RHODE ISLAND LOSES TRACK MEET TO N. H.

KINGSTON TEAM WORSTED BY SCORE OF 82 TO 44

2 MILE RUN FEATURE OF MEET

By Being Run in Nine Minutes, Forty-six One-Fifth Seconds—Most Events Easily Won.

New Hampshire won the annual track and field meet with her old rival Rhode Island, by a score 82 to 44 at Kingston last Saturday. After getting 9 points each in the 100 yard dash and the high jump, the result was never in doubt. Ten of the fourteen first places came New Hampshire's way, together with a good share of the seconds and thirds. Two freshmen were easily the stars of the meet. Boomer collected 12 points out of four events, while Nightingale came through in the 2 miles run, in the time of 9 min. 46 1-5 sec.

The trip was interesting from start to finish. The 10.30 express failed to stop for the team and they were forced to take the 11.23 to Boston. After checking the baggage at the South Station, Coach Cleveland took the team for a short hike and sight seeing excursion through the busiest streets. By following up the scent of strawberry shortcake, an eating place was finally found, just across the street from the South Station. After dinner the team took an express to Providence, and from there an accommodation to Kingston. Here they were placed on two commodious coaches and finally arrived in front of the Commons. Most of the scenery between the college and the station seemed to be decorated with such signs as R. I. 7, N. H. 6 and R. I. 13, N. H. 0. These were inspiring, to say the least. After supper, the members of the team were taken to the various houses for the night. During the stay in Kingston, all received the best of treatment.

The meet started at 10 o'clock. The day was excellent, and the track was in much better condition than the one here at Durham. The crowd was small, however, since track is not well supported at Rhode Island.

CENTURY DASH.

The 100 yard dash was the first event. Dudley got away with a good start, beating Ward out for second place by two yards. Ross won, as usual. In the high jump Rollins cleared 5 ft. 7 in. while Stevens and Boomer tied for second place. Bemish, known locally as the Iron Man, and Nightingale, the Human Ford, lapped the other starters in the 2 mile run. Bemish stayed a yard ahead of Nightingale for seven and a half laps, but was left behind about thirty yards in the sprint for the finish.

Wood of Rhode Island won the high hurdles easily. Hewey finished second but was disqualified, giving Boomer second place. Hewey won the low hurdles with Wood second and Stevens third. Thomas led the first 250 yards of the quarter, but Capt. Greenhalgh of Rhode Island easily walked away from him at the finish. Dudley wobbled in for third place. Greenhalgh also took second in the 220, although it was close between him and Ross for first. Ward finished third. In the half mile, there was nothing to it but Wentworth and Dame, who ran almost a dead heat, Wentworth winning by a few inches.

BROAD JUMP.

Boomer came through in good shape in the broad jump, winning first place, and then tied for second in the pole vault with Strand of Rhode Island. Brill won the latter event with one trial. Palmer of Rhode Island was not pushed in the shot put. Wadleigh and Bugbee landed second and third. Wadleigh also won the discs with Bennett second and Palmer third. Huse carried off the hammer throw easily beating Palmer and Hopkins of Rhode Island.

After the meet the team was taken to the station in the coaches. On the way "the old gray mare" showed that she could do what the Rhode Island team could not, and furnished some excitement.

PAN HELLENIC SOCIETY REVISES CHINNING RULES

Velma Hardy, '17, Elected President and Marguerite Merrill, Secretary and Treasurer—New Members

At the last meeting of Pan-Hellenic election of officers for 1916-17 was held, and the rushing rules for the coming season decided upon. Verna Hardy '17, was chosen president, and Marguerite Merrill '18, secretary and treasurer. The new members of the organization are: Lucille Gove, Alpha Xi Delta; Irene Huse, Chi Omega; and Marguerite Merrill, Phi Alpha Phi.

Formerly only four meetings a year have been held but next year the plan of having a regular meeting during the last week of each month will be tried. These meetings will be open to the three societies, and will probably be in part, at least, discussions of topics of interest to the fraternity world.

Another innovation is a Pan-Hellenic party to be held the last of September. All freshmen women will be entertained as guests of Pan-Hellenic, but this party will not take the place of either of the two rushing parties granted in rushing rules.

Hitherto all rules applying to rushing have been published and a copy given to every girl, on Registration Day. This year the rules are simplified by having only those printed which apply directly to freshmen; the others are put in the form of resolutions, and a copy given to each fraternity. In order to avoid other college activities being scheduled for the same time, the date of chinning is to be put in the date book.

THE NEW RULES.

The rushing rules for the freshmen are as follows:

I. The word freshman signifies any girl who has not been through one rushing season at New Hampshire College.

II. No fraternity shall invite any girl to become one of its members or in any way indicate the same before the 8 o'clock mail Thursday, November 23, 1916.

III. All replies shall be formal, and mailed at Thompson Hall at 8 A. M., November 25.

IV. Fraternity matters shall not be mentioned by any member of any fraternity to a freshman at any time, with the exception of a stated hour on the day bids are given out, until the reply from an invitation is received.

V. As soon as a girl pledges herself, the fraternity insignia shall be worn visibly.

VI. Any girl breaking her pledge with one fraternity shall not be eligible to a bid from another fraternity.

VII. No invitation shall be issued by a fraternity during rushing season to a freshman for any entertainment or sleeping accommodations, and no invitation of like nature from a freshman shall be accepted by a fraternity girl.

(a.) Entertainment means any refreshment offered to a freshman, any money spent on a freshman, or any escorts or callers provided for a freshman.

(b.) Dutch treats are allowable.

VIII. There shall be no intercourse in the dormitories between freshmen and fraternity girls after 8 P. M.

(a.) This rule applies to girls living in private homes.

IX. Each fraternity may hold two rush parties during the rushing season. A rush party is any entertainment offered to a freshman by a fraternity girl.

X. In regard to the rules concerning sleeping accommodations and eating together, exception is made between roommates and sisters.

XI. There shall be no intercourse during chinning season.

Penalties: The first violation of these rules shall be reported to and penalized by Pan-Hellenic.

A second violation of these rules by a fraternity shall take away its privilege of bidding, during the college year, the girl with whom the rule is broken."

In the past week John F. Durgin, '18, of Newmarket was pledged to Kappa Sigma fraternity; and Carl F. Mathes, '19 of Lawrence, Mass., to Theta Chi.

1000 WITNESS GAME AT CENTRAL PARK

NEW HAMPSHIRE LOSES HARD GAME TO SPRINGFIELD

CONNECTICUT DEFEATED 7 TO 6

Ten Inning Game Gives Victory Over Starr's Team—St Anselm's College Wins From N. H. by Score of 5-2

The name of New Hampshire College was added to the already enviable list of scalps which Springfield Y. M. C. A. College has taken into camp this year, the contest last Tuesday afternoon at Central Park proving amusement for a thousand baseball fans who witnessed the defeat of the local team by a score of 8 to 0. The Massachusetts boys played gilt edged baseball and it was almost impossible to pick a single weakness in their line up. Base ball critics agree that it was the most evenly balanced college team that has appeared at Central Park for some time. Springfield has everything that goes to make up a winning combination and need not fear any college team in the country.

From looking at the score one would think that the game was slow and uninteresting but such is not the case. The whole trouble seems to have happened in the first inning. In this inning Springfield touched Humiston for six hits and scored five runs. After this rather disastrous session New Hampshire settled down and played good consistent ball for the remainder of the game.

THE NINTH.

New Hampshire's best opportunity came in the ninth when Bissell reached first on an error after which Blatchford laced a clean single out into left field. Morrison the next batter laid down an infield hit and an attempt was made to get Bissell at third but it failed and all were safe. This made three men on bases and one out and things began to look brighter for New Hampshire. Shuttleworth succeeded in getting three balls and two strikes before he fanned and then Irvine flied out to short. Meserve was then sent in to bat for Cullinan, but he was not able to hit safely and this ended the contest.

There were a number of feature plays by both teams one of the prettiest of which was made by Springfield in the eighth inning. After Humiston had fanned, Atkins poled one out to right field for two bases, the ball taking a bad bound and getting away from Mitterling, who rushed in to try for an out at first. Brackett then met one and sent it like a bullet to left field. It was now up to Baird to make a sensational catch in order to prevent New Hampshire from scoring. Diving forward he made a regular shoe string catch and by a perfect throw caught Atkins on second before he could return.

Mitterling and Zielminiski played well for Springfield while for New Hampshire Bissell and Brackett played the best.

DOUBLE VICTORY CAUSES BONFIRE CELEBRATION

Hilarious Crowd Makes Merry Over Defeat of Rhode Island in Track and Connecticut in Baseball

The double victory, track and baseball, that came to New Hampshire last Saturday was fittingly celebrated in the evening by a big bonfire with spirited speeches by the coaches and members of the teams, and cheering by the gathered students.

Owing to the agitation this spring regarding prompt disposal of waste material about the village, the freshmen apparently foresaw a possible shortage of inflammables and so wisely waited until nearly dark before starting their campaign. Then lively work on the part of this big class resulted in a very satisfactory pile upon Bonfire Hill by 10 o'clock when the torch was applied.

It is hard to say what fed the fire that night, probably the full quota of railroad ties, old boxes and kerosene. However it is a fact that all there is left of Company F's scaling wall are the ashes. It is even rumored that this wanton vandalism was the outcome of a conspiracy by part, or the whole, of Company F to avoid the serious task of hoisting certain corpulent members over the wall in the exhibition drill Commencement week. To prove the ardor of the freshmen in the glorious cause there may be cited the case of the load of lumber by the road side that started to move toward the fire but was happily detained.

DEFECTS IN FIRE FIGHTING APPARATUS FOUND ON TRIAL.

A unique feature of the drill period last Wednesday was the fire alarm sounded for Thompson Hall just after the regiment had assembled. The companies moving at a run in squad formation were quickly on the scene, one bringing the ladders, another the hose carts and the others acting as salvagers and guards. While the alarm was only for fire drill, yet it led to several interesting developments. For instance, at least one practically useless hose was found, and then of the various ladders gotten from the vicinity only one was found sufficiently long to reach the second-story windows.

By way of entertainment a group of men armed with a hose, throwing a powerful jet, suddenly mutinied and directed the stream upon their own comrades, even the adjutant. The latter, grasping another nozzle while others fled, strove bravely to retaliate. But the greater range of the mutineers' stream was too much and finally the adjutant, quite deserted at the last, was drenched and driven from the field. Needless to say, Lieutenant Sutherland held his ground in the thick of the fight—but it happily lay behind a sheltering column of the portico.

SENIOR PRIVILEGES GRANTED WOMEN OF 1916 CLASS.

According to time-honored custom the senior women of New Hampshire College have petitioned for and obtained special senior privileges. When young women have had four years of college training, it seems only natural to expect them to be capable of making their own decisions, unfettered by under graduate regulations. The faculty have therefore, granted to seniors exemption from all rules governing women. This freedom is to take effect June 1, and last throughout the remainder of the college year.

ENGAGEMENT ANNOUNCEMENT.

Mrs. Loie C. Coffin announces the engagement of her daughter Alice Veve Coffin to Herbert S. Austin, Dartmouth '14 of Central Acquire, Porto Rico.

ANNUAL INSPECTION RATES CO. A FIRST

NEXT IN ORDER CAME COMPANIES E, C, AND F.

ADVANCE GUARD PROBLEM

Usual Ceremonies Take Place in Forenoon and Afternoon—Captain Schindel is Inspecting Officer

Company A. was rated first in the regiment after the close of the annual governmental inspection of the military department by Captain Schindel, E Company got second place, C third, and F fourth.

College exercises were suspended at 10 o'clock Monday morning and assembly sounded at 10.10. After a few practise drills, the regiment marched to the B. & M. station to do military honors to the inspecting officer. Captain Schindel came in on the 10.36 and was immediately escorted to Thompson Hall by the regiment under command of Lieutenant Colonel D. P. Crockett. The morning program was begun with regimental review immediately followed by inspection. The usual questions were asked various men in the ranks, and no especially bad breaks were made by anyone. The forenoon ended with parade.

THE AFTERNOON.

Company A. began the afternoon with escort to the colors. Individual company drill came next involving both close order and extended order drill. The day was finished (and also the privates) with the solution of a problem. Company F. was considered to be the outpost of a large force coming from Concord, and was stationed on a hill to the left of the red schoolhouse on the road to Lee. The remainder of the regiment made up the advance guard of a force approaching the enemy. Company A made up the point and advance party while C. and E. were the support. The location of Company F by A's point and flankers was a wonderful masterpiece of military strategy and ingenuity. Following the discovery of the enemy an engagement took place with alarming fatalities.

STRAW HAT GOES.

Perhaps the most amusing incident of the day was a dastardly attack on a non-combatant. Just before the advance guard started over the railroad bridge the privates became hilarious and started firing a few left over blanks from the Wednesday before. Whereupon a certain notorious senior complained to the commander-in-chief that his army was firing upon him. The latter loyally stood up for his men; and, being too far away to use his saber shied a stone at the senior. At this same instant the friendless senior was holding out his brand new last year's straw hat. Yes, the stone went clean through.

ROSINA MARTHA DIETRICH.

The sympathy of the whole student body is extended to the relatives and friends of Miss Rosina M. Dietrich, '16, who passed away suddenly at the Cottage Hospital, Exeter, Wednesday, May 31, of acute appendicitis. She is survived by her father, B. F. Dietrich, two brothers, Bernard and Edward of Boston, and a sister, Mrs. George Haywood of Manila. During her course at New Hampshire College she made a host of friends on account of her fun loving, cheery disposition. She was a member of Chi Omega, and prominent in the Girls' Club and Y. M. C. A. work.

EDITORIALS.

OUR ATHLETIC FIELD.

The athletic field as it is today is not satisfactory because it does not embody progressiveness or true college spirit. Outfields much too small, a puddle of water around first base, a gently sloping hill back of second base, boards around the running track which would make excellent military obstacles—all these do not tend to increase the playing ability of baseball teams. A level field would also make possible better performances in football. We would classify as "pig-headed," or unfair, a mill-owner who expected first class work with third class machinery installed, yet we students are ever ready to find fault over "slow" and "tame" games.

"The entire field ought to be scraped, leveled, and tile-drained," says Coach Cowell, "and something must be done on it mighty soon." A decent field would mean from one to two weeks earlier start on outdoor work in Spring, and, aside from the tangible results, there would be created a new psychological condition which, if realized, means a deeper college spirit and a "bigger, better and busier" college. Aspirers to athletic honors would feel that there was something to work for, some gratitude to be expressed in their performances by the interest taken in them and what they represent.

Let everyone think about the matter, contributing ideas and real enthusiasm. Thus by working in unison with our hands and hearts we can achieve something which, while somewhat insignificant in itself, will be far-reaching in its effect on the present and future of New Hampshire College.

A GOOD BEGINNING.

Despite the fact that the threatening weather made it necessary to wait until within one hour of the time scheduled before the decision to play could be safely made, the New Hampshire-Springfield game in Dover brought out a large crowd. For the first time in eight years the people of Dover, Rochester and Somersworth had an opportunity to see the varsity team in action, and considering the caliber of the opposing nine, they were pleased with New Hampshire's showing. The game, especially after the disastrous first inning, was an interesting one to watch and the crowd remained to the finish although considerable rain fell. This will surely seem to indicate that there is a real interest in college athletics in these towns and augurs well for the football games scheduled at Central Park next fall. It will not be surprising if another year or two finds many more of our home games, especially those which fall on Saturday or holidays being played in Dover.

CAMPUS LIGHTS.

New Hampshire's campus is certainly not to be excelled in its situation and beauty. The coming commencement reminds us that the visitors are unable to appreciate the campus in the evening. Is there any reason why we should not have our campus lighted?

Should we permit the beauty of our campus to be hidden at night? A large part of the expenditure for a lighting system would be for the wire and fixtures. This expense is too great for any class or other organization to bear. Why not have a tag day? If every student should buy a tag (and of course every student would) for the small sum of ten cents, a yield would be received which would be sufficient for the present. Next year, if it is desired to have more extensive decorations or to light a larger portion of the campus, we can have another tag day. In this manner the college would have a permanent means of illuminating and decorating the campus. At least the suggestion is worthy of some consideration.

OUR PRESIDENT.

The whole college, both student and faculty, unites in welcoming President Fairchild back to Durham. We all know how hard it has been for him, with his heart filled to overflowing with New Hampshire and all its problems, to be forced to remain inactive in distant South Carolina. But we are all glad that he returns to us with the energy that he so wholeheartedly spent for New Hampshire in the past partially restored. His guidance has caused a remarkable growth in this institution, not only in numbers and equipment, but in the respect of the people of the state, which is a matter of the highest importance. We trust that he will so conserve his energies that he may long remain with us, our own capable Prexy, respected and beloved by all.

LESSONS FROM THE FIRE DRILL.

The fire drill last Wednesday afternoon proved the efficiency of the new system arranged by Lieutenant Sutherland, whereby the regiment works as one team without the customary confusion. But what was far more important, it demonstrated the absolute need of trying out every piece of hose on the campus. It does not require a very active imagination to picture what would happen in a real fire should a hose leak as badly as did one of those in Thompson Hall. Then, too, think of there being only one ladder long enough to reach a second-story window. Surely, here upon our own campus we have a timely hint as to the vital importance of preparedness and it must not pass unheeded.

ATHLETIC ASSOCIATION ELECTS OFFICERS WEDNESDAY.

At the meeting of the Athletic Association last Wednesday, S. W. Wentworth, '17 was elected president; R. L. Dame, '18, vice president; M. H. Brill, '18, secretary; Prof. C. C. Steek, treasurer; and E. S. Ross, '17, member of the executive committee.

The new constitution was also discussed at this time.

LIBERAL ARTS CLUB ELECTS V. W. BACHELOR '17 PRESIDENT.

At the last meeting this year of the Liberal Arts Club the following officers for the coming year were elected. I. resident, Vance W. Batchelor, '17; Vice-president, Phyllis M. Blanchard, '17; secretary, Dorris Dudley, '19; treasurer, Alfred N. Graham, '18; captain of the debating team, Vance W. Bachelor, '17; manager, Charles C. Bond, '17.

PROFESSORS G. C. SMITH AND A. E. RICHARDS IN TENNIS FINALS

Prof. G. Smith and Prof. A. E. Richards qualified for the finals in the faculty teams tournament Thursday, by winning three out of five evenly matched sets. Each team won two sets and the other set lasted until almost dark the score finally being 7 to 5. It now remains to decide who will play against them in the finals. The winners of the sets Friday between Prince and Ritzman and T. Smith and Ambrose will play Steek and Otis to determine which team plays in the semi-finals against Woodward and Curry. The winners of the semi-finals will be the ones who play the finals, to determine the faculty tennis championship. The date for the latter is not fixed since many of the sets have been postponed on account of the weather.

The only rice journal published in the world is the Monthly Rice Journal, which is published in Crowley, Louisiana. It has a circulation throughout the world and is devoted entirely to the rice industry.

CLASSES IN HORTICULTURE MAKE INSTRUCTION TRIP

Markets and Gardens Near Boston Visited in Two Days Tour—Arnold Arboretum and Farquhar's Nursery Visited

On last Wednesday and Thursday members of the classes in Horticulture 52 and 58 took an instruction trip to Boston, visiting the markets, several market-gardens, Farquhar's nursery, and the Arnold Arboretum.

The majority of those attending went down Tuesday in order to reach the markets early Wednesday morning. The party met in Faneuil Hall market shortly after 5 o'clock and walked through Faneuil Hall and Quincy markets, observing grades and methods of packing the various vegetables offered for sale. Then all went to Revere, where the market-gardens of G. Arthur Tapley, Alfred S. Hall, J. B. Shurtleff and William H. Derby were visited. Mr. Shurtleff's place was noteworthy because he used the Skinner system of irrigation and also many cold frames. From a hill covered by the market gardens, they could be seen extending for more than a mile up through the valley. The establishment of Mr. Symms, the biggest sweet-pea grower in the country, at Cliftondale was next visited and several of the houses gone through. The largest house was 500 by 40 feet and there were six or eight shorter ones, 400 feet long, containing sweet peas almost exclusively, a few pansies being grown.

The Hittinger Fruit Company's farm at Belmont was the destination for the afternoon. This farm was of especial interest because of the intensive intercropping practiced; apples, pears, currants, parsnips and radishes being grown on the same land. The Shaw Brothers' farm nearby was also visited and their greenhouses containing cucumbers inspected. From the Payson Park Reservoir hill a view of the market gardens visited during the day was obtained, and after visiting Mr. Hittinger's green houses under his personal direction, the party returned to Boston. W. T. Tapley '16, piloted the party about during the day as he was well acquainted with the places visited.

SECOND DAY.

The number reporting at Scollay Square at 8 o'clock for the second day's trip was much smaller than that present the previous day, owing to the fact that several of the men went on the Animal Husbandry trip which began that day. After considerable excitement in losing different members, the party finally succeeded in arriving intact at the store of Henry M. Robinson & Co., wholesale commission florists. There in refrigerated rooms, 25,000 carnations and 70,000 roses were packed in ice. The men who showed the party the place said that in the three days before Memorial Day, the firm would handle approximately 100,000 roses and 150,000 carnations, shipping all over New England. This company handles more flowers than any other in Boston. It handles the entire output of the Symms mammoth sweet-pea farm visited the day before. The manufacture of wire forms for set pieces proved of especial interest.

Farquhar's nurseries at Dedham was the next place visited. The many greenhouses filled with seedlings were gone through and cold frames filled with herbaceous plants were found of interest. Three large green houses 200 by 60 feet were filled with tender flowering plants, one contained scarlet, pink and white geraniums almost exclusively.

Mr. Fordham very courteously showed the party the grounds and explained the culture and habits of the various plants. The nurseries were particularly of interest because of their extent and the permanence of the buildings, the greenhouses being of concrete.

After dinner the party walked through the Arnold Arboretum near the Forest Hills station. Especially noteworthy was the collection of lilacs and viburnums. The variations in lilac coloration was extreme. From here the party went to the train, arriving at Durham in the evening.

ADDRESS ON CHEMISTRY AND HOME ECONOMICS PUBLISHED.

At the fifteenth meeting of the Central Association of Science and Mathematics Teachers, in Chicago last year, Miss Nellie E. Goldthwaite gave an address on "General Chemistry and Home Economics." The article is a discussion of the science of chemistry as a foundation for home economics, and it has recently been printed in the "Journal of Home Economics."

Dover, N. H.

Everything for Students' Rooms.

COMPLETE CAST FOR "AS YOU LIKE IT" DECIDED UPON.

The Shakesperian music for the open air production of "As You Like It" by the Girls' Glee Club, has been definitely decided upon, and rehearsals are well under way. There will be five solos: "Under the Greenwood Tree," "Blow, Blow, Thou Winter Wind," "When Daisies Pied," "The Poor Soul Sat Sighing," and "Fancy." The choruses are also of Shakesperian origin, and include the well-known, "I Know A Bank Where the Wild Thyme Grows," " 'Twas a Lover and His Lass," "How Sweet the Moonlight," "As It Fell Upon A Day," "Pastoral," "Wedding 's Great Juno's Crown," and "What Shall He Have Who Killed the Deer." A trio, composed of Miss White, Mr. Ewert, and Mr. Hoffman, will furnish music during the play and between the acts.

A part of the costumes are being made by the members of the club under the direction of the manager, Miss White; the remainder have been ordered from the Raymond Costumiers of Boston.

The tickets will be on sale at the bookstore next week, and since there are only 150 reserved seats, it will be necessary to secure them at the earliest opportunity.

In presenting the play, the famous Ben Greet arrangement will be used. The complete cast is as follows:

Rosalind,	Julia Roberts
Duke,	Bernice Reed
Frederick,	Louise Burpee
Amiens,	Marjory Boomer
Jacques,	Lucille Gove
Le Beau,	Laurene Edwards
Oliver,	Sara Greenfield
Orlando,	Marion Dudley
Adam,	Abby Turcotte
Touchstone,	Rachel Colby
Corin,	Mary Dole
Sylvius,	Phyllis Blanchard
William,	Mabel Foster
Hymen,	Mary Worcester
Celia,	Marion Chase
Phebe,	Irene Hall
Audrey,	Clarice Shannon

FORMER TRACK MANAGERS GIVE DAVIS-HAM MEMORIAL CUP

The Davis-Ham Memorial Cup is now on exhibition at the business office. It is of silver, lined with gold and stands about one foot high.

The cup is given in memory of Thomas A. Davis, '14 and Guy C. Ham, '14, both of whom were prominent in athletics here. It was made possible through the efforts of N. D. Paine and the hearty cooperation of former managers of the track team.

98% Of the World's Creameries Separate their cream with a DE LAVAL

TEN YEARS AGO THERE WERE A DOZEN DIFFERENT MAKES of creamery or factory separators in use. Today over 98 per cent of the world's creameries use De Laval Separators exclusively.

IT MEANS A DIFFERENCE OF SEVERAL THOUSAND DOLLARS a year whether a De Laval or some other make of separator is used in a creamery.

EXACTLY THE SAME DIFFERENCES EXIST, ON A SMALLER scale, in the use of farm separators. Owing to the fact, however, that most farm users do not keep as accurate records as the creameryman, or test their skim-milk with the Babcock tester, they do not appreciate just what the difference between a good and a poor separator means to them in dollars and cents.

NOW IF YOU WERE IN NEED OF LEGAL ADVICE, YOU WOULD go to a lawyer. If you were sick you would consult a doctor. If you had the toothache you would call on a dentist. Why? Because these men are all specialists in their line, and you rely upon their judgment and skill.

WHEN IT COMES TO BUYING A SEPARATOR WHY NOT profit by the experience of the creameryman which qualifies him to advise you correctly? He knows which separator will give you the best service and be the most economical for you to buy. That's why 98 per cent of the world's creameries and milk dealers use the De Laval exclusively.

THERE CAN BE NO BETTER RECOMMENDATION for the De Laval than the fact that the men who make the separation of milk a business use the De Laval to the practical exclusion of all other makes of cream separators.

Your local De Laval agent will be glad to let you try a De Laval for yourself on your own place. If you don't know the nearest De Laval agency simply write the nearest main office, as below.

NEWSY ITEMS OF THE ALUMNI.

T. C. BAILEY, '12, MANUAL TRAINING INSTRUCTOR

To Have Charge of Club Work—"Chuck" Sanborn, '09, Successful as Actor—Other News

Frank H. Bliss, '10, is completing his sixth successful year as instructor in mathematics at the Rhode Island State College, Kingston, R. I. When he accepted the position there were only two divisions in mathematics in the Freshman class. Now there are four divisions and he has had three of these the past year.

Miss Mary A. Chesley, '08, is instructor in French at the West Warwick High School, R. I. She was a visitor at Rhode Island State College on the date of the Interscholastic Track meet at Kingston, May 23.

"Chuck" Sanborn, '09, is gaining a wide reputation as an actor in amateur productions. As "Simon Finer" in "Willowdale" he keeps his audiences in an uproar. The cast presenting "Willowdale," have played in Kingston, Fremont, Raymond, Candia, and are to play in Deerfield in the near future.

L. R. Tarbell, Ex. '15, is in Durham visiting friends.

Thomas C. Bailey, '12, is teaching Manual Training in the Ludlow High school, Mass. He will have charge of the club work in the towns of Wilbraham and Ludlow. Last year Wilbraham ranked first in the county and second in the state. It is considered that Wilbraham and Ludlow stand a good chance of receiving the silver cup offered by the State Board of Agriculture.

C. R. Heath, '14, is employed in the pieric acid department of the Merrimac Chemical Works at South Wilmington.

Walter Whittier Swett '15 has recently been appointed instructor in Dairy Husbandry in the University of Missouri to take the place of a man who goes to North Carolina to become head of the Dairy Department there. Mr. Swett and Paul E. Corriveau, '15 are the two New Hampshire men out of the sixteen students recently pledged to Sigma Xi; the scientific professional fraternity. They both expect to be in Durham during Commencement Week.

Philroy C. Gale, '13, writes that he has been transferred from the road to the Boston office of Stone and Webster Co., where he is now an assistant in the construction department.

HINTS ON TEMPERATURE AT WHICH BREAD SHOULD BE BAKED.

Miss Frieda Reiner of the Home Economics department has recently issued some valuable hints to housewives—and others; in fact, all who bake bread and who do not have good results every time. Miss Reiner advises that the temperature of the dough should at all times be between 70 and 80 degrees Fahrenheit.

Housewives sometimes complain that they cannot make good bread in winter, while in summer results are better. This Miss Reiner says, is due to the fact that the temperature of the kitchen is too low, but, on the other hand, it should not be allowed to get too high. Some state that good bread should be made from dough mixed at a temperature of 95 degrees. Under these conditions we are very apt to obtain sour bread.

The ideal temperature is 75-80 degrees. In the modern steam-heated house this may be easily maintained, but the farmhouse kitchen does not always have such conveniences. So, the beginner in bread-making may be prepared to overcome these difficulties and failures by the frequent use of a thermometer.

The latest intercollegiate magazine is Dynamite. The editors of this publication aim to put forth a medium in which ultra-radical thoughts may be expressed.

An elementary course in Hieroglyphics is now being offered in the University of Pennsylvania, under the auspices of the Graduate School.

134 NEW BOOKS ADDED TO LIBRARY IN TWO MONTHS

Books on Mathematical, Botanical and Agricultural Subjects Predominate—Military Science also Included

One hundred and thirty-four books have been added to the college library in the months of March and April. This is exclusive of the large number of government bulletins and official documents which are constantly being received. Books on mathematical, botanical, and agricultural subjects predominate, but there are several additions to the rapidly growing collection of the modern language department. At Lieutenant Sutherland's request three books concerning military science have been purchased.

ARCHITECTURE.

"The Colonial House," J. E. Chandler "The Law of Architecture and Building," C. H. Blake; "Decorative Design," J. C. Chase, and "How to Lay Out Suburban Home Grounds," H. T. Kellaway are helpful to those concerned with architecture and landscape gardening.

Two accessions for the home economics department have been made, "The Home Science Cook Book," by M. T. Lincoln and A. Barrows and "Individual Recipes" by H. M. Spring.

The ever-increasing interest in efficiency is well put in J. Hartness's book, "The Human Factor in Works Management," and "The Story of a Pioneer," Anna Howard Shaw's story of her own life as a suffragist leader, is well worth reading. J. L. Palmer's, "Life of Kipling," is another well-written, authentic biography.

It is appropriate that the valuable new edition of the "Life of William Shakespeare," by Sir Sidney Lee, should be placed in the library this year, as well as "Julius Caesar," from the New Variorum edition of Shakespeare's works. There are now in the library fourteen volumes of this set, which is one of the most scholarly and accurate editions in existence. The New International Year book for 1915 has just been received. This book is issued annually and contains a condensed account of the world's progress each year.

NEW FICTION.

Among the new fiction are: "Hillsboro People," short stories by Dorothy Canfield Fisher and Mrs. Humphrey Ward's latest book "Ethan House." The complete list of new fiction and books of current interest follows:

- The Escape of Mr. Trimm, I. S. Cobb
- Prudence of the Parsonage, E. Hueston
- Roughing It de Luxe, I. S. Cobb
- Stories of Thrift for Young Americans, M. T. Prtichard
- Hillsboro People, Mrs. D. C. Fisher
- These Twain, A. Bennett
- Story of a Pioneer, A. H. Shaw
- Drusilla with a Million, W. G. Brown
- In a French Hospital, M. Eydoux-Demains
- The Lower South in American History, W. G. Brown
- Home Life in Spain, L. T. Bensusan
- The Green Fairy Book, A. Lang
- The Red Fairy Book, A. Lang
- The Gentleman from Indiana, N. B. Tarkington
- Treasure Island, R. L. Stevenson
- Redeemed Captive Returning to Zion, Rev. J. Williams
- The Indian Captive, Zaddock Steele
- Loot from the Temple of Fortune, H. A. Vachell
- Spragg's Canyon, H. A. Vachell
- Lady Betty Across the Water, C. N. and A. M. Williamson
- Cabbages and Kings, W. L. Porter
- The Garden of Allah, R. S. Hiehens
- Story of the Psalms, H. Van Dyke
- Stories and Toasts for After Dinner, N. C. Fowler
- The Dean of Women, Mrs. L. K. Mathews
- Those About Trench, E. H. Lewis
- The Shadow Riders, I. Paterson
- Life and Gabriella, E. A. G. Glasgow
- The Edge, J. Corbin
- Street Called Straight, B. King
- Marriage, H. G. Wells
- The Real Adventure, H. K. Webster
- The First Hundred Thousand, Ian Hay
- Ethan House, Mrs. H. Ward

ANIMAL HUSBANDRY CLASS INSPECTS STOCK FARMS

High Grade Establishments with Record-Milk-Giving Cows Visited—N. H. Man, Herdsman at Langwater Farm

Last week, Thursday to Saturday inclusive, the class in Animal Husbandry 52, took an instruction trip to Boston, visiting several high grade farms near the city.

Thursday, F. L. Ames' Langwater Farm at North Easton was visited and four rings of stock from the herd were judged. Dolly Dimple and Dolly Bloom probably the two greatest living Guernsey cows, were judged, also a few Clydesdale colts. The stock of this farm consists of 135 Guernsey cattle and 50 Clydesdale horses. The herdsman at the farm is Burns, '10 a graduate of New Hampshire.

F. F. Fields' Dutchland's Farms, at Montello, specializing in Holsteins, was next visited, the cattle inspected in the barns and a few judged. Dutchland Cornucopia Korndyke, one of the record cows in the herd gave on the day the party visited the place 55 lbs milk in 12 hours, 30 lbs milk in six hours, or one pound of milk every twelve minutes. Dutchland Colantha Vale, a cow on test now promises to break the world's record, having given 16,000 lbs milk in 6 months, and it is hoped she will make an average daily record for the year of 75 pounds. This herd contains 160 head.

Sibley's Moose Hill Farm at Spencer, specializing in Jerseys was visited Friday morning and several rings placed. The herd consists of 160 head.

At Sagadorph's Alta Crest Farm, also in Spencer, specializing in Ayrshires, several rings were placed. This herd contained 86 head altogether.

Saturday morning Thomas Lawson's Dreamwold Farm at Egypt, specializing in Jerseys, was inspected and judging done. The herd contained between 60 and 70 head. This place is noteworthy because of the lavishness with which money has been spent. On the estate there is a horse barn over 800 feet long and there are 37 buildings over 100 feet long. The flag flying from the 175 foot flagstaff was of silk 55 by 65 feet in size.

Those who went on the trip are Mr. Fawcett, B. G. Butterfield, P. B. Badger, J. B. Ford, R. H. Sawyer, J. F. Durgin, M. H. Benson, F. W. Hall, C. H. Young, O. R. Garland, J. H. Guiswold, and S. H. Perley.

DAMAGED CULVERTS SOON TO UNDERGO EXTENSIVE REPAIRS

It is highly probable that the culvert on Garrison avenue which was badly damaged by the recent freshet, will soon be greatly improved. The old stone work is to be replaced by a six foot metal culvert with concrete wing walls. This will be large enough to take care of another such rain fall as the one lately experienced. The stone culvert on the Madbury road will be replaced by a concrete slab culvert.

TOP DRESS all your Crops with Nitrate of Soda alone, no matter what other fertilizers you may have used. 100 pounds to the acre for seeded, and 200 pounds to the acre for cultivated crops will do the work. The increase will yield large profits over the cost.

CHEM. ENGINEERS INVADE BOSTON AND VICINITY

Nine Habitues of Conant Hall Visit Commercial Establishments Near Hub on Instruction Trip

Early last Friday morning, nine embryo chemists accompanied by Prof. Perley started on the annual chemical instruction trip.

Immediately upon arrival in Boston the party set out for the works of the New England Gas & Coke Company. There they saw the manufacture of coal and water gas; also the purification of the by-products, coke and ammonia liquors.

Next the group went to A. D. Little's Experimental Paper Plant. Here they were favored with a special lecturer and guide who thoroughly explained the different methods of producing the various kinds of papers of today.

At the Merrimac Chemical Works, South Wilmington, the party was shown the commercial preparation of sulphuric acid and many general chemicals. Latter in the evening a theatre party was thoroughly enjoyed by all.

For a good clean start Saturday morning the "chemikers" visited the plant of the Leever Soap company to watch the manufacture of soap, and especially the new product "Lux." The recovery of the glycerin was well demonstrated.

Last but not least, the party went to see a real research laboratory conducted under the direction of the Hood Rubber Co. This was one of the most interesting places visited.

Saturday afternoon the factories were closed and so the party took in the intercollegiate track meet at Harvard as a final.

2 base hit, Irvine, 3 base hit, Dempsey, Cavanaugh. Stolen bases: Humane, 3; Flynn. Sacrifice hits, Bissell, Dempsey. Bases on balls off: Mooney, 2, Lannan, 1. Hit by pitched ball, Cullinan. Struck out by Mooney, 3, by Lannan, 10. Umpire, Walter Lynch.

THE CONNECTICUT GAME.

The first extra inning game of the season was won by New Hampshire from Connecticut State College by a score of 7 to 6.

Shuttleworth made his first appearance in the box for New Hampshire, and, considering his lack of support, did very well. He was replaced by Humiston in the tenth.

Connecticut got two men on in the second inning. A triple by Hopwood scored them both. Hits by Brackett and Blatchford gave one run in the second. Two more were made in the third, giving New Hampshire a one run lead. In the fifth each side got a run, Connecticut on a three bagger by Crowley, who scored on an error by Irvine. Hits by Crowley, McCarthy, King, and Anderson and an error by Morrison, gave Connecticut three runs in the ninth.

Brackett started the ninth for New Hampshire with a two bagger and scored on Morrison's hit. A lucky three bagger by Atkins scored Morrison and tied the game. Humiston held Connecticut in the tenth, not allowing a hit. A triple and a double by Irvine and Bell off Connecticut's freshman pitcher, Moore, brought Irvine home with winning run.

A feature of the game was the number of double plays, Connecticut making two and New Hampshire one.

Atkins replaced Meserve in the sixth, and Bell replaced Russell in the seventh for New Hampshire. Connecticut replaced Reeve by Moore and Salisbury by Reed in the ninth.

Brackett and Blatchford played their usual good game. For Connecticut, Capt. Crowley and Hopwood starred.

ANNOUNCES ENGAGEMENT.

Mr. and Mrs. Frank H. Follansbee announce the engagement of their daughter Nellie Lydia White to Mr. Howard Richards Pierce, Massachusetts College of Pharmacy, 1915.

CORRECTION.

By some unaccountable and regrettable error, the write up on "The Importance of Being Ernest," the play given in Dover by the Dramatic Club, May 11, omitted the name of A. R. Morgan '17 who took the part of John Worthing in a most creditable manner.

GIRLS COUNCIL TO HAVE SOUVENIR BOOTH ON CAMPUS.

During Commencement week there will be a Girls' Council booth on the campus, probably near the gymnasium. College souvenirs of all sorts—banners, pillows, postcards, jewelry, song books, and possibly a few Granites will be on sale, as well as ice cream and candy.

EXHIBITION DANCING AT FINAL CLASS MEETING

Physical Culture Students Show Results of Much Careful Study—Solo Dancing a Feature

The last meeting of the classes in physical culture was held Thursday, May 25 and included exhibition of the work done during the year. All the classes showed excellent training. The freshman and sophomore girls gave examples of the rudimentary gymnasium work, such as marching, arm exercises, and Indian club drills; and the juniors, of the more advanced work in aesthetic dancing. Practical work in relaxing and correct breathing, and folk dancing was entered into by all three classes. The interpretive dances "Comin' thru the Rye" and "Every Little Movement," by the junior class, showed much practice. A special feature was the solo dancing. Miss Natalie Ewer, '17 gave an interpretive dance expressing perfect grace, and Miss Louise Hughes of Dover danced in costume, simplified versions of a Spanish dance, and of the dance expressing grace. Miss Hughes is six years old and is a member of Miss Rollins dancing class for children. The exhibition closed with a group of folk dances, including the Danish dance of Greeting, the Shoemakers' Dance, the Ace of Diamonds, the Norwegians Mountain March and the Kinder Polka. Miss Rollins hopes to give special attention to aesthetic dancing during 1916-17. There will probably be an elective course for sophomores and juniors, which will meet once a week; and an advanced course for seniors, which will be a study of technique and grace, with classic and interpretive dancing.

ENGINEERING DEPARTMENT MAKES BRONZE PLATE FOR IVY ORATION

The bronze plate bearing the senior class numerals which will mark the ivy planted by this class, will this year be the gift of the mechanical engineering department. This plate is the work of Mr. L. J. Batehelder, instructor in shop-work. The ivy plant, itself, will be the product of the college greenhouses.

RHODE ISLAND LOSES

Continued from Page 1

ment for a few minutes. Upon arriving in Boston the team separated, most of the men going to the Stadium to the Intercollegiate, and then taking the train for Durham.

THE SUMMARY

100 yd. Dash—Won by Ross (N. H.); second, Dudley (N. H.); third, Ward (N. H.). Time 10 2-5 sec.

120 yd. Hurdles—Won by Wood (R. I.); second, Boomer (N. H.); third, Greenleaf (R. I.)

220 yd. Dash—Won by Ross (N.H.); second, Greenhalgh (R. I.); third, Ward (N. H.)

220 yd. Hurdles—Won by Hewey (N. H.); second, Wood (R. I.); third, Stevens (N. H.) Time 27 2-5 sec.

440 yd. Run—Won by Greenhalgh (R. I.); second, Thomas (N. H.); third, Dudley (N. H.) Time 52 1-5 sec.

880 yd. Run—Won by Wentworth (N. H.); second, Dame (N. H.); third, Tweedel (R. I.)

1 Mile Run—Won by Bemish (R. I.); second, Fastman (N. H.); third, Tweedel (R. I.) Time 4 min, 40 sec.

2 Mile Run—Won by Nightingale (N. H.); second, Bemish (R. I.); third, Porter (R. I.) Time 9 min. 46 1-5 sec. New Record.

High Jump—Won by Rollins (N. H.); second, Stevens and Boomer (N. H.) Height 5 feet 7 in.

Broad Jump—Won by Boomer (N. H.); second, Redford (R. I.); third, Wood (R. I.) Distance 20ft. 1 in.

Pole Vault—Won by Brill (N. H.); second, Boomer (N. H.) and Strand (R. I.) Height 8 ft. 9 in.

Shot Put—Won by Falmer (R. I.); second, Wadleigh (N. H.); third, Bugbee (N. H.) Distance 39 feet. 9 1/2 in.

Discus—Won by Wadleigh (N. H.); second, Bennett (N. H.); third, Palmer (R. I.) Distance 110 ft. 1 in. New Record.

Hammer Throw—Won by Huse (N. H.); second, Palmer (R. I.); third, Hopkins (R. I.) Distance 110 ft. 6 in.

From all appearances E. S. Ross '17 will be the man to win the Davis-Ham trophy cup. He is now in the lead with 26 points. The other high men are as follows: Hewey and Wadleigh 17 each, Boomer 15, Brill 14, Nightingale, Wentworth, and Huse 13 each.
