EXTENSION MEN HAVE MEETING

Discuss State Food Problems With Leaders

THREE-DAY SESSION

Situation Is Serious—Conservation Necessary if War Is To Be Won—Spaulding and Floyd Speak on Issues of Day

The annual Extension Service Conference was held in Durham this week beginning Tuesday and closing Thursday night, for the purpose of reporting the year's work in agricultural lines and outlining plans for increasing production, directing consumption and stimulating interest in this state in matters that concern the food situation.

Practically all divisions of the state machinery governing food production, fuel, regulation, transportation, marketing, consumption, and the special branches necessitated by the war, were represented.

SERIOUS NOTE

The convention was marked by the seriousness and intensity of the 70 men there. Problems laid forth for consideration carried more weight than usual, but optimism was not lacking. Sacrifice and save were the words used as texts by many of the speakers, who claimed that only by personal thrift and self-denial can this war be won by the Allies.

The meeting opened Tuesday at eleven o'clock to organize the conference. County Agents, Assistant County Agent Demonstrators, Farm Bureau representatives, leaders of Boys' and Girls' Clubs, and many other state workers assembled to line up and get into action. Following the conference came a series of committee meetings lasting the rest of the day.

FOOD PROBLEMS

Tuesday there was a general meeting. The first speaker was President R. D. Hetzel, who spoke on the subject, "The Interest of the College in Extension Work." He was followed by Huntley N. Spaulding, Food Administrator for New Hampshire, who talked about the "Food Outlook for 1918." The food situation was ably discussed by former Governor C. M. Floyd. Other speakers were A. F. Hawes, Forester of States Relation Service, C. E. Bassett, an expert on co-operative organization, and H. W. Selby, Director of Market Bureau of the Eastern States Agricultural and Industrial League.

PICTURE TAKEN

Thursday's main attraction was the annual meeting of the Federated Farm Bureau associations which was attended by all the presidents of the associations in this state. At noon the delegates had a group picture taken and in the afternoon before the final reports of committees were heard Professor Newbill, specialist in Boys' and Girls' Club work, gave some valuable hints as to the conduction of such work.

Director J. C. Kendall closed the meeting with a talk on "Relationships of Extension Workers."

RECEPTION TO GUESTS

Wednesday night the worry of business was forgotten when Director and Mrs. John C. Kendall gave a reception in the Gymnasium. This reception was attended not only by Extension workers but by members of the faculty.

As a result of this three days' conference, workers in the Extension department of the college feel a closer bond of workmanship with the state bodies at work in the attempt to increase production and help win the war.

PLEGGED TO CHI OMEGA.

The name of Grace Hanscom, '21, Somersworth, was accidentally omitted from the list of Chi Omega pledges published in the last issue.

ARRANGE SCHEDULE OF SEVENTEEN GAMES

To Be Long Season, Ending Mar. 15—Have at Least Six Games at Durham—Good Prospects.

Coach Cowell and Mr. Durgin, manager of the 1917-18 basketball team, believing that sports should not be forgotten in war-times, have arranged the following schedule. The season is a long one, beginning early in January and closing with the freshman-sophomore game March 15. Fifteen games are already certain and there are two open dates. The first half of the season's games will be played away from home, and of the last eight games, six will be played in Durham. With an abundance of material to work with, Mr. Cowell expects to develop a winning team.

Jan. 4. W. P. I. at Worcester.
Jan. 5. Springfield Y. M. C. A. College at Springfield.
Jan. 7. Boston College at Durham.
Jan. 11. Conn. A. C. at Storrs.
Jan. 12. Wesleyan at Middletown.
Jan. 19. Mass. A. C. at Amherst.
Jan. 25. Pending.
Jan. 26. Dartmouth
Feb. 2. Pending.
Feb. 9. Mass. A. C. at Durham.
Feb. 15. Rhode Island at Kingstons.
Feb. 16. Boston College at Boston.
Feb. 21. W. P. I. at Durham.
Feb. 23. Conn. A. C. at Durham.
Mar. 2. Rhode Island at Durham.
Mar. 9. Boston University at Durham.
Mar. 15. Freshman-Sophomore game.

MAJOR PARKER APPOINTED COMMANDANT OF COLLEGE.

Major Samuel M. Parker, U. S. A., retired, recently detailed by the war department as commandant and professor of military art at New Hampshire, comes here with a record as instructor and administrator that appeals to those having the military work of the College at heart.

Major Parker was graduated from West Point in 1903, joining the 29th infantry in the Philippines as a second lieutenant. He was appointed first lieutenant in 1909, captain in 1916, and a major in the national army Aug. 19, 1917. He was retired Nov. 8, 1917, because of partial deafness, directly caused by continued practice at rifle shooting. While otherwise perfectly sound, this trouble prevented his passing the stringent examination now required of officers intended for overseas service.

Between 1903 and 1912, Major Parker served in the Philippines at two different times, and spent four years as instructor at West Point. He then went to Alaska for a couple of years, returning in 1914 to become commandant at the University of Nebraska. He left in May, 1917, to become an instructor in the R. O. T. C. at Fort Snelling, Minneapolis. His last duty was with the 88th Div. at Camp Dodge, Des Moines, Iowa, handling the administrative end of the work as divisional adjutant.

Major Parker has the greatest enthusiasm for rifle and pistol shooting. That it has borne fruit is shown by the fact that he was for three years (1906-1909) a member of the Army Infantry Rifle team, shooting in the National Rifle Matches.

DURHAM RED CROSS TO EQUIP STUDENTS.

The Durham Branch of the Red Cross desires every student who enters the service to be equipped with a full set of the knitted articles. Those who are not sure of being furnished by personal friends of their home town are requested to notify Miss Charlotte Thompson at the Library. This applies to all about to enter the service and also to those already in it who lack any of the needed articles.

BIG PERCENTAGE STUDENTS WARNED

Two Hundred and Thirty-Three Get Reminders

DUE TO WAR UNREST

Registrar Not Surprised at Number—Women Escape With Slight Casualty List—Half Hundred Debarred from Activities

"Mid-semester warnings this year are more numerous than they were last year, but not as many were given as I had reason to expect," said Mr. Ham, registrar of the college, in an interview Wednesday night.

Of the 543 students in college at the time warnings were sent, 233 were notified that they were below a passing grade in one or more subjects. The total percentage of warned students is 43, only slightly more than last year. "This is due to the present state of unrest," said Mr. Ham.

WOMEN INTELLIGENT

Of the 233 unfortunate ones, 35 are girls and 198 are men. Fifty students were warned in more than seven hours studies, while 53 were warned in more than seven hours last year. This is offset, however, by the difference in enrollment last year and this year.

Statistics have not yet been compiled as to the division of warnings by classes, but present knowledge indicates that more upperclass students were gently reminded to speed up, than usually receive that suggestion.

SEUMAS McMANUS OPENS LECTURE COURSE SCHEDULE.

The first number of the 1917-18 lecture course schedule was presented Saturday evening in the Gym when Seumas McManus gave an illustrated lecture on Ireland.

Humorous descriptions and witty stories accompanied the many beautiful views thrown on the screen. A true Irishman himself, no one could better describe the habits of the people, their history and their traditions.

FOOTBALL BENEFIT DANCE A SUCCESS.

The football benefit dance given by the N. H. Club Friday evening, Nov. 30, in the Gymnasium proved successful, considering the fact that many students were away for the week-end.

The orchestra was placed in the middle of the hall, rather than in the right hand corner as customary. Refreshments of ice cream and cookies were served.

The chaperones were Professor and Mrs. Charles James and Professor and Mrs. Ross Wilson.

THE NEW HAMPSHIRE NEEDS MORE REPORTERS.

Like other college organizations, The New Hampshire is feeling the effects of the war through the enlisting of members of its personnel, and this bids fair to be increasingly true. But the paper has an ever-growing opportunity for usefulness to the men in the service and to the college. Whether it shall meet this opportunity, as indeed it must, depends on the unearthing of material to replenish the depleting ranks in the news department. Students who are interested in the work and have some ability and perseverance are urged to hand their names to the news editor. Reporters are open to those showing proper qualifications, and advancements to editorial positions will then be in order.

The college paper represents a quiet activity with little personal glory, but much valuable experience is gained by the student who works, and all the while there is the satisfaction of taking part in the broadening activities of the college community.

FACULTY VOTES CHANGE IN HOURS

Would Have Drill in Morning, Recreation in Early Afternoon, Labs from 3.30 to 6.00 p. m.

At the regular meeting of the faculty last Monday night it was voted to recommend to President Hetzel that he consider the feasibility of so changing the order of afternoon classes that the time from 1.30 to 3.30 can be devoted to outdoor recreation, athletics and physical culture. The motion as put reads: Voted to recommend to the President that he consider the feasibility of

(a) scheduling the drill period at 7 to 8 a. m. during the fall and spring,
(b) keeping the afternoon hours free until 3.30 p. m. in order to encourage outdoor recreation, physical culture and athletics,
(c) scheduling afternoon classes and laboratory periods from 3.30 to 6.00 p. m.

At the same meeting a committee, Professors Hewitt, Porter and Whoriskey, was appointed to arrange for a series of motion pictures to be given in the Gym Saturday nights to students and townspeople, free of charge.

PROF. WHORISKEY SPEAKS BEFORE LANGDON CLUB.

Prof. Richard Whoriskey gave an interesting lecture before the members of the Langdon Club of Portsmouth, last Monday night, on his personal experiences in the war. His address was the opening number of the lecture course given by the Langdon Club. Many naval men were present.

TIME ON COLLEGE SONG CONTEST TO BE EXTENDED.

Because of the interruption of the Thanksgiving holiday, the time for the college song contest has been extended one week. Saturday is the last chance to win the five dollars; put your contribution in the box before 6 p. m., December 8.

GOVERNMENT NIGHT LETTER.

Washington, D. C., Dec. 4, 1917.
President R. D. Hetzel,
New Hampshire College,
Durham, N. H.

Have just been authorized by Secretary of War to request you to inform all your technical students that if they wait until drafted they can, upon summons to the draft camp, take with them letters from you stating their special qualifications, such letter to be filed with occupational census questionnaire of war department under authority of this authorized telegram, Secretary of War also authorized me to say that every effort will be made to use each student's special training in connection with the specialized occupations in army so as to afford technical students of draft age fully as great an opportunity through the draft as if they enlisted now.

Signed,
HOLLIS GODFREY.

WARNINGS

Warnings are in season this week. Thirty per cent. of the student and alumni bodies are hereby notified that their subscriptions to the New Hampshire are unpaid. It is absolutely necessary that YOU pay up at once in order to keep free copies of the New Hampshire going to the men in the service.

CALENDAR OF EVENTS.

Saturday, Dec. 8—Girl's Glee Club Concert at Austin-Cate Academy.

Sunday, Dec. 9—Y. M. C. A. Meeting at 7 P. M. in Church vestry. Rev. F. D. Libby of Exeter will speak.

Wednesday, Dec. 12—Membership Day for Y. M. C. A. and Y. W. C. A., entertainment and dance in evening. Men's Club supper at Grange hall.

Friday, Dec. 14—Junior Prom.

PLAIN WAR FACTS AT CONVOCATION

Importance of Food Problem Shown by Leaders

SPAULDING IS FRANK

War Prophecy Come True—Unscrupulous Dealers To Be Squelched—Work of Food Committee Appreciated—Bennitt for Team Work

The prophecy of seven years ago is coming true; food will be the arbiter of this war. This was the statement made by the Honorable Huntley N. Spaulding in a short address to the student body at Convocation. In outlining the Hoover plan he said an effort is being made to stop all speculation. Large business firms must submit monthly reports to the state and Federal authorities, and small dealers will be cut off from the source of supply if exorbitant prices are charged. The first great business of today is war, and the food commission is to see that the nation and its soldiers are properly fed. To do this all waste must be eliminated. The present sugar shortage is not very important as yet, but meats and dairy products must be conserved in all possible ways because the men at the front must have these, and the available supply is becoming daily shorter.

SHIP OR SURRENDER

The wheat question is not a question of whether we can ship or not, but a question of ship or surrender. This country must not be allowed to get out of wheat, because of the liability of food riots. At present nearly every European country is facing starvation. All external sources of food except the United States and Canada have been cut off. The immense shortage of wheat in these countries will probably be relieved by the unusually great corn crop. It is not the plan of the food commission to police the homes, but rather to appeal to the men, women and children of the homes for hearty co-operation.

Mr. Hunter of the Public Safety Commission followed Mr. Spaulding, with a talk on the work of that organization. The first task of this body of men was to co-ordinate the aid societies, so that team work might prevail throughout the state. The work of the food committee has been such that it is recognized by the authorities at Washington and held in the highest esteem.

The question of where to get labor is becoming acute and the nation is gradually drifting toward a solution in the priority of industries. Upon the success of this move will depend the comforts of the people at home and the success of the men abroad. There are three classes of service: military, civilian and financial. The nation easily accepted conscripted military service, and it seems eventually the same will occur in the two remaining classes. Price standardization is now at hand and it is only another step to the standardizing and fixing of labor prices. It is the business of the Public Safety Commission to work out these problems.

Mrs. Woods spoke primarily to the women, reviewing briefly the advancement in the women's world of activity in the past few decades. The world is to be made over and women will have a big place in this making over. Next to the great questions of men and munitions comes that of food. It lies in the hands of women to handle over ninety per cent. of the country's food. "Look well after your work and see to it that the nation is able to stand and make democracy safe for the world and the world safe for democracy."

Mr. Bennitt of the Bureau of Markets, represented the Department of Agriculture and placed great emphasis upon the value of team work. He said, "obeying orders, giving up personality, and self-sacrifice is going to win."

EDITORIALS.

ADVICE ON THE CHOICE OF COLLEGE FRIENDS.

From "The College Course and the Preparation for Life," by Albert Parker Fitch, reprinted from the Caduceus.

Never permit yourself then to draw your friends largely from any one group in your versatile and fascinating community. If you want the best self-development, make friends among all sorts and kinds of men. Choose representatives of every variety of youthful excellence, especially of those kinds of excellence in which you yourself are deficient. One of the chief opportunities of undergraduate life is the chance which it offers you to acquaint yourselves more or less intimately with a cross section of the American life of your generation. And what great gifts the lad struggling up from the bottom, lifting himself by sheer self-initiative and ambition, has to offer the rich man's son, who, unfortunately, has never been obliged, in all his life, to drink the cup of effort to its dregs.

Human quality is just what you may learn, if you will, in the varied society and the relative democracy of the college life. Choose your friends, then, no matter in what group accident has placed you, among the men who in inheritance and environment and equipment are unlike yourselves. Let them be not your counterparts, but your complements. The gilded youth has no idea of the delight and satisfaction to be found in close association with the boy in whom poverty and struggle have braced the will, sharpened the senses, made vivid the imagination.

Here, then, is the first step toward a worthy and stable social recognition. Be generous and cosmopolitan in your friendships, and be thankful for the extraordinary opportunity for that kind of friendship which the American college offers. For the first step toward that full development, whose accompaniment is the coveted personal recognition, is the choosing of your friends on the basis of their varied and intrinsic worth as men, irrespective of station, clothes, manners, or their present stage of sophistication. Believe me, nothing is more certain to bring, both now and in the future, the just esteem of your fellows, influence and recognition among them, than a wide and generous acquaintanceship with your own generation, a magnanimous and appreciative approach to all other men. If you have this wide and generous humanity, exercising toward those with whom you live and whom you meet a sincere and positive personal interest, almost any and every other deficiency will count for little.

WHAT IS THE MATTER?

Mid-semester warnings prove true a condition hinted at in certain actions and lack of action on the part of students. It has been noticed, as the first two months of college life have slipped along that established customs of business, certain habits involving moral scruples, and the ordinary routine matters that are given little consideration, have slipped back several cogs since last spring. Warnings are simply proofs that there is an undercurrent of unrest, dissatisfaction, lack of concentration, neglect of studies and a slighting of the morals and virtues

that tend to make honest men and women. What name can be given to this mysterious thing at the bottom of the mischief? The same thing that caused so many warnings is responsible for the neglect of business by students in class and personal affairs.

Several things are admittedly not going properly. Class dues have not been collected in the senior class; there is little organization; the sophomores imposed unfair taxes on freshmen with their posters and caps, and to date have not made a class financial report through the treasurer; cuts are being taken right and left, by nearly everybody, it seems; and last and most important, classes hold little interest or stimulate little work on the part of many.

Perhaps nobody is at fault. It may simply be the times. War is a new experience to us and we may be suffering from it. The same "lost" feeling and sense of bewilderment that allows us to gradually slump prompts one to gloss over conscience and murmur, "May the Lord forgive us, for we know not what we do."

BASKETBALL PROSPECTS.

At the close of the first week's basketball practice the outlook was dark and dismal. The squad was small, the men in it were small for the most part. Beginning with Monday night, prospects brightened. Tuesday night there was a flood of material pouring onto the Gym floor. Never before, in recent years, have so many men attempted to make the team. Their pep and spirit, to be especially admired when war is filling the air, has changed this year's basketball future from dimness and uncertainty to brightness and optimism. Mr. Cowell, the captain, and the few old men are feeling better. The students themselves will take added interest in the 1917-18 series of games because they know that there is good material at hand to furnish the competition necessary for a good team.

WATCHFUL WAITING.

The contents of the telegram read by President Hetzel in Chapel Wednesday, printed in this issue of The New Hampshire, should alleviate the panicky feeling of the men students who are listed under the draft. There has been considerable talk lately by men apt to be drafted to the effect that they prefer not to wait until after December and then be placed wherever the authorities see fit to send them.

As the telegram states, a man with special training, which will be of use to the government, need have no fear of being doomed to an ignominious finish because he is drafted.

Sit tight and wait until you feel the breeze from the draft. You may be of more use then than to jump blindly now before the lightning strikes.

CALLED HOME BY DEATH OF MOTHER.

Harry P. Young, instructor in agronomy, was called to his old home at Tunckhannock, Pa., last Tuesday night by the sudden death of his mother. His classes during the absence were taken by Dean Taylor and Professor Prince.

CORRESPONDENCE COURSE IN POULTRY INTRODUCED.

An innovation in the form of a poultry correspondence course has been introduced in connection with the extension service. It is expected that the high price of eggs will induce many to take this course. It consists of three sets of questions, twenty in each, which are sent out a month apart. These are answered by the correspondent, with the aid of an up-to-date textbook and sent back for correction. The only expenses incurred is the price of the textbook and the actual benefit is large compared to the money invested, considering that the time spent would not detract from the farm work. Every effort will be made to make the course fit the individual needs. It is a fine opportunity and it is hoped that many will avail themselves of it.

THIS MIGHT APPLY TO YOU.

Knocking at St. Peter's door.
St. Peter: "Who's there?"
Candidate: "College student."
St. Peter: "Did you support your college paper?"
Candidate: "No."
St. Peter: "Down below!"

ATTEMPT TO BOOM SHEEP INDUSTRY

Breeders Association Publishes Comprehensive Bulletin Pointing Out Advantages of Industry in New Hampshire

A new bulletin has recently been published by the New Hampshire Sheep Breeders Association, entitled, "The Sheep Industry in New Hampshire," with list of breeders and laws relating to the sheep industry.

In this bulletin Mr. Ritzman points out the urgent need for sheep raising in New Hampshire and the advantages to be gained from this industry. He says that, owing to the present unsettled conditions and the high cost of grain and labor which has made the cost of production of farm and dairy products so high as to show a small balance of profit, sheep would be a profitable side line. The additional labor would be small and a large amount of unproductive pasturage which constitutes two thirds of the average farm could be utilized.

The raising of sheep would also go a great way toward answering the great question of soil fertility. The cause of the great number of abandoned farms in New Hampshire is partially due to this question of soil fertility and in these days of the high cost of grain and labor, sheep raising seems to be the only way to bring back these unproductive farms.

BIG EFFORTS

All efforts are being made to re-establish the sheep industry in New Hampshire and late reports show that the forward movement has begun, but is hindered by the lack of breeding stock and an understanding of the business.

The great consumption of wool at the present time far exceeds the normal supply, while the supply is now below normal, and consequently the price of wool has greatly increased. Lamb and mutton are also very high, spring lamb reaching as high as \$18.45 per cwt. live weight, a price never known before in this country. Lamb and wool form the marketable product of the flock and these can be produced with a small amount of labor and grain. Breeders of mutton flocks find that wool can be improved on the mutton type and are combining high grade mutton with a better grade of wool.

REASONS FOR FAILURE

Good management is essential. The greatest cause for lack of success in the sheep industry in recent years has been poor management. This is one of the chief hindrances at present to the greater development of the industry. The average flock is not given the consideration that is given dairy cows and practically no attempt has been made to put the industry on a business basis.

An example of poor management is shown by the study of twenty-five farms taken at random; from a total of 447 ewes, 333 lambs were raised, a lamb crop of 75 per cent. when it should be 120 per cent. The wool crop averaged only 6 pounds and varied in price per pound received by different breeders more than 100 per cent.

Number of sheep in New Hampshire.

The following figures show that the sheep industry has reached a low water mark in the last few years. Number of towns in the state, 235; of 221 towns reporting, only 31 reported no sheep. The number of sheep is 19,462 and number of owners 1,235, this makes an average of less than one sheep per farm. However 215 owners reported only one or two sheep each, probably kept for pets. This leaves 1,020 owners with an average of about 18 sheep per flock. This is fairly good for the size of the farms but only one farm in 26 owns any sheep at all.

Mr. Ritzman says that, "our location as to early lamb markets, our topography and climate certainly warrant an increase in our flocks."

REV. F. D. LIBBEY TO SPEAK AT Y. M. C. A. MEETING.

Rev. Frank D. Libbey of Exeter will speak at the Y. M. C. A. meeting in the church vestry Sunday evening at 7 o'clock. A large attendance is expected, since Mr. Libbey's talks have met with popular approval in previous years. He is a speaker of unusual interest to young men.

IT'S CHEAPER TO BUY A DE LAVAL CREAM SEPARATOR

"Cost" is what you put into a cream separator

"Value" is what you get out of your cream separator

It isn't the "outgo" but the "income" that determines the real value of a Cream Separator

VALUE depends upon the amount and the quality of service the article gives you—what you get out of it.

You get by far the greatest actual VALUE for your money when you buy a De Laval—BECAUSE it will give you much better and longer SERVICE than any other separator.

From the standpoint of its greater durability alone, the De Laval is the most economical cream separator to buy, and when you also take into consideration its cleaner skimming, easier running, greater capacity and less cost for repairs, the price of the "cheapest" machine on the market is most exorbitant compared with that of the De Laval.

NEWSY ITEMS OF THE ALUMNI.

FIRST N. H. C. STUDENT INJURED IN SERVICE

Alumni Shifted in Various War Departments—Others Report Various Kinds of Work They Are Engaged In

Lee L. Rice, '19, of the 27th Aero Squadron, now at Camp Talliaferro, Fort Worth, Texas, writes,—“In my first solo flight I was knocked cold; lost five teeth and some hair; all repaired now. Second time lost one tooth and split my lip, but these are fixed. Last time only the machine was hurt. I have been flying for nine weeks now in Curtiss machines. Remember me to the whole bunch and tell them to keep their feet on the ground. The air game is fascinating but very uncertain. We do not expect to be in the United States much longer.”

STEELE PROMOTED

H. A. Steele, '16, has been assigned as chief storekeeper to the Bremerton Navy Yard, in the state of Washington. Mr. Steele enlisted last June at Rockland, Maine, as an apprentice seaman in the naval reserve, but was released from active service in August to attend the Military Stores School at Hanover, N. H. In November he was again assigned to the navy and sent across the continent to his present location.

R. H. Kinder, '15, is principal of the Harwich High School, Harwich, Mass., but expects to be called soon into the aviation section of the S. O. R. C., in a month and is willing to bequeath his job to any reliable New Hampshire man that writes him.

ALUMNI IN SOUTH

H. T. Converse, '10, locates himself by the following: “I am working for ‘Uncle Sammy’ in the department of agriculture having been stationed at Clemson College, the agricultural college of South Carolina, for nearly three years trying to increase the production of milk and butter in the state. At the same time I am raising a boy, H. T. Junior, (now a little over a year old), whom I hope to send to ‘Old New Hampshire’ some day to ‘rough house’ in Pettee Block.”

E. L. Brackett, 2-yr. '16, who entered the service as a volunteer from Concord, Mass., is in Company I, 26th Division, 104th Regular U. S. Infantry. A letter recently received by his mother was dated November 5, “Somewhere in France.”

R. I. Young, ex-'20, enters the aviation corps next Monday.

M. H. Johnson, ex-'19, is aboard the U. S. Submarine Chaser, No. 253, now stationed at New London, Conn. He evidently expects to be soon on the broad Atlantic as he gave his address as care Postmaster, New York.

K. E. Fenderson, '20, is recovering from an operation for appendicitis at the Wentworth Hospital, Dover.

O. C. Work, '16, is working for the Starrett Tool and Drill Company at Athol, Mass.

C. W. Sleeper, ex-'18, is in Y. M. C. A. work at Charlotte, North Carolina.

R. L. Dame, ex-'18, and D. W. Libbey, ex-'18, are in the 1st Connecticut Infantry of the National Guard stationed at Camp Green, Charlotte, North Carolina.

F. I. Ordway, Jr., ex-'18, is in the 27th Aero Squadron at Fort Worth, Texas.

MEN SCATTERED

E. J. Andrew, ex-2yr. '17, is in the light field artillery of the field headquarters company at Camp Gordon, Atlanta, Georgia. He was drafted October 3, 1917, and was at Camp Devens, Ayer, Mass., three weeks before being transferred to Camp Gordon.

D. C. Stinson, ex-2yr. '05, is “somewhere on the Atlantic” aboard the U. S. S. Louisiana. He is enlisted in the Marine Guard.

L. L. Smalley, '09, formerly assistant superintendent of the Whitcomb-Blaisdell Machine Tool Company of Worcester, Mass., has received a commission as 1st lieutenant in the Ordnance Department.

T. J. Landry, ex-'19, has been made a corporal in the Depot Brigade, Camp Devens, Ayer, Mass.

M. R. Revene, ex-'19, has been detailed in the regular navy at the Communication Office, Executive Building, Naval Station, Newport, R. I.

R. A. Lawson, ex-'19, is in the U. S. Navy and stationed at the Brooklyn Navy Yard, Brooklyn, N. Y.

Many alumni have been in town the past week: A. J. Grant, '15, P. J. Murdoch, '15, K. C. Westover, '17, R. M. Manter, ex-'20, V. A. Perkins, '16, R. J. Bugbee, '16, G. W. Burke, '16, P. W. Burt, '16, A. G. Davis, '12, L. B. Robinson, '16, and O. C. Work, '16.

ANNUAL ROUND UP AND BANQUET IN BOSTON.

The annual Round Up and Banquet of the Alumni Association will be held at the Copley Square Hotel, Boston, on Saturday Evening, Dec. 15.

Every effort is being made to equal the success of the recent “Home Coming” at Durham. President Hetzel will be there and a similar program will be carried out. All the New Hampshire men in the army and navy stationed at Portsmouth, Boston, and Ayer will be present, also our newly commissioned officers from Plattsburg. This is the time to meet the new President and to hear about the New Hampshire boys in the service of our Uncle Sam.

It is a war-time banquet, strictly informal, and an inexpensive menu has been arranged. Bring your wife, let her do the Christmas shopping in Boston this year, and then all come out for the Round Up and Banquet in the evening.

H. A. SMITH WRITES FROM CAMP IN ENGLAND.

The following letter was received from H. A. Smith, 2-yr. '16, from Somewhere in England.

“We are safe and sound now. We arrived in camp tonight. We left port early this morning and boarded the train. We saw some of the most beautiful scenery imaginable. The farms seem to be kept up in fine shape and everything is very neat. I was much interested to see the fine sheep, which were beside the tracks. They were all nice and fat, and seemed much larger than what we have in the U. S. The cattle here are not so good. There are few Holsteins, most of the cattle are Jerseys and Herefords. The farms are not level and they are not hilly, but are what would be called rolling farms.

“There are but few houses made of wood, most of them are brick or concrete.

“The streets are straight and are laid out well. The roads are mostly macadam. The country roads are in great shape. The horses are all large and when they plow they plow tandem style with four horses. It does look queer. But the queerest things are the trains, they are divided into sections and there is room enough in each section for 8 men. The freight cars are about half as large as ours and the engines about the same. We passed through a station that is the largest in the world, there were 5 miles of platform. We also passed through the place where Shakespeare was born. It was a very pretty city, so was Oxford, England.

The people over here are very good to us, it only cost us a penny (two cents in our money) to ride on the electric cars. It costs 6 cents for a shave and 12 cents for a haircut. Potatoes are the only things that are cheap here, they are \$1.12 a bushel, in our money.

On the whole, I think that food-stuffs are cheaper here than in America. They will give us only so much and we have to go to several places before we can get enough to eat. The English are very glad to see us Sammies over here. The first thing when I got here, I ran into 4 fellows in the engineering corps, that I used to go to college with. It seems funny everywhere I go I meet someone I know. All the women work over here, they take the place of men everywhere. I never saw so many bicycles and baby carriages in all my life, everyone has got them. We have seen several airplanes. We can hear them coming several miles off.

UNIFORMS HAVE COME AND ARE UNUSUALLY EXPENSIVE.

The uniforms ordered last October came this week. The price is twenty-three dollars and ninety cents, flannel shirt not included, but this advance was anticipated “on account of the war.” The suits seem to be of a serviceable kind, but the finish and appearance is much rougher than previously, due to the fact that the wool shortage necessitated the use of cotton in their manufacture.

DEAN HEWITT TALKS TO AGGIE CLUB

Discusses Principles of Electricity—Use of Motor Power on Farms and Application of Electricity in the Home

At the Agricultural Club meeting held December 3, a very interesting and instructive lecture was given by Dean Hewitt, on the subject, “Electricity As Applied to the Farm.”

He divided his lecture into three parts. First he gave demonstrations of the principles of electricity, including magnets, electric lights and their history, and concluded with an experiment showing the cause of lightning striking a building and the way in which lightning rods help to prevent this.

The second part of the lecture consisted of lantern slides showing farm machinery and the uses of motors in running many machines that are usually operated by hand at a great expense of time and labor.

The lecture ended with a short reel of moving pictures showing the application of electricity in the home. This was humorous besides being very instructive. The old time methods of running a house without electricity were contrasted with the advantages of the present day systems of electrically equipped homes.

DEAN GROVES ANNOUNCES SPEAKING ENGAGEMENTS.

Dean Groves will speak before the Y. M. C. A. convention, to be held at Manchester, Dec. 9, on “Conserving Boy Life in War Time.” “Social Influences of the War” will be his subject on Dec. 11 before the Dover Woman's Club and on Dec. 12 before the Women's Federation Meeting at Manchester. On Dec. 17 he will address the Women's Club of Lebanon on “Community Welfare.”

THE AGRICULTURAL CLUB.

Why not give the Agricultural Club more genuine, whole-hearted support? Do some agricultural men feel envious of the doings of the engineering society, a younger organization? Then get out and do likewise! If the meetings are not attractive enough to merit attendance, then work to make them so, rather than wait for the other fellow to do it.

The Agricultural Club truly offers through student participation in the program an opportunity of inestimable value. The “live-wires” appreciate this fact, remembering, too, that in general the more one puts into a thing, the more he gets out of it. Are you a “live-wire?” If not, why not?

20th ENGINEERS SENDS OUT CALL

Two N. H. C. Students Already Accepted—Others Liable to Call—More Needed.

Considerable interest is shown at present in the 20th Engineers (Forest) which is being recruited for service in France. This regiment of engineers, commanded by Col. W. A. Mitchell, U. S. A., will be the largest in the service. Composed of ten battalions of foresters and woodsmen and nine battalions of laborers, it will have a total quota of 17,000 enlisted men and officers.

The recruits are sent to an encampment at the American University grounds in Washington, D. C. Here they receive infantry drill until sent abroad. The work of the regiment will be to prepare lumber and timbers from the French forests for use by the allied armies. They will take with them several portable sawmills and all other equipment necessary for lumbering operations.

The regiment has its full quota of officers, but needs enlisted men and accepts only those who have had some experience in the woods.

The students of this college are doing their bit in this, as well as in other branches of the service. Two men have already been accepted, E. L. Scovell, '18, and L. C. Swain, '18; while three others, F. J. Howe, '18, C. B. Broderick, '18, and S. J. Connors, 2-yr. '19, have made application. Any others desiring further particulars should see Professor Woodward.

GIRLS' GLEE CLUB TAKES TRIP TO CENTER STRAFFORD.

The Girls' Glee Club will give its first concert of the year at Austin Cate Academy, Center Strafford, this Saturday night. Twenty-five girls with the pianist and reader, will make the trip, leaving Durham at 2.22 in the afternoon, and returning the next day. Mrs. Charles L. Simmers will act as chaperon.

BOOK AND SCROLL ENTERTAINS GUESTS.

Many guests were entertained at the second open meeting of Book and Scroll, held Sunday evening in Smith Hall parlor.

Mildred Flynn read an interesting paper on Vers Libre, giving special attention to the writers, Carl Sandburg, Robert Frost, and Edgar Lee Masters. Poems by Amy Lowell and Edgar Lee Masters, exemplifying free verse were read by Dorothy Hanson, Ruth Hadley, Helen Bugbee and Dr. Richards. After a discussion of the poetry read, Florence Kelley, '20, played a piano solo, and a violin solo was given by Helena Kelleher, '21, both of which were much enjoyed.

COLLEGE WELL REPRESENTED AT O. S. U. ALUMNI MEETING.

New Hampshire College was well represented at the annual meeting of the New England Branch of the Ohio State Alumni Association held last Saturday night at the home of Mr. and Mrs. E. G. Bailey, Newton Highlands, Mass.

Forty men and women were present to renew acquaintances, sing Ohio State songs, and eat doughnuts. Dean Sabine of Harvard, an old O. S. U. man, was to be present and relate some of his recent experiences on the front, but a war conference prevented his attendance. Those present from Durham were: Professor and Mrs. Taylor, Professor and Mrs. McKay, Mr. and Mrs. Fawcett, Professor O'Kane and Miss Mary E. Bailey. Dean Taylor was elected President of the New England Association for the coming year.

ANIMAL HUSBANDRY CLASS HAS INSTRUCTION TRIP.

The Animal Husbandry classes in animal diseases and live stock markets, accompanied by Prof. Eckman and Mr. Fawcett spent Thursday, Friday and Saturday on an instruction trip to Boston. Thursday, they visited Squire's hog packing plant and studied the operations at the New England Dressed Meat and Wool Company's building which they were allowed to enter only on a special permit, necessary because of government restrictions. They spent Friday at the Angel Memorial Veterinary Hospital, the largest of its kind in the world, where they witnessed several operations.

The last day, Saturday, they inspected the Brighton stock yards, where all kinds of live stock are prepared for market. Here they saw the shipping, butchering and other departments of the work. On the whole, it was a very interesting and instructive trip. To all, it was a novel and enjoyable experience.

SKI-JUMPING TO BE TAKEN UP BY COLLEGE.

Ski-jumping and skiing will take their places with the college sporting activities this winter, if the plans of the newly formed New Hampshire Outing Club are carried out. The club plans to build a good ski jump on the hill behind the Granite State Nurseries and it is hoped that a large number of the students will avail themselves of the opportunity and become interested in this new activity. There will of course be some expense connected with the erection of the jump and this will be met by voluntary contributions. Coach Cowell has already shown his interest in this sport by starting the contribution list.

For the benefit of those interested, as new developments occur, they will be made known.

GIVE PLEDGES TO ALPHA TAU ALPHA FRATERNITY.

Alpha Tau Alpha Fraternity announces the pledging of the following two-year agricultural men:

S. S. Ajemian, Portsmouth.
C. H. Carter, Bradford.
L. D. Gile, Suncook.
J. E. Gould, Hanover.
F. M. Grimes, West Medford, Mass.
R. E. Heath, Caterbury.
C. T. Illsley, Haverhill, Mass.
A. R. Mann, Melrose Highlands, Mass.
H. F. Northrup, Williamstown, Mass.
H. L. Rumery, Danville.
A. W. Sadenwater, New York, N. Y.
A. G. Sudrabin, Grafton.

MEMBERSHIP DAY FOR Y. M. C. A. AND Y. W. C. A.

Membership Day for the Y. W. C. A. and Y. M. C. A. will be observed Wednesday, December 12. It is the aim of each society to interview each student personally. There will also be an opportunity for people to join in the evening at an entertainment and dance given in Thompson Hall.

ECONOMICS CLUB HOLDS FIRST MEETING.

The Economics Club held an informal meeting at Prof. McKay's home last Monday evening. The purpose of the meeting was to promote an increased interest in the subject of economics and all men taking economics courses were invited. Prof. McKay told of the work of the club and outlined its purposes.

A very interesting and instructive talk was given by Mr. Ham on the subject of valuations, the practical side of it being clearly illustrated by his telling of his work this summer on the valuation of the Boston and Maine Railroad.

While lunching on cider and doughnuts all joined in a general talk on business problems, phases of the war and other subjects.

CHEMISTRY PROFESSORS WILL PUBLISH REPORTS.

Professors James and Stewart of the chemistry department have submitted for publication the result of their experiments in the determination of the atomic weight of samarium. This report will appear in the December number of the Journal of the American Chemical Society. This work has extended through a number of years.

They also have ready for publication a report on the determination of the atomic weight of thulium. It is practically the first time this determination has been made with the pure earth.

GOVERNMENT ISSUES WAR CERTIFICATES

Purchased at \$4.12 to \$5.23, Redeemable Jan. 1, 1923, for \$5.00—Interest Rate 4 per cent. Compound

A United States War-Savings Certificate, Series of 1918, will be an obligation of the United States when, and only when, one or more United States War-Savings Stamps, Series of 1918, shall be affixed thereto. Each of such certificates will have spaces for 20 such stamps, and each of such stamps thereto affixed will have a maturity value of \$5 on January 1, 1923, which will accordingly give each such certificate, when bearing its full complement of such stamps, a maturity value of \$100 on said date. No certificate will be issued unless at the same time one or more War-Savings Stamps shall be purchased and affixed thereto, but no additional charge will be made for the certificate itself. The name of the owner of each certificate must be written upon such certificate at the time of the issue thereof.

NOW ON SALE

These war certificates may be purchased now at the rate of twenty-five cents each at any bank. Sixteen of these certificates (\$4.00) plus twelve cents, before Jan. 1, 1918, or one cent more a month after, will be redeemable for \$5.00 on Jan. 1, 1923.

Owners of War-Savings Certificates will be entitled to receive, on January 1, 1923, at the Treasury Department in Washington, or at a money-order post office, upon surrender of such certificates and upon compliance with all other provisions thereof, \$5 in respect of each War-Savings Stamp, Series of 1918, then affixed thereto, but no post office shall be required to make any such payment until 10 days after receiving written demand therefor.

REDEMPTION

Any owner of a War-Savings Certificate, at his option, will be entitled to receive at any time after January 2, 1918, and prior to January 1, 1923, at a money-order post office, upon surrender of his certificate and upon compliance with all other provisions thereof, in respect of each War-Savings Stamp, Series of 1918, then affixed to such certificate, the amount of the face of the stamp or stamps affixed, plus 1 cent per month for each stamp, but no post office shall make any such payment until 10 days after receiving written demand therefor.

EAT MORE POTATOES AND LESS WHEAT BREAD.

One of the most effective means of conserving the wheat supply, thus aiding our government and our allies, and incidentally conserving our cash resources, is the more liberal use of potatoes in the family diet, substituting them as far as possible for bread. Potatoes, of course, contain a great deal more water than does bread, but in starch and energy one medium-sized (six ounce) potato is about equal to two slices of bread weighing one ounce each.

The potato should not be considered as a vegetable but as a breadstuff, such as wheat and other similar grains. Its food value should not be confused with that of many green vegetables with which it is usually classified and which are valuable chiefly for the minerals they contain. In fact, the potato, by its importance in the diet of mankind the world over, is entitled to share with bread the title of "staff of life."

The government's appeal, "Eat more potatoes and less wheat bread," is meeting with the patriotic response that it deserves, but manifestly the farmer has greatest incentive for responding, particularly so if he has produced more potatoes than are required to meet his ordinary needs.—American Farming.
