in his failure to make proper use of his spare hours.

In our schools today we make the sad mistake to suppose that hurry and speed are indications of efficiency. It is a distinct advantage in a world of intense organizations to be able to work rapidly and accurately, but, as someone has said: "Nothing artistic is either produced or enjoyed under the sense of hurry."

This then is a plea for the proper use of leisure.

Beauty and culture cannot be assimilated in condensed form; they spring up and are nurtured in moments of repose. Our leisure can make to our lives a deep and permanent contribution, for there shall come a real appreciation of the sense of beauty in art, in literature, in music, in nature. We need the inspiration that comes alone from those thoughts and aspirations aroused by the noblest and best in our environment. Poetry which appeals to the soul; art, which enriches a man's appreciation of life; the music of a master, arousing in us a deep sympathy and love for the highest things; a compelling sense of the expression in nature of the deepest lasting truths of life and of God—these are what we may expect from our leisure hours. These are the substances of real education and of life.

INFORMALS.

Some few weeks ago a short comment was printed in this column relative to the apparent change of sentiment which has gradually appeared during the past two years toward our informals.

If one will look in Webster's dictionary he will see there, after the word "informal," these three meanings: "Not in the usual form or mode; not with the official or customary forms; without ceremony."

Now if he will compare these three definitions with the word "informal" as applied to one of our college dances, he will see a great incongruity.

When these dances were first naught-

ed, and some cognomen had to be applied to them, the word "informal" was chosen.

Now why was this name which meant all these things selected to be applied to our dances?—Because, the dances were invented to furnish amusement and recreation and sociability for the whole of the student body; not particularly for those who move in society as a rule, not for those who patronize dances in Dover or Newmarket or Somersworth, not for those who affect elaborate costumes, not for those who must have a certain partner each time, and not for any clique or set whatsoever but, particularly—for everybody.

See how well the informals carry out that idea!

If we are to make the dances into "balls" we must show a little consideration for the kindness of the orchestra in giving its services that everyone may enjoy himself, and cough up three dollars apiece for those services. It's only fair.

Throw away the dance orders, let the orchestra leader announce the dances as he plays them, give the chaperone a rest from that ram rod position all alone in a corner and let everybody come whether "married" or "single." Then our dances will be distinctive college informals.

OPEN FORUMS.

Why would it not be a good thing to have an open forum here at New Hampshire? We believe it would prove very popular and incidentally of great value. At such gatherings various matters pertaining to student interest might be discussed by fraternity and non-fraternity and sorority and non-sorority members. There are situations constantly arising which are beyond the scope of Casque and Casket or even the Student Council, and these might be discussed in an open forum thereby giving the opportunity for expression of opinion on the part of any student.

The kindergarten will meet every Wednesday at 1.30 P. M. Blocks and rattles will be provided for the younger attendants while pop-guns and drums will be furnished for the older ones. It is hoped that in the future more enjoyment will be indicated by more noise.

The new demerit system is, in its requirements, very easy to live up to. All that is necessary is to use as much care in deportment and dress as would naturally be used by any gentleman on the street. A proper frame of mind is the most essential thing toward making the requirements pleasant and easy for the individual.

COMMUNICATION.

"Do It For Durham."

This is the motto which the Civic Department keeps before them, and it is the one I am going to ask the students of N. H. College to take to heart this spring. The very unusual weather has made the town, "house cleaning" come earlier this year, and not one of us can fail to see how very much in need of tidying up Durham is. I want to ask first the fraternities and boarding houses and eating clubs to take stock of how they look, in their back as well as their front yards. Are there ashes to be carted away, papers to be burned, tin cans to be hauled to the dump? If so will you have them attended to at once? I want to ask each individual student not to yield to the temptation of throwing papers and trash into the road, especially in front of the post office, stores, or the station. The Village Improvement Society, has a great deal to do and very little to do with. Will you cooperate with us in keeping Durham clean and tidy? Can't you work yourself up into a sort of "House Party" attitude and go to work with enthusiasm? It will make a vast difference in the looks of the town. Please co-operate with us, or we shall be utterly discouraged at the prospect of a "Thousand Students in Five Years."

Katherine D. Paine,
Chairman Civic Dept.

Mrs. Knight's Sunday school class enjoyed a delightful social at the parsonage last Friday evening.

The Pomona meeting held with the Winnepesaukee Grange at Meredith was addressed a week ago Thursday by Director Kendall on the subject "Extension Work and Its Value to the New Hampshire Farmer." An audience of 150 or 160 was in attendance.

Paramount Pictures at the Lyric Theatre every Monday, Wednesday and Friday.

NEWSY ITEMS OF THE ALUMNI.

L. D. ACKERMAN, 07, BEACON FALLS RUBBER CO. CHEMIST

F. H. Bills, '10 at R. I. State—Powers, '07 Retains Old Position—Other News From Alumni of Various Places.

L. D. Ackerman, '09, is chief chemist for the Beacon Falls Rubber Shoe Co. It will be remembered that Mr. Ackerman was married last Christmas Day in the "little church around the corner", New York City, to Miss Anna Gilchrist. Mr. Ackerman reports that he is having a house remodeled and expects to open it in about a month. He has a room fitted up for New Hampshire people and he hopes to have a good many visitors from old New Hampshire.

Mr. Ackerman writes, "Believe me, I am strong for New Hampshire. In my limited experience, I have been up against men from some of the larger schools in the country and I have never had reason to be ashamed of my training. The college men who wear the insignia of a large university may have a little more prestige at an evening's bridge but when the boss comes around and wants to slip one over on his competitor, it is the man who can deliver the slip that gets the smiles. That's where New Hampshire men fit."

"I follow the progress of the whole college with interest and when Gus turns upside down or we get a new dormitory from the legislature, you can be sure it gets a good advertising down here."

Mr. Frank H. Bills '10 is Instructor in Mathematics at the Rhode Island State College at Kingston, R. I. The mathematics department is now located in the commodious quarters of the newly erected granite building "Science Hall." During the time which Mr. Bills has been in the above department, the freshman class in mathematics has increased from fifty to one hundred and fifteen students, which necessitated dividing the class up into three divisions.

Mr. John G. Powers, '07, who has had charge of the agricultural work in the high school at Easton, Mass. for the past two years, was recently offered the position of county agent for Merrimack county. After accepting the position tentatively, he was made such a tempting offer by the school board at Easton that he concluded to remain there.

M. G. Holton, Ex. '16, is now working for the F. B. Spaulding Co., Lancaster, N. H. He has recently been elected Secretary and Treasurer of the Coos County Farmer's association.

Miss Bernice M. Hayes, '12, is now completing her third year as teacher of mathematics and science in the Hillsboro High school, Hillsboro, N. H.

Miss Margaret DeMerritt '11, is teaching in the Botany department at Wellesley College. She has two of the twelve divisions in Freshman botany and two divisions of the course in bacteriology.

Iathrop L. Parsons, Jr., is now in charge of the New York office of the Mercantile Security Co., of Baltimore. His office is at 51 E. 42nd St., New York City.

The Misses Lucy Drew and Robina O'Connor '13, are both teaching in Waterville, Me.

John Randall, '05 was recently the guest of H. J. Pettee, '05, at Decatur, Ill. Mr. Randall represents the Bureau of Education in an attempt to interest the public schools to include home gardening as a course of study.

Francis M. Hoben, '11 has been delegated by the General Electric company of Lynn, Mass., to take charge of their laboratory exhibit at the Panama-Pacific exhibition.

Frank S. Davidson, '12 is selling aluminum ware in Ansonia, Conn.

MRS. R. D. PAINE TO BE JUDGE AT PRIZE SPEAKING CONTEST

Mrs. Ralph D. Paine has consented to act as one of the judges of the Prize Speaking Contest to be held here May 7th. This contest is attracting more interest than usual this year, and the number of competitors undoubtedly will be greater than in former years. Dr. Richards has received letters of inquiry from widely scattered schools.

Desks! Desks!

You would hardly expect to find 75 Desks in one store within 4 1-2 miles of Durham, but by actual count we have more than that number

The Supremacy of the De Laval Cream Separator

37 Years of Leadership

Supreme in Skimming Efficiency

Over 35 years of experience and thousands of tests and contests the world over have demonstrated the De Laval to be the only thoroughly clean skimming cream separator. Under all the varying actual use conditions, favorable as well as unfavorable.

Supreme in Construction

This applies to every part of the machine—to the bowl, the driving mechanism, the frame and the tinware. The De Laval patent protected Split-Wing Tubular Shaft Feeding Device makes possible greater capacity, cleaner skimming and a heavier cream than can be secured with any other machine.

Supreme in Durability

The De Laval is substantially built. The driving mechanism is perfectly oiled and the bowl runs at slow speed all of which are conducive to durability and the long life of the machine. While the life of other cream separators averages from three to five years, a De Laval will last from fifteen to twenty years.

Supreme in Improvements

This has been the great factor in De Laval success. Not a year goes by but what some improvement is made in De Laval machines. Some of the best engineers in America and Europe are constantly experimenting and testing new devices and methods, and those which stand the test are adopted.

Supreme in Service

With its worldwide organization and with agents and representatives in almost every locality where cows are milked, no stone is left unturned by the De Laval Company to insure that every De Laval user shall get the very best and the greatest possible service from his machine.

Supreme in Satisfaction

De Laval users are satisfied users not only when the machine is new, but during the many years of its use.

Supreme in Sales

Because they are supreme in efficiency, construction, durability, improvements, service and satisfaction more De Laval Cream Separators are sold every year than all other makes combined.

Spring and Summer Clothing

The most important factor in the matter of dress is the FEELING that your clothes are up to date, that they are properly tailored. Style is also a most important element in a spring suit—the Spring Suit is more closely observed than that of any other season.

Adler-Rochester

Suits always look well—they always hold their shape. They combine style, beautiful tailoring, perfect fitting and long wear—that's why they excel. And they are distinct and individual. Today is the day to make your selection—the assortment is now complete.

1917 2 YR. MEN TRIM HIGHER 2 YR. CLASS 36 TO 7

2 Year '15 Makes No Score in First Half—Turner the Star of Contest—Game Was Walk Away from Start.

The 1916 2 yr. team defeated the 1915, 2 year team in a walk-away game Friday evening, March 18 in the Gym by a score of 36 to 7. At the end of the first half the score stood 18 to 0 and six minutes of the second half had been played before the 1915 2 yr. team made a single score; a condition which has seldom occurred at a basketball game.

ONE SIDED GAME.

"Zeke" Turner starred for the first-year men, shooting eight baskets from the floor and six goals from fouls. The playing of the second year men was very loose and lacked team work.

In the second half, a different team was put in for the second year men and they managed to score seven points. The proceeds of the game and the faculty-senior game played between the halves were donated to the bleacher fund.

SUMMARY:

1915 2-yr.	1916, 2 yr.
Seymour (Crosby) rf	lg Tootill
Redden (Hazen) lf	rg Schoolcraft

Baskets from floor: Turner 8, Eastman 4, Hughes 3, Crosby 2, Hall. Baskets from fouls: Turner 6, Hall. Referee, Thompson. Timers, Cutts and Dwight. Scorer, W. J. Nelson. Score, 1916 2-yr. 36, 1915 2-yr. 7.

SEVEN COW TEST ASSOCIATIONS ORGANIZED IN NEW HAMPSHIRE.

There are at present in New Hampshire seven Cow Test Associations. Below is printed the list together with the names and addresses of their officers.

Ammonoosuc Cow Test Association—President, W. K. Dexter, Sugar Hill; Secretary, Oscar Batchelder, Sugar Hill; Tester, E. Q. Paul, Lisbon.

Coos County Cow Test Association—President, C. W. Clark, Route 1, Lancaster; Secretary, C. M. Rich, R. F. D. No. 2, Lancaster; Tester, R. H. Holmes, Lancaster.

Jefferson Cow Test Association—President, F. D. Stebbins, Jefferson; Secretary, George Evans, Starkring; Tester, W. T. Phair, Jefferson.

Lyndeboro Cow Test Association—Secretary, Harry Holt, South Lyndeboro; Tester, F. C. Obsber, South Lyndeboro.

Piermont Cow Test Association—President E. E. Perkins, Fiermont; Secretary, F. A. Horton, Fiermont; Tester, Leslie Thompson, Ryegate, Vt.

Upper Coos Cow Test Association—President, Freeman Marshall, Colebrook; Secretary, A. B. Frizzell, Colebrook; Tester, W. M. Farrington, Colebrook.

Monadnock Cow Test Association—President, C. H. Thomas; Secretary-Treasurer, Wm. H. Caldwell, Peterboro; Tester, H. P. Jaquith, Peterboro.

SURVEY MAP AGENTS WANTED BY NATIONAL SURVEY COMPANY.

H. F. Crocker, representing The National Survey Co., was in Durham, Mar. 22, interesting students in agencies for maps of Maine, New Hampshire, and Vermont. These maps make quickly available any detailed information with regard to railroads, highways and telegraph stations of every town in the states. They are based on topographical data of the government surveys.

Similar maps are made of every state in the Union and of the United States. In their preparation the cooperation of highway commissioners has been secured.

The agencies are taken with straight commissions of approximately fifty percent.

ILLUSTRATED LECTURE GIVEN AT SOMERSWORTH.

Professor Ernest R. Groves gave an illustrated lecture on "Primitive Art," at Somersworth, Thursday, March, 18. He was assisted by Prof. Richard Whoriskey who gave readings from primitive literature contrasting it with poetry from Whittier, Wordsworth and Matthew Arnold. In the middle of the lecture the lights gave out and Professor Whoriskey talked during the interval of darkness upon the European War.

Spring pruning of the young orchards and vineyards is well under way.

F. W. TAYLOR ISSUES BULLETIN ON PASTURES

Number of Domestic Animals in State Decreasing—Reason Attributed to Lack of Attention to Pastures.

If the New Hampshire cow turned out to pasture now doesn't give so much milk as has been expected of her, don't blame the cow without an investigation. Professor F. W. Taylor, head of the department of agronomy here, says about four times out of six the cow has to work too hard for a living. It's the fault of the pasture.

SUBMITS STATISTICS.

Pasture lands in New Hampshire, says Professor Taylor, have been getting poorer for years. Statistics indicate that the acreage is at least as great now as it was 70 years ago, and that probably the acreage has slightly increased, but the number of cattle and sheep grazing on this land has decreased tremendously. In 1840 there were 276,000 cattle and 617,000 sheep in this state. In 1910 the cattle had dwindled to 168,000 and the sheep to but 44,000.

PASTURES WORN OUT.

There are many reasons for this decline, but one of them is that the pasture lands of New Hampshire will not support cattle or sheep as they once would. They are worn out. Tests on one of the college pastures showed that it would take nine acres of it to furnish enough feed for one cow for the summer, and that the cow would have to eat all day long. There would be no time for meditative cud chewing.

This college pasture is typical of the poorer pasture land of the state. If the farmer wants his dairy cows to thrive he must feed them well all summer, and Professor Taylor says "The most natural, the cheapest, the best feed for the dairy cow during the summer is good pasture."

METHODS OF RECLAMATION.

The poor New Hampshire pastures have become poor through neglect. They can be made good again by care. Professor Taylor is now writing a bulletin on this subject in which he will give detailed instructions on how to reclaim worn out pastures.

When possible Professor Taylor recommends plowing, reseeded and fertilizing. When the land is too stony for plowing and only a top dressing can be applied, Professor Taylor recommends nitrate of soda.

Good pasture grass must be nutritious and it must be palatable to the cow. It must be long lived and it must be able to reproduce itself without having to produce seeds. The following grasses answer these requirements: Kentucky bluegrass or June grass, timothy, red-top, orchard grass, meadow fescue and white clover.

The proper seed mixtures for various soils will be given in the new bulletin and formulae for good fertilizers which the farmer can mix for himself.

SOME DON'TS.

Here are a few of Professor Taylor's Don'ts:

Don't turn your cattle out as soon as snow is gone. They will trample the tender grass into the mud and seriously hurt the pasture. There isn't so much grass in a spring pasture as there seems to be.

Don't leave the cattle out too late in the fall. The pasture needs to have a good coating of grass left as protection against winter cold.

Don't waste money on lime. It will not do what you have been told it will.

WALT CHAMBERLAIN D.AGNOSSES LACK OF INTEREST IN Y. M. C. A.

"Spirit, mind, and body" is the motto of the Y. M. C. A., and we are laying too much emphasis upon the spirit part of the triangle, says Walt Chamberlain, who spoke last Sunday afternoon before the Christian Association on the subject "Through a Glass Darkly." Walt tried to explain why the association in Durham was not getting the support it deserved. In his opinion if the mind and body could be brought up to the standard, the spirit could not help but follow. As a means toward this end he thought that the Sunday meetings would be popularized by the omission of formal prayer, the permission of applause, provision made for a series of occupational talks, and the holding of wholesome gym classes in physical culture at regular intervals.

Any lack of interest at the present time, he thought, could not be laid to lack of ability in the men interested in the work, nor too much effort spent in deputation work, but was due to a subconscious antipathy on the part of the individual for any thing that savored of churchiness, fostered by (a series of impressions which finally became dominant of) uninteresting hours spent in a church whose pastors had not advanced in the science of religion far enough to hold the individual interest.

COURSE IN RURAL JOURNALISM ESTABLISHED AT MASSACHUSETTS.

Rural journalism has been established as a major course in the Massachusetts Agricultural college, to begin in September. Training will be directed to the preparation of students for service upon agricultural papers, or country newspaper work and for correspondence to farm periodicals. The courses will be directed by Professor Robert W. Neal, who has had practical newspaper and magazine experience. "The warrant for such instruction," according to Professor Neal, "lies in the extreme importance of the farm journal and the country newspaper to country life. Agricultural colleges, in order to treat agriculture effectively, have found it necessary to deal with the economic and social interest of rural life. Hence the attention they pay to the churches and the schools are vital influences in country affairs. To omit the press as a powerful influence in the industry and life of the small community would be shortsighted."

SELF-PRESERVATION.

An Oklahoma editor was much interested in a scientific note he encountered in a New York paper to the effect that if the earth were flattened the sea would be two miles deep all over the world.

The editor reprinted the note with the following comment:

"If any man is caught flattening the earth, shoot him on the spot. There's a whole lot of us in this State that can't swim."

PROSPECTS HOPEFUL FOR SUCCESSFUL TRACK SEASON

But Ten Men Gone from Team of Last Year—Good Material in the Freshman Class this Year.

With 12 letter men from last year's winning team back, and with much good material in the entering class, the prospect for a successful track season is very bright. All the track events will be well taken care of by members of the 1914 team, and it will only be necessary to develop men for some of the field events.

Sellers, Smart and Riford will be missed in the sprints but it is expected that Ross, with the help of other new men will be able to strengthen these events. In the 440 yard run, Ward, the present record holder should be a winner, and Clark, Wentworth, Hadley and Tibbetts should prove formidable contenders in the half mile and mile runs.

The two mile run brings out the holder of the college record E. Sanborn and Gus Paulson, captain of last year's team, who electrified the guests at the Dartmouth Winter carnival this year by his sensational work on the skis. Reed, Fettec and Davis are three men who have already proved their worth in the hurdles.

The field men will need the most attention but there are some striking performers in college, especially in the jumps. Davis holds the record in the broad jump and Bartlett is a close second, Rollins, and Fettec are excellent high jumpers, while Bugbee and Huse form a strong nucleus for the weight events. There are many men in the freshman class who have excellent preparatory school records and they will help to strengthen the team in every branch.

ANNUAL ALUMNI BANQUET TO BE HELD IN BOSTON.

The Annual Banquet of the New Hampshire College Alumni Association will be held at Hotel Brunswick, Boston, on Saturday, April 10. Governor Spaulding and Dr. Fairchild will be among the speakers.

E. H. Wason '86 member of Congress elect and alumni trustee, will be toastmaster.

All alumni and their wives, all alumnae and their husbands, and any former students are invited to attend.

The secretary T. J. Laton, of Durham, N. H., will receive notices of intentions to attend.

The price will be \$1.75 a plate. The college orchestra and quartet will furnish music.

Professor Whoriskey addressed the Berlin Woman's Club, Monday afternoon, March 15, and the Berlin Men's Club in the evening.

The class in farm management under Ford S. Prince inspected the Hanson farm at Rockingham Junction last week.

PROF. O. L. ECKMAN ADVISES FARMERS TO RAISE HORSES.

Professor O. L. Eckman of the department of animal husbandry says that the automobile is not only not going to put the horse out of business, but that there are today more horses in the United States than there were 15 years ago when the auto was first coming into use, and that the average value of the horse is greater than at that time.

Professor Eckman strongly advises the New Hampshire farmer to raise horses. He should not undertake to go into horse raising as a business, but he should produce horses for his own use. A team costs from \$600 to \$700 and the New Hampshire farmer can raise horses cheaper than that. Moreover, he can make money selling his surplus to his less provident neighbors.

POOR DRAFT HORSES.
The farm horses in many sections of the state, says Professor Eckman, are exceedingly poor in quality. There is, he thinks, entirely too much of this low grade stock. What the farmers need are good, medium weight draft horses. Those now on hand are as a rule entirely too light while too heavy an animal is too clumsy. The ideal farm horse here is a draft type, of from 1300 to 1500 pounds weight.

For breeding purposes any good draft mare will do, but the sire should be pure bred. With a little care the horse raiser can have all his horses for work all the time, by having the foaling period come when there is least work on the farm for the horses.

Professor Eckman points out that the mare is as good a work animal as the gelding, and if used with judgment and not overworked when in a delicate condition, will be completely serviceable for farm work.

NEW PLANT TO HANDLE DR. RITTMAN'S INVENTIONS.

Secretary Lane announced recently that he had entered into a contract with private interests to build a \$150,000 plant to handle the invention of Dr. Walter G. Rittman of the Bureau of Mines—a process for the manufacture of gasoline, dyestuffs and explosives.

Secretary Lane, acting as trustee for the government has already applied for patents on Dr. Rittman's invention. Later he will announce details of the plan for utilizing it.

Dr. Rittman's invention is expected to cheapen the manufacture of a number of articles.

Professor Groves is to speak in Boston, May 14, before the New England Association of School Superintendents. His subject will be the Sub-Normal Child.

Kicking of the goal after a touchdown should be abolished is claimed by Dr. Charles Whelan, the Tufts coach. He says that there is no real science in it, there is no opposition, it is not exciting, and it has no place in football.

"Corn is Corn."

Very true, corn is corn—but we have pop corn, sweet corn, field corn and almost endless varieties of each.

So when you dismiss the subject of cleaning with the thought that all washing agents are the same, may you not be overlooking the possibility that they are not.

We guarantee that after you have used one barrel of

you will note a very great difference in the cleaning it does compared with the cleaning any other washing agent does you have ever used.

It differs both in being more efficient and more economical. Can you afford to pass it without a trial?
