SOPHOMORE'S WIN INTER-CLASS CONTEST

NOISLESS GAME IS FAST, CLEAN AND INTERESTING

FINAL SCORE OF 17 TO 13

Score 9-6 for Freshmen at End of First Half, Then Sophomores Catch Up

In the annual interclass basketball game played Saturday evening in the Gym the sophomores came from behind in the second period and invested a 17 to 13 victory from the freshmen. At the end of the first half the 1919 men had nine points to their opponents six. When Bell made the score an 11 to 11 tie in the second period by hooping the ball on a free try after a foul the sophs braced, took the lead and kept it. "TRADITION" FEATURES.

The game was fast, clean, interesting, and all the features that have characterized previous interclass basketball contests—all except noise. The silence that reigned would have made a chapel speaker feel that he was actually being appreciated. The shattering of the old custom of making this a slam-bang affair was commemorated by the hanging of a stuffed figure, labeled "Tradition" from the steel girders in the center of the gym.

Organized cheering was no small feature of the game. Dame and Libby contorted themselves before the sophomore ranks to drag out the cheers in rhythm while Mitchell and Smith generated the shouts from the 1919 delegation.

FIRST SCORE BY DRESSER.

The first score of the game was made by Dresser of the freshman team after two minutes of play. An instant later "Joe" Morrill hooped one for the sophomores. The end of the period found things looking rosy for the freshmen with a 9-6 lead. Reardon's three baskets in themselves equalled the results of the efforts of the sophomore quintet.

SOPHS CATCH UP.

In the second half the sophomores gradually caught up and then just as gradually increased their lead. The final whistle prevented the spurt that the freshmen "might have made" on the home stretch

SUMMARY.

1918	1919
Bell rf	If White, Hilliard
Hewey lf	rf Reardon
Morrill, Humiston c	c Dresser
Ford, Cann rg	lg Brosnan
Jenkins, Bennett, Sawyer, lg	
rg Morrison, Spencer, Owen	

Score: Sophomores, 17; Freshmen 13.
Goals from floor, Hewey 1, Bell 2, Humiston 1, Morrill 3, Dresser 1, White 1, Reardon 4.
Goals from fouls, White 1, Bell 3.
Referee, Craigan of Portsmouth, Timer, Brackett; Scorer, Tapley. Time, two twenty minute periods.

"THE POLICY WITH SALOONS?"

"What, at the present time, would be the wisest policy with regard to the saloon?" will be the subject under discussion at the open forum conducted by the College Christian association in the gymnasium Sunday evening at 7 o'clock. Notice the time of day.

This will be an open meeting, both men and women of the student body and faculty being invited. Special music will be a feature.

3573 PEOPLE ATTEND ELEVEN MOVABLE SCHOOLS THIS YEAR.

The work of the Movable Schools for the past year has just been completed. Eleven schools were held, with a total attendance of 3573, or an average of 33 persons each session. An increasing interest was shown from the beginning of each meeting.

Read the editorial "Curing the Hams," "The Dartmouth," March 6, Monday.

A. E. BARTLETT, '15, GETS PHILIPPINE APPOINTMENT

To be Employed as District Supervisor by U. S. Department of Education—Notes On His Past Career

Mr. Arnold E. Bartlett, '15, has resigned his position as assistant in the modern language and mathematics departments and will leave May 1 for the Philippine Islands where he will be employed as a district supervisor by the United States Department of Education.

Mr. Bartlett, who is the son of Mr. and Mrs. N. A. Bartlett of Manchester, was graduated from the Manchester High School in the class of 1910. While in High school he was prominent in all school affairs and was at one time editor in chief of the "Oracle," the Manchester High paper.

He entered New Hampshire College in the Fall of 1911 and was enrolled in the Arts and Science division, specializing in mathematics and psychology. He was graduated in the class of 1915; was class historian for four years, and in his Junior year he was managing editor of the New Hampshire. Last March he passed the civil service examinations, and two weeks ago he received his appointment from the Insular Department at Washington.

LEAVES MAY 1.

Mr. Bartlett will leave here May 1 for Seattle by way of the Union Pacific, visiting en route Buffalo, Chicago, Omaha, Salt Lake City, Tacoma and Portland. After spending a few days in Seattle he will go to Vancouver and from there he will sail on the Canadian Pacific steamship line, taking the Northern route, and will touch at Yokohama, Kobe and Nagasaki, arriving at Manila about June 5.

He intends to be gone for two years.

REGIMENT ORGANIZED BY COMPANIES TO FIGHT FIRE.

Should a fire occur in Durham, Lieut. S. J. Sutherland has provided an efficient machine to fight it in the college regiment, whose component parts have been so assigned to duty that all the departments of fire fighting will be well covered. Let but the fire whistle blow the signal and company A will seize the hose cart and drag it from Conant Hall, to the scene of the fire, connect it to the hydrant and, after turning on the water, direct the hose. Lieut. Col. D. P. Crockett is appointed fire marshal with Majors W. I. Waite and C. S. Pettee as assistants. Company C is designated as ladder company and will collect all necessary ladders and carry them to the scene of the fire. E company will have charge of all indoor stationary hose, while F company forms a cordon of gards around the burning building to keep out unauthorized intruders. Companies B and D are to act as salvagers and save movables and valuables, while the band and signal corps are general utility men.

TALK ON SUBMARINE AND AERIAL WARFARE IN LECTURE COURSE.

The number on the lecture course program to follow Mr. Bingham will be a joint illustrated lecture by Lieutenant Miles of the Navy, and Earle Ovington, aviator. Their subject is to be, "Above and Below In Modern Warfare," and will be presented Friday evening, March 31. Lieutenant Miles will lecture on the relation of the submarine to warfare, and Mr. Ovington will take up the side of the Zeppelin and the aeroplane.

It has been the intention of the lecture course committee this year to have, as one speaker, a man prominent in public affairs; but because of Congress and the various state legislatures being in session now, these men are too busy to be able to come here. Attempts have been made to get some of the best known men of affairs to speak here; but as yet they have been unsuccessful. The plan has not been given up, however,

TWO SPEAKERS AT CHAPEL EXERCISES

MR. W. K. MOOREHEAD OF INDIAN SERVICE COMMISSION

ILLUSTRATED TALK ON INDIAN

Secretary Dooley of Educational Department of Westinghouse Manufacturing Company Speaks.

Chapel exercises, Wednesday, March 15 took the form of an illustrated lecture on the Modern Indian and a talk on Idealism and Industrial Efficiency.

Mr. W. K. Moorehead of the Indian Commission compared the progress and education of a few thousands with the poverty and pauperism of the tens of thousands, brought about by unfair treatment.

Before the coming of the white man, the Indians of the plains depended upon the buffalo for all forms of sustenance. After the buffalo became extinct, however, the Indian was obliged to give up some of his roving habits and settle down to tilling the ground. As a general thing the Indians became peaceful and contented. The last fight occurred at the time of the Wounded Knee fight in 1890. A party of Sioux Indians were having a Ghost Dance when soldiers came to try and stop it with the result that 51 soldiers and 186 Indians, men, women and children, were killed. As a general thing the Indians were peaceful, the fighting being done by roving scattered bands.

The Pueblo Indians in South Western United States only number about 1100 or 1200, and have made but little headway in civilization.

NAVAJO INDIANS.

The Navajo Indians number about 32,000, and get along very well indeed where left alone and not spoiled by absorbing the white man's vices without his virtues.

Indian Territory before it became a part of Oklahoma was governed largely by Indians. The inhabitants were healthy, happy and contented, well off, and owned good houses. After entering Oklahoma, the Indians were robbed right and left by unscrupulous grafters. Fake money was paid them for valuable gas and oil lands, until they were reduced to a state of pauperism.

In Minnesota the same state of affairs prevailed; and, under the unnatural living conditions into which they were forced by their poverty, tuberculosis became prevalent.

SECRETARY DOOLEY.

Following Mr. Moorehead, Secretary Dooley of the Educational Department of the Westinghouse Manufacturing Company showed how idealism and industrial efficiency were really synonymous; and told of the very extensive welfare work that is being done by his company at Pittsburgh.

GIRLS' GLEE CLUB TO PRESENT OPERETTA, "THE JAPANESE GIRL."

"The Japanese Girl" is the operetta to be given by the Girls' Glee Club in the gymnasium Friday evening, March 24.

The solos will be sung by Miss Julia Roberts, leader of the club, and other principal parts, will be taken by Misses Doris Dudley, Sarah Greenfield, Marian Lewis, and Caroline Perkins. The chorus will contain at least twenty girls. Both costumes and scenery are to be Japanese, and a Japanese dance will be one of the features of the evening.

"The Japanese Girl," was written by Charles Vincent, author of "The American Girl," which the Girls' Glee Club presented so successfully last year.

There will be dancing after the concert.

LADIES NIGHT OBSERVED BY COOPERATIVE SOCIETY

Celebration Includes Very Unusual Program—Interesting Discussions of "Co-op" Matters

The first annual "Ladies' Night" of the Durham Cooperative Society, which consists of thirty-two members of the faculty organized for the purpose of buying groceries and other household necessities, was held Tuesday evening, March 14, at Morrill Hall in the Agricultural Club room.

The celebration consisted of songs, stories, good things to eat and an unusual program, in fact a very unusual program, including several special features.

PROGRAM

Call to order,	President
Roll Call song,	"Co-op" quartet
Reading of minutes	G. C. Smith
Correction and adoption of minutes	
Treasurers report,	O. V. Henderson
Auditors report,	R. H. Porter
Unfinished business,	
Tryouts for "Co-op" Quartet,	
(a) Hewitt, Gourley, Moore, Henderson.	
(b) Scott, Curry O'Kane, Huddleston.	
(c) Kendall, Sutherland, Woodward, Wolf.	
(d) Rasmussen, Ritzman, Eekman, Perley.	

Taking of Grocery order
Song (by request) "Co-op" quartet
Banjo Solo Tom Laton
Spelling Match,

In charge of C. L. Simmers.
Members of the "Co-op" pianographed
A. E. Richards
Reflectoscopic Guessing contest
Refreshments, "A la Co-op."
Dancing.

"CO-OP" QUARTET.

The regular quartet consisted of Professors Richards, Steek, Whoriskey, and Taylor.

The above program was duly censored by the official censor of the "Co-op," Mr. Current Electric Hewitt.

The meeting was opened by devotional exercises by Professor F. W. Taylor.

The highest award in the tryout for the quartet was given to squad (b). (Professor Scott received the booby prize.)

The reflectoscope contest was a tie between Mrs. Woodward and Mr. Young.

NEW BUSINESS.

Under the head of new business, Professor Hewitt talked on the advisability of having a cooperative kitchen maid, Professor Gourley brought up the matter of having "patent hair restorer" for himself and several other members, while Mr. Henderson called attention to the mortgage held by the "Co-op" on Professor Richards auto.

PROFESSOR E. R. GROVES F NISHES OUTLINES OF RURAL SOCIOLOGY.

Professor E. R. Groves, has just finished his book on "Outlines of Rural Sociology," which will be published in August by a New York firm.

Professor Groves is one of the authorities in this country on rural sociology and his experience embodied in this book will make it of great value to those in any way interested in the present day problems of rural communities.

BOOK AND SCROLL.

The regular meeting of the "Book and Scroll," was held in Thompson Hall, Tuesday evening, March 15. The works of Ella Wheeler Wilcox were discussed by Miss Marion Dudley and Miss Helen Weston.

AGRICULTURAL CLUB HAS ENTERTAINMENT

SEVENTY-FIVE COUPLES ATTEND EPOCH MAKING EVENT

MANY AND UNIQUE FEATURES

Success Crowns Efforts of Pres. "Walt" Chamberlain—First Dance Ever Held in Morrill Hall

Guests of the Agricultural Club on Monday evening, March 13, were lighted along the streets by torches of Red Fire, the occasion being their annual Ladies' night. This event was epoch making in a measure as it was the first dance which has ever been given in Morrill Hall. The lower halls of the building were decorated with Japanese lanterns, while the stairways were tastefully adorned with bunting in the college colors, with embankments of evergreens. The entire upper floor of Morrill Hall was thrown open for the occasion. The agricultural Reading Room was transformed into a reception room, with rugs, settees, and easy chairs. At opposite ends of the room were "cosy" corners, decorated with yellow and white, this being the prevailing color scheme of the upper floor.

Punch was served in the Hallway under a canopy of yellow and white, against a background of fir.

SEVENTY-FIVE COUPLES.

Seventy-five couples enjoyed dancing in the Agricultural Club Rooms. The musicians were nearly hidden from view by masses of Red Lilies, Callas and Palms, with an intermingling of Cinerarias, Lantanas, and Penderis Vitcheii. A frieze symbolical of the farm harvest ran along the walls of the hall while overhead were artistic drapings of yellow and white.

From start to finish the occasion was replete with surprises.

Novel lighting effects, producing sudden changes of color, and a "winky blinky moon" made the event unique. Dancing by the light of hundreds of "sparkers," or indoor fire works, or amid clouds of confetti will long be remembered by those present.

FAVORS.

Favors consisting of paper hats, fans, horns, rattles, etc., gave almost a carnival aspect to the occasion.

The program had many interesting fetures to it. C. H. Young gave an interpretation in costume of Dvorak's "Humoresque," and W. E. Chamberlain gave several readings, among them being "Biff Perkin's Toboggan Slide." The college quartet in some original selections made a few much appreciated local hits, while Messrs. Weigel and Batchelor played a violin duet, "The Dream of the Shepherders," by La Vitzky. Perhaps, one of the most laughable features was the joke basket on the engineers. In this was concealed a lusty infant representing the new Engineering Club.

CREDIT TO "WALT"

The whole affair is a great credit to the man, President W. E. Chamberlain, who conceived and executed it in such a successful manner. "Walt" certainly is to be congratulated on the way the Aggie Club has prospered under his leadership, and he has set such a standard in efficiency that those coming after will have to go some to equal it.

The patrons and patronesses who received the guests were Dean and Mrs. C. H. Pettee, Director and Mrs. Kendall, and Prof. and Mrs. F. W. Taylor.

The committees in charge were: W. E. Chamberlain, chairman; Executive: W. J. Nelson, Chairman; P. B. Badger, V. A. Perkins, W. T. Tapley, P. J.

DURHAM, N. H., MAR. 18, 1916

EDITORIALS.

The next issue of the "New Hampshire" will come out under the auspices of the Agricultural Division and will be an eight page special edition, completing the trio of special issues that the paper has published in order to acquaint the people of the state better with their state college.

IT PAYS TO ADVERTISE.

That "It pays to advertise" is undoubtedly thoroughly believed by the editors of the 1917 Granite as evidenced by the various means resorted to in bringing the annual publication before the eyes of the college. Wherever one goes he is confronted by some grotesque work of art or multi-colored placard announcing the fact that here is the last opportunity to sign up for a Granite; or he is deluded into reading eight stanzas of some pathetic poem, the last line of which contains the climax, "have you ordered your Granite yet;" or perhaps one discovers a stamped and addressed envelope lying on the floor of the reading room or in the lobby of T Hall and picks it up only to read the legend "the 1917 Granite is the best ever;" and as though all this were not sufficient, when the harmless and much abused student is fatigued from craning of neck and bending of back from over-participation in the above forms of exercise, he sees in large letters Danger, Look Up, only to find a young Zeppelin suspended from nothing, floating in the atmosphere, bearing the name "1917 Granite," and, when he would rest his eyes and mind in the quietness of the weekly convocation he is forced to sit facing a large bulletin board bearing the same inscription. Unless all signs fail, and these "signs" cannot, the subscription list of the Granite will surpass that of former years by a considerable number.

AGAIN NEXT YEAR.

The intercompany basketball league which completed its first season last Wednesday when Company C won the final contest by defeating Company E., has been without doubt one of the most significant athletic features of the year. Not only has a great deal of new material been uncovered, but a healthy competition between the companies has been aroused and an opportunity has been given for the average man to get into a game which has formerly been open only to men of ability. Furthermore, with a lack of required physical exercise necessitated by indoor drill periods, the league has presented a means of satisfying the hunger for bodily action which every live man craves. It is also another method of stimulating college spirit as well as making for greater efficiency in the military department. Coach Cowell and Lieut. Sutherland deserve a great deal of credit for this new venture which will without doubt be repeated each year.

DANGER.

It is bad enough to have to walk up and down a poorly lighted stairway at

any time, but when one company of the battalion, carrying rifles and side arms, meets another company similarly equipped on the narrow turn of the stairs leading to the basement of the gymnasium, the situation is not only unpleasant but actually dangerous. This is really a serious matter, and the situation, which could easily be remedied by the installing of one light, should be looked into at once by the proper authorities, before some one is injured. Day or night this stairway is in almost absolute darkness and the careless handling of a rifle when the stairs are crowded as they are, at every drill may result in serious injury. This darkest spot in the gym is a menace not only to cadets at drill, but to everyone who makes use of the stairs. Let there be light.

A CHAOTIC CONFUSION.

Coat racks full, overcoats three and four deep on every hook, railings piled high with clothing, door handles and every other suitable projection supporting a hat and even the floor and umbrella racks utilized to their fullest extent; this is the scene that greets one upon entering the library between 8 and 10 o'clock any morning. The classes which meet in the library have trebled in the past two years, yet no additional wardrobe conveniences have been provided. The situation is very unpleasant to say the least and often proves destructive to the clothing. It is not at all in keeping with the efficiency policy of the college and should be remedied as soon as can conveniently be done.

A GAME STILL UNPLAYED.

Oh what is so rare as a day in March when spring-like winds should blow, But a regular, roaring, wintry blast is whirling the late, cold snow. Then is the time when basket-ball games are nearing their final call To be laid away with the foot-ball scores in a stack that is dusty and tall. These last few weeks though, have been plumb full of games of varied grades From those by seasoned veterans won or by soft greenhorns played. Now, by the schedule on billboard tacked, the final game is done For the intercompany meet is o'er and company C has won. These "soldier" games have been some games and have shown to sportsman (true) That the college team didn't use the "stars" when they skipped Doc Bell (and you. There's one more team that may yet reveal a bright and shooting star And that's the faculty, young and old, no matter who they are. Before they take the baskets down, our noble, stately profs. Should practice up a night or two before the game comes off And then should test their speed and skill with those who for four years Have listened to their classroom dope with mingled joys and fears. The seniors, sure, will gladly play a gentle, harmless game And prove to all without a doubt, that college makes 'em tame. We therefore hope and even beg that one more game be played And on the seniors or the profs the victor's wreath be laid.

REMINDER FOR 271.

All have been interested in the diagrams of the class averages, which were recently placed on the bulletin board in Thompson Hall. "Boost the class average," is now the slogan. Here is another way in which one may boost his class. The following list will show how the unpaid subscribers of "The New Hampshire," are distributed.

Class of 1916	34
Class of 1917	31
Class of 1918	69
Class of 1919	43
2 yr. Agr. '16	25
2 yr. Agr. '17	23
2 yr. Eng. '17	14
Faculty	19
Exp. Sta. Staff	13

If you are numbered among the above please remit either by mail to The New Hampshire, Durham, N. H., or call at Prof. C. E. Hewitt's office, room 1-27 Demeritt Hall.

A circular outlining the Boys' and Girls' Club work for the coming year has been written by L. A. Carlisle who has charge of this work.

MU ALPHA CHAPTER OF CHI OMEGA HAS ANNUAL DANCE

Girls' Gymnasium Well Decorated for the Occasion—Many Out-of-Town People Present

The first formal dance of the year was given by Mu Alpha Chapter of the Chi Omega fraternity in the Girls' gymnasium at Thompson Hall, the evening of March 10. In contrast to its usual appearance, the one-time assembly hall presented a striking scene in its pleasing decorations of cardinal and straw flowers and streamers, evergreen and Japanese lanterns. The Misses Cressey, Richmond, Ada Langley, Kelliher, Lauders and Greenfield served as aids. After an overture by the orchestra, which consisted of Messrs. Ward, Hoffman, Dodge and Prescott, came the grand march, lead by Miss Bernice Reed, '16, and Mr. R. C. Wiggin, '17.

A carefully arranged program of twenty dances was then enjoyed for the remainder of the evening. At intermission a delicious sherbert was served in the girls' rest room where a multitude of chairs and settees had been arranged for the dancers. The dance programs were catchy affairs in black leather, souvenir style with the fraternity crest stamped upon the front, and bound with a cord and tassel of cardinal and straw. All agreed in pronouncing it a most enjoyable spent evening.

The patron and patronesses of the dance were Dean N. E. Goldthwaite, Mr. and Mrs. G. C. Smith and Miss Caroline Black. The guests were Misses Dudley, Mary Dole, and Genevieve Charbouneau of Durham, Misses Matheson, Simons, Foster, and Hyland of Jackson College, Miss Cynthia Knowles of Rochester, N. H., Miss Delia Langley of Durham, Miss Edith Hardy of Concord and Messrs. Wiggin, Whittemore, Cutts, P. Batchelder, Perkins, Degnan, Blake, J. Thompson, Goodwin, Parnell, Weigel, V. Batchelor, Chase, Westover, Pettee, Wentworth, Lynde, Nevers, Sullivan, Willard, O'Brien, Durgin, Bugbee, Gar-side, Mitchell, Steele, Manter, Hurd, Ordway, Rogers, Boomer, Tapley, Cahalane, Sanders, Rollins, Sleeper, Purington, T. O. Smith, Grant, A. Bartlett.

COLLEGE GLEE CLUB GIVES GOOD ACCOUNT AT HAMPTON.

Thursday the noble band of musicians composing the Glee Club journeyed from this metropolis to the city of Hampton where one of the most successful concerts of the year was given before a large and enthusiastic audience.

One of the features of the trip was the impromptu serenade given the brakeman on the 5.32 train who has shown so much courtesy to New Hampshire students. From Exeter the club rode on one of those bob cars that rock and roll on a straight away and pitch and tumble around the bends. (That road is largely bends, by the way.) The hall was full (not inebriated) before eight o'clock and one of the seven wonders of the age was accomplished—namely a program on time. The hits of the evening were made by the quartet which received five encores, by "Doc Bell in his local" —and by one of the men in his solo dancing after the concert. (Ask T — if he stole anybody's girl.)

The Club returned to college Friday morning fully satisfied with the trip and the hospitality of Hampton people.

115.

The Business department of The New Hampshire believe that this year's paper is the best in its history, this opinion being based on the large number of compliments which are received weekly from subscribers. In order to publish a good paper it is very essential that it be well financed. We wish to thank our Alumni subscribers for their support, and also call to their attention that there remain 115 Alumni who have received every issue of this year's New Hampshire and have not yet remitted their \$1.00, in payment for their subscription. A prompt payment of these subscriptions would be appreciated.

MU CHAPTER PLEDGES CHEMICAL SOPHOMORES TO ALPHA CHI SIGMA.

Mu Chapter of Alpha Chi Sigma, honorary chemical fraternity, has pledged the following chemical students of the college: Harry C. Atkins, '18, of Franklin, N. H.; Herman C. Fogg, '18, Concord, N. H.; Mertan B. Lane, '18, Ashburnham, Mass; and Elmer N. Sanders, '18, Durham, N. H.

B. E. CURRY DISCUSSES THE POTASH SITUATION IN U. S.

"If the European War should stop now, there would be no potash in the fertilizers sold in this country in 1917," declares B. E. Curry of the experiment station. "The potash deposits are in a valley in Germany and on account of their disuse are probably filled with water. It would take many weeks if not months to pump this out and then the supporting timbers would have to be renewed.

"Practically all the importations into this country are brought over before September first, for manufacture into fertilizers for the following spring. MONTANA MINE.

"There is a small mine in Montana but this is of course not sufficient to supply the whole country. We have plenty of potash in the feldspars of New Hampshire but it would take a long time to make this into plant food, and even then the cost would be prohibitive, except for war prices. The war is sure to stop sometime, and when it does, the price will fall; so of course, it would not pay to put any large amounts of money into reducing plants in this country.

DEPOSITS IN SPAIN.

"Deposits of potash have been discovered in Spain, but as yet nothing has been done to mine from them, except that certain fertilizer interests in this country have an option on the land and are making a topographical survey. In the event of finding paying deposits," says Mr. Curry, "it would be many years before we could get any from these."

At Purdue, they publish in the "Exponent" a list of Freshman who have failed to wear their freshmen caps. The list is called the "Dishonor Roll."

THE MILK IN THE PAIL THE COW KICKS OVER IS LOST FOREVER.

AND the butter-fat that goes into the can through the skim-milk spout of a cheap, inferior, or worn out cream separator is just as surely lost as the milk in the pail the cow kicks over.

The farmer who is trying to get along without a cream separator, or with an inferior or worn-out machine, is losing butter-fat right along, and butter-fat is money.

Thousands of Babcock and other tests have proved that the De Laval skims closer than any other cream separator under any condition, and particularly under the more difficult conditions so frequently experienced.

Just think what a loss of as little as ten cents worth of cream at each skimming means to you in a year—twice a day for 365 days—over \$70, and with as many as ten cows the cream losses alone from an inferior separator usually amount to more than this.

It doesn't matter whether the cow kicks the milk over or the cream separator doesn't skim clean, the waste is there just as surely in one case as in the other. The former is bound to happen once in a while but it is always possible to guard against the latter by buying a De Laval Cream Separator.

We will be glad to send one of our handsomely printed and illustrated new catalogs to any farmer or student interested in dairying upon request.

NEWSY ITEMS OF THE ALUMNI.

C. H. BATCHELDER, '13, DOES FAUNAL RESEARCH WORK

J. W. Smith, '88, in Charge of Division of Agricultural Meteorology—A. G. Wood, '12, at Turner Falls

C. H. Batchelder, '13, has been instructor in zoology and geology at New Hampshire College for almost three years. In 1915 he received his Master's degree as a result of some very interesting work in the vicinity of Durham. This work was done in conjunction with the U. S. Bureau of Fisheries on "The Fauna of Great Bay in Relation to the Density of Water." Several technical papers have published articles contributed by Mr. Batchelder and he has given some extension lectures in the state on zoological subjects. He is a member of the American Microscopical Society and of the Boston Society of Natural History.

J. W. Smith, '88, M. S., '98, has been placed in charge of the newly organized division of Agricultural Meteorology of the U. S. Weather Bureau with the title of Meteorologist. This division will have supervision of all the activities of the Weather Bureau that relate to agriculture. Mr. Smith will carry on investigation of the relation between weather and crop yield, and climate and crop distribution and farm operations.

H. H. Kimball, '84, has charge of the Solar Radiation investigations of the Weather Bureau.

A. G. Wood, '12, is supervisor of the Manual Arts of the Schools of Turner Falls, Mass. He has 350 boys in his classes learning about carpentry, cabinet making, pattern making, and wood turning. Mr. Wood's work is with students of the upper grammar grades and freshmen and sophomores of the high school.

Items about trench drills to be undertaken by the college cadets have recently appeared in many papers. Alumni at Pittsburgh were surprised to see one of these items in the Gazette Times of Pittsburgh recently.

The Pittsburgh Branch of N. H. Alumni Association will hold a banquet for the members and their wives on March 25.

'Joe' Goodrich, '04, has since Sept. 1, 1915, been in full charge of agricultural department of the Loomis Inst., Windsor, Conn.

Harry Hayden, '13, who during the past year taught school in Brooklyn, Conn., is now principal of one of the grammar schools in his home town of North Adams, Mass.

Ralph Easterbrook, '11, with his brother is running their home farm at Dudley, Mass. Ralph certainly is a busy boy. This year he harvested from the farm 400 baskets of raspberries, 3200 baskets of peaches, 400 barrels of apples, and 500 bunches of asparagus. The farm also supports 46 head of cattle. A Sharples milker is being used successfully on the farm, as is also a tractor. Besides attending to the many duties of the farm, Ralph finds time to act as Selectman, Overseer of the Poor, Member of the Board of Health, Master of the Dudley Grange, President of the Dudley Branch of the Worcester County Farm Bureau, Chairman of the Republican Town Committee, and Member of the Executive Committee of the Sunday School. He is a live wire in the town's affairs.

Dear Alumni:—

Some time ago we sent you self addressed post cards offering you an opportunity to obtain a copy of the "1917 Granite." A great many Alumni have taken advantage of this opportunity and ordered "Granites," and we wish to thank them for the interest they still hold in "New Hampshire."

Some of you have been putting off the ordering of your "Granite" from day to day until it is now almost too late. However, there are still a few copies that have not yet been sold, and knowing that you wish to keep in touch with your Alma Mater, we will reserve them for you until April First.

The "1917 Granite" perhaps, more than any thing else, portrays the growth of "New Hampshire." New clubs and societies have been formed, new buildings built, new departments, added

GREAT KEYS IN GYMNASIUM MYSTERY NO LONGER

"What is the meaning of those large keys which hang from one of the posts of the gymnasium running track?" is a question students are asking continually. For the purpose of informing those of the student body who do not know, and to refresh the minds of the loyal alumni to whom the college owes so much it might be well to go back about 16 years to the spring of 1902. At that time an agitation for a drill shed and gymnasium was begun. The first idea was to secure enough money to buy material and have a wooden building erected by the students themselves. A joint committee of faculty, alumni and students was organized with Prof. Richard Whoriskey as chairman.

MONEY FOR THE GYM.

The student body was canvassed for money as were the alumni and a goodly sum secured. Three members of the faculty all of whom are still connected with the college contributed \$25 each and soon the sum totaled \$2500. A petition was presented to the legislature by a committee who went to Concord for that purpose asking for \$25,000 to erect and equip a real gymnasium and armory. The committee met with a very cold reception at the capitol and were informed that if they felt they needed exercise a buck-saw and knotty stick was all that was necessary. However, this did not discourage the committee or student body and they decided to continue in their efforts hoping to be able to raise the needed sum in about 10 years.

AIDED BY WRECK.

About this time a wreck occurred on the B. and M. R. R., near the Durham station. Many of the students gave their assistance and President Tuttle of the railroad tendered a gift of \$1000 in payment of their services. This offer was refused by the students who wished no pay for humanitarian work and, as a result of his admiration for the student body Mr. Tuttle turned over the \$1000 to the gymnasium fund. This gave a new incentive to the committee with a result that the legislature in 1904 appropriated \$25,000 for a gymnasium and armory. The present building is the outcome. The money raised by the students was used for equipment and to provide the college club room. Among the contributors to the fund was Wm. E. Hunt '99 who sent a contribution of \$10 from Camp Skagway Alaska. A great deal of credit belongs to Mr. R. W. Pillsbury who not only made a personal gift of \$1000 but had a decided part in influencing the legislature to make the appropriation.

It was at the dedication of the building that Mr. Warren Brown, president of the trustees, presented President Gibbs with the large keys as a token of the turning over of the gymnasium to the college.

NEW CATALOGUE TO CONTAIN MUCH ADDITIONAL INFORMATION.

The new catalogue is about to be sent to the printer, and with the innovations found in it, will be a better one than has previously been issued. It will contain a map of the campus, and will give an up to date estimate of expenses, the result of a questionnaire, sent out last fall. There will be an expanded summary of students, by courses, classes, etc., and there will be placed after the name of each student the total number of credit hours earned up to the end of last semester. Then there will be a description of the two year engineering course and the subjects in Education, as well as new courses in Home Economics, Mechanical Engineering, Economics, etc. The new requirements for admission will be printed, and each course will state the name of the instructor, the place of meeting, and whether the meeting is a recitation, laboratory or lecture period.

Lady: "And you say you are an educated man?"

Wearied Will: "Yes, I am a roads scholar."

Soph: "I know a thousand times more than you do."

Freshie (musingly): 1000 times 0 equals 0.

and we are coming into our own in athletics.

The leather bound "Granites" have all been sold, but the cloth bound make a very attractive volume for the library or table. Please send in your order at once.

Very truly yours,
R. C. Graham, Bus. Mgr.

B. E. CURRY ANALYZES 313 SAMPLES OF FEED STUFF

Finds Wheat Feeds All Right, but Compounded Feeds Frequently Below the Standard

Mr. B. E. Curry, chemist of the experiment station, has just completed his annual analysis of food-stuffs that are for sale in New Hampshire, having tested 313 samples, which were sent to him by Andrew W. Felker, Commissioner of Agriculture. Wheat foods are of about the same good quality that was found last year, but the compounded feeds, in many cases, were below the standard because they are more easily adulterated with poor grade grains.

AN EXAMPLE.

One of the compounded feeds was found to be composed of wheat bran, ground corn cob, and just enough corn meal in it to give an excuse for putting it on the bag. The law as it is now does not make it necessary to put on the bag just what the percentage of each grain is that makes up the feed, but only the different kinds of grains. In this way the unscrupulous manufacturer may put only enough good grain into the feed to cover the law and make the rest from worthless or nearly worthless substances.

BUY THE BEST.

"The farmer in buying grains," Mr. Curry says: "should buy only the best there is on the market, but if he is obliged to buy cheap grains he should buy them at a very reduced price. The trouble with these poor feeds is that while they have a small nutritive value, they sell for only a small amount less than the best feeds."

"In the manufacture of oat meal, rolled oats, etc., the oat-hulls are left as a by-product. Some of these hulls are reground and sold as oat feed for \$15 a ton, wholesale, and \$25-30 retail. Oat hulls are a favorite material for adulteration and any feed which has a large amount of protein and a large amount of fiber, should be avoided."

Cotton seed meal is another feed that Mr. Curry found did not come up to the standard, as guaranteed on the bag. Molasses feeds and oat cereal manufacturers add just enough good feed to their products to make them look good and "get by" the public.

"All these oat hull and wheat bran compounds have a nutritive value," says Mr. Curry, "but they should be used where they are produced and not shipped East where the farmer will have to pay more than their actual value plus the transportation charges."

PORTABLE SAW MILL OPERATING NEAR COLLEGE ATHLETIC FIELD.

Busily engaged in converting the evergreen timber of Durham into lumber this winter is the saw mill owned by a Mr. Ellison and operating in the hard wood growth north of the football oval, by the railroad track. It is the portable type of mill and is being used to saw some logs that Mr. Ellison has bought here in Durham and Lee.

This sort of mill is considered quite efficient and well adapted to this locality because of the small quantities of lumber that are produced around here. It has a 25 or 30 horse power boiler, capable of sawing out from 12 to 17 thousand feet of lumber a day, according to the quality of the logs. One of the good points of this sort of mill is that it uses the waste material from the logs for fuel, and is so arranged that it will keep up a fairly constant steam pressure all of the time.

Six men are required to operate the mill itself besides men enough with teams to take the lumber away from the saw, and furnish the logs for the sawyer.

One man is required to roll a log on to the carriage, where it is fastened and run through by the saw. A man then takes the sawed board, measures and marks it, and shoves it out into the pit to be taken away by the team whose business it is to haul the boards out to be stacked.

One man takes the waste or slabs and saws them up for the boiler and is the fireman.

The boiler has an arrangement attached so that it can pump its own water into the boiler when it is necessary. Thus it is advisable to set the mill up near a good water supply. A blower is also attached to blow the sawdust away from the saw into a pile to one side.

Mr. Ellison buys the logs that he saws and when properly seasoned the lumber is loaded on the cars and shipped to the market.

THIS WEEK

We are showing in our windows the new

Spring Hat Styles.

We are prepared to show you just the shape you require and the color that suits your fancy. They are all here in the

CORRECT SHAPES

And the Stylish Colors.

Drop in before or after the "movies" and we will convince you what a pleasure it is to "get under" one of these "Correct Shapes."

ENGINEERING SOCIETY HAS AUTO MOVIE FILMS

Packard Motor Car Company Lends Five Reels—Wheel Construction and Motor Assembly

Monday evening, March 13, the Engineering Society had an opportunity to see the films of the Packard Motor Car construction, that were promised last fall but only recently completed.

The reels began with the lumber used in the wheels which was seasoned out of doors and then kiln-dried for months, at a time. After drying, the wood was roughly sawn into square billets, the proper size for working up into spokes. These were roughed, shaped by revolving cutters, cut off to the proper length, and the ends fixed for the assembly. After assembly of the spokes and felloe, the metal rims were put on red hot so that the shrinkage would insure a tight fit. Practically all of the painting and varnishing was done by compressed air.

Other reels showed the motor assembly, where the shaft was fitted to its bearings with an accuracy down to one one-thousandth of an inch.

At the next meeting Professor Willard J. Fisher will lecture on the optical side of photography; and at the following meeting Professor Ferley will talk on the chemical side of photography.

MID YEAR VACATION IS ABOLISHED BY FACULTY.

No more mid year vacations will gladden the hearts of New Hampshire students in future years, is one result of the faculty meeting, the first of the week. There is, however, no reason for dismay at this, since the week lost will be made up in some other way, as, for instance, opening college a week later, closing earlier, or lengthening the spring vacation. This will mean the exams will close on Saturday and registration come the following Monday.

It was also decided to open college next fall on September 20, rather than September 13, as had been planned, but it is barely possible that this action may be reconsidered, as the first football game of the season, with Dartmouth, comes September 23 and it would be difficult to get the team together and in good working order so soon.

The faculty also voted to allow the Dramatic Club to perform their coming play in the Dover Opera House, and voted to endorse the Johnson Bill now before Congress, which provides for making the Centigrade scale the national standard, rather than the present Fahrenheit scale.

N. H. ATHLETIC ASSOCIATION AMENDS ITS CONSTITUTION.

At a meeting of the Athletic Association after chapel last Wednesday, the following amendments to the constitution were adopted: Article X', Sec. 2. Amended to read.

Basketball letters shall be plain white, five inch monogram N. H. and shall be worn on navy blue sweaters.

Article XI, Sec. 6, Amended to read.

Managers of athletic teams shall be awarded the privilege of wearing letters as authorized for their respective departments, beneath which shall be a two inch M., a model of which shall be kept in the office of the Athletic Director.

Article XI, Sec. 7, Amended to read. The association shall award beginning with football 1915 a sweater with proper insignia to a member of any team earning his letter in that department for the first time.

Winners of the varsity N. H. for the second and third time in any department, shall be awarded a star, a model of which shall be kept in the office of the Athletic Director.

The first star shall be worn one inch below the N.

The second star shall be worn one inch below the H.

Winners of the varsity N. H. for the fourth time in any department shall be awarded the choice of a gold fob or navy blue blanket with varsity letters.

ELECTION OF OFFICERS FOR 1916-1917 AT Y. W. C. A. MEETING.

Election of officers of the Young Women's Christian Association for the year 1916-17 was held March 9. Gladys Brown, '17, was made President; Irene Huse, '18, Vice President; Marion Lewis, '19, Secretary; and Louise Burpee, '17, Treasurer. The cabinet appointed by the President is made up of the following chairmen of committees: Religious Meeting Committee, Mary Worcester, '17; Missions and Bible Study Committee, Florence Harris, '18; Missionary Committee, Mabel Foster, '19; Social Committee, Helen Bugbee, '18; News Committee, Alice Kemp, '19; and Conference and Convention Committee, Abby Turcotte, '17.

FIVE WEEK COURSE MEN GET PRIZES FOR DAIRY JUDGING.

The prizes for the Annual Dairy Judging Contest given through the courtesy of Mr. Thomas J. Davis of Duluth, Minnesota, a former resident of Durham, were awarded Friday March 10, to the students of the five week course ranking highest in judging the various breeds of dairy cattle. At the final meeting of the class Professor Rasmussen presented Dean Taylor as presiding officer who in turn introduced Professor Whoriskey as the speaker with full power and authority to award the prizes. The prizes were given to the men as follows:

First Place, W. J. Madden, Gold Fob
Second Prize, E. F. Perkins, Silver Fob.
Third Prize, F. B. Jordan, Bronze Fob.
Fourth Prize, W. H. Miller, Ribbon.

J. A. SULLIVAN, '16 RECEIVES APPOINTMENT TO ANNAPOLIS.

Joseph A. Sullivan, '16 has just received an appointment from Senator Henry F. Hollis, to the United States Naval Academy at Annapolis, Md. This is the second appointment of a student from New Hampshire this year, the other being that of Lemuel Pope, 3rd, to West Point. The appointment was the result of a competitive examination, Warner C. Jones of Franklin, a student at Harvard receiving second place as Mr. Sullivan's alternate.

When the middy enters Annapolis he enlists for six years, the last two of this being spent on board ship. The first two of this term must be spent at Annapolis without a leave of absence. Another feature of the student's life is that no one except a senior may use tobacco. "Joe" says that he won't mind this much because he is training or it now, having "sworn off" until house party. Incidentally he has rung in 10 of his fraternity brothers on the "swearing off" stunt, to lend him moral support.

April 18, is the final date set for the absolute acceptance or rejection of the appointment.

ROCKINGHAM COUNTY FARMERS' ASSOCIATION NOW ORGANIZED.

The Rockingham County Farmers' Association was organized at Exeter, Tuesday, February 2).

The officers elected were as follows: President, W. B. Farmer, Hampton Falls; First Vice President, W. H. Ranney, Derry; Second Vice President, Charles W. Barker, Exeter; Third Vice President, Wilbur White, Deerfield; Secretary, George B. Hyde, East Kingston; Treasurer, Alden F. Sanborn, Fremont.

BUELAH I. HAZARD TO ASSIST IN BOYS' AND GIRLS' CLUB WORK.

Buelah I. Hazard of Westerly, R. I., has come recently to assist in the Boys' and Girls' Club work. She is a graduate of Boston School of Domestic Science, took domestic work at Northfield Seminary, taught domestic science for two years in a New Haven Grammar School and also for one year in the Boardman Apprentice Shops at New Haven.

Wednesday, March 8, Professor Rasmussen attended a meeting of a committee of the New England Federation for Rural Progress to consider starting a New England dairy campaign.

PRESENTATION OF SCENES OF SHAKESPEARE'S PLAYS

To Celebrate Tercentenary Anniversary of Death of Noted Poet—Fifty Students to Act in Parts of Seven Plays

Practically all colleges in the country will have celebrations or events of some sort in April to commemorate the tercentenary anniversary of the death of William Shakespeare. On account of the exact date, April 23, coming on Sunday the actual celebrations will probably come just before or after. The date here is to be April 27, a Thursday.

The exercises here will take the form of a presentation by students of about a dozen scenes from the more popular plays of William Shakespeare. The plays from which these scenes are to be taken are "Midsummer Night's Dream," "Merchant of Venice," "Henry IV" part I, "Henry V," "Taming of the Shrew," "As You Like It," "Much Ado About Nothing," and "Twelfth Night." These scenes are to be presented in the gymnasium with very little scenery, after the custom of the Elizabethan stage.

SUI TABLE MUSIC.

Shakespearean music will be furnished by the orchestra and partly, it is hoped by phonographic records of Shakespearean songs and a few of the most famous speeches as rendered by Ellen Terry, Ben Greet, and other noted actors of these plays.

The main object of the scheme is to make the audience feel the wonderful power and beauty of the lines rather than to attempt great proficiency in the acting per se. As each person has but a few lines it is hoped that three rehearsals will be sufficient. These rehearsals will probably be held at the home of Dr. Alfred F. Richards.

OLD ENGLISH DANCES.

After the performance, the audience will be asked to sit around the sides and in the gallery of the gymnasium to provide room for an exhibition of old English country dances. These will be practised under the personal direction of Miss Rollins, and will be rendered by about one hundred students. As these dances are different from the present day fashions of dancing, representing spontaneity, simplicity, and an appeal to the artistic sense, they are expected to meet with a cordial reception.

The performance will begin sharply at eight o'clock and last for about three hours. Over fifty students are to take in this affair. The cast for a few of more important characters is as follows: Falstaff and Sir Aubrey Aguecheek, E. L. Bell, '18; Toby Belch and Dogberry, J. A. Sullivan, '17; Fock, G. W. Chase, '16; Rosalind, Irma Lary, '18; Hero, Lucille Cove, '18; Portia, Marguerite Merrill, '18; Katherine, Eleanor Currier, '18; Goins, A. N. Graham, '18; French Princess, Genevieve Charbonneau, '15; Alice, a lady-in-waiting to the princess, Marion Mitchell, '16; Dromio, E. W. Hardy, '18.

SENIOR CLASS HOLDS MEETING ON COMMENCEMENT MATTERS.

A meeting of the Senior Class was held Thursday, March 9, to decide on Commencement matters. A discussion was held on the question of whether some mark of distinction, such as canes, be adopted by the class; and a committee was appointed to investigate the project.

It was voted that caps and gowns be worn by the class at chapel and necessary class functions after the spring vacation.

The following commencement committees were chosen: executive, F. S. Manter, chairman, W. T. Tapley, and L. A. Hawkins; Invitations and Printing, G. A. Charbonneau, and W. T. Tapley, N. C. Hurd; Class Day, N. A. Steele, chairman, Miss Nellie White, and J. A. Sullivan; caps and gowns, G. W. Chase, chairman, W. H. Barr, and P. S. Ward. The committee for the commencement ball will be appointed at a later meeting.
