## NEW HAMPSHIRE WINS FROM RHODE ISLAND

TEAM DOES GOOD WORK FOR HOUSE PARTY GUESTS

## SENSATIONAL PLAY IN EIGHTH

Brings in Run That Breaks Up Tie—Humiston Pitches Well—The Final Score 5 to 4

New Hampshire won its most spectacular base ball game of the season last Saturday afternoon on the local diamond by defeating Rhode Island State by a score of 5 to 4.

The setting was most propitious for a victory for New Hampshire since the bleachers were completely filled with houseparty guests and the weather was ideal for base ball.

### HUMISTON INVINCIBLE.

Captain Bissell started on the rubber for the local team but the Rhode Island batters seemed to fathom his curves and touched him for six hits and scored three runs in the 5 innings that he pitched. He was then replaced by Humiston who was almost invincible. In the four innings that he worked he struck out 7 men and allowed only 4 safe hits.

Meserve and Brackett both played very well, each getting three safe hits out of four times at bat.

The sensational play came in the eighth inning when the score was 4 to 4. Meserve was on third, Brackett was on the initial sack, Humiston at bat and there was one man out. Brackett started to steal second but was caught between the bases and touched out; Meserve however stole home during the play thereby scoring the winning run.

For Rhode Island Lynch played the best, getting two doubles and a home run out of 4 times at bat. He also made several good catches in the field.

### SUMMARY

Following is the line up:

	ab	r	h	po	a	e
New Hampshire	4	2	0	3	6	
Blatchford 2b	4	1	1	0	1	
Irvine 3b	4	1	3	0	0	
Meserve rf	4	1	2	1	2	
Morrison ss	4	0	3	9	3	
Brackett c	4	0	0	0	0	
Humiston p	3	0	0	0	0	
Bissell p	3	6	0	2	0	
Cullinan cf	3	0	1	2	0	
Russell 1b	3	0	1	0	0	1
Atkins lf	36	5	11	17	12	1

Innings: 1 2 3 4 5 6 7 8 9  
New Hamp. 0 0 0 1 0 1 0 3 0—5  
R. I. 1 0 1 0 1 0 0 1 0—4

Two base hits, Lunch 2, Meserve, Brackett Morrison; Home runs, Lynch; Hits off Bissell, 6 in 5 innings; off Humiston, 4 in 4 innings; Struck out by Bissell 2, by Humiston 7; Hits off Hudson 3, off Woods 7; Struck out by Hudson, 5; Double plays, Lermond and Seifert; Hit by pitcher, Blatchford, Woods. Umpire Magoon.

### PROF. GROVES TO TEACH AT CANADIAN Y. M. C. A. SCHOOLS.

Prof. Groves has been invited to teach this summer at the Canadian National Y. M. C. A. schools for social workers. The Y. M. C. A. is putting social workers into the trenches for the benefit of the soldiers, because many peculiar and interesting problems have arisen. Prof. Groves will devote a week to these social workers, immediately after he leaves the summer school at Lake Geneva. The Canadian Camp is situated 100 miles north of Toronto.

SCENES FROM THE "IMPORTANCE OF BEING EARNEST."

### DRAMATIC CLUB PRESENTS PLEASING PLAY IN DOVER

Parts Well Interpreted—Pretty Costumes a Feature—Cast Enjoys a Mid-Night Banquet

"The Importance of Being Earnest" presented by the Dramatic Club in the Dover Opera House, Thursday evening, was heartily enjoyed by a small but appreciative audience, mostly made up of college students and their friends.

#### THE STARS

Mary Worcester as the cold and haughty Lady Bracknell scored a hit throughout the play, and E. L. Blake as Algernon Moncrieff kept the audience laughing from the moment he appeared on the scene.

Eleanora Currier and Ethel Kelleher were both charming as young and beautiful society girls and W. T. Tapley was unsurpassable in his role of butler.

All of the parts were well taken and well sustained. Perhaps especial credit is due Mr. Tapley and Mr. O. C. Work for making much out of small parts.

While the play was more in the nature of a farce than a comedy, and the humor depended more on the brilliant sayings than absurd situations, the fine quality of the wit was made apparent to the audience by the splendid interpretations of the different parts, and the plans were a decided success.

The beautiful costumes which were also a pleasing feature of the performance were furnished by Mrs. Shirley Underdonk.

#### MIDNIGHT BANQUET.

After the "show was over" the members of the cast hastened to the Chinese Restaurant and refreshed themselves with divers appetizing dishes before they returned to Durham on the jitney in the wee small hours of the morning.

Friday, May 19, Prof. Groves spoke before the state parents' and teachers' association, at Derry, N. H. His subject was: "Public Schools and Progress."

### AGRICULTURAL CLUB ELECTS OFFICERS FOR COMING YEAR.

The last meeting of the Agricultural Club, for this year, was held in the club rooms on Monday evening of this week. Officers for next year were elected as follows: President, C. L. Stevens; Vice President, E. W. Hardy; Secretary, S. L. Stearns; Treasurer, F. W. Webster; Master of Program, W. H. Jeffers; Sergeant at Arms, H. S. Martin; Executive Committee, Dame (chairman) Wadleigh and Thomas. The retiring president, Walter E. Chamberlin, congratulated the club on the results it had attained during the past year and also thanked them for the hearty support he had received throughout his term of office. The meeting then adjourned to the Agronomy lecture room where a very interesting and instructive illustrated lecture was given by Prof. Bell of Chicago. Prof. Bell holds the position of an educational representative of the fertilizer industries of this country and goes about the country under their support. His lecture was on the soil fertility and plant food of the soil and took up many of the commercial fertilizers with pictures of their manufacture and commercial importance as shown by tables of statistics.

The attendance was not all that could be desired, due, no doubt, to the after-effects of house party. A number of fertilizer dealers from adjacent towns were present and expressed their interest in the club and its ability to obtain such an interesting speaker. The meeting closed at a suitable hour, and was in all ways a climax to the most prosperous year that the Agricultural Club has probably experienced since its foundation at New Hampshire college.

### PRES. FAIRCHILD AT PITTSBURGH.

President and Mrs. E. T. Fairchild are visiting their daughter, Mrs. H. C. Holden of Pittsburgh, Pa. Their many friends will be glad to learn that Dr. Fairchild is gradually regaining his former good health.

### PROM. WEEK CELEBRATED BY SUCCESSFUL PARTIES

Wide Variations in Events of Holidays Was Brought to Close by Party Dances—An Enjoyable Week

All but one of the fraternities held house parties Prom week. Alpha Tau Alpha alone omitting this feature of the holiday making. The preliminary events of each fraternity's celebration varied widely in character, but all culminated in the same form of enjoyment—a dance.

#### GAMMA THETA.

The Gamma Theta fraternity spent the morning in walking and having a social time at the house. In the afternoon the ball-game furnished entertainment, and after supper a lawn party and dance was in order. A short concert was first given by the fraternity musicians, the audience sitting on the piazza and on the lawn which was prettily decorated with Japanese lanterns. Then dancing was enjoyed until twelve, when the gathering gave some cheers and sang college songs, closing the party with "Alma Mater."

#### THETA CHI.

The Theta Chi party went down the bay in the morning where a basket lunch was enjoyed and a base-ball game played between two teams of men and girls, the Lucky Strikers winning. The Rhode Island game was attended in the afternoon, and in the evening, a dance was held in Morrill Hall, favor dances furnishing an attractive feature.

#### BETA PHI

The Beta Phi fraternity took walks around town and bowled in the morning. Miss Hayward of New York won the ladies' prize, a five pound box of chocolates, for the highest score. The game proved interesting in the afternoon. The evening was passed in dancing at the Grange Hall, feature dances including favor and confetti dances, and a flag dance in which all nations of the world were represented.

#### ZETA EPSILON ZETA

The Zeta Epsilon Zeta party motored to Portsmouth on Saturday morning and visited the navy yard returning home in time for the game. In the evening, autos conveyed the party to Hilton Hall, where a sumptuous banquet was served. A unique entertainment in the form of ballet dancing was enjoyed by the company and then general dancing was indulged in for the rest of the evening.

#### KAPPA SIGMA

The Kappa Sigma fraternity in the morning motored to Watson's and took a launch, sailing down the bay to Portsmouth, where the navy yard was visited. Dinner was served at the Rockingham Hotel and the party returned to town for the ball game. In the evening, a dance was given at the fraternity house.

## GRADUATE 35 MEN IN TWO YEAR COURSE

GEORGE H. WHITCHER DELIVERS THE ADDRESS TO CLASS

## PRES. FAIRCHILD'S MESSAGE

Reminds Men of Responsibilities—Reception Held at Home of the President—Some Continue Work

In his paper, "The Value of the Training in Our Two-Year Course," F. A. Adams presented some very clear statements in regard to the benefits derived from the social as well as the practical side of the Two-Year Course.

The Class History compiled by Lee I. Rice, contained the usual brief summary of class athletics, a few "knocks" on some of the members of the class, and expressed the regret felt by all at leaving New Hampshire college.

### GRADUATION CLASS.

The Class Will, a cleverly worded satire on some of the members of the class and their peculiarities was written by Neal Andrew. The agricultural faculty were kindly excluded.

George H. Whiteher, Deputy Superintendent of Public Instruction, Concord, was introduced by Dean Taylor as a "man who formerly had charge of the New Hampshire Experiment station, and who had been identified with agricultural and educational problems in this state for a quarter of a century."

He gave an address on "Success and Failure in Scientific Farming." He divided his talk into three heads: the soil, the market, and the man. Speaking of the soil he said that almost any kind of soil will produce crops if properly handled as is shown by the fact that the formerly arid regions of the West now produce large harvests.

A hotel man in the northern part of the state told him a short time ago, he said, that he was unable to get fresh vegetables from home markets because the farmers did not raise them in sufficient quantities and this made it necessary for him to buy from wholesale markets from outside the state. Thus he showed that it is not necessary to go outside the state to find markets for the produce of the farms because they are right at our door.

### DEPENDS ON MAN.

The main thing to be considered is the man, because if he has the right amount of common sense mixed with a fair amount of brains he can succeed.

He expressed the hope that the class would engage in practical farming in New Hampshire, or else continue their studies in the four year course at New Hampshire college.

Following Mr. Whiteher's address, a message from President Fairchild was read by Mr. P. B. Gay, in which the class were reminded of their social and moral responsibilities, their debt to New Hampshire College and the state, and finished with the hope that they would always reflect credit upon their Alma Mater.

### RECEPTION.

Directly following the presentation of the Certificates by Acting President C. H. Lettee, the reception to the graduates and their friends was held at President Fairchild's home, where the class used their last chance to greet their professors and instructors. Some of the class are planning to come back for the four-year course. All pledge to New Hampshire their hearty support, wherever they may be in the future.

The graduates are: Floi Augustus Adams, Wellesley, Mass; Neal Davis Andrew, Littleton; George Albert Bassett, Fremont; Ellwood Vance Bennett, Laconia; Robert Stebbins Callender, Bethlehem; Dwight Edward Carlton, Lancaster; Charles Henry Colby, Franconia; Carl Elmer Crowley, Ashland; Adna James Cutting, Orford; Clark

## EDITORIALS.

### A WORD FOR THE TWO YEAR MEN.

Last Wednesday the largest two year class ever graduated from New Hampshire college received their certificates and went out to fight the battle with nature on the farms of New Hampshire. For two years they have read, studied and experimented as well as received practical work in almost every line of agricultural achievement. They have lived in an atmosphere of college life, associating with men and women from city, town and country. They have lived in a democracy and have made their lives what they are—better in every case than formerly, though varying in degree. These men go forth to take their place in society with a technical knowledge and a social training. They are to be the leaders in the community life of many of the towns where they settle. To a great measure the future of the state's greatest industry, agriculture and to a degree the future of the state socially and politically, will be aided or marred by their efforts. May they be true to their trust and always bring honor upon their Alma Mater and their native state.

### EVERYBODY OUT

Every bit of college spirit should be mustered for the first game in Dover, May 30, when New Hampshire meets Springfield Y. M. C. A., College at Central Park. With commencement but two weeks off and attendance required the day before for government inspection of the regiment, there is no excuse for anyone to be away from college that day, and there should be four hundred students in an organized cheering squad to spur the team on to its best efforts. Despite a bad start, due to lack of practice, the team has done well and every game since the first contest has been hotly contested, and, with a revival of the spirit manifested last fall when three hundred took the long trip to Worcester and cheered the football team to an overwhelming victory, it should not be extremely difficult to make the crack Springfield team realize that if they are to defeat New Hampshire they have got to put forth their best efforts. Let's have the band out this week for a few parades through town and cheering practice to limber up our throat muscles for the Dover game.

### COMMUNITY CONFERENCE.

The Community conference to be held here next week is a most significant thing. Men and women of national reputation are on the program and the subjects under discussion are as varied as they are valuable. This conference presents a great opportunity for New Hampshire people to get into close touch with men and women who are authorities upon the very problems that the communities of the state are facing and wise is that place which listens to the voice of authority and profits thereby. Dean Groves and those associated with him deserve great credit for the splendid program and for their successful efforts to have the conference in Durham. We welcome all our visit-

ors and trust they will make the fullest use of the college while they are here.

### MAJOR SPORTS FOR GIRLS.

For some time now the young women of the college have not had a tennis court that they could use exclusively, or when they have had one it has not always been in the best of condition. Our co-eds usually suffer in silence but now and then a few of them have been heard to remark that tennis was a very beneficial game and that they would appreciate it if they were given an opportunity to enter into the sport when they felt so disposed. It does not seem that this is preposterous on the part of the young women when the men of the college have so much done for them. The percentage of young women students is increasing and as it increases their needs and desires will increase, and they should not be neglected. Therefore, let them have their tennis court.

### WHAT OTHERS THINK OF US

Judging from the conduct of New Hampshire State College men both at home and abroad we would say the man and the gentleman are combined in every one of them. They have always given our teams and musical clubs the most hospitable and courteous entertainment at Durham and have never failed to do the square thing when on our campus. Nor did this estimate come from the New Hampshire Club. (The Bates Student.)

### Notice.

The Girls Council has about 50 New Hampshire college song books which they wish to dispose of before June 10. These song books may be purchased from Marion G. Dudley '16 at Smith Hall. Every New Hampshire student should have a copy of this book. Have you one?

### CAST OF CHARACTERS CHOSEN FOR OPEN AIR PERFORMANCE.

The Girls' Glee Club out of door performance promises to be one of the most entertaining and novel events during Commencement Week. The cast and chorus have been selected, and the work is well under way. The soloists will be Marjory R. Boomer, '19, Julia A. Roberts '17, and Marian O. Chase '17. In "As You Like It" the leads will be played as follows: Rosalind, Miss Roberts; Celia, Miss Chase, Orlando, Miss Dudley. The humor will be well brought out by Miss Colby as Touchstone, Miss Shannon as Audrey, and Miss Foser as William. The entire cast numbers nineteen, and the chorus is made up of twenty voices. An interesting feature will be the aesthetic dancing between the acts.

### "THREE B'S" TRAGIC CRUISE IN THE RAPIDS OF PETTEE CREEK.

Three B's all in the same canoe, and just after house-party at that, was proven to be a failure when last Wednesday afternoon, a member of the kid faculty, a special, and an Arts and Crafts student tried to shoot the rapids just back of The Dean's barn that were formed by the flood that descended on this neck of land during the 24 hours just preceding the attempt.

Dressed in oil skins, overcoats, rubber boots, and other wet weather accouterments, the three started out for a nice little paddle in the miniature lake back of the Gamma Theta house and all went well until the Captain ported the helm two points too far to the Sou'West!!! Then Mate, Engineer, and all sank into the murky depths arising only to flounder about vainly trying to get a foot hold on the slippery banks. Captain B, says that the first thing that he remembers hearing after the crash came was the exclamation "D—I've lost my pipe." Due to the efficient work of Mate B, it was not long before the canoe was recovered and righted.

Interested spectators kindly offered assistance but it was politely declined as being entirely out of place. As the sturdy voyagers calmly paddled their way back across the pond, with the Engineer B. crouching in the bottom, the strains of "Rocked in the Cradle of the Deep" were wafted gently back on the breeze to the bystanders.

Prof. W. C. O'Kane who viewed the return of the Triumvirate, thought that he had discovered another class of bugs but when he heard them "beller" he recognized it as belonging to the "genus homo" and promptly resumed his work.

## ANNUAL INTERSCHOLASTIC PRIZE SPEAKING CONTEST

Large Number of Contestants Present—Boys and Girls Compete on Equal Basis—Three Prizes

The annual interscholastic prize speaking contest took place in Thompson Hall at 8 P. M., May 1<sup>st</sup>. This contest was inaugurated by the alumni of New Hampshire College, who vote annually a sum of thirty dollars for this purpose. Three prizes of fifteen, ten and five dollars, respectively were offered, and this year the boys and girls competed on equal terms. These prizes were awarded to the three contestants who excelled in the combined qualities of sympathetic interpretation, clear enunciation, and graceful delivery. Notice of the contest had been sent to all New Hampshire schools on the approved list and to all the larger high schools of Maine and Massachusetts, so that many competitors were present. The judges were: Mayor H. W. Spaulding of Manchester, Mr. Albert K. Church of Hampton and Miss Elizabeth Sawyer of Dover.

### COMMUNICATION.

To the Editor of the New Hampshire, Dear Sir:—

In view of the recent defeat of the New Hampshire Debating team at the hands of Rhode Island, the members of the team feel that an explanation is due the student body, which may, perhaps, explain the statement in the last issue that the debate was "unsatisfactory."

Under arrangements made between the two managers, March 20, it was agreed that N. H. was to select the three judges from a list submitted by Rhode Island. This list was not submitted until May 2, although our manager had repeatedly written asking for it. Although the list was unsatisfactory because all of the people named lived near the College and in the State of Rhode Island, nevertheless we made a selection and returned it the following day, May 3. Upon our arrival at Kingston we found that none of our selection had been obtained and that one of the three judges selected by them was not even on the list submitted by R. I., nor were we notified of this fact before leaving Durham. In the evening one of the judges did not appear and the debate was delayed for 45 minutes. In the meantime various plans for judging were proposed by Rhode Island which we would not accept. The President of the College would not serve, another person whom we would have accepted was ill, and the local minister, their proposition, we would not have. The proposition that we proceed with only two judges, using an individual score for each man and then averaging the two teams was rejected by us. Finally it was found that there was an architect from Providence in the audience, and we were forced to accept him as the third judge or refuse to debate. The other two were ministers from nearby towns. This was unsatisfactory to us because the majority of the ministers in the country are opposed to military compulsion, but we had no other alternative. Rhode Island proposed a volunteer system in opposition to the Swiss, and the two ministers voted for them and the architect for us. In an informal discussion following the debate one of the judges who voted for Rhode Island said that he gave very little credit to the quoting of authority, but that facts should be given. New Hampshire quoted the best of authorities and by far the greater number. We fail to see wherein an ordinary layman is qualified to throw aside the opinions of authorities of men of prominence and known ability and substitute in their place their own personal views. It surely is not weighing the evidence.

We do not wish the students of New Hampshire to think that this is written in a spirit of criticism or protest because of our defeat, but we do feel that since you have given toward the expenses of the trip you should know the conditions. These statements can be backed up by the admission of the President of the R. I. Debating Club that the conditions were due to lack of proper management, upon their part.

Respectfully yours,  
R. I. McCartney,  
R. J. Bugbee,  
V. W. Batchelor,  
C. C. Bond.

Dean C. E. Hewitt is to speak at Short Falls, N. H., this evening, May 20, on the subject: "Electric Lighting Plants for Rural Communities."

### TROPHY CUP TO BE AWARDED TO TRACKMAN WITH BEST RECORD.

There is soon to be a new trophy cup here at New Hampshire. This has been made possible by the generosity of several alumni in Akron, Ohio. The cup is to be known as the Davis-Ham Memorial cup and will be awarded yearly to the member of the Track Team making the best individual record for the season. This will be decided by a committee appointed by the Athletic Director. The cup will soon be on exhibition in the registrar's office.

This is sure to be an advantage to the Track Team. It will increase the spirit of friendly rivalry already existing among the members and their efforts to win the cup will result in more points for New Hampshire in the meets to come. The efficiency of the Track Team will surely be increased and very probably, many of the present records will be broken. The high point winners this year are as follows: Ross 1', Hewey 12, Brill and Wadleigh 9, Nightingale, Wentworth, Huse, and Bennett 8 each.

### HOME ECONOMICS DEPARTMENT BUYS MORE NEW EQUIPMENT.

Dean Goldthwaite has just succeeded in obtaining for the Home Economics department two excellent looms through J. L. Hammett Co., of Boston. The larger which stands three feet high, permits the weaving of rugs 54 inches long by 40 inches wide, the smaller which is held in the lap or rested on a table, is for weaving sofa pillows 10 inches square.

In course 6 each student is required to weave one article, and she may weave others if she wishes. This new plan promises to be very efficient not only because of the practical experience of weaving, but also from the standpoint of teaching the principles of the old and new weaving.

# DE LAVAL

## Stands On Its Record

FOR nearly forty years the De Laval Cream Separator has led in the cream separator field. It was the pioneer in 1878. It had a long start and has always held its lead. It has always led in every step of cream separator development and popularity, and more De Laval are in use today than all other makes combined.

It has always been recognized as the closest skimming cream separator. That's the main reason why 98% of the world's creameries use it to the exclusion of all others.

Because of its cleaner skimming, ease of operation and wonderful durability, every De Laval user is a "booster" and the better its work is known in a neighborhood the more popular it becomes.

The better quality cream it produces is attested by the fact that De Laval produced cream and butter have scored highest at every annual contest of the National Buttermakers' Association for twenty-four years and in every great representative contest for over thirty years. Last but not least, the De Laval was awarded the Grand Prize at San Francisco Exposition in 1915 as at every other great exposition since its invention.

*We will be glad to send one of our handsomely printed and illustrated new catalogs to any farmer or student interested in dairying upon request.*

### NEWSY ITEMS OF THE ALUMNI.

Frank Lane, '07, attended the manual training teachers conference here last week. He is teaching in Manchester at present.

H. C. Reed, '10, in the employ of the Southern New England Telephone Co., is at present in New Haven, Conn.

Probably the youngest New Hampshire graduate to hold the office of selectman is D. W. Ladd, Jr., '14, who was elected to that office at the Fpping town-meeting this spring.

J. A. Tufts, Jr., '14, of Exeter, is in business with Dow's Nursery of North Fpping.

R. B. Scammon, '10, is engaged to Miss Viola Smith of Lynn. Mr. Scammon is employed in the Turbine Construction Department of the General Electric Co., at Lynn.

J. J. O'Connor, '08, has left the employ of the General Electric Co., and has accepted the position of Superintendent of the Thomas A. Kelley & Co., Morocco manufacturers, of Lynn. Mr. O'Connor is a son-in-law of Mr. Kelley.

### RESEARCH WORK CARRIED ON AT NEW HAMPSHIRE LABORATORIES.

In the past year many articles have been published in various chemical journals, on research work that has been carried on by students at New Hampshire College. A fairly complete list of these articles is as follows:

"The Regeneration of Sulfated Storage Cells," by Prof. G. A. Ferley and C. W. Davis; "The Reduction of Lead Sulfate," by Prof. G. A. Ferley and C. W. Davis; "The Extraction of Beryllium from Cadolinite," by Prof. C. James and Prof. G. A. Ferley; "The Colbaltcyanide of the Rare Earth Cadolinum Sodium Sulfate," by P. S. Willard; "The Separation of the More Soluble Rare Earths From Brazilian Monogite," and "Some New Rare Earth Compounds," by A. J. Grant; "The Separation of Yttrium from the Yttrium Earths," by J. P. Bonardi. A. J. Grant has partially completed research work on a new method of separating Yttrium from Erbium by fractionation with ferricyanide. Books have been published containing discussions on the subject, but heretofore, no actual work has been done.

### REV. CHARLES R. BROWN TO GIVE THE COMMENCEMENT ADDRESS.

The Reverend Chas. R. Brown, dean of the Divinity School at Yale is to deliver the Commencement address here June 16. Mr. Brown was formerly pastor of the First Congregational Church at Oakland, California, the largest church of that denomination in the country. He is a native of West Virginia, and graduated from Iowa University in 1883. He has been special lecturer at Cornell and Columbia. In 1905 and 1906 he was Lyman Beecher lecturer at Yale. He is the author of many books on religious and sociological subjects, one of them being the Social Message of the Modern pulpit.

### BOOK AND SCROLL GUESTS OF DR. RICHARDS AT LAST MEETING.

The last meeting of the "Book and Scroll" was held at the home of Dr. and Mrs. A. E. Richards on Tuesday evening, May 16, where nearly all of the members were present to enjoy the very pleasing program in charge of Dr. Richards.

A business meeting was held first, and the officers elected for the coming year. Phyllis Blanchard was reelected President, Marguerite Merrill was elected Vice President; Abbie Turcotte, Secretary; Helen Weston, Treasurer, and Louise Burpee, Librarian.

Dr. Richards then took charge of the meeting, and began the program by reading some of the most noted and beautiful lines from Shakespeare's plays, as well as some of his best sonnets, pointing out some of Shakespeare's characteristic thoughts as he read:

"It was a Lover and his Lass" and "In Springtime" were charmingly sung by Bladys Brown accompanied by Goldie Basch. Dr. Richards then played several selections from various Shakespearean plays on the victrola, and while the company was enjoying the music Mrs. Richards served ice cream and cake.

### REGISTRATION REQUIRED FOR PRIVATE MOTOR BOATS

Equipment Same as Demanded by Regulations of 1913—Necessities are Lights Life Preservers, Fire Extinguishers

The following bulletin was given out May 8 by the Public Service Commission.

By an act passed at the 1915 session of the legislature private motor boats are required to be registered and numbered in the same manner as automobiles, the registration fee being one dollar, the proceeds of such registration, above expense of administration to be applied to the maintenance of lights and buoys, and otherwise improving the navigability of the inland waters of the state. The Public Service Commission is charged with the administration of the act. By an act passed at the 1913 session, providing for inspection and licensing of public boats, the commission was required to prescribe regulations for the operation and equipment of such boats, which regulations should also apply to private boats, unless expressly provided. Those regulations were issued in 1913, and have ever since been in force, so that the law providing for the registration of private boats has in no respect increased the requirements as to their equipment.

### EQUIPMENT.

It is evident that there is much misunderstanding as to the demands upon private boat owners in the matter of equipment, and the expense involved. For small boats, not exceeding twenty-six feet in length, the only equipment required is lights, life-preservers, and fire-extinguishers.

The lights are a combination red and green light at the bow, and a white light at the stern. These will not cost over \$1.25. Life preservers of solid cork cost from 90c to \$1.20 each. Life belts, buoyant cushions or ring buoys may be used in place of life preservers. The boat's cushions can be stuffed with buoyant material, and equipped with handles. Such cushions, for adults, at least, are perhaps better than the standard life preserver. A fire extinguisher suitable for extinguishing gasoline fires may be bought for \$1.00. The total cost of equipment for a boat carrying five or six persons would be not over \$7.00 or \$8.00.

### FEDERAL REGULATIONS.

For some years, the Federal government has had in force very strict regulations governing motor boats on tide waters. Extensive tests have been made of all types of fire-extinguishers and life-preservers. Any type of equipment approved by the Federal service is legal under the New Hampshire regulations. Many fire extinguishers are useless for gasoline fires. Certain types of life-preservers, as those filled with granulated cork, or cushions inflated with air, are unreliable, and cannot safely be used. There is an ample choice of inexpensive materials. Full information will be given on application to the Engineering Department of the Public Service Commission, or to the inspector or assistant inspector of boats.

There is other equipment which in the interest of safety motor-boat owners are advised to carry. But lights, life-preservers and fire-extinguishers are all that is required by the regulations of the commission.

There are great dangers in motor-boat operation—hardly less than in the operation of automobiles. Lights are necessary for the protection of other boats. And fires on motor-boats are sudden and almost necessarily fatal unless means are provided for their extinguishment, or for escape. No man ought to be willing to take women and children out in a motor-boat with less safeguards than these regulations provide.

The commission desires to make the law as little burdensome to boat-owners as is consistent with reasonable and decent regard for safety. If in any respect the regulations seem unreasonable, the commission will welcome suggestions for their improvement.

### CHAPEL SPEAKER DISCUSSES AMERICAN CITIZENSHIP

Monday at convocation, the Rev. Jesse M. Durell of Tilton Seminary delivered an impressive address on "The Gospel of American Citizenship." Dr. Durell said in part that "The Declaration of Independence and the Constitution of the United States bestow upon the individual the highest honor possible. Longer may these things prevail and their greatest honor continue. The highest sentiment that an American citizen can have politically is loyalty to the flag.

"When a foreign government interferes with our enjoyment of life, liberty, and the pursuit of happiness, with purposeful intent, the highest duty of the American citizen is organization for defense. The man who turns the other cheek when he has been smitten is he who volunteers. We want a navy big enough to do business; an army big enough to serve the purpose; let experts decide on the necessary size.

### PRIVILEGE OF SERVICE.

"The highest privilege of an American citizen, is service in the organized forces of his country. The right of casting the ballot carries with it the privilege of carrying the musket. When every citizen wields his ballot as well as his musket, pork barrel legislation will virtually disappear. When the day for universal arbitration of international disputes comes, the United States must be able to back up its contentions. When that day finally comes, it will be acknowledged all over the world that all men have the inalienable rights of life, liberty, and the pursuit of happiness."

Dr. Durell's address was exceptionally impressive, holding the attention of the audience to an unusual degree.

### IMPROVEMENTS ON CONANT HALL ADD MUCH TO THE BUILDING.

In the course of the past year improvements have been made, a few at a time on Conant Hall until now they have accumulated to a respectable and important size. The old quantitative laboratory has been enlarged by the tearing down of the old library and balance room, and new benches are being installed for the courses in quantitative agricultural chemistry. The old office just beyond the former balance room has been turned into a balance room for the students in agricultural chemistry. Downstairs the former mineralogy room has been petitioned off to form separate library and balance rooms. A Physical Chemistry laboratory has been constructed in what was known as the dynamo room before DeMeritt Hall was built. A new stock room has been built in the basement with more room and better facilities for the proper storage of apparatus and supplies. Finally, a direct current generator set has been installed in the basement for use in electrolytic work. The generator is driven by a motor on the 550 volt power circuit and delivers current at any pressure desired within a range of 30 to 250 volts.

### What's on the Fertilizer Bag?

Does the manufacturer print on the bag of fertilizer you use, how much immediately available nitrogen it contains?

Many do not. This is another reason why home mixing is the safe, economical method. Mix your own fertilizers and know what you get.

My book "Home Mixing" free. Send post card for it, today.

Hartford, Conn.

### INTERSCHOLASTIC TRACK MEET HELD HERE TODAY

Representatives From Best Prep. Schools in New England—Men Entertained at Frat. Houses

The annual Interscholastic Track and Field Meet will be held on the college oval today, May 20. This event has been held every spring for the last five years and many of the best prep schools in New England have sent their representatives to compete.

The prime object of the meet is to bring out the best athletes from these prep schools and to promote clean, fair sportsmanship. It also gives the coaches an opportunity to size up the men, some of whom may enroll here after completing their preparatory courses.

The men taking part in the contest are entertained at the various fraternity houses and in this manner they are able to gain a few glimpses of college life.

#### ITS SCOPE

Great interest has always been shown in this meet and some idea of its scope may be gained by observing the number of schools which are represented this spring as well as considering the distance that some of them send men to engage in the different events. The following schools are represented: Lebanon High, Hebron High, Worcester Classical High, Sanborn Seminary, Kimball Union Academy, Worcester North High, Worcester South High, Colby Academy, Dummer Academy, Manchester High, Concord High, Inkerton Academy, Hopkinton High, Haverhill High and Moses Brown school. The meet was won by Huntington School last year with Boston English and Colby Academy second and third respectively.

The preliminaries will be held at 10.45 this morning and the finals will be run off at two in the afternoon.

### FOREST FIRES SUCCESSFULLY HANDLED BY N. H. C. STUDENTS.

On Thursday, May 11, the college whistle was sounded at 9.45 for the first forest fire in this vicinity. The fire started near the railroad tracks to the north of the campus, and when the alarm was sounded, had gained considerable headway. Owing to the strong west wind that was blowing, it looked at first like a big proposition to control the fire. The refuse left from recent lumbering operations offered a fine pathway for the flames, and made fire-fighting doubly difficult.

Upon reaching the scene of the fire the regiment, under the direction of Prof. K. W. Woodward, and Lt. Col. D. P. Corbett, began a fight that soon ended in the subduing of the fire. The limited supply of tools handicapped the men to a considerable extent. The fire was well under control by noon so that classes were resumed in the afternoon. Patrol was established to watch the fire at night.

At 4.00 P. M., on Thursday an alarm was sounded for a fire in Lee, directly west of Durham. Although the situation presented an ugly aspect for a time, the fire was in hand before dark.

Friday at 7 A. M., an alarm for a small fire near the first one was sounded. This, however, was quickly extinguished.

The forestry department is now at work mapping the territory burned over, and making an estimate of the losses.

Owing to some confusion caused by the all out signal being sounded for a forest fire, a new signal has been arranged. Hereafter the forest fire alarm will be five short blasts of the whistle.

### PROF. E. R. GROVES ATTENDS ANNUAL NATIONAL CONFERENCE.

Last week Prof. Groves attended the Annual National Conference of Charities and Correction, held at Indianapolis, Ind. Six thousand of the country's most famous social workers were present, to discuss many phases of social problems. This is the sixth year that Prof. Groves has attended these conferences. This year he joined a large party at Boston and traveled in a special car for the remainder of the trip. The only other New Hampshire delegate was Mrs. Brown of Whitefield, who is a member of the state board of charities.

#### NO MORE ADVERTISING.

At the University of Michigan rules have been made prohibiting the sticking of college "posters" on suitcases or other baggage. It is claimed that this is against the conservation of present day things.

### HEAVY RAINFALL NEARLY UNDERMINES ENTIRE TOWN.

The dam by the old mill was faithfully doing its duty last Wednesday afternoon with fully two feet of turbid water rushing over the spill-way. The water accumulated so rapidly in the usually dry area enclosed between the dam and the retaining walls on each side of the bridge that its level was less than three feet below the level of the water above the dam. And a fall of from six to eight feet was necessary in passing under the bridge for it to reach the level of the water in the bay, as it was at high tide.

At noon the water was so high that it overflowed the abutments of the dam, and completely encircled the mill raising the level below the dam to the sills of the mill itself.

#### WORST WASHOUT.

The bridge adjoining Dean Pettee's land on Garrison avenue was almost totally undermined and a large portion of the none too well constructed roadway washed away, leaving only a frame-work of rocks and the sidewalk. The nearby pumping station was surrounded by the water which flooded the building to the depth of several inches and even entered the well seriously contaminating the intended drinking water.

The practically new stone bridge on the Parker's Falls road was attacked persistently by the turbulent waters of the college brook but it sustained no critical injuries. The road was partially dug out by the water that covered it at one time, to a depth of about six inches. The concrete culvert, however, withstood all such attempts at destruction.

#### HEAVY PRECIPITATION.

This storm started Tuesday morning with a thick intermittent mist but late that evening it really began to rain and continued so until five o'clock on Wednesday. Approximately seven inches of rain fell in eighteen hours. The streams are higher than they have been for many years.

Wednesday noon many of the streets were almost impassable on account of the accumulation of water, mud and debris. The roads, and sidewalks were very badly gutted by the rapidly draining water; which finally, in many instances, collected in private yards and open lots forming small deep ponds.

The members of the Kappa Sigma fraternity were temporarily imprisoned in their house by the surrounding water and they had either to navigate rafts or swim to secure contact with the mainland.

The fraternity house-parties came in good season for many of the woodland walks and resting places have greatly lost their charm under several inches of water.

Various surrounding towns reported more or less damage to civic property and railroad beds but no news of an alarming nature has been received.

### DEAN GOLDTHWAITE TO SPEAK ON WHAT IS HOME ECONOMICS.

Dean Goldthwaite is to speak in Manchester, Saturday, May 20, before the annual meeting of the Mount Holyoke Alumnae Association. Her subject will be "What Is Home Economics?" For eight years, Miss Goldthwaite was head of the department of chemistry at Mount Holyoke, and was an honorary member of the classes of 1902 and 1905.

#### GRADUATE 35 MEN.

The class officers are: President, Harold L. Fastman; Vice President, Adna J. Cutting; Secretary, Paul B. Gay; Treasurer, William A. McGrath.

### WORCESTER POLYTECH. WINS TRACK MEET BY 67 TO 59

Sanders Ties for First in Pole Vault, but Breaks Arm—Four Men Win the N. H.—Meet Hotly Contested.

Despite the much flouted track ability of the engineers from Worcester Polytech, New Hampshire held them to a narrow margin victory in the dual track meet here last Friday which the red W. jerseyed athletes won by a score of 67 to 59.

In the century dash, the first event of the day, New Hampshire gave Worcester the surprise of her life. Captain Riccar in whom she had all kinds of faith captured only third place, Ross and Dudley of New Hampshire beating him by inches to the tape. Ross's time, 10 1-5 seconds, equals the college record held by Captain Ward but will not be allowed to stand, it is said owing to the wind aiding the runners.

Riccar came back strong in the 220, however, and had the race all to himself. The last few yards he turned and waved his hand at Ross and Ward who were fighting it out for second place.

#### NISH INGALE WINS 2 MILE

Nightingale set a new mark in the two mile after running a masterful race. He prudently allowed Garland of Worcester to keep a stride ahead the first seven laps thus using him for a windshield on the back stretch of the oval track. Nightingale had his usual punch left for the final spirit and broke the tape in record time.

In the broad jump Boomer was in top notch form but owing to his inability to get the takeoff his jumps, which otherwise would have given him first place, were ruled out by the officials.

owers of Worcester nosed out "Sid" Wentworth of New Hampshire in the 800 yard run in a pretty race.

#### HIGH JUMP

Much interest was manifested in the high jump, the event being closely contested and men several times clearing the rod on their last try and even hitting it occasionally without its falling off, much to their own surprise as well as that of the spectators. The first two places finally went to the visitors, Rollins, New Hampshire's stand-by having to content himself with third. After trying Brill for first place in the pole vault, Sanders had the misfortune to fracture his left arm in landing on hard ground outside of the pit. He was rushed to the Dover Hospital by automobile.

Four men will probably get their letters for work in the meet. Dudley for coming in second to Ross in the hundred, Bennett and Wadleigh for first two places in the discus throw and Nightingale for landing the two mile run.

#### SUMMARY

100 yd dash—won by E. S. Ross, (N. H.); W. A. Dudley (N. H.) 2nd; A. F. Riccar (W. P. I.) 3rd. Time 10 1-5 sec.

220 yd dash—won by A. F. Riccar (W. P. I.); E. S. Ross (N. H.) 2nd; P. S. Ward (N. H.) 3rd. Time 23 sec.

440 yd run—won by A. E. Riccar (W. P. I.); E. F. Greene (W. P. I.) 2nd; R. L. Dame (N. H.) 3rd. Time 53 1-5 sec.

880 yd run—won by L. F. Powers (W. P. I.); S. W. Wentworth (N. H.) 2nd; R. L. Dame (N. H.) 3rd. Time 2 minutes 7 1-5 seconds.

Mile run—won by O. A. Francis (W. P. I.); G. B. Keith (W. P. I.) 2nd; A. B. Whittemore (N. H.) 3rd. Time 4 min. 58 3-5 sec.

Two mile run—won by G. T. Nightingale (N. H.); A. F. Garland (W. P. I.) 2nd; C. C. Dustin (N. H.) 3rd. Time 10 min. 22 sec.

120 yd high hurdles—won by M. E. Taylor (W. P. I.); B. A. Schmidt (W. P. I.) 2nd; H. C. Hewey (N. H.) 3rd. Time 17 1-5 sec.

220 yd low hurdles—won by B. A. Schmidt (W. P. I.); H. G. Hewey (N. H.) 2nd; C. I. Stevens (N. H.) 3rd. Time 27 2-5 sec.

Hammer throw—won by R. W. Huse; A. F. Hazelton (W. P. I.) 2nd; C. B. Wadleigh (N. H.) 3rd. 111ft. 2 in.

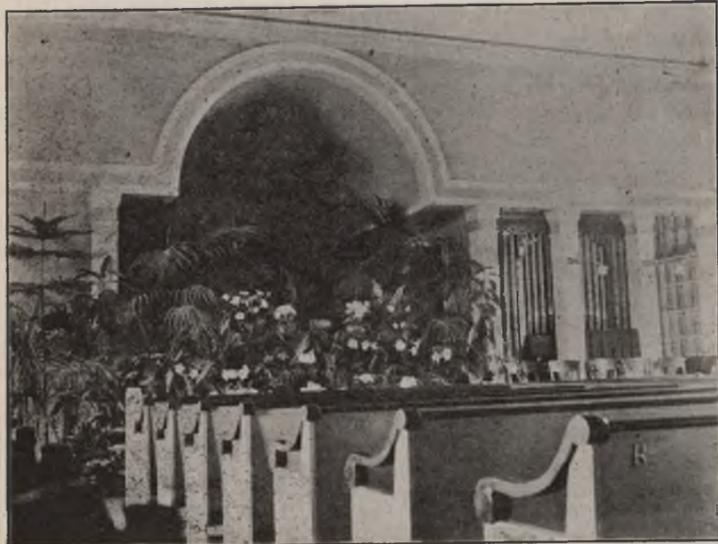

Shot put—won by M. O. Chaffee (W. P. I.); C. B. Wadleigh (N. H.) 2nd; M. H. Brill (N. H.) 3rd. 37 ft. 6 1/2 in.

Discus Throw—won by F. C. Bennett (N. H.); C. B. Wadleigh (N. H.) 2nd; A. F. Hazelton (W. P. I.) 3rd. 139 ft. 0 in.

High jump—won by A. F. Hazelton (W. P. I.); C. A. Schmidt (W. P. I.) 2nd; J. H. Rollins (N. H.) 3rd. 5ft. 8 1/2 in.

Broad jump—won by B. A. Schmidt (W. P. I.); H. W. Degnan (N. H.) 2nd; H. C. Hewey (N. H.) 3rd. 10 1/2 in.

Pole vault—tie for first between M. H. Brill (N. H.) and E. N. Sanders (N. H.); O. A. Gorman (W. P. I.) 3rd. 10 ft., 6 in.

THE CHURCH IN DURHAM.
