PRICE 5 CENTS

TUFTS TEAM DEFEATS NEW HAMPSHIRE NINE

N. H. C. LOSES FIRST CONTEST OF THE SEASON BY 5-0.

CLOSE GAME DESPITE SCORE

Only Sharp Fielding Gives Medford Men a No Hit, No Run Game—Opponents All Veteran Players but Two.

Handicapped by having had less than a week of out-of-door practice New Hampshire's baseball team journeyed to Medford last Saturday and was defeated 5 to 0 by the strong Tufts College nine.

The score does not indicate the closeness of the game for it was only by sharp fielding that the Massachusetts team scored a no-hit, no-run game.

The Tufts team was composed, with the exception of two men, of veterans who made a sensational record last year, and had already had two to three weeks outdoor practice. Humiston pitched the entire game with the coolness of a veteran allowing not more than one hit in an inning. Tufts used three pitchers all of whom were in mid-season form.

Volk starred at the bat, getting two singles, and a two-bagger in four trips to the plate. Capt. 'Bernie' Lee and Carroll were the other stars for Tufts at the bat, Carroll being the old Holy Cross star catcher.

Brackett, Cram, and Irvine starred for New Hampshire in fielding.

FORD S. PRINCE PREPARES BULLETIN ON BETTER SILAGE.

A press bulletin on "Better Silage" by Ford S. Prince of the agronomy department, has been prepared and will soon be ready for distribution.

MUCH INTEREST TAKEN IN MODEL OF ELIZABETHAN THEATRE.

Since the printing of an article on the subject several weeks ago in "The New Hampshire" much interest has been shown in the model of an Elizabethan Theatre under construction in the wood shop. It has been suggested by some that an Elizabethan Theatre be built here. It would be a combination of the Globe, the Hope and the Fortune and could be used for commencement or any like occasion and to reproduce o plays.

SEVENTY ALUMNI ATTEND ANNUAL BANQUET AT HUB

Old New Hampshire Men Addressed by President Fairchild and Prof. Groves on Growth of College.

"I have not given up the Commons yet," said President Fairchild at the annual banquet of the Alumni Association Saturday night, April 10 at hotel Brunswick in Boston. "There are certain securities the college has that I hope may be turned into that building and if all our efforts fail to get it this year, we will get it two years from now just as sure as the two years roll around."

Seventy of the alumni attended the banquet and engaged in a social hour before it started. The three speakers of the evening were Governor Spaulding, Professor Groves and President Fairchild.

MESSAGE OF APPRECIATION.

The governor had a message of appreciation for the work of this college, and mentioned the duties and responsibilities that devolved upon it. He said that if it had not been for the great financial stress he believed that the college would have received the whole of the appropriation asked for.

Professor Groves told the alumni of the new spirit of hope and confidence that has been instilled into the faculty by the president. "When he came to us we were not very hopeful and did not have much to look forward to, but now he has instilled his enthusiasm into every one of us." Professor Groves also spoke of the friendly attitude which the high schools and academies of the state have toward us. This feeling has been growing stronger until now we are beginning to be looked upon as the higher authority of learning in the state.

"These two points have been the important factors in our rapid growth," says Professor Groves.

RESUME OF GROWTH.

President Fairchild gave a resume of the growth of the college in the last year and emphasized two points that he thought were the fundamental causes. He said, "The time has come when people are not satisfied with simple living. They want to know how to live and they turn to their state college for this higher education."

That they know about this college is due to the work of the faculty. Our extension work and lectures by the different members of the faculty all over the state advertise the college in a fine manner."

Music for the occasion was furnished by the N. H. C. quartet: Knight, Bugbee, Blake, and Dame and by Ward, Brogini, and Batchelor of the N. H. C. orchestra.

APPROPRIATION BILL NOW CERTAIN TO BECOME A LAW.

The bill appropriating \$178,000 for the college has passed the House and Senate and will soon become a law, as the governor is heartily in favor of its passage.

NOTICE.

Tomorrow night in the Gym, S. S. McClure will lecture on the subject: "The Making of a Magazine." This lecture was postponed some time ago, and constitutes one more number than was originally planned by the lecture course committee.

W. T. TAPLEY '16 ELECTED BASKETBALL MANAGER.

At a recent meeting of the Athletic Committee, W. T. Tapley '16 was elected basketball manager for the season of 1915-16. Mr. Tapley comes from Revere, Mass., and prepared at Revere High school. He played on his class baseball teams and was a member of the Hockey team.

Paramount Pictures at the Lyric Theatre every Monday, Wednesday and Friday.

CATALOGUE OFFERS TWO NEW COURSES

ONE IN EDUCATION AND ONE IN INDUSTRIAL MECHANICS

SHOWS AN ENROLLMENT OF 518

This a Gain of 25 Per Cent Over Last Year—Only Fifty From Outside the State—300 in Short Courses.

The new New Hampshire college catalogue shows a gain in students of more than 25% in one year. Last year there were 403, while this year the total is 518. The New Hampshire legislature has just appropriated funds for a new dormitory for men, and the new catalogue indicates that had it not done so, next year's class upon its arrival would have had nothing to do but to return again to its several homes.

TWO NEW COURSES.

The faculty of fifty members, owing to lack of funds, has not yet been increased, but a new department of education will mean a new professor for that subject at the opening of college next September. Five courses will be offered next year in this department, including History of Education, School Hygiene, Class Management, School Administration and Supervision, History and Theory of Industrial Education.

Perhaps the most important announcement in the new catalogue is that of the new two year course in industrial mechanics. This is to parallel the long successful two year course in agriculture and is aimed to do for the mill towns of the state what the agricultural course has done for the rural districts.

"This course" says the announcement, "will be offered to young men who are likely to enter the mills, factories and machine shops of the state; who will have to do with the practical problems of the telephone, gas engines, the application of water power, and other industries. It is not intended to establish a trade school in any sense, but it is hoped that the fundamental principles of mechanics, developed in a practical way, will be of direct benefit to the students who take these courses. It will be the endeavor to provide an opportunity for wage earners to improve their efficiency and thereby better their own and the community's well being."

"The course the first year will include instruction in the industrial application of electricity, in industrial physics, in mechanical drawing, in shop work, in practical mathematics and in English. The second year will include instruction in applied mechanics, in elementary machine design and in business economics."

ENTRANCE TO COURSE. Any New Hampshire youth 16 years old or older can take the course. He must have a knowledge of the ordinary subjects taught in the grade schools but there will be no examinations to pass before entering here. The applicant must however present a certificate of good moral character signed by some reliable citizen. A circular giving detailed information will soon be issued.

An idea of the rapid recent growth of the college is had by a comparison of the class figures. There are in the four year courses but 52 seniors, while there are 134 freshmen. There are in the entire 518 students but 50 from outside New Hampshire. Not included in the 581, are 300 other students who came here this winter for a one week course in agriculture.

LARGE ENROLLMENT IN BOYS' AND GIRLS' CLUBS FOR COMING YEAR.

At the present time 415 boys have been enrolled in clubs by the college extension department for the boys' club work of the coming season and 295 girls have entered canning clubs. This denotes that a healthy interest is being taken in the work throughout the state.

ROBERT J. MERRILL GIVES TALK TO ECONOMICS CLUB

State Insurance Commissioner Merrill Addresses Students on Work of State Insurance Office.

State Insurance Commissioner Robert J. Merrill was the guest of the Economics Club, Thursday evening. The club has recently been making a study of insurance and Mr. Merrill was invited to Durham to speak on the work of the state insurance office.

It is unfortunate that the work of this office is not more generally known about the state, for it exercises an influence that is far reaching and beneficial. No insurance company from outside the state can transact business within the state without having been licensed by the commissioner after he has investigated its financial condition. Every insurance agent must also be licensed before he may write any insurance for any company, and agents licenses may be, and frequently are, refused for sufficient reasons. Fees from these sources bring an annual revenue to the state of about \$20,000. The insurance features of our workmen's compensation law are also within the field of this department.

CLASSIFICATION ATTEMPTED.

More important than these more or less routine duties are the efforts that are being made by Mr. Merrill to cooperate with other states in an effort to arrive at a more scientific classification of insurance risks so that premiums paid for insurance on a given class of property may be more accurately determined in proportion to the risk involved. This is only one of a number of important problems which lie within this field and the state is fortunate to have in the commissioner's office so able a student of insurance as Mr. Merrill.

This meeting was the first of a series which the Economics Club plans to hold with representatives of various state departments. It is hoped that out of this will develop a closer relationship between the economic life of the state and the college.

LOCAL CHAPTER OF COMMONS CLUB INITIATED FIVE MEMBERS.

Last Monday night the Commons Club initiated the following candidates: Carl E. Crowley, 2 yr. '16, Ashland; George E. Evans, '17, East Kingston; Chester W. Gliddén, '17, Alton Bay; Edward Long, '17, Dover; Herbert A. Smith, 2 yr. '16, Hedding.

B. K. BAGHDIGIAN SPEAKS IN COSTUME AT Y. W. C. A. MEETING.

On April 15, the Y. W. C. A. meeting was addressed by Mr. Bagdasar Baghdigian, who appeared in a native Khurdish costume. Mr. Baghdigian gave a very interesting talk on Armenian and Khurdish customs, and told some of his own experiences in the terrible massacres of the late nineties, and of his life among the Khurds. "The continued sufferings of the Armenians are due," so the speaker said, "to the fact that they have long ago adopted the Christian religion and will not embrace any other kind."

GLEE CLUBS GIVE CONCERT-OPERA

PRODUCE GILBERT AND SULLIVAN'S "TRIAL BY JURY"

PARTS ALL CLEVERLY TAKEN

Judge Blake, Rather Partial However to Plaintiff and Bridesmaids—Sextette from Lucia di Lammermoor Sung.

The Glee Clubs recently lived up to all their advance notices in the splendid Concert and Entertainment presented in the gymnasium, last Wednesday evening.

The program was divided into two parts, the first part being given over to concert work entirely and the second part the rendering of Gilbert and Sullivan's famous comic opera "Trial By Jury."

The concert work of both clubs was very well rendered and reflected great credit on the instructor, Mr. W. M. Dalglish of Lawrence. The solos by Miss Julia A. Roberts of Toledo, Ohio, are especially worthy of mention as she has a very clear and sweet voice and her selections proved her ability. The quartet furnished the humorous element of the first part of the program and was well received. The climax of the first half was the rendering of the "Sextette from Lucia di Lammermoor!" "What From Vengeance."

"TRIAL BY JURY."

After a brief intermission the combined clubs proceeded to show the audience how the law courts of England are run or rather not run. Mr. Blake acted the part of judge to perfection but was rather partial to the bride and bridesmaids. Ralph Bugbee, manager of the club, proved that it was no easy job to keep "Silence in court," while D. W. Libby poured forth his eloquent appeal to free the charming bride, Miss Nellie White from the clutches of the Knight. Poor Ralph Dame was full of joy and rapture but had no active voice in the final disposition of the case. Every one decided that the defendant was a snob and the judge a good judge too and all felt repaid for the money and time spent.

THE PROGRAM.

Voi Vode	Becker
Bright Star Of Love	Robandi
Vira	Riker
Pastoral	Stewart
(a) Little Pink Rose	Bond
(b) At Dawning	Cadman

When The Roses Bloom	Reichardt
What From Vengeance	Donnizetti
Trial by Jury.	

Judge	E. L. Blake
Plaintiff	Miss N. White
Counsel for Plaintiff	D. W. Libby
Defendant	R. A. Knight
Foreman of Jury	R. L. Dame
Usher	R. J. Bugbee

A. J. GRANT REPLACES R. J. BUGBEE IN "MICE AND MEN."

A change has been made in the cast for "Mice and Men." The part of Sir Harry Trumble-Stone is to be taken by Arnold J. Grant instead of by R. J. Bugbee.

New Hampshire college, which was one of the first in the United States to send money and an expression of sympathy to the King and Queen of the Belgians, is now gratified by the receipt of an acknowledgement from King Albert.

The letter written by the king's secretary is as follows:

February 3, 1915.

Dear Sirs:

The King has read the kind letter which you have sent to him. Profoundly moved by your gracious action His Majesty thanks you very deeply and begs you to impart his grateful sentiments to all those associated with you in your kindness.

The Secretary.

The contribution of this college to the Belgian relief was made as the result of the suggestion of Professor Willard J. Fisher. The letter which accompanied the contribution was bound in vellum and fastened with ribbons of the college colors. It was signed by members of the aculty and students.

The reply of the king will probably be framed and kept in the college library as a souvenir of the great war.

The New Hampshire.

NOTICE.

On account of the spring recess the next issue of The New Hampshire will not be published until May 7.

THE INFORMAL.

From a number of points of view our informals have for some time past been unsatisfactory. A comparatively small number of the more socially inclined of our undergraduates have attended and by the system in vogue have divided themselves into cliques by making out their programs before the dance. This is admittedly not a desirable situation. These social gatherings should extend our friendships among the undergraduates and the faculty. A few of the latter have been kind enough to attend but their reception has been anything but cordial. Therefore realizing that under the present system our informals are not representative of the institution, it seems to be most fitting and proper that a change should at least be tried. The plans as outlined below are to be tried at our next informal which will come this evening. Every undergraduate is earnestly asked to co-operate and his or her attendance is earnestly solicited.

THE DANCE PROGRAM:

One of the basic faults of our present system is the dance program and from a number of points of view its elimination seems desirable. Dances will be announced just previous to their beginning by the leader of the orchestra. Without programs the cliques will be broken up to a large extent and make the dance more enjoyable to the greatest number. In addition to this there is the important consideration of the widening of our acquaintance which would be materially benefited by this system. The dancing will also be really informal as the name of our dance implies. The elimination of the dance order is a most vital point in the success of the new plan and it is earnestly urged that no one make out a program either written or verbal.

The Cooperation of the Faculty.
Another most apparent weakness of the old system is in the faculty representation and few have braved the frigidly. They were particularly fortunate if more than half a dozen spoke to them, and as far as dancing with them was concerned it was practically unheard of. The advantages of having a large representation of the faculty at each informal cannot be questioned. It would afford us a most excellent opportunity to become acquainted with our professors and instructors outside of the class room. This advantage would be mutual. To our very much needed college spirit this would act as a spring tonic as it would tend to produce an opportunity where ideas and points of view would be exchanged with freedom between faculty and students. Nothing but good can come out of a unified faculty and student body each sympathetic of each other's wants and needs. So it cannot be too strongly urged that each and every undergraduate be present tonight and at least meet and say a few words to the faculty present. We surely want them

to attend the informals, so let's see to it that they enjoy themselves.

MUSIC:

The orchestra will render popular airs during the evening singing the choruses and everyone is asked to join. College and old folk songs will also be a part of the program and in order that this may be successful it is important that everybody should sing.

These plans as outlined above are not the ideas of one person but of a group of persons representative of the institution as a whole. They have been very carefully considered in every detail and while they are not perfect it is hoped that they will prove satisfactory. "Don't knock—boost!" and this new system can't be anything else but a great success. A special effort is being made to have large delegations of the faculty present. Let us have our informals in the future more representative of the whole college and accomplish the greatest good for the greatest number.

The uninitiated, judging from the appearance of some of the class rooms, might think that the tse-tse fly is present in Durham. We know, however, that it is poor ventilation which causes most of the prevailing somnolence. Why not leave the windows of the class rooms open more of the time while there are no classes in session. That would go far toward relieving that dried and musty smell of a dead chalky atmosphere.

When we visit West Point or Culver Academy or any other place of the sort, the trim, trig and generally natty appearance of the cadets is the object of our wonder and admiration. And yet, in those places the uniforms are worn all the time. Isn't it possible that our slovenly way of wearing our uniforms disgusts the visitors to New Hampshire college?

The Tennis Association has opened a new field for a new set of men to work in. These who are really interested in tennis should get into the game and make the Association an efficient working organization. Intercollegiate tennis of the same caliber as the last winter's skiing is our immediate goal.

If it is possible to obtain drinking water, the bubblers in the "Gym" should be put in working order at once. A gymnasium without water is like an automobile without gasoline.

It is said that we are all to be "kidded" more or less in the new Granite. Wonder what they've got on me!

A too brilliant man only makes the day seem darker for the rest of us.

N. H. C. AGRICULTURAL CLUB TO BE REPRESENTED AT AMHERST.

The annual meeting of the New England Federation of Agricultural Students will be held tomorrow at Amherst, Mass. Among the matters which will be under discussion will be rules and plans for a proposed Poultry Contest which will be opened to teams representing the six New England State Colleges. If it is deemed advisable to hold such a contest, it will be held undoubtedly at the Boston Annual Poultry show next January.

W. J. Nelson '16 represents the New Hampshire College Agricultural Club at this meeting.

POULTRY DEPARTMENT HAS TWO NEW COLONY HOUSES.

Two new colony houses have been added to the equipment of the poultry department. They have been moved recently to a place on the east side of the railroad track near the plum orchards. The floor dimensions of these houses are 8 feet by 12 feet and the roofs are of the gable type. One house is to be used as a brooder and is equipped with a coal stove outfit which will furnish ample heat for the chicks.

J. A. PURINGTON '16 AND R. E. DEARTH '15 TALK TO AGGIE CLUB.

At the regular meeting of the Agricultural Club last Monday evening, the members present were entertained by a talk on the "Foot and Mouth Disease," by R. E. Dearth '15 and a talk on "Uncle Sam's New Crop—Sudan Grass," by J. A. Purington '16.

H. T. Dennison, 2 yr, 1916, is ill with rheumatic fever at the home of Prof. F. W. Taylor.

The Women's League has engaged the college orchestra for "Mice and Men."

R. A. KNIGHT, '15 ELECTED PRESIDENT OF NEW CLUB

Tennis Enthusiasts Form Organization—Tournament to Decide Team to Play Against Connecticut.

On Wednesday, April 7, the tennis enthusiasts of the college met and organized a tennis club. The election of officers was as follows: President, R. A. Knight, '15, Vice-president, J. F. Hobbs, Secretary-treasurer, H. A. Steele, '16. A committee consisting of J. F. Thompson, '15, F. J. Hobbs, '15 and M. H. Brill, '18 was appointed to draw up a constitution. A tournament committee consisting of W. J. Nelson, '16, E. L. Blake, '16, and W. F. Farker, '15 was appointed to make arrangements for a tournament. In a recent issue of The New Hampshire it was stated that the tennis management of Connecticut Agricultural college wanted to secure a game with a representative team from New Hampshire college. The tournament will be held to determine the championship of the college, both in singles and doubles, and the winners will be sent by the club to Connecticut. The tournament will begin immediately after spring vacation. The tournament committee is planning to have the semi-finals played off during House Party week if possible.

BAGHDIGIAN REPORTS ON LAST YEAR'S NORTHFIELD CONFERENCE.

At the N. H. C. C. A. meeting Sunday afternoon, Mr. B. K. Baghdigian gave an interesting report of last year's Northfield conference, describing the courses of Bible and mission study, athletics, patriotic celebration, and Round-top and platform meetings. He was enthusiastic over the mutual benefits derived from an interchange of ideas by delegates from not only the principal colleges of this country but also students from all parts of the world. One comes in close contact with the leaders of social and religious movements in the study group, at informal talks, and by personal interview. This makes the conference a potent educational factor, and the impressions gotten by the delegates are lasting.

Mr. Baghdigian regretted that in the program over emphasis was given the foreign field. He suggested that in sending a delegation to the conference they should be instructed to take courses in home problems and thereby derive immediate benefit.

It was a noticeable fact that most of the delegations had as leaders either their graduate secretary or a member of the faculty. A lot of embarrassment and misdirected effort is thus saved by having an experienced person in charge.

FIFTY CANDIDATES REPORT TO COACH BLANCHARD FOR PRACTICE.

The real training for the track team started last Monday with the advent of Coach Blanchard. About fifty candidates appeared in suits and there is some very good material among them. Before going out for practice the coach gave a short talk regarding the policy which would be followed this season. Among other things he gave the men to understand that any infringement of the training rules would not be tolerated a minute. In order to give the men his best attention, Mr. Blanchard arranged the following schedule:

The sprinters are to report at 4.15 P. M., the distance men at 4.45, and the candidates for the field events at 5 o'clock.

MRS. DEMERITT GIVES TEA IN HONOR OF MISS BARROWS

On Saturday from 4 to 6 a delightful tea was given in Ballard Hall by Mrs. Elizabeth P. Demeritt in honor of Miss Katherine Barrows of Berkeley, California. Miss Barrows, Mrs. Barrows and Miss Elena Barrows spent four days in Durham as the guests of Dr. A. E. Richards and had the pleasure of meeting the faculty and ladies and many of the girl students. Accustomed to college life and Co-Education of Oberlin college and the University of California, the visitors were greatly interested in the undergraduate work at New Hampshire and enjoyed it all. On Sunday an auto ride was taken to York Beach, a resort which Mrs. Barrows last saw some thirty years ago, when she lived in Lawrence, Mass., where her husband had his first pastorate. On Tuesday, Dr. Richards' guests returned to New York.

Desks! Desks!

The Survival of the Fittest

Tried in the furnace of competition and subjected to the test of years of practical use on nearly 2,000,000 farms the world over, the De Laval has proved its overwhelming superiority to all other cream separators.

Twenty years ago there were as many makes of factory as of farm separators, but for the past ten years the De Laval has had this field almost to itself, 98 per cent of the cream separators in use by creamerymen and market milk dealers to-day being of the De Laval make.

It has taken the inexperienced farmer a little longer to sort the true from the untrue, the wheat from the chaff, in the maze of confictory catalog and local dealer separator claims, but year by year the ever-increasing proportion of farm separator buyers is reaching the same conclusion as the creameryman—that the De Laval is the only cream separator they can afford to buy or use.

Many other cream separators have

come into the limelight of publicity for a few short months or a few short years, claiming to be "as good as" or "cheaper" than the De Laval, but their users have sooner or later found them lacking in some one respect or another, and even where a few have seemingly done well their users have come to learn that the De Laval was a still better machine.

The unfit or the less fit cannot possibly survive for long in separators or anything else. Think of all the separators you used to see advertised so extravagantly in your favorite farm papers? Where are they now? Why do you seldom, if at all, see their names mentioned? Simply because the fittest must survive and the others must fall out of the race.

The De Laval has triumphed over all other separators, and its supremacy is now almost as firmly established in farm as in factory separators because its separating system, design and construction are essentially different from and superior to other separators.

Spring and Summer Clothing

The most important factor in the matter of dress is the FEELING that your clothes are up to date, that they are properly tailored. Style is also a most important element in a spring suit—the Spring Suit is more closely observed than that of any other season.

Adler-Rochester

Suits always look well—they always hold their shape. They combine style, beautiful tailoring, perfect fitting and long wear—that's why they excel. And they are distinct and individual. Today is the day to make your selection—the assortment is now complete.

MARRIAGE OF W. MASON, '97 TO MISS BARTLETT, '87

Morrison, '10 Visits Durham in Quest of Teachers—Lane, '13 at Akron—Corson, '10 Attends Meeting at New Orleans

Woodruff Mason, '97 was recently married to Miss Carrie A. Bartlett, '97 and they are now residing in Lee. Mr. Mason is a brother to Erskine Mason, '93 the donor of the Erskine Mason Memorial Prize. The latter's sister married Albert Kingsbury, the first Professor of Mechanical Engineering at New Hampshire. Mr. Kingsbury is now Chief Engineer for the Westinghouse company at Pittsburg, Pa.

L. D. Hayes, '97, is Assistant Professor of Machine Design in Sibley College of Cornell University. This is his fifth year in this position. He is assisted by five instructors as there are 250 students taking his courses.

C. E. Clement, '06, has been employed, during the last two years, in market milk work of the dairy department of the Bureau of Animal Industry, Washington, D. C. His principal work, at present is in cooperation with the city milk dealers in all the large cities, along the lines of milk plant economics. He is also engaged in dairy farm inspection work along the lines of sanitation.

Lieutenant Charles A. Hunt, '01, formerly commandant here, is in camp at Douglas, Arizona with his regiment, the 22nd Infantry.

P. L. Crosby '12 has had several of his cartoons appear in "Life."

L. S. Morrison '10, visited Durham recently and offered some teaching positions to seniors intending to take up that work. Mr. Morrison is Superintendent of Schools around Wilton and has the distinction of being the youngest Superintendent of Schools in the state.

G. A. Lane, '13 is with the Philadelphia Rubber Works, Company, of Akron, Ohio. This is the largest rubber reclaiming works in the world. "Gib" is positive that he has seen several of Pa Taylor's discarded Ford tires there in the process of being reclaimed.

A. L. Richmond, '13, is Chief Operator for the Northern Ohio Traction and Light Co., which operates interurban railroads through Akron and Canton to Cleveland, N. D. Paine, '13, is an assistant to Mr. Richmond.

H. P. Corson, '10, chemist for the Illinois State Water Survey at Urbana, Illinois, attended the meeting of the American Chemical Society at New Orleans, Louisiana, March 31 to April 3.

O. D. Goodwin, '09, finished the Student's Engineering Course with the General Electric Co., at Lynn, Mass., in December 1911 and since that time, he has been employed in the Turbine Engineering Department with the same company, his work being confined to the generator end of the Turbine Generator department.

D. F. Smalley, '08 and H. D. Waler, '08 are in the Stationary Motor Engineering department of the General Electric Co., at Lynn, and H. H. Calderwood, '01 and W. N. Shipley, '00, are on production work in the Turbine department.

J. J. O'Connor, '08 is assistant superintendent of the River Works Plant of this company.

Fred W. Morse, Dartmouth 1913, son of Professor Morse former chemist at N. H. C., and former state chemist, was recently a visitor at Mrs. Morgan's.

MR. AND MRS. SILAS JENKINS OBSERVE GOLDEN WEDDING.

Mr. and Mrs. Silas Jenkins observed their golden wedding April 10 with a reception in their home on Main street, Durham. They have lived in Durham since 1871, coming from Greenland to this place. Born in 1840, Mr. Jenkins served gallantly in the Civil War in Co. D, First Massachusetts Heavy Artillery. Mrs. Jenkins was formerly Miss Anna M. Watson of Tamworth. Two married daughters are living at the present time, Mrs. T. W. Schoonmaker of Durham, and Mrs. W. E. Nason of Exeter.

F. W. TAYLOR SUPERVISES ANNUAL SPRING SEED TESTS

Work Done to Protect Farmers and Seedsmen—Requirements of Laws—Results of Tests Important.

The usual spring grass and grain seed tests conducted under the supervision of F. W. Taylor of the agronomy department for the benefit of the farmers and seedsmen of the state are now in full swing. The statutes of New Hampshire provide that all seeds in bulk or packages of one pound or more must be tested each spring to determine their purity and ability to germinate. Dealers are required to send in samples under penalty of a fine of not more than \$100 for the first offence and \$200 for the second, but the penalty has not been enforced, the state sending a man around instead to collect samples from different towns.

The work began this week and about thirty samples have already been tested, the number usually examined is about 150.

METHODS OF SEED TESTING.

In testing for purity a certain weight of the seed is taken, depending on the kind and soil, and the pure seed is separated out, also the domestic grass seeds, weed seeds, and the foreign or inert matter. The weight of each is taken and reduced to a per cent basis. The domestic grass and weed seeds are then identified. In the germination test duplicate samples are taken of 100 seeds. These are kept moist in a special apparatus and the average of those which grow constitutes the per cent of vitality.

WEED SEEDS PLENTIFUL.

The tests usually show few adulterations, but often show the presence of large quantities of noxious weed seeds, a source of trouble to the unsuspecting purchaser. Sometimes the seeds are treated in such a manner as to destroy their vitality, as in the sulphuring of oats for the purpose of bleaching them. Oats of this kind have tested as low as 5% in a germination test.

A PSYCHOLOGICAL DREAM OF OUR HYPOTHETICAL BLEACHERS.

Last night as I lay sleeping,
There came a dream so queer,
I saw some things about me
That ought, but are not here.

I saw our brand new bleachers
Arranged about the field,
And the bumpy baseball diamond
Was smooth as a flatboat's keel.

The students of our college
Were cheering with their might
Although they might be losing
They still kept up the fight.

And the dream was ended
As all such fancies should
And I awoke for classes
Willing to do what I could.

To boost New Hampshire spirit
As every one should do
If we want the world to honor
The dear old white and blue.

Better Sanitary Conditions.

A growing demand is seen everywhere among dairies, creameries, and city milk plants for better sanitary conditions. This discontinuing of soap and soap powders, and the banishing of their greasy films and soapy odors from the dairy by the use of the modern

Wyandotte
Dairyman's
Cleaner and Cleanser

has proved a most satisfactory change for sanitary betterment.

Since Wyandotte Dairyman's Cleaner and Cleanser is free from soapy properties and since it contains only cleansing and sweetening agents it is no effort to maintain the dairy in a delightfully sanitary condition. Because of its local cleansing nature Wyandotte Dairyman's Cleaner and Cleanser is recommended by all Food and Health Inspectors.

If you are not acquainted with Wyandotte Dairyman's Cleaner and Cleanser and what it is doing to better sanitary conditions why not then give it a trial, and if not all we say the trial will cost you nothing.

CHRISTIAN ASSOCIATION HAS DELEGATES AT EXETER

John R. Mott, Field Secretary of International Committee of the Y. M. C. A. Speaks at Exeter.

Without doubt the greatest campaign of its sort ever held in a New Hampshire school was the one just ended at Phillips-Exeter academy. The delegation of big men who visited the school the latter part of last week was led by John R. Mott, known all over the world as a leader of students. Mr. Mott is field secretary of the International Committee of the Y. M. C. A., and his exceptional ability, wide experience and attractive personality are responsible for his being in greater demand as a speaker to students than any other man living. He has addressed and held private conferences with students in almost every country of the world, and in all places his visits have been productive of great results. Resident Wilson has said of him "Certainly one of the most nobly useful men in the world. I have the greatest admiration for him and the most profound confidence in his extraordinary character and abilities."

Although the campaign at Exeter was primarily for men of that school there were forty men from throughout the state who were especially invited to be present. Among this number were six men from New Hampshire.

MEN OF NATIONAL FAME.

With Mr. Mott were other men of national reputation including Dr. Laycock of Dartmouth College, David R. Forter and Francis Miller, Student secretaries of the International Committee Y. M. C. A., and H. B. Watson and F. B. Freeman, State Secretaries New Hampshire Y. M. C. A.

The campaign opened with an address by Mr. Mott on Friday evening. He wasted no time on introductory remarks but plunged right into the subject on which he intended to speak. He enumerated the school and college man's temptations, as being impurity, hypocrisy, intellectual pride, indifference to moral and spiritual life and selfishness.

Saturday morning while the academy was in session the men from other places met with some of the leaders and received great benefit from hearing Dr. Laycock on "A man's relation to his Bible," Mr. David Porter on "Essentials to Voluntary Work," and Mr. Francis Miller on "Personal Work."

VICTORY OVER TEMPTATION.

During the hours between the conference sessions many of the fellows had personal talks with Mr. Mott and the other men. On Saturday evening Mr. Mott spoke again telling of some of his experiences in Christian work.

The delegates from New Hampshire were Raymond Bowden, '15, Dura Crockett, '16, Roy Graham, '17, Ralph Dame, '18 and Willard Allen, '18. The fellows all report a very enjoyable and profitable time.

Y. W. C. A. GIRLS ATTEND CONVENTION IN PORTLAND

Largest Gathering of its Kind Ever Held in New England—Ten Delegates From N. H. C.

The largest Y. W. C. A. convention New England has ever seen was held at Portland, Me., from April 9 to 11. Over twelve hundred girls swarmed the city during that time. Every county in the state responded to the roll call by counties which was one of the interesting numbers of Friday evening programs. The proximity of New Hampshire college gave the Y. W. C. A. the opportunity of sending ten delegates to this inspiring convention. Those who attended were Misses Nettie Finley, Helen Plumer, Bernice Reed, Beatrice Reed, Josephine Brackett, Gladys Brown, Florence Harris, Louise Burpee, Irene Huse and Helen Weston. These delegates had the privilege of hearing some of the best speakers and workers in the National Field of the Y. W. C. A. as the following program shows.

FRIDAY EVENING.
Friday evening: Greetings. The principal speakers of the evening were Mrs. Deborah Knox, and Miss Gertrude MacArthur. Saturday morning, Rev. Plinette Allen, Dr. Caroline Colvin, and Miss Margaret Glenniker addressed the students from colleges and normal schools.

Saturday afternoon was spent in sight seeing and teas given in various homes for various groups of delegates.

At 5.39 every one gathered at City Hall steps for a conference picture. From there the delegates proceeded to the auditorium, where supper was served which was followed by "stunts." The following taken from the Portland paper shows that the stunt of the New Hampshire girls took as well as any.

STUNTS.
"A group of girls from New Hampshire College, under the direction of one of the most energetic and forceful young ladies of the entire lot enacted the tragedy of Pyramus and Thisbe with the aid of some placards by means of which people could tell a wall from a lion both being impersonated by girls."

The stunts were followed by an organ recital on Portland's famous organ.

Sunday morning the girls attended various churches in the city.

Sunday afternoon delegates were guests of the Municipal Music Commission. The concert was followed by speakers, the most important of whom was Dr. Raymond Calkins.

The conference motto was: "I am come that they might have life and that they might have it more abundantly."

The student council committee to raise funds for bleachers acknowledges the receipt of \$4.00 from E. D. Hardy, class '06; \$2.00 from J. H. Nixon two year, '03, and 25 cents from E. C. Thompson, '84.

MOVABLE SCHOOLS PROVE POPULAR WITH FARMERS

Work of Past Winter Carried on Successfully in Seven Counties—Attendance Totals 3,417.

During the past winter thirteen movable schools were held in seven counties. Many more requests were received but due to the limited number of extension men available for this work it was impossible to supply the full demand. Three sessions per day, morning, afternoon and evening, were held at the first schools, but later it was found more satisfactory to have only two evening meetings at each place. It is rather difficult to determine the total number reached, but certainly over 1,000 people were addressed at the various schools. In the thirteen schools there were ninety-eight sessions with a total attendance of 3,417, or an average attendance per session of about thirty-five.

Three types of schools were held: two Dairy Schools, two Orchard Schools, and nine Soils, Fertilizer and Crops Schools. A certain amount of soil fertility work was given in every school, and in some of the Soils, Fertilizer and Crops Schools, a few lectures on dairying, horticulture and poultry were given.

VALUE OF WORK.

The movable school has proven to be one of the most important and effective branches of extension work. It has been gradually evolved from an occasional lecture by some member of the Station Staff to a carefully prepared course of lectures and demonstrations suited to the type of farming and the needs of the community where it is held. The school opens the way for other forms of extension also work such as field demonstrations, which are made possible by the close co-operation of progressive farmers with the extension service.

HELP MAKE THE LAST MEETING OF THE YEAR THE BEST.

President Fairchild is expected to address the college Christian Association at 5 o'clock next Sunday afternoon in Thompson Hall. This will be the last meeting of the year and a rousing attendance is desired. The meeting will be a joint one with the Women's Christian Association. If each does his or her part this may be made the best and most helpful meeting of the year.

MERRIMACK VALLEY COW TEST ASSOCIATION IS FORMED.

At a meeting held April 12 in Haverhill, Mass., a new cow testing association was formed. Atkinson, N. H., is to be included in the territory covered. The official title of the organization is to be the Merrimack Valley Cow Test Association. The officers are: president, H. N. Sawyer; vice president, Everett Poor; secretary-treasurer, Milton A. Corliss.
