PRICE 5 CENTS

OPENING GAME LOST TO DARTMOUTH TEAM

SCORE OF 12-0 SHOWED THE LACK OF PRACTICE

NORWICH GAME RESULTS IN TIE

With Score 4-4 in Tenth Inning—Team Defeated at Middlebury by Score 8-4; and at Vermont by 3-0

The baseball season opened April 19 with Dartmouth as our opponent. This game was the first chance the pitchers had had to use their curves and the first opportunity for the batteries to work together. The result was manifested by the large total piled up by Dartmouth, the final score being 12 to 0. The weather was cold and raw, wholly unsuitable for baseball. Dartmouth's early spring trip plainly showed to advantage, both in batting and fielding. Our men especially seemed to lack ability in batting. Because of the condition of the field, the game was not played on the regular diamond but on the old diamond on the campus.

A feature of the game was the catch of a fly by Cofran which looked at first good for a homer.

NORWICH GAME.

On April 20, Norwich was the opponent and the score resulted in a tie, 4 to 4, the game being called at the end of the tenth on account of darkness. Mooney's pitching was the feature of the game, no runs being scored on him up to the time of his removal in the last of the seventh. The desire of the coach to save his arm was the reason for taking him out. Another feature was the cadet band which furnished music for the occasion.

SHAKESPERIAN PLAYERS.

FINAL TEAM IS CHOSEN FOR DEBATE WITH RHODE ISLAND,

The final team for the debate with Rhode Island has been picked as a result of the debate recently held at Chapel. It will consist of R. I. McCartney, R. J. Bugbee, V. W. Batchelor, and C. C. Bond as alternate. The debate will be held May 4. The New Hampshire College team upholds the affirmative of the question, "Resolved that the Swiss Military System should be adopted by the United States."

DR. PORTER TO DISCUSS HOW CHILDREN AND ANIMALS LEARN,

"How Children and Animals Learn," will be the topic of an illustrated lecture given in the gymnasium Monday evening, May 8. The lecturer will be Dr. James P. Porter, Dean of Clark College, Worcester, Mass. Dr. Porter is Professor of Education and Psychology, and holds a prominent place among the foremost educators in the United States. He is a graduate of the University of Indiana. He is a leader in the research work on the habits, instincts, and intelligence of animals, and the fundamental methods of learning by children.

In this lecture he will explain the causes of action in the animals by lantern slides and will draw illustrations from the training of a dog by one of his students, under his supervision. He is also an authority on the habits and instincts of spiders and squirrels.

The lecture is presented by the Education Committee of the Liberal Arts Club with the co-operation of Prof. Simmers of the Education Department. The lecture is open to everyone; there will be no admission fee. The lecture will commence at 8 o'clock.

ARCHIE HAHN ASSISTS IN TRACK

Archie Hahn, the Olympic star sprinter was here April 17, assisting Coach Cleveland with the track team.

Mr. Hahn, formerly of the Michigan University, is at present track coach at Brown University and is a personal friend of Mr. Cowell. He held the 100, the 220 and the 30 meter records in the Olympic games, the 220 record standing for 11 years.

WOMAN'S LEAGUE ELECTION.

The woman's league of the college has elected the following officers: President, Mrs. C. C. Steck; vice president Miss Mary Worcester of Berwick; corresponding secretary, Miss Helen Weston; recording secretary, Miss Henrietta Nudd; treasurer, Miss Martha Emerson, auditor, Miss Frieda Reiner. Mrs. E. T. Fairchild and Miss Louise Burpee were elected to the executive committee.

NEUTRALITY DISCUSSED BY ALBERT BUSHNELL HART

Development of Conception that Peace is Normal has been Gradual—U. S. Incapable of Helping Materially

The lecture course was closed Friday evening, April 14, by Albert Bushnell Hart, who, taking as his subject "The Way of the Neutral is Hard," disclosed in a comprehensible way somewhat of the position of our country in the European War.

"Never were any neutrals so neutral as in the present war," he declared. The original state of man was one of hostility. Even as late as the days of the Roman Empire, war represented the normal condition of society. Taking the case of the American Indians, they considered those tribes with which they had no agreement as their enemies. For example, they classified all white men as belonging to one tribe, and thus is explained, at least partly, their instinctively fierce opposition to the encroachments of settlers. However, in the last century there has developed the conception that when A and B are at war it is possible for C to remain friendly with both of them; that place is normal and war a disturbance to be confined to the smallest possible area.

First among the duties of a neutral is not to participate in the war. No men are to enlist in foreign armies and retain their citizenship, no expeditions are to be fitted out, or warships built. This country is very earnest in its enforcement of the last provision, perhaps because of its experience with Great Britain in the Civil War. It has taken the position that no armed ships can be fitted out since the commencement of the war. But what of airships? An airship is not a ship of war—but a hydroplane is, because it leaves the water.

SHIPMENT OF MUNITIONS.

One of the questions largely debated lately is whether it is the duty of the United States, or any country, to stop shipments of munitions of war to belligerents. Another technicality arises here and decrees that no country is bound to prohibit it, though shipments are made at the risk of the shipper. However, any power may do so. For instance, in the Taft administration there was an embargo on shipments into Mexico. In general, the Germans have been unable to control the shipping, the English being in possession of the seas. Consequently the United States has recognized the truth that munitions have reached only the Allies. The Germans have been unable to protest because of somewhat similar practices by the Krupp works in previous wars. Nevertheless, it has got onto their

nerves, so to speak. The aid thus far given the Allies by the United States is, generally speaking, much exaggerated, in fact it is almost a negligible quantity for the simple reason that the factories are as yet incapable though unpreparedness to put out sufficiently high grade materials. As a matter of fact, probably not 10,000 rifles have reached the belligerents, because large numbers were rejected as unfit.

The provision made in the Declaration of London for declaring conditional contraband has given the British a big advantage in their blockade. They began to add to the contraband list after the outbreak of war and have continued to do so until now such things as cotton, which has only a remote possibility of being made into gun-cotton, are excluded. By increasing the list of contraband thus, the British are really hurting themselves in case of future wars.

As for the blockade, it is no true blockade at all, at least not the kind that was known in the Civil War, because of the presence of extensive mine fields. Beginning a year ago neutral ships were forbidden to pass through the Dover Straits, being required to go around Scotland where they were searched. One reason for this was the principle laid down by the British that they must prevent anything reaching Germany directly or indirectly. In other words, in order to punish each other the belligerents will punish any neutral that gets in the way.

ELIZABETHAN SCENES AT NEW HAMPSHIRE

SHAKESPEARE TERCENTARY OBSERVED APPROPRIATELY

OLD ENGLISH COUNTRY DANCES

More Than 100 Take Part—Cake from Recipe 300 Years Old—Affair a Great Success

Certainly one of the biggest events of the year was the celebration in the Gym last Wednesday evening commemorating the three hundredth anniversary of Shakespeare's death. In its presentation, New Hampshire is right in line with other prominent colleges in the country in paying a just tribute to the great literary genius, who with the passing years is gaining that recognition not granted him when living.

A unique feature in the celebration was the large number of students taking part, there being more than a hundred who appeared either in the scenes from Shakespearean plays or in the old English country dances. Never before have dramatics been presented on such a large scale by New Hampshire students. Then, too, the splendid way in which the program was executed is all the more commendable when it is recalled that the whole affair was gotten up in a comparatively short time. In fact, the 10 scenes were rehearsed on the average only three times each in as many weeks, thus showing that much can be accomplished when all take hold with the true New Hampshire spirit.

SCENES FROM SHAKESPEARE.

The dramatic part of the program began promptly at 8 o'clock. Ten scenes from eight different plays were presented. While all the scenes were from comedies, the kind of wit portrayed varied from the boisterous fun of the Comedy of Errors, Twelfth Night, and the Taming of the Shrew, to the gentler and more subtle humor of As You Like It, Much Ado About Nothing and Henry V, while the scene from Midsummer Night's Dream furnished a touch of both.

Perhaps the most pleasing roles in the first named class of comedies were taken by Mr. Hardy as Dromio in the Comedy of Errors, Mr. Sullivan as Sir Toby Belch in Twelfth Night, and Miss Elenora Currier and Mr. Badger as Kate and Petruccio in The Taming of the Shrew. In the second type of comedy Miss Charbonneau as Katherine in Henry V, Miss Beatrice Reed as Beatrice in Much Ado and Miss Colby and Mr. Tibbetts as Audrey and Touchstone in As You Like It, did noticeably well. Henry V had an outstanding and jovial Falstaff in the person of "Doc" Bell, while Mr. Meserve did well as Prince Hal. In the Midsummer Nights Dream Miss Chase made a betwishing

EDITORIALS.

ELIZABETHAN THEATRE.

The success which attended last Wednesday's celebration of the Shakespeare tercentenary brings up before us once again the extreme desirability of having an Elizabethan theatre. It is quite evident that New Hampshire College has talent enough to make frequent use of such a structure, and a splendid site is available to the rear of Thompson Hall, where an amphitheatre could easily be constructed at small expense. Should the time come when it was desired to present a pageant of Durham, such a structure would be indispensable. Celebrations like the recent one are very much worth while, both because of the pleasure to the undergraduates and the educational value of the performance. Who has not a clearer idea of how much Shakespeare means to those seeking culture of mind and refinement of feeling? Who can help but wonder at the versatility of the man and his practical knowledge of life in all its aspects after being in attendance last Wednesday evening? Everyone present will always have a warmer sympathy with the great playwright and his works from such an experience. Why not then make it possible to perpetuate this splendid kind of effort under as ideal conditions as possible? From the diversity of uses to which it might be put it would seem as though an Elizabethan theatre was a necessity rather than a luxury.

VIVE LA DRILL!

Congratulations, Dartmouth! In spite of your traditional dignity and your time-honored, cultural ideals, your spirit of modernity has realized the value of and has placed military training on a standing with the established subjects of the curriculum. In giving three hours credit toward graduation for meritorious work at Plattsburg or other summer students' camps, you recognize the value of preparedness in a military way; and so follow the example set for so many years by your younger sister college, New Hampshire. The added opportunity to elect drill at the institution itself will make it no longer necessary for those desiring military training to feel obliged to come to New Hampshire in preference to Dartmouth.

We rejoice greatly, therefore, that you too may have the opportunity of deriving the beneficial training that we enjoy a gun-toting, sword swinging and signal flag waving and trust that we may some time enter into competition with you in some sort of military activity.

Keep up the good work!

SPRING FEVER.

In the spring the young man's fancy lightly turns to thoughts of ball, as he gazes o'er the campus from the classroom in "T" Hall. Not a note has he been taking for a half an hour now, and the words of the professor fail to penetrate his brow, for his thoughts are on the diamond in the field beyond the "gym" and he feels the hand of nature gently, firmly urging him to leave the

realm of English, German, Math, and Eco. dull and go forth to heave the horsehide that his joy may be quite full. He imagines he is pitching, he has form just like Joe Wood, and he thinks that on his uniform an "N. H." will look good. It is his turn to bat now, three sacks are occupied, and in his mind he sees that pill enjoy a lofty ride. The college band is playing, a great crowd cheers the team, when our hero gives a mighty swing ----- and wakes—it's all a dream.

CAP AND GOWN.

The petition of the Senior class to the faculty asking that the faculty wear cap and gown during the exercises of Commencement Day should be acted upon favorably. Cap and gown represent dignity and stand for tradition, which in this age of intense efficiency, is often given but scant attention. It is an old custom that should be preserved especially at New Hampshire College, in recognition of the culture that forms a part of the very practical training given here. The final ceremony of graduation is naturally an impressive one to both students and audience, but much more dignity and impressiveness, would be lent were the faculty garbed appropriately with the Seniors in the traditional vestments of culture. By setting such a precedent, the faculty will be doing their part in making the final college exercise a success.

A GOOD INVESTMENT.

An exceptional opportunity for the promotion of real New Hampshire spirit and a feeling of fellowship between the faculty and the under-graduates is offered by the Agricultural Club Banquet. That the faculty and student body should "eat, drink and be merry" together on an occasion of this kind is good as it enables each to understand the other better. To the undergraduate it will prove an investment in after days worth at least five times the cost, when in a reflective mood he looks back over the pages of his college days.

ATTENDS MEETING.

Professor F. C. Moore attended the Spring meeting of the New England Association of Teachers of Mathematics at Boston on April 15. The sessions were held at the Massachusetts Institute of Technology.

FRESHMEN GIRLS WIN IN INTER-CLASS BASKETBALL

The girls' basketball season closed with the Freshman-Sophomore game which was called at 5 P. M. Monday, April 12. This last inter-class contest proved to be the snappiest of the season. The Sophomores were handicapped by the absence of Miss Center who plays right guard. Each team had its own group of rooters and original cheers and songs.

SCORE TIED IN FIRST HALF.

During the first half the teams played equally well. The first score of the game was made by Florence Harris, '18, the first minute of play. During the first play five fouls were called on each team, but only one point each was realized on these free throws. These were made by Mildred Doherty, '19, and Erma Lary, '18. At the end of the first half, the score was 3 to 3.

The second half proved fatal for the Sophomores, although the first score of the period was made by Erma Lary, '18. This free throw resulted in a score of 9-3 in favor of the Sophomores. The Sophomores were not in the lead again. Six points were then skillfully added to 1919's score by Miriam Sanders and Mildred Doherty. The Sophomores were able to score 2 more points when Florence Harris shot after a free throw. By the excellent guarding of Mary Poland, '19, and Olive Ashford, '19, 1918 was unable to score again. The final whistle came when 1919 had piled up thirteen points against 1918's six.

SUMMARY,

1918	1919
E. Lary, lf	rf, A. Kemp
I. Huse, rf	lf, M. Doherty
F. Harris, c	e, M. Sanders
M. Cushing, lg	lg, M. Poland
M. Hoitt, rg	rg, O. Ashford

Score: Freshmen, 13; Sophomores, 6. Goals from floor: Florence Harris, 2; Mildred Doherty, 3; Alice Kemp, 0; Miriam Sanders, 2.

Goals from fouls: Erma Lary, 2; Mildred Roberts, 0. Referee, Miss Rollins; timer, Mrs. Woodward; Scorer, Mrs. Steek; Linesman, Mrs. Perley. Time 2-ten minute periods.

Season scores:

Seniors 12	Opponents 29
Juniors 11	Opponents 14
Sophomores 35	Opponents 25
Freshman 7	Opponents 17

While the Sophomores attained the highest score, yet the Freshmen are the champions of the season.

Agricultural Club Banquet, May 4th, 1916.

THE MILK IN THE PAIL THE COW KICKS OVER IS LOST FOREVER.

AND the butter-fat that goes into the can through the skim-milk spout of a cheap, inferior, or worn out cream separator is just as surely lost as the milk in the pail the cow kicks over.

The farmer who is trying to get along without a cream separator, or with an inferior or worn-out machine, is losing butter-fat right along, and butter-fat is money.

Thousands of Babcock and other tests have proved that the De Laval skims closer than any other cream separator under any condition, and particularly under the more difficult conditions so frequently experienced.

Just think what a loss of as little as ten cents worth of cream at each skimming means to you in a year—twice a day for 365 days—over \$70, and with as many as ten cows the cream losses alone from an inferior separator usually amount to more than this.

It doesn't matter whether the cow kicks the milk over or the cream separator doesn't skim clean, the waste is there just as surely in one case as in the other. The former is bound to happen once in a while but it is always possible to guard against the latter by buying a De Laval Cream Separator.

We will be glad to send one of our handsomely printed and illustrated new catalogs to any farmer or student interested in dairying upon request.

NEWSY ITEMS OF THE ALUMNI.

L. D. HAYES, '97, PUBLISHERS "EMPIRICAL DESIGN" BOOK

S. R. Harriman, 2 yr. '15, Takes Position in Colebrook—Captain W. E. Hunt, '99, Visiting Friends in Durham

New Hampshire has many men among her alumni of whom she may well be proud. The name of Leslie D. Hayes is perhaps foremost among these. Mr. Hayes has recently published a book entitled, "Empirical Design," which is being received with hearty approval by men interested in machine designing. The author says in his preface: "This book has been planned especially to meet the needs of second year students in the department of machine design of Cornell University. The purpose and manner of using the various machine parts is explained in detail for the benefit of those students whose previous training has left them wholly unfamiliar with machinery."

Mr. Hayes was graduated from New Hampshire in 1897, and received an M. E., degree at Cornell in 1908, and is now Assistant Professor of Machine Design at that university. Prof. Hayes is a native of Durham, and is one of a family of four, all of whom have graduated from New Hampshire. Thus far the Hayes family is the only family which has furnished New Hampshire with four alumni.

W. F. Langelier, '09, has accepted a position as Assistant Professor of Sanitary Engineering at the University of California for the next college year. For several years Mr. Langelier has held the position of Inspecting Engineer for the Illinois State Water Survey at Urbana, Illinois, having supervision over the operation of the water purification works and the sewage treatment plants of the state of Illinois. Mr. Langelier graduated from New Hampshire in chemical engineering and subsequently did graduate work in chemistry and bacteriology at the University of Illinois receiving the degree of M. S. in 1911. He will leave for his new position in August and expects to spend the month of July in New England.

Sam R. Harriman, 2 yr '15, assistant in the dairy department, has resigned to take a position in the creamery at Colebrook belonging to the Mohawk Dairy Co. The output from this plant consists of ice cream, condensed milk and the other dairy products.

NOTICE.

The Class of 1914 will hold its reunion at Commencement next June. Now, fellows, we have been away two years, just long enough really to appreciate getting together back at Durham. We have been away long enough so that many changes will be apparent and yet not so long but that we will see familiar faces everywhere. This is the year to come back. Rest assured there will be something doing every minute. Make those plans now. Watch these columns for further announcement.

L. S. Riford, Class Secretary.

B. K. Baghdigian, ex '16, senior in industrial journalism at Kansas State College, recently was awarded first prize for getting the most material during the winter term into the Kansas Industrialist, a paper issued by the college. The prize was a subscription either to The County Gentleman, Field, or Breeders' Gazette.

Mr. Baghdigian was also recently taken into Sigma Delta Chi, the national honorary journalism fraternity.

Capt. William E. Hunt, 22nd U. S. Infantry, class of '99, has been visiting friends in Durham lately. Capt. Hunt was professor of military science at New Hampshire College from 1904 to 1909. He has been quartered at Fort Sam Houston, San Antonio, Texas, and at El Paso, but will sail June 5 to Honolulu for a three year tour of duty. It will be recalled that Capt. Hunt is the brother of Lieut. Charles A. Hunt, '01, who was professor of military science from 1912 to 1914 here. Capt. Hunt is accompanied by his wife and two sons.

SAVORY ADVICE.

Faculty, students, and all others interested, lend me your ears. We are here in this world but once and

must not miss anything.

The good times we have will always be remembered and are well worth what we pay.

When, therefore, on the night of May 4, we assemble round the board in the "banquet hall" of the college,

Let not a man be missing, but rather, let the crowd be large enough to overflow the very corridors within the stately halls.

There is only one Aggie Banquet a year and that should be attended by all "sons of the soil" and parties interested,

Also the faculty should come out and taste of a regular "feed," where lobsters and turkey will mingle side by side.

What more can you ask for a single dollar than plenty of food and a group of witty speakers?

Caesar would not have demanded greater things, so how can you?

Therefore, Oh worthy friends and enemies, make one great, final effort. And be present with us at the "Banquet of the Great," the feast of the Aggies on May 4, 1916.

AT VERMONT.

Friday, April 22, the baseball team played the University of Vermont in a five-inning game. The whole game was played in a pouring rain, which greatly handicapped the players. The fielders could not hold on to the ball and the batters were unable to retain their grasp on the bats. The Vermont pitcher, the only veteran on the team, was a player of great reputation, and successfully held the New Hampshire players down. The hits for the innings played were about even for both sides. The score at the end of the fifth was Vermont, 3; New Hampshire, 0. Battery for Vermont, Captain Spear and Hamilton; for New Hampshire, Mooney and Brackett.

MIDDLEBURY.

On the next day, April 21, the team journeyed to Middlebury and was defeated by the score of 8 to 4. Meserve again showed his prowess as a stickster by getting a three-bagger in the sixth which resulted in a run, Irvine's single sending him over the plate.

STUDENT GOVERNMENT FOR GIRLS STARTED IN 1913

Result of New Hampshire Delegation to Y. W. C. A. Conference—Now Have Quite Complete Set of Rules.

Student government was instituted among the girls of Smith Hall in 1913. It was organized at the suggestion of the New Hampshire delegation to the Y. W. C. A., conference at Silver Bay in June, 1913. Student government was a topic discussed at some length there, and it seemed feasible to adopt it at Smith Hall. A committee was appointed to draw up rules concerning, "quiet hours" and similar subjects, which were to be presented for approval to Girls' Council, the Dean of Women, and the President. The rules finally adopted are as follows:

RULES.

(a) Quiet shall be maintained from 7.30 p. m. to 9.30 and from 9.45 p. m., 6 a. m., every day except Saturday. Quiet shall be observed on Sunday night from 8.00 p. m., to 6 a. m.

(b) House President shall be elected each year by the girls of the hall.

(c) Duties of House President:

1. To appoint proctors, two for each floor for each month.
2. To call house meetings.
3. To see that these rules are carried out.

4. To report to the Dean of Women all warnings reported by proctors.

(d) Duties of Proctors:

1. To ring bells for quiet hours.
2. To preserve order and warn students of misconduct.

3. After warning a girl three times, she shall be reported by the proctor to the House President who reports the name to the Dean of Women.

4. Proctors must report to House President each month.

5. Proctors must turn off lights in halls and bathrooms.

II. Each girl is to be responsible for keeping halls and bathrooms neat.

III. Girls are requested not to dance during meal hours.

IV Fire monitors for each floor shall be appointed by the girls in the hall each year.

When Ballard Hall became a girls dormitory, the same system of government was adopted there. The house president's for the year 1915-16 are: Miss Bernice Reed, '16 Smith Hall; Miss Etta Waldron '16, Ballard Hall.

"RELIGION AND HUMAN PROGRESS" DISCUSSED BY PROF. GROVES.

"Religion and Human Progress," the thesis of Professor Groves as speaker at the final meeting of the College Christian Association, Sunday, April 16, was one of the most interesting subjects discussed this year. The speaker brought out different aspects of the problem and showed clearly the relation of religion to the Freudian system of psychology.

In discussing the relation of science and religion to progress, he said that progress is defined as the increasing satisfaction of desires. This comes about by two methods. First is the control of nature which is accomplished by science, whose duty it is to understand and use nature for the material benefit of man. The other method is by the control of self. This is the more difficult as it involves the control of the instincts and must aid man in his struggle with his animal self. In this struggle, he must learn the three great values of life: Truth, Beauty, and Goodness. Religion should conserve and teach these values. They are things that need not be proven.

Ancient Farming

Herodotus, in the year 450 B. C., said that good cultivation yielded two-hundredfold in the Valley of the Euphrates. Ever in that land of Eden, poor cultivation yielded but fiftyfold.

In 1898, the average Wheat yield per acre in New York State was 21.2 bushels; in 1907, 17.3 bushels per acre; in 1912, but 16 bushels. This does not speak very highly for our Fertilizers.

Average American yield per acre of Agricultural Produce is at present about Eleven Dollars. European yields are more than double.

Isn't it time for our farmers to get down to business methods? Home Mixed Fertilizers will help.

ENGINEERING INSTRUCTION TRIP TAKEN TO HINSDALE

20,000 H. P. Hydroelectric Development on Connecticut River—Power Furnished to Surrounding Towns

Wednesday, April 19, the senior engineers made an instruction trip to the hydroelectric development at Hinsdale, N. H., situated on the Connecticut river near the southern boundary of the state. The party left Durham early in the morning and went down through Boston and then up the Fitchburg Division arriving at the power plant shortly after noon. This plant at Hinsdale, operated by the Connecticut River Power Company is the largest hydroelectric development in the state of New Hampshire.

Previous to its erection, 20,000 horse power, worth \$900,000 annually, was going to waste year after year. In 1902 public spirited and far-sighted men in Brattleboro hired engineers to investigate the feasibility of getting power from the Connecticut River in that vicinity. In 1907 the actual work was begun, after many difficulties; and in 1909, seven years after investigations were begun, the work was completed. The plant now furnishes power to countless towns and cities in its vicinity, including Worcester, Marlboro, Clinton, Fitchburg, Winchester, Keene, Hinsdale, Brattleboro, Shirley, Leominster, Gardner, and Winchenden.

The power house itself is 216 feet long by 55 feet wide and forms a connecting link between the dam and the Vermont side. It is so located that the log drives, and the melting ice in the spring, all pass over the other side of the dam. The dam is constructed with large capacity flood gates, so that high water periods can be safely handled. When the water is at the top of the dam, a lake, 16 miles long is formed; and in summer, four foot flash-board are put up, causing the water to back up for thirty miles.

Superintendent P. W. Rancourt very courteously escorted the seniors about the plant, explaining many details and methods of operation. Those who went on the trip are Messrs. R. W. Doeg, R. F. Hayes, N. C. Hurd, E. C. McDuffee, W. R. Partington, K. E. Sawyer, G. T. Studd, H. E. Swain, and L. W. Davis.

P. S. WARD '16 MARRIES MISS DOROTHY ATWOOD AT NASHUA.

Friends of Paul S. Ward '16 were agreeably surprised to learn of his marriage at Center Harbor on April 8 to Miss Dorothy Atwood of New York City. Miss Atwood who is especially talented in music has made her home in Nashua for the past few months and while there she made a host of friends.

Mr. Ward who is one of the best track men at New Hampshire and who is captain of this year's team will be graduated in June whereupon he intends to go to work for the Remington Arms Company at New Haven. Mr. Ward who is a piano player of more than local repute has been prominent in all college affairs; for two years he was sporting editor of the New Hampshire. He is also a member of the Senior Skulls, Cask and Casket and the Kappa Sigma fraternity.

NUT HONEY CAKE.

The following recipe which is 300 years old, is published for the benefit of those housewives who may wish to try their skill in making such excellent cake as was served at the Shakespearian celebration last Wednesday evening:

2 cups brown sugar, 2 cups honey, 6 egg yolks, 3 cups flour, 1 1/2 teaspoons soda, 3 teaspoons ground cinnamon, 1/2 teaspoon ground cloves, 1/2 teaspoon ground nutmeg, 1/2 teaspoon allspice, 1 cup raisins cut fine, 1/2 ounce citron cut in small pieces, 1/2 candied orange peel cut in small pieces, 1/2 pound blanched almonds coarsely chopped, whites of two eggs.

FEWER WARNINGS ISSUED.

It will be no news to 29% of the student body that warnings for the second semester have been issued. For the benefit of the remaining 71%, however, it may be stated that such is the case. Large as this percentage seems, it is a big improvement over the 44% warned last semester. Warnings in more than seven hours were received by 3% of the students, contrasting with a percentage of 10 for last semester. As would naturally be expected, the freshmen had the largest score in this respect, followed by the sophomores, juniors, and seniors, with a class percentage of 39, 28, 22, and 11% respectively.

CAST OF "MID SUMMER NIGHT'S DREAM."

Continued from Page I ELIZABETHAN SCENES AT NEW HAMPSHIRE

Fuck while the broadly common humor of Bottom the weaver was well taken off by Mr. R. C. Graham.

NUT HONEY CAKE.

A most exciting diversion was furnished about midway in the performance when nut honey cakes were served to the audience by young women of the Home Economics department. These were made from an Elizabethan cook book recipe more than 300 years old, and received the hearty approbation of the assemblage.

Mr. E. P. Cutts probably received more applause than any other performer.

ELENORA CURRIER in "TAMING OF THE SHREW."

er. It was his duty to mail up a placard at the beginning of each scene denoting the place where it was supposed to occur, and his successful efforts won the hilarious appreciation of the audience CREDIT TO PARTICIPANTS.

More than 100 students took part in the production in scene or dance and Dr. A. E. Richards was much impressed with the splendid spirit of cooperation shown by all the students both men and women in making possible in so short a time the success of the undertaking. Dr. Richards deserves credit for his efficient coaching which produced such finished results in so limited a time. Mr. W. T. Tapley as stage manager did a whole lot of work most acceptably.

It may not be generally known that practically all the men's costumes were made by the following members of the Women's League: Mrs. Simmers, Pettee, Steck, Morgan, Mitchell, Fawcett, Wilson and Woodward. The costumes

of the girls owe part of their ingenuity and effectiveness to the direction of Miss Basch. The comparative barrenness of the state was in large measure atoned for by the elaborateness of the costumes. OLD ENGLISH DANCING.

Amid bright ribbons and gay costumes five of the old English Country dances popular three hundred years ago, were performed for the audience at the close of the Shakespearian scenes. Immediately after the curtain went down on the dialogue between Warwick and the King in the second part of King Henry the Fourth, the chairs were moved from the center of the gymnasium to make room for the dancers and the audience distributed themselves about the sides of the hall and in the balcony. Those who took part in the scenes were fortunate enough to have seats of vantage on the stage.

To the strains of old English music sixty men and women of the college entered the gymnasium dancing the processional, one of the famous Morris Dances. This was followed by the pretty ribbon dance, where the partners danced at the ends of long bright-colored ribbons. The third number was known as Ruffy Tufty, and was a spirited affair with lively music. The fourth number was as interesting as its name, Oranges and Lemons, the fifth dance, the Recessional concluded the evening's entertainment.

Much credit is due Miss Rollins for her excellent work in teaching the dancers and her aid in making the men's costumes. The men wore knee breeches bedecked with ribbons, and bright-colored waistcoats. The women wore dresses typical of Shakespeare's day. Shakespearian music was played for the dances by Miss Ruth Stevens, piano and Messrs. F. L. Blake, and V. W. Batchelor, violins. The playing of the college orchestra in the first part of the evening was especially commendable.

SPIRITED DEBATE IS UNUSUAL PROGRAM OF LAST CONVOCATION.

A unique program was presented to the student body at Chapel, Monday, April 17, in the form of a debate on the question "Resolved: that the Swiss military system should be adopted by the United States." The affirmative was upheld by Messrs. McCartney, Bond and Batchelor, the negative by Messrs. Graham, Wagner, and Bugbee. Each speaker was given six minutes in direct debate and three minutes in rebuttal. The arguments advanced were clearly and forcefully expressed, and the debaters easily held the attention of their audience to the end. The judges, Mr. Ham, Prof. Moore and Prof. Simmers, decided in favor of the affirmative.
