

The New Hampshire.

Vol. 5, No. 14.

DURHAM, N. H., JANUARY 22, 1916

PRICE 5 CENTS

BASEBALL SCHEDULE INCLUDES 19 GAMES

AMPLE OPPORTUNITY FOR ALL TO SEE TEAM IN ACTION.

SPRINGFIELD GAME AT DOVER.

Team to Meet Dartmouth—Plans for Playing of Springfield Game at Dover—Big Game at Worcester.

The baseball schedule for next spring has been practically completed by Manager W. J. Nelson. It includes eighteen games in addition to the customary Sophomore-Freshman game. That the students will have ample opportunity to see the team in action, is seen by the unusually large number of home games. In addition to the six already scheduled, the two open dates will probably be closed for games at Durham, Norwich undoubtedly being one of the attractions.

NEW DEPARTURE.

Several teams will be played this year which were not met last season, among them being Dartmouth, University of Vermont, Springfield Y. M. C. A. College and St. Anselm's College. Plans are now being made to have the Springfield game played at Dover, and to make it one of the biggest games of the season.

It is interesting to note that the increased rivalry which has sprung up between Worcester Polytechnic Institute and New Hampshire has resulted in the two colleges meeting at Worcester for the big commencement game there, June 6th.

SCHEDULE.

Following is the schedule:

- April 11—University of Maine at Durham.
- April 19—Dartmouth at Hanover.
- April 20—Norwich University at Northfield.
- April 21—Middlebury College at Middlebury.
- April 22—University of Vermont at Burlington.
- April 29—Worcester Polytechnic Institute at Durham.
- May 2—Bates College at Durham.
- May 5—Brown University at Providence.
- May 6—Rhode Island State at Kingston.
- May 10—Open.
- May 13—Open.
- May 17—Lowell Textile at Lowell.
- May 20—Bates College at Lewiston.
- May 24—St. Anselm's College at Manchester.
- May 27—Connecticut Agricultural College at Durham.
- May 30—Springfield Y. M. C. A. College at Durham.
- June 3—Rhode Island State College at Durham.
- June 6—Worcester Polytechnic Institute at Worcester.
- June 13—Sophomore-Freshmen.

GIRLS OF SMITH HALL GIVE LEAP YEAR DANCE JANUARY 13.

On Thursday evening, January 13, the girls of Smith Hall gave a Leap Year dance. The decorations were palms and flowers and music was furnished by Ward and Morgan. The patron and patronesses were Mr. E. G. Ritzman, Mrs. E. G. Ritzman, and Mrs. Marcia Sanders. The guests were Messrs. R. J. Bugbee, C. S. Pettee, C. Cummings, A. B. White, K. C. Westover, A. S. Bartlett, F. I. Ordway, G. W. Chase, E. N. Sanders, G. D. Parnell, E. L. Blake, A. B. Whittemore, J. A. Sullivan, A. J. Grant, H. A. Steele, R. A. Mitchell, K. E. Fenderson, C. Horne and V. W. Batchelor.

DATE OF JUNIOR PROM.

The period set aside by the faculty at their last regular meeting for the Junior Prom begins 4.00 p. m. Thursday, May 11, and lasts until 2.30 p. m. Sunday May 14. This statement is made to clear up any possibility of misconception as to the meaning of an article on the same subject in the last issue of the paper.

NEW HAMPSHIRE DEFEATS CUSHING ACADEMY 36-29

Score at End of First Half 17-17—Two Subs Play the Second Half—Captains Star.

New Hampshire defeated Cushing Academy last Saturday evening at the Gym by a score of 36-29. The game was well contested by the losers, the score at the end of the first half being 17-17, but in the second period, New Hampshire seemed to be stronger and won 36-29. In the second period, New Hampshire used two substitutes, Badger and Taylor. The game was especially clean and fast. Individual stars were the two captains, Bissell of New Hampshire and Vanderlick of Cushing. Following is the summary:

N. H. Cushing
Sanborn, Taylor, rf lb, Turnball
Prentiss, lf rb, Walker
Steel, c c, Vanderlick (Capt.)
Bissell (Capt.), rb lf, Maedermott
Brown, Badger, lb, rf, Baumgartner

L. J. BATCHELDER ADDRESSES N. H. MANUAL TRAINING CLUB.

Mr. L. J. Batchelder of the Engineering division spoke before the New Hampshire Manual Training Club of Dover, N. H., on Saturday evening, January 15th, his subject being Manual Training.

This lecture was given as a part of the lecture work which is being offered by the Engineering division; a full description of which will appear in the special Engineering issue next week.

WINTER BLOOMING SWEET PEAS IN COLLEGE GREENHOUSE

The Sweet Pea vines in the college greenhouse have grown to a height of seven and a half feet and are now producing three or four large, highly scented blossoms, on a stem thirteen inches in length.

These are the Winter blooming types of the famous "Orchid Flowered" and the "Spencer Waved" varieties. The cost of the seed of the finer kinds is as much as \$8 to \$12 per ounce. To sow a house 20 by 50 feet would cost \$75.

The blooms are of many beautiful colors and have also other points in their favor. Visitors can not help but remark at the sweet perfume which scents the whole house. Lovers of these flowers have one advantage over those who desire the carnation, that is, in breeding for highly colored varieties of the later, many of the handsomest sorts have lost their noted clove like odor. This is probably why the white carnation is so popular. Whether the sweet pea will lose this characteristic in crossing for new types is yet to be discovered. For exhibition, size and color are two very important factors, but the average appreciator of flowers values the perfume which so appeals to one of his senses, that of "smell."

NOTICE.

A notice appeared in last week's issue of the New Hampshire to the effect that there will be a lecture next Monday night in the Agricultural room in Morrill hall. The lecture has been arranged for under the auspices of the Liberal Arts club and the College Christian Association, and will also constitute the program for the Agricultural club which meets that night.

The lecture will come at 8 p. m., and is entitled, "The Church Problem in Rural Communities," and will be given by J. Franklin Babb, of Haverhill, Mass.

FARMERS' WEEK PROGRAM READY

IS EXPECTED TO BE THE BEST EVER GIVEN HERE

SPEAKERS OF NATIONAL REPUTE

Special Women's Section Provided—To Deal with Household Work—Of Interest to All.

Moving pictures for at least one hour every evening, and different pictures each night is the present plan for Farmer's Week," said Professor W. C. O'Kane, who is in charge of that feature of the short courses, which are now under way. "We are planning to show several reels of farm scenes in foreign countries, many travel films taken in the United States, especially in the far west, and one or two reels of farms owned and developed by Indians." The other pictures are to be on such practical subjects as coffee, tea, rubber, and wool industries.

SPEAKERS.

The program for Farmer's Week this year is undoubtedly the best of its kind ever presented. The course opens Monday, Jan. 31, and closes Friday, Feb. 4. Among the men of repute who are to address the meetings are John A. McLean, formerly professor of Animal Husbandry at Massachusetts Agricultural College; V. O. McWhorter, of the United States Bureau of Animal Husbandry, a sheep raising expert; A. B. Graham of the United States Department of Agriculture, in charge of extension schools in the northern and western states; Herbert W. Collingwood, a well known writer and lecturer, and for the past thirty years editor of the "Rural New Yorker;" F. C. Sears, professor of Pomology at M. A. C.; William Craig, secretary of the Boston Florists association and Miss Bertha F. Terrill, head of the Home Economics department at the University of Vermont. In addition to these outside speakers several members of the college faculty will take a prominent part in the sessions.

WOMAN'S SECTION

A special women's section with lectures and practical demonstrations in domestic science and home economics will be a feature of the course. On Tuesday, the Strafford County meeting of the N. H. Sheep Breeders' association will be held; Wednesday will be Extension Service day; the annual meeting of the N. H. Potato Growers association takes place Thursday and on Saturday there will be an exhibit of corn and potatoes by the winner's of the Boys' Club contest.

ACCOMMODATIONS.

The college is prepared to take care of an unusually large number during the week and there will be room for all attend. Rooms will be provided in the new dormitory and other suitable places. The course is designed to meet the needs of the practical farmer and his wife who cannot leave home for more than a few days, but who wish to get the best and most up-to-date scientific methods of management, and operation of farm, dairy, and home.

BURROUGHS ADDING MACHINE COMPANY GIVES TEXT BOOKS.

The economics department of the college has received from the Burroughs Adding Machine Company, 30 copies of "Efficient Cost Keeping," by E. St. Elmo Lewis, a well known authority on this subject. The books will be used in the course called Economics 14 which takes up cost accounting and cost finding and is a continuation of last semester's course on this subject.

A volume on "Auditing and Cost Accounting," has also been received from the Alexander Hamilton Institute of New York city. Another volume from this same source on "Corporation Finance," is being used by Professor G. C. Smith, in his course in corporation finance. The Institute publishes quite a few volumes on different phases of Economics, each by an expert in the subject considered.

GLEE CLUB TO START ON 600 MILE TOUR FEB. 1

Longest Trip in its History—32 Men to be Taken—5000 People Reached—Trip Ends Feb. 16

The longest trip the Glee Club has yet undertaken will begin at 5.32 February 1, where the men will start in their special car for Concord. The trip will extend until Feb. 15 and will include towns in three of the New England States. The Club will probably be composed of 32 men, of which number 12 will be in the Orchestra. Mr. Bell will be taken as reader and will be featured twice on the program.

ITINERARY

The towns visited will include Concord, Contoocook, Warner, Claremont, Meriden, Franklin, Laconia, St. Johnsbury, Littleton, Lancaster, Colebrook, Portland and Biddeford. The two Sundays will be spent in Claremont and Colebrook when the fellows will furnish special music for the Sunday night services.

ENTERTAINMENT IN HOMES.

The pleasant side of the trip is the cordiality the fellows receive in the homes of people interested in the club. Very few of the towns are furnishing hotel entertainment and this is one of the most pleasing parts of the program.

LEWISTON CANCELS.

The cancelling, at the last moment of the course of lectures and entertainments in Lewiston made it possible for the club to appear in St. Johnsbury, Lancaster and Littleton. The Bates Club, with whom the New Hampshire club was to appear in Lewiston, under the same conditions as those here Jan. 11, feels unable to handle the necessary guarantee to make the concert possible there, although they have the city of Lewiston to draw from.

STATISTICS.

Some of the points about the trip that are worth considering are, a mileage of approximately 600 miles, 40 miles in teams, the college brought to 12 towns reaching approximately 5,000 people, an expenditure in money of nearly \$700.

The club expects to return to Durham February 16, feeling like veterans of the road and experts in the art of entertaining.

STATE LABOR COMMISSIONER SPEAKS AT C. C. A. MEETING.

Those who did not attend the meeting of the Christian Association last Sunday, missed something. Mr. Davis the commissioner of labor, gave a short snappy talk followed by an open forum discussion.

In outlining the relation of the Labor Unions to the Church, he showed that in the past, and even until very recently, the labor unions have been adverse to the church. This has been due, he said to the class distinctions of many "church attenders" who go to show their clothes or their social prestige. It was also due to the fact that the church did not sympathize with the laborer and told him to be content with what he had rather than fight for what were to him the necessities or comforts of life.

He showed that at the present time there is a tendency in the other direction and the two institutions are coming to a more mutual understanding of their interests. He removed any misconception that there might be regarding the relation of the labor movement to the liquor interests, by quoting from the constitution of a typical union to the effect that members in such straits lost the privileges and many of the rights allowed to other members.

In the open forum, he discussed the Nashua textile strike at some length. While he showed that it was a two-sided case, much of the trouble was traced to misunderstanding and prejudice. All the strikers but two factions he said are now back at work.

TO PLAY DARTMOUTH IN FOOTBALL

TEAMS WILL MEET FOR FIRST TIME SINCE 1901.

VERMONT AND RHODE ISLAND

Will be the Big Games—Manager R. C. Wiggan Announces Schedule of Nine Games!

Manager Rohl C. Wiggan, '17 has arranged an excellent football schedule for next fall. The schedule includes the opening game with Dartmouth. As far as can be ascertained this is the first game with Dartmouth since 1901, when the weak New Hampshire team was defeated by Dartmouth's exceptionally strong eleven by a score of 51-0. Coach Cowell said: "We shall make Vermont and Rhode Island the big games."

SCHEDULE.

Following is the schedule:

- Sept. 23—Dartmouth at Hanover.
- Sept. 30—Maine at Orono.
- October 7—Colby at Waterville.
- October 14—Bates at Lewiston.
- October 21—Norwich at Durham.
- October 28—Vermont at Dover.
- Nov. 4—Connecticut at Storrs.
- Nov. 11—Middlebury at Durham.
- Nov. 18—Rhode Island at Durham.

T. J. DAVIS OFFERS PRIZE FOR BEST DESIGN FOR PARK GATE.

T. J. Davis, a lawyer of Duluth, who lived as a boy in Lee, New Hampshire has offered prizes of \$5, \$3, and \$2 to the student who makes the best design for a gate at the entrance to Davis Park.

This park a tract of five acres in Lee was presented to the college by Mr. Davis in 1912 and is being transformed into an arboretum by the department of forestry, under the direction of Professor K. W. Woodward.

Mr. Davis had planted on the tract an avenue of chestnut trees which are now about 15 years old, and the college has growing there, pine, spruce, larch and Douglas Fir.

The gate will probably be built of the native stone, and the design is to include not only the structure itself, but suggestions for horticultural decoration. The designs are to be submitted to Prof. Woodward on or before the first of May.

TWENTY-THREE ALREADY ENROLLED AS SHORT COURSE STUDENTS.

Among those who have been taking the short courses on Hay and Forage Crops, Orchardings, and Poultry are the following: A. I. Hall of Rochester, C. L. Estes of Somersworth; S. C. Horne of Somersworth, W. F. Keyser of Bristol, J. S. Chamberlin and Mrs. J. S. Chamberlin of Durham, Miss Stella DeLaney of Durham, T. J. Brackett of Greenland, R. H. Hoyt of Grasmere, L. B. Burpee of Exeter, F. P. Murphy of West Kennebunk, Maine; H. D. Corey of Brookline, N. J. Rowell of Newton, Miss A. J. Skinner of Stratham, Miss Ruth M. Park of Stratham, Mrs. Margaret Le Baron of Manchester, Mrs. Harry Atwood of Newfields, Miss Effie York of Plymouth, M. A. Young of Walpole, Jerry Mitchell of Durham, W. H. Miller of Methuen, Mass., Theo. Peterson of Raymond and T. J. Cate of Chester.

NOTICE.

The next meeting of the College Christian Association will be held next Sunday afternoon at five o'clock. The speaker will be the Rev. Frederick J. Libby of Exeter. Mr. Libby has appeared before N. H. C., audiences several times in the past few years and has not begun to wear his welcome out. The meeting should be a very interesting one.

EDITORIALS.

The next issue of the New Hampshire will be an eight page one published under the auspices of the Engineering Division of the college.

"PREP SCHOOL STUFF."

There may have been some question in the minds of the younger members of the student body as to whether the trouble, which was so noticeable in the basket ball game with Cushing Academy, was the fault of the college or of the referee. Most seem to think that the referee was roasting the Academy players unmercifully.

It is, however, extremely doubtful in the minds of those who observed closely that any such thing was done. Considering the fact that the rules this year call for many more penalties for fouling than heretofore the question of the referee may be thrown out. Where, then, does the trouble lie?

Without doubt the basic cause of the trouble comes from the fact that it was a preparatory school team against a college team. It is a characteristic of preparatory school teams, no matter how good the team or how old the players, to refuse to play the game in a businesslike fashion. Especially when playing against college teams there is always a great deal of argument and ill-feeling over petty things. In other words there is a lot of "Prep school stuff," pulled off. It is unnecessary to say anything further.

Our teams should never be allowed to play preparatory school teams. Here's hoping that measures will be taken to keep prep schools off our schedules in the future.

ANENT THAT RULING.

However the matter of the use of the college name at Exeter may be settled, the fact remains that students have not been taking the care they should of the honor of their alma mater.

If such trips have to be made the men on them should certainly see that false reports are not circulated. The best way to do this is to see to it that false impressions are not given in advance. Oftimes the attraction of the games is greatly enhanced if the story is circulated that one team is to be made up of college men. The manager of the games usually knows this and likes to have the story passed on until the game is over and then he takes a chance on suppressing the use of the name if he finds it has to be suppressed.

There is not enough publicity on subjects of this sort there in college. People of the college do not have enough decided opinions on the question. Citizens of the surroundings and other towns do not hear enough about the college attitude on the question as a whole. The average college man does not realize until he has it brought forcibly to his attention, what such things mean.

If we were not so vacillating in our individual minds on points involving the good name of the college we should find ourselves taking a more decisive and definite stand as representatives in the student body.

APPRECIATION.

For some time President Fairchild has been endeavoring to offer the student body of New Hampshire College some form of free amusement at different intervals in order to give a chance for relaxation from the tension of and monotony of the daily study routine. The ever popular moving picture entertainment was decided upon as the best method and an attempt was made to give something both entertaining and instructive, taking the best of the moving picture idea and omitting what was objectionable. Therefore through the president's interest in the welfare of the students, the first of a series of entertainments was offered last Tuesday evening at the Gymnasium. There is of course a certain amount of expense entailed in the procuring of suitable films, and, while these entertainments are to be free to all who may wish to attend, the support and appreciation of the student body must be assured to justify this expense. If the scheme still proves successful there will probably be three or four similar entertainments given next semester.

This is but one of the many steps taken by President Fairchild to make the student's life a happier and less one-sided one and deserves the hearty support of the entire student body.

COUNTERFEITING.

A man who passes a lead dollar is a criminal and if caught is punished to the full extent of the law.

The man who passes a \$3.00 Athletic Association ticket at the gate for entrance to the basket-ball games where only the \$4.00 ticket is supposed to admit is, on the other hand, only an exceptionally smart man—so considered at least by a few.

Is it after all a cute little trick to cheat the college organizations of their just dues, or is it merely another form of counterfeiting and another evidence of that lawlessness with which the youth of America has been charged?

Why is it that we always have to take a little more rope than is allowed us even when we are allowed plenty and to spare? Formerly we had to pay extra for the basket-ball games whether we had Association tickets or not; this year we have had all the games including track, offered for only one dollar over the old price.

Let us get on to our feet and put the taboo on ticket-counterfeiting. Its existence is unthinkable at New Hampshire College.

KEEP TO THE POINT.

We have long needed a Debating Society and it seems to be the policy of the new Liberal Arts Club to try to supply the need. At the first regular meeting of the club there was held an open debate on the question of a National Prohibition amendment. There seemed to be a tendency during this debate for the male and the female members of the club to lose the argument for the sake of antagonizing each other. In fact the point of the debate was lost entirely during the course of the exchange of repartee. It is to be hoped that a society which gives such promise of good work will be able to overcome such tendencies through the efforts of the individual members.

CHANCE OF A LIFETIME.

Students of New Hampshire College! Begin to save your pennies, gather in the sordid shekels and ducats, the ever necessary medium of exchange, that you may not be found wanting when the 1917 Granite comes upon the college in all its glory. The shine of other Granites will be as the glimmer of tarnished metal is to the splendor of the sun when this mental prodigy is thrust upon you. In less than three months this handy compendium of useful information about the college will be yours to have and to hold. Jokes about all your friends and classmates; knocks on everyone except your self. Remember the tragedy of the unprepared and have your three shining silver dollars ready for the collector.

OUR OWN MOVIES.

Now that we have started moving pictures for the student body it seems as if we might have some of the moving pictures shown which were taken a year or so ago here in Durham.

It does not seem to be known what became of the pictures of the battalion but there is scarcely any doubt that if we could see ourselves as others see us, good would result.

WHO IS THE GOAT?

There is a joke on someone, but who is who and if so why. When the moving picture machine was being carried over to the Gymnasium for last Tuesday's entertainment, the assistance of Harvey Jenkins, '17 and Warren Knox, '17 was asked. One of the two suggested complimentary tickets to the evening's performance in return for their services. After some hesitation, these were granted and the two Juniors went off happy in the thought of having no admission to pay. Now Jenkins claims that he knew the show was free but that he kept still to help fool Knox. Knox, however, asserts with equal fervor that he was wise to the game, but that he said nothing in order to help fool Jenkins. The question now arises, who is the goat? Jenkins, Knox, or the issuer of the free tickets?

N. H. C. A. A. TICKETS.

Coach Cowell announces that in the future Athletic Association tickets will be closely watched to see that they are in the hands of the person to whom issued. He also announces that tickets not held by the person to whom originally issued are liable to forfeiture as each ticket bears the words "Not transferable." Furthermore, the three dollar ticket does not admit to basket-ball.

E-X-A-M-I-N-A-T-I-O-N-S!

Examination time approacheth.

Xams are the bane of our lives.

Are yours easy?

Mine are de—sh!

Instructors are heartless, aren't they?

Never let up on a feller.

Ain't it awful!

Think you'll get by?

I don't expect to.

One week from Thurs., Cursos!

"Nearer, still nearer."

Shut up, I want to plug.

HOT AND COLD.

There's nothing like a Durham bath up at the college Gym,

'Specially when the showers balk as you get half way in.

How nice it is to feel those streams of stinging smarting drops

As underneath the cleansing flow your carcass bends and hops

And then just as you get quite wet the cold stream ceases flowing

And you receive a parboiled back that pains you beyond knowing.

Or else, as often happens too, the hot stream is the quitter,

And cold wet streamlets cause your teeth to rattle and to twitter.

Oh these are drawbacks to be sure and often make one wonder

If an attempt to take a bath is not a ghastly blunder.

But at this age and in this place we must not stop or worry

A bath is an hygienic job, not banished in a hurry.

The proposition then is that we want these showers quick repaired.

And then we'll not be shy to use them with our bodies bared.

DARTMOUTH OUTING CLUB TO HOLD ANNUAL WINTER CARIVAL.

The sixth annual Winter Carnival of the Dartmouth Outing Club will be held at Hanover, February 10, 11, 12. As planned this year, it will far eclipse any affair of the sort yet undertaken on this side of the Atlantic. The carnival is subsidized by endowment, thereby making possible the proper attention to all details.

As was the case last year, the feature of the festivities will be an intercollegiate ski and snowshoe meet, comprising a varied program of dashes and cross country runs for both skiist and snowshoer, and a ski-jumping contest. Prizes will be offered by the Club for winners in all events.

Students in any American or Canadian college or university are invited to compete, and any who are interested in attending the Winter Carnival, are urged to communicate immediately with L. H. Bell, the secretary of the club, Box 291, Hanover, N. H., who will gladly furnish more detailed information.

The question of military training is being seriously considered at Wesleyan University.

A corps of light artillery is being organized at Yale.

A Good Chiffonier

is the most convenient article one can have in the sleeping room. We show many patterns with

Six Good Romy Drawers

and a fine mirror. Prices \$10.75 to \$25.00. Chiffoniers without mirrors as low as \$5.75.

E. Morrill Furniture Co.,

Everything for Students' Rooms.

ARTS AND SCIENCE STUDENTS TO ELECT 18 HOURS AS MAJOR.

"What the world wants is trained specialists," Mr. Babson of the Babson Statistical Bureau told the student body in chapel last fall. "There is a fortune for the specialist, even if his specialty is only beans."

The Arts and Science division made such changes in their requirement as will turn out students specialized in some line of work. By the new plan an Arts and Science Student must elect eighteen hours in one department as a major study. The minors will be elected with the advice of the head of the department in which the student majors.

The three groups listed in the catalog are: Group I, Languages; Group II, Mathematics, Zoology, Astronomy, etc.; and Group III, Social Sciences, Sociology, Economics etc. These still hold and the student should elect eighteen semester hours from each of these three. If the major is outside these groups, the head of that department will be the adviser with the approval of the Dean of Arts and Science Division.

At the middle of the Sophomore year the major subject will be chosen and the faculty adviser will be the head of the major department as before said. For Freshmen and first semester Sophomores, a committee will be chosen from the faculty to approve the subjects elected.

This plan goes into effect with the present Sophomore class and if it interferes very much with his studies any one can follow the old requirements for the present.

STUDENTS ATTEND SOCIAL AT CONGREGATIONAL CHURCH.

A number of the New Hampshire College students enjoyed a very pleasant social at the church parlors Friday evening. Readings were given by Miss Ruth Stevens and Miss Frances Hoffman with a piano solo by Miss Priscilla Benson. After the program games were played for the rest of the evening and refreshments were served by the ladies of the church. All who attended reported a jolly good time.

MARRIAGE OF E. D. FRENCH '10, TO MISS ROBINSON

"Chuck" Davis, '15, Ass't Chemist in Experiment Station at M. A. C.—H. L. Whittemore Announces Engagement.

"Chuck" Davis, '15, who has been working in the chemistry department of the Experiment Station here since his graduation, has now a position as assistant chemist in the Experiment Station at the Massachusetts Agricultural College at Amherst.

Charles W. Kemp, '11, who has been teaching agriculture at the Theodore N. Vail School at Lyndonville, Vermont, has resigned his position there. The director of this school is Arthur R. Merrill of the class of 1904, New Hampshire College.

T. F. Twomey '13 has passed the civil service examinations and has received a position in the Pittsburg bureau of mines. He is working under R. E. Rittman, the man who recently refused a million dollars for his invention of a new and cheaper process of making gasoline.

J. D. Clark, '06, professor of Chemistry at Albuquerque, New Mexico, recently delivered a lecture at his university on "The Effect Of the European War on The United States."

On December 30, E. D. French, '10, an inspector for the Western Union Telegraph company, was married to Miss Idella P. Robinson of Exeter, a graduate of Burdette College in 1911. The marriage was performed at the Arlington Street Church, Boston. T. A. Thorpe, '10, also in the employment of the Western Union, acted as best man, and Mrs. Thorpe, the bride's sister, as matron of honor.

R. M. Dole, 2 yr. '10, who has been farming at Proctorsville, Vt., has moved with his wife and family to Brentwood and taken a position at Deer Hill Creamery.

H. B. Catlin, '12, is attending Hartford Theological Seminary.

H. L. Whittemore, '12, recently announced his engagement to Miss Marion E. Pillsbury of Londonderry, N. H.

B. H. Rolfe, '09, is assistant teller of Mechanics Bank in Concord.

R. M. Wright, '08, is associated with Gen. Frank Streeter of Concord in the practice of law.

J. P. Bonardi, '15, who is now an assistant in the department of chemistry of West Virginia University, Morgantown, West Virginia, is considering taking up graduate work at the University of Wisconsin.

TWENTY-EIGHT CALIFORNIA BOYS WIN 9000-MILE JOURNEY.

Twenty-eight California boys have won the twenty-eight largest prizes ever offered for victory in a boys' agricultural club crop-growing contest.

This prize is a 9000-mile journey from the Pacific to the Atlantic and back again, conducted by the University of California, for every one of the twenty-eight young champion farmers. These crop-growing contests, organized by the University of California, have resulted in astounding examples of what the boy farmers can win from the fertile soil of California by using modern methods. They have opened the eyes of the boys' fathers. The neighbors for miles around have marveled at what boys have accomplished as compared with what most members of the farming community have been doing, with the traditional methods.

Many hundreds of the other members of these boys' clubs made records almost equally good. There were 309 of them in attendance at the annual convention of the boys' agricultural clubs of California, at the University Farm on October 14 and 15—the greatest attendance ever recorded anywhere in America for such a convention of boys' crop-growing contest clubs. Every one of them went home to his own community an enthusiastic missionary of profit, pride and pleasure to be won from growing crops and raising farm animals in the new modern ways which mean cheaper and better food for the world and prosperity and independence for the farmer.

STUDENTS APPRECIATE MOVIES GIVEN WITH COLLEGE MACHINE.

The moving pictures shown in the gymnasium Tuesday evening, as the first number of the series of free entertainments provided by New Hampshire College were thoroughly appreciated by a large audience composed of students, faculty and townspeople.

The reels were well selected to appeal to students of every department. The Zoology student and especially the members of the Home Economics department were greatly interested in the first reel, which showed the Life and Evolution of the silk worm. These pictures were particularly good, showing the silk worm at home among the mulberry leaves, and emerging from its cocoon, a gorgeous, white winged butterfly.

The second reel, "A Knife of Fire," and "Liquid Air" appealed strongly to the Science students. Some very interesting experiments were done with liquid air, the one which impressed the audience the most being that which two coals were thrown into the liquid, and, upon being removed, one was plunged in a tank of water and recovered, while the other was easily broken into pieces with a tap from a hammer.

The third reel, "Glimpses of Yellowstone Park," showed the wonderful scenery in the National Park, very realistically. Pictures of the tame deer and bears in the park were shown, as well as the usual views of geysers and canyons.

The "Octopus" and "Cuttlefish," were presented in the fourth reel and presented so vividly that the audience was glad to realize that they were safely secured to the screen. "The Octopus at Home," showed this horrible animal swimming about in the water with outspread tentacles.

The last reel, "Birth Of A Flower," and "Culture of the Dahlia," was shown in colors and was the most beautiful of all. Eight days growth of the flower was given in two minutes and it was a truly wonderful sight to watch the huge petals unfolding.

Members of the college orchestra played between the reels and as always the music was greatly enjoyed.

The next entertainment of this nature will be scheduled on such an evening as will not interfere with other student functions and the time will be moved forward to 7.30.

HIGHLY EFFICIENT CAMPUS RESTAURANT AT MINNESOTA

The campus restaurant proposition probably is better worked out at Minnesota than at any other school in the United States. Over one thousand students are fed at every meal with a cost to each student of twenty-one cents per day. This is remarkable and is an example of extremely high efficiency. Practically everything is done by machinery that can be done that way. The potatoes are peeled by machine; the bread is cut by a large machine which takes but one attendant, and which can cut enough in twenty minutes to serve a meal; all the cooking is done by gas and under high pressure so that time is saved; the dish-washing is done by two people, a man and a woman who do not have to touch the dishes with their hands at all. All the meals are served from a central kitchen and regular help is employed all the time. The proposition of having students do the work met with absolute failure there, so it was decided to install a high efficiency kitchen. Each person in the kitchen is trained to do some one thing and it is necessary that he know how to do it in the shortest possible time.

A large refrigerator is built in the basement and there is enough butter and ice cream stored there to last for several months ahead. It is purchased in the raw form and made up in the shop, so that not only is the best got but money is saved on it. In fact, most of the food-stuffs are purchased from the producer direct getting the better quality at the lowest possible price.

A cafeteria is also run along with the restaurant. Of course it costs a little more to get meals at the cafeteria on account of the variation in the number to be served. There must be some insurance for the proprietors against loss but on the whole it is cheaper than at most boarding houses.

There is also a dormitory on the campus at Minnesota and room, heat, laundry, nurse hire, and good meals are furnished to the students for exactly 40 cents per day. This is getting it down to bed rock and is certainly a worthy example of efficiency and economy.

LIQUOR PROBLEM DEBATED BY LIBERAL ARTS CLUB

Enthusiastic Meeting of 50 Students in Agricultural Club Room—President Discusses Plans.

"Shall the United States Constitution be amended to prohibit the manufacture and sale of intoxicating liquors" was the topic under discussion at the first meeting of the Liberal Arts club in the Agricultural Club room last Friday night. The program was in charge of C. C. Bond, chairman of the Economics committee who led the discussion for the affirmative. Messrs Russell and Brown spoke on the negative and the question was thrown open for general discussion. The debating was carried on with a good deal of enthusiasm and considerable oratorical ability was displayed. Prof. Scott made a stirring appeal for the preservation of the constitution and for the submission of all such problems as the liquor traffic to local, county or state option only. The general sentiment was decided in favor of prohibition but against a constitutional amendment to that effect. There was an attendance of fifty at the meeting.

J. F. BABB.

Robert McCartney, president of the club was chairman. He spoke for a few moments on the purpose of the club and some of the plans for future meetings. He announced that the next meeting would be held in conjunction with the College Christian association and that J. Franklin Babb of Haverhill would speak on "The Problem of the Country Church." Mr. Babb is well known at New Hampshire having spoken here upon several occasions. The club now has 100 members and an artistic certificate of membership is given upon payment of the dues, fifty cents per year.

FRESHMAN GIRLS FURNISH PROGRAM FOR WOMAN'S LEAGUE.

The January meeting of the Woman's League was held in the Girl's Rest Room in Thompson Hall, Wednesday, January 12. After a short business meeting an interesting program was furnished by freshman girls, under the direction of Miss Frances Hoffman. Piano solos by Miss Ethel Kelleher, Miss Priscilla Benson and Miss Frances Hoffman, and readings by Miss Lucille Gove, Miss Ruth Stevens, and Miss Frances Hoffman were enthusiastically received. Refreshments were served by freshman members of the Home Economics department.

CREDIT INCREASES POPULARITY OF TUFTS DEBATING SOCIETY.

Debating at Tufts College, revived into popularity last year, bids fair to become more popular than ever this season because of the many new additional attractions that the Forum, the college debating society, has to offer to the students interested in the art of the platform.

The department of history and public law has offered participants in college debates, who discuss questions coming under the course in American Government, credit in connection with their work. This step alone served to popularize the Forum and its meetings. The faculty also has passed favorably upon the recommendation to give credit to debating, which places the society in a way to develop teams and individual debaters in a very advantageous way.

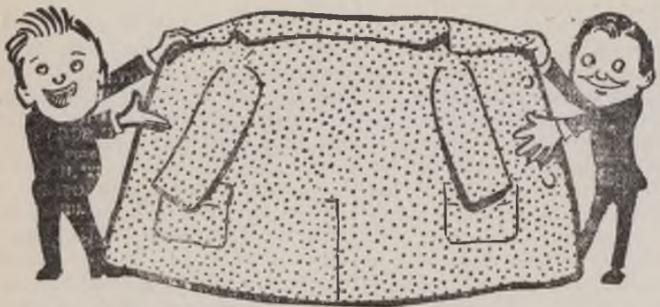

To comply with the demands of the faculty in allowing debating to count toward a degree. Pres. Wilson has announced several changes. Meetings are to be held once each week throughout the entire college year, to be attended by one member of the faculty committee on debating. Each debater must take part in at least six regular debates. Credit will be given each member of an intercollegiate debating team. Not more than three term hour credits can be obtained by any student in his college course.

Public law and political questions will be the most prominent on the schedule of debates this year. It is expected that Tufts, Clark and Bates will again hold their triangular debate.

Georgia chartered, built and conducted the first college for women in the world.

The University of Paris, the oldest university in the world, was founded in 1200, six years before the founding of Oxford.

WOMEN'S CLUBS FEDERATION HOLDS CONFERENCE HERE

Twenty-Eight Societies Entertained by the Durham Club—All Day Program With Many Speakers.

A conference on Home Economics under the direction of the Home Economics Committee of the New Hampshire Federation of Women's Clubs was held at the college gymnasium on January 14, 1916. The conference was in charge of Mrs. Alpha H. Harriman of Laconia, chairman of the committee, and the federation was entertained by the Durham Woman's Club. The visitors represented 28 women's clubs of the State and were welcomed for the college by Professor E. R. Groves, Dean of the Arts and Science Faculty. The welcome for the Durham Woman's club was made by Mrs. Louis H. Snell, and the response for the federation was made by Mrs. Frederick J. Shepard, the federation president.

The principal address of the morning was that of Dr. Nellie E. Goldthwaite, Professor of Home Economics of New Hampshire College. Dr. Goldthwaite explained that home economics did not mean instruction in cooking and sewing only, and went on to give her hearers an idea of the broad scope of the department here. Just before Dean Goldthwaite spoke Miss Sara E. Greenfield of Rochester gave a violin solo.

In the afternoon session there was much music by the girls' glee club of the college and at four o'clock tea was served by girls of the Home Economics department, in the Rest Room at Thompson hall. The conference was well attended, and great interest was shown in the subject. The program follows.

Morning Session 10.45 O'Clock.

Welcome, Mrs. Louis H. Snell,

President Durham Woman's Club

Response, Mrs. Harriman

Greetings, Professor Ernest R. Groves,

Dean of Arts and Science, N. H. C.

Greetings, Mrs. Frederick J. Shepard

Pres. New Hampshire Federation.

The trustees of the college have made an appropriation for the construction of a carriage road in the college woods. Its construction will be under the supervision of the forestry department.

CADETS TO GET CERTIFICATES AT END OF MILITARY COURSE.

The War Department at Washington has issued a bulletin that should prove of much interest to the new students of New Hampshire College. This bulletin states that as a result of a conference between a committee of the War Department and a committee representing the association of Military Schools and Colleges, the War Department will issue to the graduates of military schools and colleges at which officers of the Army are detailed as professors of military science and tactics, who have pursued the military course, a certificate. This latter will certify, in the case of New Hampshire College, that the holder graduated from the college, in a certain class, that he has successfully completed the prescribed course in the military department, and having demonstrated his military capacity by examination, is recommended by the proper authorities for a certain rank in the Volunteers or Reserves, being fitted therefore mentally, morally and physically. A record of the certificate is to be kept on file by the War Department.

The examination is to be both written and practical and all seniors who have had drill will take it.

COLLECTION OF REFERENCES ON EDUCATION PLACED IN LIBRARY.

Several books and periodicals, in which are treated the various phases of education and psychology, have recently been placed in the college library by that department.

Perhaps the most interesting of the books is a Encyclopedia of Education consisting of five large volumes with about four thousand pages. It is edited by Paul Munroe, Professor of Education in Teacher's College, Columbia University. In his production of this work he had the assistance of departmental editors and over one thousand contributors from various countries. Each of the men assisting him is an authority or specialist in the field in which he writes. Practically every phase of education, and every educational type of the past and present and in every country on the face of the globe is treated in a scientific, comprehensive and attractive manner. The work is well illustrated and in every way a masterpiece, being unlike anything ever before produced.

Little Jack Horner sat in a corner Eating a domestic science pie, He stuck in his thumb, and pulled out A hairpin and a button and a shoestring And a wad of spearmint and said, "Oh, what careless things those girls are." Carlisle Arrow.

Several from the college attended the Leap Year Ball at Dover given last Thursday evening by the Dover Girls Club. The dance was held in the club rooms which were tastefully decorated for the occasion.

EXAMINATION SCHEDULE.

The following is the final draft of the examination schedule. Attention is called to the fact that those courses taken by 10 or less students are not listed, being arranged for by the instructor in charge.

GREEK THEATRE AT U. OF W.

The University of Washington will have a Greek Theatre like that of California, if the plans of Dean A. S. Hagggett are realized. He has presented a plan to President Susallo of the university for the construction of an amphitheatre resembling the Greek Theatre. The old wooden amphitheatre a relic of the Alaska-Yukon-Pacific exposition, is to be torn down, as it is in a state of ruin. Donations will be sought, to cover the cost of construction. It is estimated that \$500,000 will be needed.

If you have stained or soiled your clothes, dont worry, we can remove and dry cleanse them so they will look like new.

Leave your work with Mr. Chas. Durgin, '18, Kappa Sigma House, all work called for and delivered in three days.

Pressing, Cleaning, Repairing and Dyeing satisfactorily done and prices are right.

AMERICAN DYE HOUSE,

Somersworth, N. H.

Chas. Durgin, '18, Agent, Kappa Sigma House, Durham, N. H.
