PRICE 5 CENTS

N. H. TEAM DEFEATS CONNECTICUT AGGIES

SUCCESS RESULT OF FAST CLEAN PLAYING.

MEN GIVE WESLEYAN SCARE

First Score 25-23, Second, 34-21—Outcome of Trip Highly Creditable to Team—Coach Pleased with Work.

New Hampshire won last Friday from Connecticut "Aggies" at Storrs, Conn., by a score of 25-23. The game was marked by the fast clean playing of New Hampshire. At the end of the first half Connecticut was in the lead by a score of 13-11, but in the second period New Hampshire came back strong and before the final whistle blew had clinched the game. Following is the line-up:

N. H.	Connecticut.
Sanborn, rf	Dickinson (capt.) rf
Prentiss, Torrey lf	Shea lf
Steele, c	Norton c
Bissell (capt.) rg	Davis lg
Brown lg	Barlow rg

The score: New Hampshire 25, Connecticut 23. Goals from floor, Sanborn 2, Prentiss 4, Steele 3, Bissell 2, Shea 4, Norton 3, Davis 2. Goals from fouls, Bissell 3, Dickinson 4, Shea 1. Referee Aspinwall, Springfield Y. M. C. A. College. Scorers, Atkins, Tapley. Timers Newton, Tapley. Time 20-minute halves.

WESLEYAN GAME.

On Saturday New Hampshire lost to Wesleyan University at Middletown, Conn., by a score of 34-21. This game, like that at Storrs, was marked by clean play and, while New Hampshire lost, the game was a credit to the losers. The individual stars were Captain Bissell of New Hampshire and Captain Harmon of Wesleyan. Following is the line-up:

N. H.	Wesleyan.
Sanborn rf	Hoffman rf
Prentiss lf	Harmon (capt.) lf
Steele c	Pitt c
Bissell (capt.) rg	Chapin, Still, lg
Brown lg	Timmerman rg

The score: Wesleyan 34, New Hampshire 21. Goals from floor, Sanborn 3, Prentiss 2, Steele 3, Harmon 5, Hoffman 3, Pitt 5, Chapin. Goals from fouls, Bissell 5, Harmon 6. Referee, Ledue, Colgate. Scorers, Slocum, Tapley. Timers, Keenan, Tapley. Time, 20-minute halves.

COMMENTS.

Coach Cowell seems pleased with the showing the team made. He said regarding the Connecticut game. "It was easily ours until the last few minutes. Moreover both teams played exceptionally clean. New Hampshire made only 19 fouls on the trip. At Wesleyan we gave them the surprise of their lives playing close and fast. Wesleyan won only on long shots; without these New Hampshire would easily have won. Both officials and the Wesleyan coach said at the end of the game that it was one of the fastest and cleanest games they had seen in years. This is a great boost for New Hampshire basketball. Considering the new style of basketball introduced this year the showing was exceptionally fine and prospects are very bright. With a couple more weeks the team will take on a lot more polish."

Manager Tapley commented on the clean playing of both teams and said both games were "corkers."

TWO DOVER PASTORS SPEAK AT CONVOCATION EXERCISES.

Wednesday, January 5, the Rev. Leon Morse of Dover spoke in chapel on the folly of accepting the second best in our aims and ideals.

Wednesday, January 12, the Rev. John Chapin of Dover spoke in chapel on appreciation. He urged the appreciation of the worth-while little things as an aid to happiness and contentment.

—The schedule of subjects for next semester has passed the faculty and is now in Demeritt Hall library awaiting final corrections.

LIBERAL POLICY FOR LIBERAL ARTS CLUB

Anyone May Join Club—Does Away with the Need of Smaller and More Specialized Groups.

In accordance with the constitution and the meeting at which it was adopted the organization of the Liberal Arts Club has been completed, and a part of its policy decided on. The object of the club has been already stated as the stimulation of interests in arts and science topics. Notice that it reads arts and science topics, and not Arts and Science Subjects, as taught in the Arts and Science course. The club is to be for the benefit of all students and to fill certain needs and opportunities now denied to a part or the whole of the student body. There has been a popular misconception that it was to be an Arts and Science club in the same way that the Engineering society is for engineers or the Agricultural club for agriculturists. This is in no sense to be the policy of the club. It is rather to be a College Club where every one may meet on a level and discuss politics, economics, national or social problems, the war and its many phases, problems of college life and things of general interest to students. This should be of particular interest to students in the Arts and Science Division, as it falls in line with some one or more of the subjects in that division. But it should be of particular interest to Engineer and Agriculturists also. Topics of this nature, to a limited extent, should be the part of the equipment of every college man. This is what makes for a part of the difference between citizens of a community and scientists. Without this there is a tendency for ones life to become specialized and narrow, thereby making him an expert in his specialty, but not a man. After all is not our biggest specialty in living, and getting all that is possible out of living, not merely dollars and cents, but the ability to seek real joy rather than pleasure, and be subjective minded, rather than objective minded? M. I. T. has admitted that although they have trained engineers, they have failed to train men. Darwin admitted before he died that his greatest sorrow was that he had lost the love of poetry.

BROADENING INFLUENCE.

While New Hampshire College may not be in a position analogous to this, nevertheless if one is observant, he will notice that among our scientific students, without reference to any particular course, that there is a slight tendency that way in our interests. As a rule we are not well enough read on general matters. The reply is immediately made, that the subject matter of science requires all possible time that can be given to it and no time is left for the so-called humanities. This is most emphatically true and it was in recognition of this that the policy of the Liberal Arts Club was so broadened that these people may have an opportunity to come and listen to a debate, paper or discussion, or open forum, and join in if they desire without taking the time required to prepare for or study for the same purpose outside of the club.

ALL BRANCHES OF THE ARTS.

An editorial appeared in the New Hampshire two years ago, entitled "Conservative New Hampshire." Its purpose was to start organization of college life and to establish centres of interest in all lines of thought in which we are interested or specializing. Its purpose has now been attained. We have many clubs here, all that we need, and yet other colleges have more. But we do not need any more. There is a special club for all the specialties. Opportunity will be given in the Liberal Arts Club for debating as has been shown already, thereby removing the necessity for Debating Club. It will serve as a Sociology Club, Fine Arts Club, Political Club of any denomination, or any other such club as may occur to it or be suggested. Contests of several kinds may be carried on. Problems or movements of any character may be discussed or propagated.

FIELD CROPS CONTEST AGAIN WON BY N. H. C.

ANOTHER SILVER TROPHY CUP ADDED TO OUR COLLECTION.

THIRD CONSECUTIVE VICTORY

W. H. Thomas, '17 is High Man—Nichols and Johnson Next Highest Surpassed Only by Scribner of Maine.

Another silver trophy cup has been added to the collection in Morrill Hall by the Field Crops Judging team representing New Hampshire College at the Massachusetts Corn and Apple Show held in Boston, January 7, in Horticultural hall under the auspices of the New England Association of Agronomists.

SWEEPING VICTORY.

The New Hampshire team members made three of the four highest individual scores, which shows how sweeping the victory was. W. H. Thomas, '17 of Franconia, was high man with a score of 91 per cent, winning a silver individual cup. The second individual cup went to Scribner of Maine, while E. B. Nichols, '17, of Newton and S. G. Johnson, '16 of Winchester were placed third and fourth respectively. Teams were entered by the University of Maine the Massachusetts Agricultural College, and the Connecticut State College, which finished in the order named.

The contestants were required to place five 10 ear samples of flint corn in order of superiority, also five single ears. Five peck samples of potatoes and five plates containing seven samples each were also placed. Then 25 samples of forage crop seeds had to be identified, after which the ingredients of five seed mixtures were separated out and named.

THIRD CONSECUTIVE WIN.

This is the third time the contest has been held and New Hampshire has won the silver trophy cup at them all. The first contest was in 1910 when the team won not only the cup but two of the three individual medals. In 1914 the cup was won but no individual prizes offered. This year but .6 of one per cent increase would have won the second place individual cup as well as the cup for first individual and the trophy. The margin in points is greater for this year's contest than it was last year, it being won by 63 points, against 14 points in the team's total for last year.

Too much credit cannot be given Professor S. Prince of the Agronomy department, who was the coach of last year's winning team as well as this year's, for the thorough training the teams have received.

JUNIOR PROM TO BE HELD DURING SECOND WEEK IN MAY.

At the faculty meeting last Monday it was voted to grant the petition for a Junior Prom, to be held the second week in May and to extend from Thursday afternoon through to Sunday afternoon.

YULING G. KEY, '15 MARRIED OCT. 20 IN SOO CHOW, CHINA.

Raymond Smart, '14, of Dover, received a letter recently, announcing the marriage in Soo Chow, China of Yuling G. Key, '15. The event took place October 20, and "Jake," spent the honeymoon with his Chinese bride in Shanghai, his former home. He was graduated from the Electrical Engineering course last June, is a member of the Theta Chi fraternity, and has many warm friends in Durham. He is at present representing an electrical supply house, although there is open to him a position in the Chinese government service, should he desire to take up that work.

GIVE NEW YEAR'S RECEPTION TO OFFICERS OF REGIMENT.

Lieutenant and Mrs. S. J. Sutherland continued the pleasant custom which they started here last year by giving a New Year's reception at their home to the officers of the college regiment at 4 o'clock, January 4. A full attendance was the result and a most pleasant afternoon spent. Refreshments were served.

ARRANGEMENTS FOR SERIES OF FREE ENTERTAINMENTS

To Consist of Moving Pictures of Educational Value—First to Come Next Tuesday Evening.

Through the efforts of President Fairchild a series of free entertainments, coming at different intervals, are to be offered the members of New Hampshire College, as a step toward giving them social opportunities for relaxation and improvement of the mind. The first of these is to come next Tuesday evening, January 18, at 7.30 in the gymnasium.

These entertainments will consist of moving pictures of an educational character. Although these entertainments are provided primarily for the benefit of the student body, the members of the faculty and their families and anyone interested, are cordially invited to be present.

FIVE FILMS.

The following reels will be shown on Tuesday evening:

- 1—A Knife of Fire; Liquid Air.
- 2—Birth of a Flower; Culture of the Dahlia.
- 3—Glimpse of Yellowstone Park.
- 4—The Octopus; The Cuttlefish.
- 5—Life and Evolution of the Silk Worm; The Alantus Silk Worm.

The Engineering Division will furnish and operate the moving picture machine and have charge of the entire series of entertainments.

PRESIDENT FAIRCHILD TAKING LONG DEFERRED VACATION.

President Fairchild has found it necessary to take an extended vacation of some two months. His strenuous work for the college during the past months and the fact that he has not had a vacation for nearly a year and a half makes the rest period very acceptable. At present he is in Aikon, South Carolina.

STUDENTS' LECTURE COURSE TICKETS FOR STUDENTS ONLY.

A misunderstanding has arisen about the use of season tickets to the various numbers on the Lecture Course that the Lecture Course Committee desires to have cleared up. As everyone knows, a student's season ticket for one dollar and a non-student's for a dollar and a half have been issued. As this affair is not a proposition upon which to make money, but is one which is supported in part by requisitions from the college; it is necessary to make this distinction between students and others.

At the time of the last number on the course, a number of outsiders presented student tickets for admission. These were found to have been loaned the persons by students who were unable to be present. While there is no objection to one student's loaning another his ticket when he himself cannot attend, out of fairness to those who have bought the dollar and a half tickets, the practise of lending to outsiders must be stopped. The dollar ticket is intended solely for the use of students and will not be accepted as admission from anyone else.

COURSE IN DEBATING MADE ELECTIVE FOR AGGIE SENIORS.

By vote of the faculty at their meeting last Monday afternoon, English 56, the course in Argumentation and Debating, was made elective for Agricultural Seniors. Hitherto it has been required of them. This action will permit a wider choice of Arts and Science electives by the men affected. The course was formerly required of the engineering students, but when the number of hours required for graduation was cut down two years ago, it was made elective for them.

NEW HAMPSHIRE BATES CONCERT

MAINE COLLEGE SENDS MANDOLIN AND GLEE CLUBS TO DURHAM

MUSICAL CLUBS COMBINE

Excellent Precedent Set—Mandolin Club Well Received by Audience—Every Number on Program Encored.

A joint concert with a neighboring college last Tuesday evening marked an ovation in musical circles at New Hampshire College. The Glee Club, quartet, and mandolin club from Bates College combined with glee club, quartet and orchestra here to furnish an evening's entertainment hard to equal at a similar affair.

MANDOLIN CLUB.

The Bates Mandolin Club is an organization that any college might be proud of, and their selections thoroughly delighted the audience who eagerly called for encores. Mr. Renwick of Bates displayed a volume and quality in his solos that was well appreciated by those present.

The inimitable reading of Mr. Bell with his sides jokes on the singing of one of the members of the New Hampshire glee club brought round after round of applause. The attempts of the glee club to exhibit sympathy while singing the song by that name were worth going miles to see. The New Hampshire String Suite proved as popular as ever and were forced to encore their Andante Cantabile.

PIANO SOLO.

The piano solo by Mr. Stillman was exceptional and deserved the marked applause with which it was received. His encore pleased the audience equally well. The Bates Quartet following immediately after Mr. Stillman's solo was of equally high rank, and their humorous selections caused many a laugh.

The Cello solo by Mr. Ewart was the work of an artist and but served to increase his popularity as a musician. Following the Stein song by both glee clubs together, N. H. Alma Mater was sung with the entire student body standing.

BATES QUARTET.

The Bates Quartet is composed of Messrs. Bartlett, Nicholas, Lane, and Smith. Of the Glee Club, P. W. Lane is leader, and S. E. Keneston, manager, while W. H. Cummings is leader of the Mandolin Club.

The New Hampshire quartet was composed of Messrs. Paine, Blake, Bugbee, and Dame.

After the concert, dancing was enjoyed until 11.30.

SHORT COURSES INCLUDE NEW ONE DEVOTED TO POULTRY.

The short courses in agriculture already begun here for the winter are to include one never before offered, a course lasting one week, dealing exclusively with poultry. This course will be under the direction of Professor R. V. Mitchell of the Poultry department, assisted by D. J. Lambert, Poultrymen of Rhode Island State College, J. C. Graham, Poultryman in Massachusetts Agricultural College, and L. E. Card, Assistant Poultryman in the Connecticut Agricultural College.

The lectures and demonstrations will cover all poultry problems.

From the large attendance and great interest shown in the Poultry Days in previous years, it is expected that there will be an unusually large number of students enrolled.

Prof. Guy C. Smith attended a conference of the executive committee of the society for the promotion of New Hampshire Agriculture at Concord, Friday, January 7.

REAL MUSIC.

Those attending the second number in the Lecture Course were extremely fortunate, perhaps more fortunate than they realized, to have had the opportunity to hear the Zoellner Quartet with so little effort and expense.

A string quartet which has been decorated by the Queen of Belgium, which has played with success for the music-loving people of France and has performed creditably before the highly educated and cultured upper classes of Russia must necessarily be of great merit. Moreover, the music played by the Quartet is of a quality which few here, unfortunately, can comprehend.

It is said by the musicians of all countries that even the better educated people of our country show a surprising ignorance of and appreciation for the best things in music. It is the misfortune of a young nation. It is, however, the least college people can do, as representatives of higher education, to try to comprehend the deeper things in the art of music. It is furthermore a desirable thing to do from a selfish standpoint, because as one grows able to understand and enjoy good music he is enlarging his capacity for happiness.

Let us not use music solely for the transient and exhausting pleasures which dancing gives, nor for the evanescent joy which light opera and other popular compositions produce. Let us rather bring out some of the finer things in our inner lives by learning to like good music, just as we bring out our joy and gaiety by liking light music. Music plays on the emotions and is as capable of developing the strength, purity and thoughtfulness of man's nature as it is his other characters. Good music is a good religion.

INTELLIGENT VOTING.

At this time we are hearing a great deal of talk about the men who will most likely be the candidates for the Presidency of the United States at the next elections. The names of these men have been bandied about by the newspapers and will be more bandied about later. However, much the newspapers talk about men it is very difficult to gain a true conception of a man's character and ability from reading about them and we cannot know the men personally.

The college men who are voters and the college men who expect to be voters would be shirking one of their greatest responsibilities as citizens if they did not at once start in to get what little information they can about the men on whom they will be expected to vote next fall. There is enough unintelligent voting done without the students of New Hampshire College contributing any share to the amount.

In these days of war the President of the nation has automatically assumed greater powers and so it becomes of greater importance not only to pick the best party platform but to consider the personal characteristics of the man himself.

RESPECT FOR OTHERS.

Although the college man is expect-

ed to have reached years of discretion, it sometimes becomes necessary to comment upon the attitude and behavior of certain individuals. At various times during the evening when the Zoellner Quartet entertained the student body, disturbances of one sort or another were going on in the back of the gymnasium. It is not to be expected in so large a group, that every number on the program will please everyone, but it is expected that everyone shall conduct himself as a gentleman. Out of courtesy to those that do enjoy music or anything else that is high class, and especially out of courtesy to the performers, no person should be rude enough to annoy or distract the attention of others whether intentionally or otherwise. It reflects upon the college and the individual himself and sends any visitors away with a bad impression of the character of the men who make up the student body. It is hard to conceive of the mental attitude of the men who will do such things, and it is to be hoped that they will become more of a rarity than they have been in the past.

"EARLY TO BED."

What does the individual college man need most? Many, in answer to this question would say money, others, not so kindly disposed might suggest brains. The particular need this article would call attention to, however, is sleep, enough of it and at regular intervals. No student can be efficient in his daily work, physically or mentally, who does not have regularly, a given amount of rest, the minimum required varying with the individual. A student is not making economic use of his time and money in college if he lessens his capacity for acquiring knowledge by any means whatsoever. The conservation of our natural resources is attracting much attention throughout the country, and is of importance, but stress should also be laid upon conserving individual vitality. The value of regularity in the care of animals has been established by science, and the principle applies also to man. Let us retire and arise on schedule, and not attempt to cheat Nature out of the rest period she must have, as she is one who cannot be bluff.

It is rumored that in consideration of the actions at chapel last Wednesday of some of those students from the primary grade, the faculty are considering the advisability of furnishing lollypops or some similar pacifier to keep the unruly kids quiet when company is around.

RAILROAD ACCIDENT NEAR DUFHAM STATION KILLS NONE

Last Sunday locomotive 1279, hauling the train due here at 7.17 p. m., blew off a cylinder head when starting from the station. Pressure was so great that the piston was thrown out also, striking the cross-bar in rear of the coupling-pin on the front of the engine and landing on the side of the embankment. An attempt was made to continue to Dover on the remaining cylinder, but the engine was unable to start. The Portland express passing through Durham at eight was sent up from Newmarket on the left track, crossing over to the right track above the station here. The express took the passengers of the disabled train into Dover. An engine sent from Dover hauled the disabled train to that city.

TWO MEMBERS GIVE TALKS AT ENGINEERING MEETING.

Two papers were read by members of the Engineering Society at the meeting Monday evening January 10.

J. E. Frisbee spoke on the "History and Advancement of Radio Telegraphy" In 1897 the sending of wireless messages across the English Channel was considered marvelous, now the receiving of messages in Honolulu from a station in Germany causes us to wonder not at it but at what will come next. Since 1912 there have been 1800 station licenses and 1200 operator licenses issued in this vicinity showing the interest taken by amateurs.

N. C. Hurd with the aid of lantern slides loaned by the General Electric company gave a brief account of the evolution of the electric light. An interesting part of the lecture was the gradual change of the dynamo to the present type.

Four registered Ayrshires, three heifers and one cow, were recently purchased in Concord, N. H., of Mr. Kimball and added to the college herd.

MISS BLACK ATTENDS MEETING OF BOTANISTS AT OHIO STATE.

In the Christmas recess Miss Black attended the Tenth Annual meeting of the Botanical Society of America held in Columbus, Ohio, December 27-30. The meeting was held under the auspices of the Ohio State University.

One of the most interesting speakers of the conference, Miss Black, says, was Prof. E. J. Reichert of the University of Pennsylvania, who has shown by experimenting on the amount of proteins and starches in plants that the amounts in the same species show a very close relation to each other. On this basis of the starch and proteid content of plants he has attempted to form a new classification of plants.

OFAMATIC CLUB SCORES HIT IN 'THE PRIVATE SECRETARY.'

Friday evening, December 17, the College Dramatic Club entertained the student body with a presentation of "The Private Secretary." The plot has to do with the adventures of Douglass Cattermole, whose eccentric uncle wishes to sow his wild oats. As a last resort the nephew impersonates a private secretary for his chum's uncle. The difficulties run into by C. B. Tibbetts '17 as Douglass Cattermole in keeping up the deceit caused a laughable evening's entertainment and the portrayal of Mr. Gibson, a Bond street tailor, by A. R. Morgan, '17, could not have been better. A. B. White '19 as the Rev. Robert Spalding, the real private secretary, filled a hard part extremely well.

To say that J. A. Sullivan '16 took the part of Mr. Cattermole, the uncle, as well as the original would be doing him an injustice he took the part better than Mr. Cattermole could himself. As a gruff, old gentleman he caused a laugh with every move. While the acting of those mentioned stood out as distinctive, every part was acted with an ease and conscientiousness that deserved commendation. Music was furnished by the college orchestra.

LECTURER SHOWS THREE FILMS AT ENGINEERING CLUB MEETING.

On Monday evening, December 20, the Engineering Society saw three reels of moving pictures of a most interesting character from ore to the finished product. The manufacture of "National" modern welded steel pipe was taken up in detail. The National Tube Company of Pittsburg, Pa., loaned the films and also sent a lecturer with them to address the society and explain the processes.

Before starting the reels, the lecturer took up briefly the evolution of the art of pipe making from the primitive bamboo pipe through pottery pipe, lead pipe, and bronze pipe to the modern iron and steel pipe. There are two methods of making welded pipe; the butt weld, furnished in sizes up to 3 inches for which it is strongest, and lap weld 1½ inches up to 30 inches for which it is strongest. Although at first all pipe was made of wrought iron, now over 90% is steel.

The first reel took up the mining of iron ore and the separation of the iron from its impurities by means of the blast furnace. The second showed the Bessemer process of refining crude iron to pipe steel; and the workings of the rolling mill. The third reel showed the lap weld and butt weld processes of completing the making of the pipe.

At a short business meeting the office of publicity man was created for the purpose of advertising the meetings of the club and E. F. Cutts was elected to fill the office.

Mr. John B. Scherrer, Instructor in Vegetable Gardening, spent the Christmas vacation at his home in Pennsylvania.

Prof. E. R. Groves attended a meeting of the American Sociological society at Washington during the Christmas vacation. The subject discussed was, "The Significance of the Present War Socially."

On his way back he visited the Vineland Training School at Vineland, N. J., where Deland Crafts, '15, and Marion Nash, '15 are doing graduate work.

Professor F. W. Taylor judged the corn exhibits at the annual meeting of the Massachusetts Board of Agriculture, held Thursday January 6, at Horticultural Hall, Boston.

A Good Chiffonier

is the most convenient article one can have in the sleeping room. We show many patterns with

Six Good Roomy Drawers

and a fine mirror. Prices \$10.75 to \$25.00. Chiffoniers without mirrors as low as \$5.75.

Dover, N. H.

Everything for Students' Rooms.

C. C. A. AND L. A. CLUB TO HOLD INTERESTING JOINT MEETING.

On Monday evening, January 24, Rev. J. Franklin Babb of Haverhill, Mass., will speak before a joint meeting of the Liberal Arts Club and the College Christian Association. His topic will be "The church problem in the rural communities." Mr. Babb is a minister, an entertainer, and an active worker in the field of Sociology. He was entertainer at a concert held here last year and spoke before the Woman's Club in December. He has tackled the problem in a rural community in this state and met with remarkable success which will make his talk a practical as well as interesting one. As the talk will be both religious and sociological it should be of interest to both organizations and anyone who lives or plans to live in a rural community. The place of the meeting will be announced later.

EXTENSION SERVICE CO-OPERATE WITH AMOSKEAG TEXTILE CLUB.

This winter the Extension Service of New Hampshire College is co-operating with the Amoskeag Textile Club of Manchester, N. H., in giving short courses in agriculture at Textile Hall. The program consists of a series of 28 lectures on orcharding, gardening and poultry management, given by B. B. Richardson, Orchard Demonstrator; E. M. Straight, Vegetable Garden Demonstrator; and R. V. Mitchell, Assistant Professor of Animal Husbandry, in charge of Poultry.

ARTS AND SCIENCE LECTURE COURSE LARGELY PATRONIZED.

The Arts and Science lecture service is being used quite extensively by the citizens of this state. On Dec. 20, Prof. Whoriskey spoke at East Rochester and on Dec. 23 he spoke at Nashua. Prof. Simmers spoke at New Ipswich, N. H., Jan. 7, Prof. Groves spoke at Newmarket Jan. 8. Prof. Scudder addressed an audience in Manchester Jan. 10. Jan. 23 Prof. Groves will talk in Stamford, Conn., and also at Keene Jan. 28. Prof. Simmers will speak at Milford, Jan. 22.

C. C. A. Notice.

There will be a meeting of the College Christian Association, Sunday afternoon at 5 o'clock in the Gymnasium. The speaker will be W. S. B. Davie, Labor Commissioner for the State of New Hampshire. He will speak on some phase of the work in the labor problems and industrial disputes in this state.

Mr. Davie spoke before the Economics Club last year and gave one of the most interesting talks of the year. Mr. Davie is an active worker in the field of Labor Problems and his talks are based upon his personal experiences.

**H. E. BATCHELDER '09, HAS
CHAMPION SCHOOL ELEVEN**

Marriage of R. E. Came, '15—Announcement of Engagement of Miss Margaret Demeritt to J. T. Croghan, '08.

H. E. Batchelder, '09, instructor in science and director of athletics in East High School, Minneapolis, Minn., has had a very successful season with his football team, East High having won the city championship. Mr. Batchelder has been in his present position two years, and in the past, the school has usually finished last in the city football series. In 1914, however, his team took second place, and this year they hold the championship of the five high schools in the city among which the rivalry for athletic honors is very keen. The school has an enrollment of 1400.

A. F. Nesbit, formerly professor of Physics, and now connected in a consulting capacity with several large corporations in Pittsburg, entertained at Thanksgiving dinner, Dr. Henry Corliss, '10; C. G. Paulson, '15; and T. J. Twomey, '13.

M. J. Broginni, '15, chemist for the Dupont Powder Co., in their plant at City Point, Va., writes that that concern employs over 75 chemists. They make nothing but gun-cotton, which is shipped 20% wet to the Wilmington, Del., plant, where the finished product is made. Mr. Broginni says that the reports about the Hopewell fire were exaggerated very much.

The sporting page of the New York Times for December 14, 1915 includes an item about the winter carnival at Dartmouth and states that C. G. Paulson, '15, is to give an exhibition on skis at that time.

L. A. Pratt, '09, is father of a girl born December 22, 1915.

On December '16, R. E. Came, '15, was married to Miss F. C. Plummer of Rochester. The bride attended Simmons College and the Eric Pape art school at Boston.

H. T. Converse, '10, is doing Dairy field work for the U. S. Department of Agriculture in co-operation with Clemson College at Clemson College, S. C. He is working up cream routes for the new creameries the Government and State are establishing.

The Manhattan Daily Nationalist of Manhattan, Kansas, recently printed a very interesting and thoughtful article on Cosmopolitanism by B. K. Bagdighian, ex '16. Mr. Bagdighian is now a student at Kansas State and is an officer of the Cosmopolitan Club.

O. D. Goodwin, '09, is building a home in Swampscott, Mass. He is in the Turbine Engineering Department of the General Electric Co., Lynn, Mass.

F. W. Randall, '07, who has recently accepted a position with the Rockingham Light, Heat and Power Co. of Portsmouth, was a visitor at the Lynn works of the General Electric Co. the middle of December.

The engagement of Miss Margaret DeMeritt, '11, to J. T. Croghan, '08, was recently announced. Miss DeMeritt has been instructing in the Botany Department of Wellesley College. Mr. Croghan has been employed for some years by the Stone and Webster Co. of Boston in some very important engineering work. He has recently been given charge of one of the largest jobs that has been undertaken by the company. The work will consist in the erection of the largest power plant which has thus far been constructed, to be located at Buffalo, N. Y.

D. F. Smalley, '08, built a bungalow on Shuice Pond during the summer. He is in the Motor Engineering Department of the General Electric Co., at Lynn, Mass.

"Mike" Reardon, '14, writes from Westboro, Mass., that he is still alive and kicking. He is sub-master of Westboro High school, teaches mathematics and chemistry and coaches football and baseball. The work is very interesting and seldom gets monotonous.

R. A. Knight, '15 of West Concord, left last Tuesday for Porto Rico where he has accepted a position as instructor in manual training in a government school.

Dr. W. E. Britton, '93, is State and Station Entomologist of Connecticut. His office is at the State Experiment Station in New Haven. Dr. Britton is strong for New Hampshire. Aug. 14, 1915, he delivered an address entitled "Fighting the Gypsy Moth," in the Museum building of the New York Botanical Garden.

Wednesday, October 24, 1915, a "Locomotive" containing Peavey '13, enroute to Springfield, made a stop at Storrs, Conn. Peavey is now located in Bridgeport, Conn. He is assistant testing engineer for the Locomobile Co., and has charge of their testing laboratory. He was married a year ago and says he likes married life and likes his job. He tips the scales at 207 lbs.

H. M. Shurburt, 2 yr., '04, is superintendent of the farm and grounds of the Loomis Institute, Windsor, Conn. Mr. Shurburt was in the employ of the college for a year following graduation. He has since held several positions as gardener on private estates in greater Boston. He has been in his present position since March 1914. The Loomis Institute is situated six miles north of Hartford in the beautiful Connecticut river valley.

COMMUNICATION.

Seattle, Wash., Dec. 15, 1915.
Editor of the New Hampshire, Durham, N. H.

Dear Sir:—I am very pleased to read the announcement in the last issue of the state wide invitational course of lectures offered by the "Arts and Science" faculty and am now wondering what the student body will do about it.

Surely it is up to the student body to see that the needed invitations are extended; as it forms a method of publicity for the college that must not be overlooked.

If the faculty is taken at its word, there isn't any reason why every nook of our state should not be welcoming a representative of our college.

The subjects offered are alive with interest and would serve as an introduction into the educational and economic circles of our state for the college; giving it a boost like nothing else that could be done. I am anxious to see our faculty getting in closer contact with the public school system in the state and I believe that by this method alone a great deal can be done to encourage a closer co-operation and understanding.

So I would say to the student body and the alumni to get busy and see that those at home, and those at the old school are not only willing but enthusiastically calling on the members of our faculty for some of those splendid addresses offered on this winter's program.

Very Truly,
H. H. Dickey, '07,

**PROF. O'KANE DISCUSSES STATE
WORK AT NATIONAL CONFERENCE.**

At the national conference of the association of Economic Entomologists, held in Columbus, Ohio, Dec. 27, '15, Prof. O'Kane read a paper discussing the results of the New Hampshire state entomological work of which he is the head, and Mr. W. A. Osgood, who also attended the conference, assistant. The gathering was one of considerable importance and was attended by 150 delegates from all parts of the United States and Canada, with several other foreign countries represented.

The sessions were held in the buildings of the Ohio State University, one of the leading educational institutions of the country. It now has an enrollment of over 6,000 students and a staff of 600. The trustees and faculty of the University gave a reception to the association in the library, a building just completed at a cost of \$200,000.

Prof. O'Kane was elected chairman of the membership committee of the society for the coming year.

Ode

How strange a thing is love
It cometh from above
And lighteth like a dove
On some.

And some it never hits
But that it gives them fits
And scatters all their wits.
Ho Hum!

Contributed by a "Chronic Old Bach" of 1906.

**EXCHANGE DEPARTMENT OF THE
NEW HAMPSHIRE PUBLISHES LIST.**

An effort has been made to make the exchange department of the New Hampshire a live one. The educational value to undergraduates of keeping in touch with the activities of other schools and colleges cannot be over estimated and one of the best ways is to make representative student publications of the schools, colleges and universities of the country easily accessible.

A list of the exchanges is published below. It is hoped that it will soon be completed.

The exchanges are placed in the Hanilton Smith Library Reading room on the middle shelf at the east end of the magazine rack. They will be left there a reasonable length of time and subsequently filed for one semester in the stack room where access to them may be had upon request of the Librarian.

The students should avail themselves of the opportunity of keeping in touch with other institutions of the country.

**DISCUSSION OF THREE FARM
PROBLEMS AT AGGIE CLUB.**

Last Monday night at a meeting of the Agricultural Club, W. H. Thomas '17 gave an account of the Field Crops Judging contest held at Horticultural Hall, Boston, on January 5th which New Hampshire College won.

The literary program for the evening consisted of an open discussion on the three questions: "Should oxen be raised and used on New Hampshire farms?" "Should the farmer of to-day own an automobile?" and "Should New Hampshire farmers raise their own draft horses?" The discussion was not at all one sided, many speakers expressing their opinions on both sides of the question.

It was announced that the next meeting would be a joint meeting of the Liberal Arts and Aggie Clubs at which meeting, Rev. J. Franklin Babb of Haverhill would speak.

Mr. Harry P. Young, Assistant in Agronomy, spent his Christmas vacation in Pennsylvania and while there attended the one week course in agriculture given by the Pennsylvania State College of Agriculture.

LIBERAL ARTS CLUB.

Continued from Page 1

oral speakers will be engaged, thus making a sub-lecture course. One of the wishes of our President was that the students as a body might enjoy coming together and see in moving pictures, films of education and enjoyable value. Such may very likely be the case with the co-operation of the club and those in charge.

The club urges no one to join. Like the lecture course, it is our desire to fairly and accurately represent the value and possibilities of the movement and then recommend that those who honestly desire the good that should result, and those who are interested in the things described, to join for their own sake. But also, like the lecture course, the aim is that it will be a large, popular and valuable addition to college life.

CHAIRMEN OF COMMITTEES.

The lines of work that will be followed fairly closely or rather the natural departments or divisions of the club are the committees to whom chairmen have been recently appointed. The Executive committee in addition will handle matters of general interest, as the Debating Team. Economics, C. C. Bond; Psychology, H. C. Main; Sociology, R. I. McCartney; Modern Language, Miss Basch; Dramatics, R. C. Graham; Music, Miss Charbonneau; Literature, Miss Blanchard; Fine Arts, Mr. Scudder; Home Economics, Miss Florence Harris; Education, E. H. Kelley.

PROF. E. R. GROVES TO ASSIST IN STUDY OF SCHOOL ETHICS.

Prof. E. R. Groves has been asked to represent this state in an effort to interpret ethics as taught children in the State schools by the National Commission for Moral Instruction. At least one from each state is on this committee and some of the larger states are represented by two men. Those chosen are connected with the universities in their states.

Prof. Groves has also been invited to speak at a "conference of men who are leaders in community development," in Detroit, Mich., Feb. 3, 4, 5. Men from all the large cities of this country and some from Europe are invited to attend this conference.

DEPARTMENT OF AGRICULTURE MEETING IMPORTANT TO STATE.

Director J. C. Kendall attended a meeting of the Department of Agriculture at Washington, D. C., the week commencing December 13, where two important actions were taken from the viewpoint of New Hampshire:

(1) The Extension Department in cooperation with the Department of Agriculture will hire a woman for three months next spring, to investigate the home economic problems in New Hampshire. She will meet the people at various Granges and in the rural homes. The data obtained will be used by the Department of Agriculture.

(2) The Department of Agriculture this year will cooperate with the Extension Service, and three Counties of New Hampshire, in order to furnish three more County Agents for counties not all ready having them. The counties desiring agents, should organize at once, so that the planting of demonstration crops can commence early in the spring and thus not delay the work another year.

L. A. Carlisle and Miss M. L. Sanborn who are in charge of the Boys' and Girls' Club work also attended a State Leader's Meeting in Washington the same week.

A Movable School of Agriculture and Home Economics was held this week January 11, 12, 13 and 14, at Hopkinton, N. H., under the direction of the Extension Service. The previous week the school was held at Rindge Center, N. H.

HIGH CLASS CONCERT BY ZOELLNER STRING QUARTET

Lecture Course Presents a Real Treat to Music Lovers—Selections all Classics.

The concert given by the Zoellner String Quartette of Brussels, given in the gymnasium Saturday evening, Jan. 8, fully satisfied the expectations of the audience and was heartily enjoyed by all who attended. The quartette was made up of Antienette Zoellner, violin, Amandus Zoellner, violin, Joseph Zoellner, Sr., viola and Joseph Zoellner Jr., violincello.

Each number was played by the entire quartette. It would be difficult to state which number of the program was the best, as it was all of such high quality. One of the encores, a minuet written in the sixteenth century, was much appreciated by the audience. The technical skill evinced along with the delicate expression and fine shading of the various portions of each selection have certainly not been surpassed before a Durham audience.

PROGRAM

Quartet, Op. 18, No. 6, Beethoven
Allegro con brio
Adagio ma non troppo
Scherzo—Adagio
LaMalinconia Adagio
Allegretto quasi Allegro
(a) Rain Song, Op. 35 Sinigaglia

Native melody furnished by R. R. DePoe, C. S. Skilton
(c) Bohemian Folk Song, Counter Pointed by Kaessmayer,
Quartet, Op. 2.
Allegro
Allegro
Tema con Variazioni
Tema—Andantino
Var. 1. Poco Tranquillo
Var. 2. Poco Agitato
Var. 3. Andante
Var. 4. Vivace scherzando.
Final allegro.

DEMONSTRATION WOODLOTS TO HAVE EXPLANATION BOARDS.

Mr. W. A. Osgood, assistant to Prof. O'Kane in the state moth work, is now preparing and erecting signs on demonstration wood lots located on prominent highways in Merrimac, the Merrimac valley and points in Eastern New Hampshire. The lots are those in which three years ago improvement cutting was carried on. This consisted of removing trees most susceptible to the ravages of the gypsy moth and leaving the pines and other trees capable of resisting the pest in the absence of the more susceptible trees. Hardly had the improvement cutting been finished before a decrease in the pest was noticed. The work was a complete success and no treatment other than the cutting was used. The signs now being erected are four by eight feet in size and explain the demonstration wood lot and call attention to circular number nine to be issued by the department very soon. People residing in the neighborhood of these lots have shown considerable interest and the erecting of the signs in conspicuous places is expected to attract further attention.

WANT CHANGE IN RULES.

Many of the great officials and coaches of the middle west are advocating the adoption of a new rule in football abolishing the free kick for goal after a touchdown. They claim that a free goal is too small a margin to win a game.

Among those advocating such a change in the rules are Dave Fultz, Bill Langford, "Hurry Up" Yost, Dr. Sharpe, Zupke of Illinois and Dr. Williams of the University of Minnesota.

January, 6, 7, and 14 Professor W. J. Fisher gave lectures on the slide rule to a class of twenty-five men in the evening schools of the Amoskeag Textile Club at Manchester.

If you have stained or soiled your clothes, dont worry, we can remove and dry cleanse them so they will look like new.
Leave your work with Mr. Chas. Durgin, '18, Kappa Sigma House, all work called for and delivered in three days.
Pressing, Cleaning, Repairing and Dyeing satisfactorily done and prices are right.

AMERICAN DYE HOUSE,

Somersworth, N. H.

Chas. Durgin, '18, Agent, Kappa Sigma House, Durham, N. H.

LIBERAL ARTS CLUB TO SEND DEBATERS TO RHODE ISLAND.

The Liberal Arts Club wishes to announce that as apart of its permanent policy and program for the rest of this year, it will conduct a College Debating team. Arrangements are being made for a trip to Kingston, R. I., to debate with the team from the Debating association of the R. I. State College.

A notice will appear in the near future for a preliminary contest, probably an open forum, from which two teams will be selected by a board of Judges made up of members of the faculty. These two teams will debate and from them, four men will be selected for the final team.

Some kind of reward will be given to those who make the team, probably a watch fob. This proposition is being carried on by the Liberal Arts Club and is not a separate organization. It is open to members only, but since the club is open to the whole college every student in college has an equal opportunity. Those students desiring to try out for this who feel that taking an active part in the club aside from this would be too much tax on their time, can do so by simply becoming a member of the club. It will not bind them to anything else if they are trying out for the team.

It is hoped that a large number will be out for several reasons, none of which are selfish on the part of the club.

1. It will be a precedent for a permanent college debating team.
2. It will give an opportunity for debating now denied to a large number of the students.
3. It will be of immense value to the participants.
4. It will enhance college spirit and advertise New Hampshire.

L. J. BATCHELDER CONSULTED BY MORLEY BUTTON COMPANY.

Mr. L. J. Batchelder was called to Portsmouth, N. H., on Jan. 5th by the Morley Button Company. The manager of the company wished to consult with Mr. Batchelder on certain methods of manufacture and certain special die work in order to be able to manufacture some special articles.

It reflects credit on New Hampshire College to have a man at the head of the Wood Working Shop and Foundry who is recognized as an expert along these lines.

PROF. RASMUSSEN ATTENDS EXECUTIVE COMMITTEE MEETING.

Wednesday, January 5, Prof. Rasmussen attended a meeting of the Executive Committee of the New England Federation for Rural Progress to draw up plans for the meeting of the Federation to be held in March. The Executive Committee of the society is composed of six men, one representing each state. Prof. Rasmussen represents New Hampshire.

Monday, January 3, Prof. Rasmussen judged the butter exhibited at the Dairy show of the Massachusetts Dairymen's Association.

HORRIBLE CONDITIONS ACROSS WATER FELT IN DURHAM.

The horrible state of affairs across the water was forcibly brought home to one of the students here last week when M. M. Mazmanian '16, learned through an Armenian paper published in New York of the massacre of almost his whole family by the Turks. The troubles began last summer when his father and other influential or educated Armenians in Harpoot, Turkey, in Asia were imprisoned and later massacred without any cause whatever. His mother, two single sisters, and a married sister were driven into exile with other women a short time later and terrible hardships were thrust upon them. The exiles were sent off in small groups and these were entered by Turkish soldiers in the disguise of women who attempted to make converts for Mohammed of the Christians, but without success, whereupon the women were put to death with torture, the knife and gun being used on some, while others were thrown over a cliff, or leaped over to avoid shame. Besides these Mr. Mazmanian has lost by massacre in Armenia, a cousin, nephew, and brother-in-law.

Professor E. R. Groves who has just returned from the meeting of the American Sociological Society which he attended during the Christmas recess at Washington, D. C., has recently been named as contributing editor to 'American Youth.'
