

The New Hampshire.

N. H. C. A. A. HOLDS ANNUAL MEETING

Elects Officers for Ensuing Year
EMERY, '19, PRESIDENT

Lack of Knowledge of Constitution Brought Out—Misunderstanding as to "Ballot"—Does It Mean a Written Vote or Otherwise

The Convocation period Wednesday afternoon was devoted to the regular meeting of the New Hampshire College Athletic Association. Officers for the present year were elected and other necessary business was transacted.

Owing to the blanket tax established by the association last year, every student of New Hampshire College is a member of the association and is consequently privileged to take an active part in the meeting. The entire student body was present at the meeting in the gymnasium Wednesday and all were requested to take part in the election of officers and the other business which was brought up.

OFFICERS ELECTED

W. C. Shuttleworth, '19, president and opened the meeting with a call for nominations for president after appointing A. H. Moody, '19, secretary pro tem. H. A. Emery, '19, being the only nominee, Mathes' motion instructing the secretary to cast one ballot for Emery was carried and "Hank" was declared duly elected, subsequently taking the chair.

F. A. Barker, '19, and O. A. Page, '19, were nominated for vice president and the former elected, having 172 votes, out of 322 cast. The nominees for secretary were Miss Hazelle M. Shedd, '19, Miss Mary F. Poland, '19 and K. L. Wildes, '19, the first named being elected secretary of the association for 1919. This election of secretary brought out a great deal of discussion on the constitutionality of electing by a rising vote.

The absolute lack of a knowledge of parliamentary law and the proper method of procedure in an organization properly established, was pathetic for an extremely small percentage of the student body were found all well versed in the correct methods of carrying on the meeting. Among the majority of the students in New Hampshire College a constitution, which has been drawn up and adopted only after a great deal of work, is considered merely a "scrap of paper." Why have a constitution at all?

Professor Steck was re-elected treasurer of the association without opposition. In the election of a student member from the floor T. J. Cochrane, '19, defeated Sleeper, '19. Professors Hitchcock and Whoriskey were the faculty members of the executive committee elected from the floor. The election of a cheer leader and two assistants resulted in the choice of the following, in the order named: N. Nute, '22, M. R. Vose, '20 and L. J. Cree, '20.

TO ESTABLISH COMMITTEE

Shuttleworth's motion to establish a committee, appointed by the president of the association, to consist of the coach, a faculty and two student members, who should revise the constitution, wherever it does not agree with the establishment of the new blanket tax was passed, after which the two following resolutions or recommendations of the Faculty Athletic Committee to the N. H. C. A. A. were adopted.

Durham, N. H., Jan. 25, 1918.
Voted to recommend to N. H. C. A. A. that track letters be awarded to Fitch, Billingham, Weston, for winning the championship at N. E. C. C. meet on Nov. 30, 1918.

Voted to recommend to N. H. C. A. A. that the members of 1918 S. A. T. C. football team as recommended by

(Continued on Page Four.)

EXPERIMENTING IN HORTICULTURE DEPT.

Various Orchards Planted—Information on Proper Fertilizers Sought—Old Tests Still Being Continued—Greenhouse Already Has Some Forced Plants

The department of horticulture is devoting considerable time in the development of the new horticultural farm. The plans are to provide orchards and gardens which will serve for instructional purposes, and also are being laid out as to serve for experimental purposes.

A peach orchard of 125 trees now two years old, promises to give valuable information on the proper fertilizers to be used in this climate, as well as data on the best varieties of peaches for commercial and home use. A young apple orchard, three acres large, has completed a year's growth and is designed for pruning experiments as wide differences of opinion exists on the matter of pruning. The orchard is being intercropped with vegetables which last year netted a good income from the land, in addition to providing a good treatment for the trees. This spring it is planned to plant an additional three acres to apples and an acre to plums and cherries.

TEST SMALL FRUITS

Small fruits are being planted to test the varieties for New Hampshire conditions and best methods of training the plants as well as the fertilizer requirements for each.

The vegetable work is already yielding the valuable information, and arrangements have just been completed to grow an acre of sweet corn seed for a Boston firm. This plan is a part of a long time experiment on best methods to keep up soil fertility in a market garden.

The older experiments are being continued and the past year a crop of 700 barrels of apples was harvested largely from help secured from the S. A. T. C. and vocational units on Saturdays and Sundays.

Bulletins from the department which are to appear this winter deal with the results from the Woodman orchard for a period of ten years, another on Grass Mulch experiments, Tomatoes for outdoor culture and under glass, another on Bee Keeping in New Hampshire.

It is planned to remodel some of the buildings at the Horticulture farm to adapt them to laboratory use and demonstration of proper buildings for a fruit farm.

GREENHOUSE INTERESTING

The Floricultural division of the Horticultural department is very interesting. If one should visit the green houses, at present, it would be found that some forced vegetables already have been started, and several varieties of carnations are in blossom. The collegesells these flowers at low prices and students desiring should avail themselves of the opportunity of patronizing the college greenhouse.

BLUE AND WHITE RELAY SQUAD ROUNDING INTO TRIM.

The relay squad is working out every night in "B" barracks where the corners have been banked in order to complete the small running track. It makes rather a short track, eighty-five yards to a lap but is a great improvement on the old one. The men are finding it hard to get used to the corners at their best speed.

The final tryout will be made on the new board track at Exeter. A large squad is trying for the team and the prospects are bright for giving M. A. C. a great race February 15 at service meet in East Armory, Boston.

Last Monday Melville of last year's varsity quartet returned to college thereby making three of last year's team on the squad. Several of the new ones are showing up well.

HOUSE COMMITTEE VISIT DURHAM

Thirty Legislators Make Up Party of Inspection
MAKE TOUR OF CAMPUS

Agricultural College and Appropriations Committees Shown Needs of College—Hold Reception in Y. M. C. A. Hut—Lunch Served by Home Economics Girls

Yesterday the college was visited by the members of two house committees; one on the Agricultural College, and one on Appropriations. The thirty legislators making up the party were met at the station by the reception committee, Prof. W. C. O'Kane, chairman. The party were taken to the Y. M. C. A. hut, where they made their headquarters for the day. Very soon after their arrival they were divided into two sections and together with Deans Pettee, Groves, Hewitt, Taylor and Director Kendall made a tour of the college campus.

VISIT SMITH HALL

Each section was taken to Smith Hall and annex and from there to Ballard, giving the committeemen a chance to obtain a first hand knowledge of the dormitory needed. At this point, the Hostess House, directly across the street from Ballard, was visited. The visitors were told that it was supported by the Federated Women's Clubs of New Hampshire aided by the Y. W. C. A., and was used by visitors remaining over night, and as a college social center.

Fairchild Hall, the men's dormitory, was next visited, making a favorable impression on the committeemen. From here, the visitors were taken into the new Commons building over a temporary entrance way. The dining room, cafeteria and kitchen were visited. The barracks were next visited and the opportunity here presented of converting them into rooms suitable for men students, was spoken of. The college library was next admired, special notice being taken of the quiet reading rooms. Thompson Hall, with its executive offices, home economics laboratory and class rooms was next inspected. Conant Hall, the abode of the chemists, was next on the program, while an inspection of the college power plant and shops was soon finished. The new poultry plant, dairy barn, horse barn and new piggery were all visited concluding by a visit to the dairy building and

SERVED LUNCH

Lunch was served by the home economics girls in their rooms at Thompson Hall. After lunch the visitors were taken to the Gym where the students were assembled in convocation. Some of the visitors spoke a few words, expressing their pleasure and appreciation of their welcome.

After convocation a get together meeting was held in the Y. M. C. A. hut, where members of the faculty met different visitors individually.

Dean Hewitt gave the second of a course of lectures before the Scientific Association of the St. Paul's School at Concord on Thursday evening, February 6. The subject "Modern Development of Electrical Science."

E. E. BARTLETT, '19, IN SERIOUS FALL

Breaks Leg Severely in Accident—Was Wiring "Y" Hut at Time of Injury—Narrowly Escapes Compound Fracture

Edward E. Bartlett, '19, was seriously injured Sunday morning when he fell from a ladder in the Y. M. C. A. hut.

Bartlett was wiring in the "Y" hut when the ladder, upon which he was standing slipped, and unable to save himself he fell, catching his foot in the ladder in such a manner that the whole weight of his body bore upon it. He was alone at the time but managed to crawl out to the piazza. He called to two young ladies, who were passing, and after some time succeeded in convincing them that he was really hurt and not acting a part of some fraternity initiation, they started for assistance.

DR. GRANT ATTENDS

As it happened Professor Hitchcock arrived about that time and saw that something was wrong and immediately went to the assistance of Bartlett. Dr. A. E. Grant, who at the time of the accident was at church services, was summoned and Bartlett was soon removed to his room in Fairchild Hall. There it was discovered that he had narrowly escaped a compound fracture of the leg. As it was, both bones in the leg were broken, one at the ankle and the other four inches above.

Dr. Grant, with the assistance of Professor Hitchcock, succeeded in setting the leg. Bartlett's parents were soon notified and they arrived here in the afternoon and took him to their home in Derry.

His friends and classmates sincerely wish for his speedy recovery and hope that the accident will not seriously affect his chances of graduation this year.

TAKEN FOR INITIATION

According to one of the stories heard, the two young ladies, who were passing, thoroughly believed that it was some part of a fraternity initiation and in so believing did not immediately go for assistance. When Bartlett convinced them that he was in earnest they did all that they could.

HOLD FIRST OF FORMAL TEAS AT BALLARD HALL.

The first of the formal teas which are to be given every two weeks by the girls was given on Friday afternoon, January 31, from 4 to 6 o'clock in Ballard Hall parlor. The hostesses were Grace Atwood, '19; Louise Richmond, '19; Helen Adams, '20; Katherine Aldrich, '20; Hortense Cavis, '21; Kathryn Aldrich, '21; Rhoda Hyde, '22; Ruth Barker, '22; Mrs. E. P. DeMerritt and Mrs. Marcia Sanders poured.

The following guests were entertained: President and Mrs. R. D. Hetzel, Mary Poland, Muriel Chamberlain, Sarah Greenfield, Melba Shuttleworth, Olive Ashford and Messrs. Paine, Wiggin, Nutter, Anderson, Clapp, Baker, Shuttleworth, Dustin, Cochrane, Rumrill, Hyde, Evans.

Refreshments of tea, sandwiches, wafers and candy were served.

Mrs. H. H. Scudder has recently become one of the patronesses of Tau Chapter of Alpha Xi Delta.

CALENDAR OF EVENTS.

Saturday, February 8. Informal at Gym., 8.00 p. m.
Saturday, February 8. Basketball game, Conn. State vs. N. H. at Storrs.
Monday, February 10. Agricultural Club meeting.
Wednesday, February 12. Economics Club meeting.
Friday, February 14. Entire State Legislature to visit N. H. College.
Friday, February 14. Commuting girls' dance at Thompson Hall.
Saturday, February 15. Basketball game, University of Maine vs. N. H. at Durham.

BLUE AND WHITE WINS FAST GAME

Trims Springfield Y. M. C. A. for First Time
SCORE 32-20

Game Full of Thrills—Anderson and Davis Star for New Hampshire—Edwards and O'Donnell Excel for Opponents—Wonderful Support Behind Team—Celebration After Game

New Hampshire's splendid victory over Springfield last Friday night at the Gym will go down in the annals of this institution not only as Springfield's first defeat in this hall but as one of the most intensely exciting games played here. Both from the standpoint of individual play and team work, our five gave one of the best exhibitions of basket ball ever seen on the local floor. It was a fast, clean game, free from unnecessary roughness although quite a number of technical fouls were inevitable, on account of the unusually fast play.

FIRST HALF FASTEST

The first half was the fastest of the two. After O'Donnell got a foul shot not a basket was scored until Davis made a wonderful shot from near the center of the floor. The score went up, point by point, the lead alternating between the two teams. Toward the end of the period, Butler had the wind knocked out of him by a fall and was unconscious for a minute. Had it been any other player, than Ted, he would not have finished the game, but Butler was game and soon was playing fast as ever. O'Donnell proved himself a hard man to cover, getting four baskets during this period, besides making four more from the foul line. This period ended 13-13.

WHIRLWIND FINISH

During the last half, New Hampshire was unbeatable. Davis and Shuttleworth did wonderful work breaking up the passes of their opponents. Anderson scored several times getting several baskets, one of which seemed impossible. The offense was great. Nevertheless, the opponents made a fine attempt to regain the lead. Springfield's husky captain repeatedly stopped plays in a manner that brought cheers from the crowd. But our men never slackened their pace, and were going faster at the end than at the beginning. During the last few minutes they were playing rings around their opponents.

The stars for New Hampshire were Davis and Anderson, while Edwards and O'Donnell excelled for Springfield.

REVIVE OLD CUSTOM

After the game a good old custom was revived, when an enthusiastic group of upper classmen rounded out enough freshmen to build a good sized bonfire on the old battle ground back of the library. A good crowd collected despite the biting wind, and put a lot of pep in some songs and cheers, while some one else kept the old "T" Hall bell ringing for nearly an hour. It was a good idea and is one of the numerous indications that college has got back to normal with some of the real old fashioned college spirit.

CHEERING GOOD

The cheering was most encouraging. With such support, the team could not help but win. The crowd made a huge noise, especially in the first half. They also gave the visitors fine recognition when they came on the floor and whenever they made any good plays.

Summary:
N. H. Springfield Y. M. C. A.
Butler, l. f. r. g., Mansfield
Craig, r. f. l. g., Edwards, Capt.
Hawland

Anderson, c. c., Wilson
Shuttleworth, l. g. r. f., Schaefer
Davis, r. g. l. f., O'Donnell

TAXATION WITHOUT REPRESENTATION.

Historians are agreed that this vital subject has been the cause of much bloodshed in the past, and why does not the principal hold today, in our college activities. Is it not true that representation welds together the forces of the college as well as those of the nation?

Regardless of the best of intentions, there is a growing feeling of resentment, by the students, against two of the most valuable and beneficial of the faculty committees. Such a feeling should not exist but the fact that it persists indicates that either the students or the committee are at fault. It is unreasonable to suppose that one or the other is to blame, and it is probably safe to say that both are more or less right in their viewpoints. At present any social function requires a petition to a committee which acts upon it more or less promptly, and usually wisely.

Whatever the action, the result does not entirely satisfy the students. Why is every petition accompanied by a prayer that a just decision will result? Why do some organizations carry the idea of past grievances? There are some who question the committee's authority in the control of our social life. The committee seems to be almost overwhelmed by a demand for dances. This demand is but normal, and will be satisfied at college, or outside, if necessary. The committee is liberal enough in granting these petitions, but points out that dances at present are undemocratic. This viewpoint is correct in some respects, but it is inevitable that certain organizations will have a better chance, and that a few, especially the non-fraternity men, have a very serious handicap. There is surely a reason for the patronage of public dance halls in the nearby towns, but can the students, ever solve this problem of cliques, favoritism and undemocracy so long as they have no authority to change conditions. Naturally they follow the line of least resistance and practice methods which are designed to overcome the lesser favorites. Can the faculty control these conditions without proper authority, which can only come from the students themselves? A curtailment of dances and the substitution of other social affairs would be met with half hearted support and only increase the exclusiveness of these dances that are permitted.

Why would not an equal student representation on this committee constitute a body which would hold both viewpoints and also have the support of the students, possessing at the same time authority to accomplish results? The small minority who do not dance would be allowed a better chance and those who desire to learn would have the chance to do so. Another point is that those now dancing in an improper manner would come under student censor.

Another source of grievance is caused by non-representation. The Student Welfare Committee is accomplishing good that is very important and far reaching. The usual house inspections have been productive of both good and bad. It does no good to merely find fault. With proper student representation there would

again be something done. Is it not fair to ask representation on a committee which untactfully and deliberately intrudes on your private property at inopportune times, and then merely finds fault? This is now causing unjust and unfair criticism from students because of personal feelings which are injured. Nevertheless it exists, and is likely to cause the unwelcome sign to be displayed on many of the houses.

The students have been very successful in governing many important activities, but in these cases they have failed badly in co-operating with the faculty, which has every good intention, and which spends much time and thought for the welfare of the students, both socially and physically. Lacking representation, between the faculty and the students, it is time for the students to change their attitude and try to recognize for themselves the problems before the faculty, and to co-operate in every way before further feeling causes detrimental results.

SIGNIFICANT!

New Hampshire's great victory over Springfield is full of significance. Of course, it shows that we have a wonderful team, one that can trim the best teams in New England, one that has better team work, training and greater knowledge of the game. But behind that lies the fact that New Hampshire can produce teams that will rank with the first. The college is forging ahead in all sports. From all corners comes recognition, proof of the fact. Basket ball is not the only sport which has drawn attention of the athletic world. Last year we had a wonderful foot ball team. Our cross country teams have won most consistently. One man has made a place for himself among the foremost runners of the country. This recent triumph as much as any other victory has brought out the fact that our alma mater each year is earning a place among the chosen of New England institutions.

Another fact is a very large part of the credit belongs to Coach Cowell. His system is now fairly well established and the results are being shown this year. To him also is due the credit for the fact that athletics are on the firmest basis this year than for many a season. Don't forget that behind the team is the kind of coaching that the best colleges in New England have.

WHY NOT A DRINKING FOUNTAIN IN FAIRCHILD?

Why not a drinking fountain at Fairchild Hall, the men's dormitory? Of all the buildings on the campus, Fairchild would seem to need a fountain. More than one fountain is really needed but the presence of even one drinking place would be greeted with shouts of joy.

At the college gym are two unused fountains, put in last summer, when the vocational men were being trained here. They are not in use at present. Why may not these be removed to Fairchild Hall, one at each end of the main floor, and give the boys a chance to quench their thirst without having to visit a store and spending their hard-earned cash on Jes-No and similar "stuff"?

PRESS COMMENTS ON PROF. WHORISKEY'S SPEECH.

According to the Manchester Union of January 30, the words of Prof. Richard Whoriskey at the Rotary Club of Manchester, on January 29, quoted editorially caused many people to think very seriously, as he painted for them a word picture of the results of the old balance of power, and compared it with the results of a league of free nations.

Professor Whoriskey brought to mind the spectacle of all America's preparation and concentrated energy, turned towards establishing world peace and international justice, and his remarks caused his hearers to see this great picture of simple justice as it will be administered by a great and powerful league of peace-loving nations.

Sergeant Russell Sheehy, ex-2-yr. '16, who arrived home from overseas lately, enjoyed a five days' furlough with his parents in Newfields.

Martha Chase, ex-'21, is attending the Bryant and Stratton Business college at Manchester, N. H.

HOSTESS HOUSE NOTES.

On Tuesday evening, Jan. 28, a candy-pull was enjoyed by the Extension Workers, who were staying at the house. Several college men were invited in and a very pleasant evening was spent around the piano, singing and dancing. Later all adjourned to the kitchen where a real old fashioned candy-pull and corn-pop was held. The affair, which was greatly enjoyed by all, also served as a farewell party to Miss Crowther, who left Durham the next day.

On the evening before they left, the girls of the Extension Workers' Conference, who stayed on the top floor, or "hurricane deck," as they called it, collected four dollars as a gift of appreciation to the House. On the outside of the envelope in which it was presented was the following original verse:

"Keep the Hostess ship a sailing,
We think it is just right,
Especially reserve the hurricane deck
For the Agents to spend the night.
We've had a mighty good time with you

And it's with regret we depart,
But always we'll keep fond recollections
Of our Hostess House in each heart."

The past week saw the House running under an entirely new regime. The new hostess, Miss Annie L. Sawyer of Warner, N. H., has arrived, and assumed her new duties last Monday. Miss Sawyer was graduated from Bridgewater Normal School, and afterwards taught in the practice school team. Since then she has been a member of the school board of her home town. She resigned from the position of chairman of this board to take up her duties here as hostess.

Miss Warner has already acquired the "Hostess House spirit" and is here resolved to do her best in order that the House may "carry on."

"BALLOTING."

The lax way, in which the athletic association meeting held last Wednesday at chapel, was carried on, was indeed a black mark against the upperclassmen of this institution. Think of it! Upperclassmen not knowing the constitution of the A. A. Upperclassmen not knowing the real meaning of the word, "ballot." It certainly was a sad state of affairs.

According to Webster's dictionary "ballot" means, "a ball, ticket, or paper by which a vote is registered; the system of secret voting by the use of balls, tickets, or papers; also the total number of votes cast or recorded, that is to vote or decide by secret vote."

Is a rising vote a "secret vote?" Is it a vote by use of balls, tickets, or papers? Emphatically NO!

The constitution of the athletic association states specifically, that the election of officers must be done by "ballot." Is a rising vote a "ballot?"

What is the constitution? A mere scrap of paper? Or, perhaps, it is something to be aided by? What's the use of having any constitution at all if we are not to respect it?

Surely this past meeting of the A. A. should be reopened and the officers elected in a legal way.

FROM A SENIOR.

On May 15, or thereabouts, if all goes well and good,
The Junior Granite will come out; at least 'tis said it should.
And if it don't, well never mind, the editor will rave
While we poor boobs count up the cash that we were told to save.
But if this book comes out on time;—the board all says it will;
That hard earned cash will surely help, the '20 vaults to fill.
They say it is an even swap, of Granite versus money,
Because the "kind" words in that book will be like oozing honey,
And all the pictures it contains are worth their weight in gold
Because they represent the things, that are, but can't be told.

Moreover, as the years roll by, if such a book you own,
How many uses it will serve within your little home,
Your wife can use it for a weight to keep the door tight shut,
And you can heave it like a brick, if bothered by the pup.
The kids will also like that book because it shows your face,
And neighbors will enjoy the jokes about your ancient race.
Buy then a Granite for yourself; another for a friend,
And it will be a source of joy, from frontispiece to end.

Gladys Brown, '17, is to be in Durham over the week-end. Gladys is working in the public library and teaching in the evening school at Franklin, N. H.

THE STATE LEGISLATURE.

The visit of the entire New Hampshire Legislature to New Hampshire College on Friday next, will be an event unprecedented, in the history of the college. The interest of the legislative bodies, coming as it does entirely unsolicited, and voluntarily, is but another indication of the growing interest, and appreciation, the people of the state are manifesting in the college. Both faculty and students are being asked to co-operate to make this day as enjoyable as possible to the visitors.

DE LAVAL

The World's Greatest Cream Saver

All over the world creamerymen, big milk concerns, dairy authorities and cow owners who have special opportunity for judging the worth of cream separators have for years recognized the superior skimming and all around efficiency of the De Laval.

That's why 98% of the plants throughout the world separating large quantities of milk use the De Laval. It skims so much closer that they can't afford to use any other machine.

That's why 2,325,000 De Laval's are in daily use, more than all other makes combined.

Not only is the De Laval the greatest cream saver but it turns easier, is easier to wash, has larger capacity and greater durability than any other separator.

The more you know about cream separators the more certain you are to buy a De Laval.

Order your De Laval now and let it begin saving cream for you right away. Remember that a De Laval may be bought for cash or on such liberal terms as to save its own cost. See the local De Laval agent, or, if you don't know him, write to the nearest De Laval office as below

NEWSY ITEMS OF THE ALUMNI.

SGT. J. J. LEARY, '14, VISITS COLLEGE

Wounded Severely He Is Now Recovering—Prof. H. F. Moore, '98, Lectures on the "Fatigue of Metals"—Other Items

'98. Prof. Herbert F. Moore is to deliver an address before the Engineer's Club of Philadelphia at their Club House, Saturday, February 15. His subject is "The Fatigue of Metals" and his lecture will be illustrated with motion pictures and lantern slides showing photomicrographs of metal under stress. The motion picture is the same that was shown here in the Gym during the S. A. T. C. Professor Moore is chairman of the National Research Council Committee on Fatigue Phenomena in Metals and has done some valuable work in that capacity. Professor Moore is also at the head of the Department of Experimental Engineering at the University of Illinois.

'99. Lewis H. Kenney, as chairman of the Committee on Papers of the Engineer's Club of Philadelphia, was instrumental in obtaining Professor Moore, '98, for that club.

Ex-'14. Sergeant John J. Leary attended the Springfield game in uniform. He has been "over there" and tells some interesting experiences of the service. He was with the First Division of Regulars as an engineer and went across with the first American troops in November, 1917. He was in active service in the front line trenches of the Toul Sector with the 26th Infantry. He was wounded March 14, 1918, in four places by a burst of shrapnel. Mustard gas infected the wound and he has been under a special treatment ever since. He is to have an operation soon, in a New York hospital, to remove from his system the effects of the gas. At one time he was in the front line trenches for fifty-five consecutive days without relief. During that time there was little active fighting, his main problem being to get rid of cooties, find something to eat, and a place to sleep. Although in no great battle he was active in many local attacks and counter attacks.

'16. O. C. Work is working with some special experimental tools for the Starrett Tool Company in Athol, Mass.

'16. Lieut. Victor H. Smith is reported as being in the convalescent center, Camp Zachery Taylor, Louisville, Ky.

'16. Leon A. Hawkins has left the position as Assistant Horticulturist in the Alabama State Board of Horticulture at Auburn, Ala., to take up the managship of the Hale Georgia Peach Orchards, consisting of 1,800 acres of peaches. He says, "Besides peaches this place produces around 6,000 bushels of corn per year, 5,000 bushels of wheat, vegetables enough to furnish three white families and the 150 to 200 negroes who are employed on the place and live in cabins furnished by the owners of the orchards. Also I have to raise all the meat that is used by the whole crowd. I have about 200 employees during the summer, besides the packing house crew. About 50 men are worked during the winter and some 60 mules are kept busy the year round. This is the largest privately owned peach orchard in the world." He finds life in the South very interesting, and admits that he doesn't care to come back to the northern winters.

'16. E. H. Kelley met L. A. Hawkins, '16, in Mobile, Alabama, and spent several hours with him in that city.

'16. R. H. Parker payed a short call to Durham last week. He is still working in the paymasters' office in the North Station, Boston, Mass.

'17. First Lieutenant Sumner Carlisle is in Coblenz, Germany. His division, the 91st, is one of the most noted and most honored of the Aviation Section, having received many distinctions, medals and Croix de Guerre. Lieutenant Carlisle had an opportunity to see the recent Roland flying machine of German make which appeared shortly before the armistice was signed. Its driver killed Ex-President Roosevelt's son and was later killed in this same machine.

2-yr. '17. H. A. Holbrook is creameryman and assistant instructor in dairy manufacturing at the Connecticut Agricultural College at Storrs, Conn. He anticipates very much the basketball game there and plans to give the team the best of treatment and good support from a few old N. H. C. men. Also at the college are Prof. G. C. Smith, Prof. W. L. Slate, the former formerly in the department of economics here and the latter in the agronomy department and J. A. Manter, '12.

DETAILS STILL ARE LACKING

Lieut. P. E. Corriveau, '15, Reported in November As Killed—Was Star Athlete

Paul Edward Corriveau, '15, First Lieutenant, U. S. A., whose death was reported in this paper at an earlier date, was killed in action in France, October 6, 1918. No further information has reached his parents in regard to the details of his death, or the battles in which he took part. The last letter received by them stated that he had been at the front about seven weeks and had not up to that time received even a scratch. His commander stated that he thought that his men had done their share and would not have to go into action again. The next information received was the telegram announcing his death.

He was born in Concord, N. H., October 2, 1893, and received his education in the local schools of his native city. He graduated at New Hampshire College in June, 1915, and entered the graduate school at the

LIEUT. P. E. CORRIVEAU.

University of Missouri in the fall of the same year and received his degree of M. S. in June, 1916. In July of 1916 he entered upon his duties as head of the department of horticulture at Kingston, R. I., and continued to serve in that capacity until he entered the service of U. S. Army (Marine Corps) the latter part of May, 1917.

In college Corriveau soon became known among the student body because of his active participation in athletics. He played on the foot ball team for three years and in his senior year was captain. He also was Assistant Manager of Track and Cheer Leader in his junior year.

Upon graduation he was honored by receiving the Chase Davis Memorial Prize for high attainments in athletics and scholarship.

He was a member of Zeta Epsilon Zeta and Sigma Alpha Epsilon fraternities, and the honorary societies of Sigma Xi, Alpha Zeta and Sigma Kappa Zeta, all of which testified to the high attainments which Corriveau made in his undergraduate and graduate days. During his college course he served as student assistant in the department of horticulture and spent his summers in Durham in the same capacity.

While Mr. Corriveau had scarcely entered upon his professional career yet those who knew his qualities of industry, native ability and his cordial personality predicted for him a brilliant and useful life.

In a letter received by Professor Gourley which was written July 24, he said: "We had a fine trip over. We held a sharp lookout for submarines but did not see a single one.

We stayed in our landing town only three days. While there the rest of the boys went to a rest camp (built

as a prison camp by old Napoleon) but I was left at the dock in charge of the unloading, sorting and guarding our property. We then took a two days' trip inland to Chatillon. There we stayed only two days when we marched over to Selles sur Cher which is about six miles from the latter place or forty miles northeast of Tours.

"The French people have certainly won my love, respect and admiration. They have very little to eat yet they insist that you share with them what they have. I always refuse invitations to dinner for I know, that by feeding me, they would be depriving themselves of just so much. The work here is all done by hand by old women. They still use the old fashioned cradle for harvesting their cereals. These poor old women work in the fields in the sun from daylight (4 a. m.) until dark (9.30 p. m.) There are no young men to be seen, all are no doubt at the front or 'gone west.'"

OUTLINE ALUMNI ASSOCIATION'S WORK

Opening of College Under Normal Conditions Draws Alumni Closer to College Activities—Two-Year Graduates Now Admitted to Active Membership

The constructive work of the Alumni Association as outlined at the annual meeting held at Durham last spring has been delayed by the recent war time conditions. The opening of college on January 1, 1919, under practically normal conditions again draws the alumni more closely to college affairs and the work of the Association. The Association has been active throughout the war but there are now many important questions concerning the welfare of the college to which the alumni can give most helpful consideration. However the direct influence of the Association on the affairs of the college can only be maintained by an organized effort. Every alumnus must be an active member of the Association. This is now possible.

EVERY MEMBER VOTES

The constitution of the Association was revised at the last annual meeting to enable every member to vote for the officers of the Association. The affairs of the Association are no longer to be directed by those few who are fortunate to be at Durham during Commencement. Following the action taken at the last meeting the president will appoint as a nominating committee three members who are in touch with the political affairs of the state and who know both the needs of the college and of the Association. This committee will recommend a list of officers for the ensuing two years, prepare the ballots, and supervise the election. These ballots will be mailed to all members of the Association on April 1, and all votes are to be returned in a sealed envelope provided for the purpose and bearing the voter's signature. The votes must be received at the office of the secretary of the Association two weeks before the annual meeting.

This arrangement will enable every member to take an active part in the affairs of the Association and will give the officers elect the assurance of a representative vote. Recommendations may be made to the nominating committee by any member or group of members in the Association. This same nominating committee will also nominate candidates for the office of alumni trustee when such vacancies occur.

The constitution was also revised to offer active membership in the Association to all graduates of the two-year course and after this year the term of office for all officers and the Alumni Council is to be increased to two years.

PRESENT OFFICERS

The present officers of the Association are president, Edson D. Sanborn, '10; vice-president, L. A. Carlisle, '08; and secretary-treasurer, P. D. Buckminster, '12. The members of the Alumni Council are as follows: Charles H. Hood, '80, Charles E. Hewitt, '93, John C. Kendall, '02, Edwin Hardy, '06, Edith G. Donnelly, '12, Perley A. Foster, '13, and James H. Nixon, 2-yr. '03. Mr. Nixon has the honor of being the first two-year man to serve on the Council. The office of the Association has been moved from Durham and is now at 201 Hancock Street, Everett, Mass.

During Alterations Our Store Is Open For Business As Usual.

Our Lower Entrance is closed but all departments may be reached by way of the Shoe Entrance.

The Church in Durham

REV. VAUGHAN DABNEY, PASTOR.

Sunday, February 9, has been designated as Roosevelt Day throughout the country at which time tribute will be paid to the memory of the great American. Mr. Dabney speaks Sunday on "The Idealism of Theodore Roosevelt."

"A public man is bound to represent his constituents, but he is no less bound to cease to represent them when, on a great moral question, he feels that they are taking the wrong side. Let him go out of politics rather than stay in at the cost of doing what his own conscience forbids him to do."—Theodore Roosevelt on "Official Duty."

MORNING WORSHIP, 10.45 CHURCH SCHOOL, 12M.

ENGINEERING CLUB ENTERTAIN AGGIES

Ladies' Night at Gymnasium Has Pleasing Results—Pictures Shown One Reel Shows Field Day Exercises Held Here Last Summer

The Engineering Society entertained the Agricultural Club at the Gymnasium last Monday evening. The members of both clubs were asked to bring ladies, the presence of whom added much to the interest of the affair.

The program consisted of six reels of moving pictures, the first three of which showed the development of the electric locomotive in general, and the construction and use of the Chicago, Milwaukee and St. Paul railroad locomotives. These machines represent the highest development along this line and are in truth, "King of the Rails." This film also gave a fine idea of scenery of the Rocky Mountains.

FILM OF "FIELD DAY"

Another picture represented the many uses of electricity in the home and factory and had an interesting plot interwoven with the educational part. The last film was a picture of the field day exercises, of the vocational units at the college here last summer. This was of great interest as it showed both President Hetzel and Ex-Gov. Keyes besides others whose faces are familiar to everyone.

Music was furnished by P. B. Place. I. W. Doolittle, '22, W. P. Batchelder, '22.

L. B. Hoffman, '19, gave a violin solo. H. M. Ladd, '20, added greatly to the program by giving two humorous readings.

COLLEGE CLUB ROOMS NOW OPEN TO MEN STUDENTS.

The college club rooms are now open. This announcement was greeted with a happy smile by those students who have missed their noon-time game of pool.

The rooms have been thoroughly renovated and the pool tables put in good shape by the athletic association. The club rooms are now open for use at any time and the privilege of using the pool tables may be had, in payment of a small fee. The athletic association puts forward the claim that a fellow might as well spend his money playing pool here, as at the local pool-room, thus supporting the college by adding profits towards its athletic fund.

Again the club rooms offer opportunity for a few minutes of study after breakfast, or dinner at the mess hall, while waiting for class time. The club room also serves as a place where one gets the "latest" on the basket ball situation, makes out his dance order for the next (informal) or talks over the latest news on President Wilson's peace-treaty.

The college club rooms are free to all and should be used by all. The enjoyments of pool games may be had for a nominal sum.

DR. H. L. HOWES JOINT AUTHOR OF RECENT PAPER.

In the current number of the Proceedings of the National Academy of Sciences there is a paper by Dr. E. L. Nichols of Connell and Dr. H. L. Howes of New Hampshire College on "Types of Phosphorescence." The paper reveals the fact that there are two distinct types of phosphorescence, the first of momentary duration, and the second of long time duration. Strangely enough one substance may present both types.

SMITH HALL GIRLS HOLD ANNUAL DANCE.

The girls of Smith Hall gave their annual dance last Saturday evening in Thompson Hall gymnasium. The decorations of Japanese colors, with hanging streamers, and paper sunshades concealing the lights, were very effective. The stage was transformed into a cosy corner, with evergreens for shade. The program of 18 dances was enjoyed from 7.30 until 11 o'clock, and during intermission refreshments of ice cream and assorted cookies were served. Two moon light dances during the evening were a novel feature.

The orchestra, composed of I. W. Doolittle, '22, L. Cohen, W. P. Batch-

elder, '22, and P. B. Place, '20, was especially good.

The chaperones were President and Mrs. R. D. Hetzel, Mrs. Bernice Smith, Miss Louise Knight, and Mrs. Marcia Sanders. The guests of the evening included Messrs. R. Sawyer, A. Sawyer, E. W. Hewitt, Perkins, A. W. Davis, J. E. Durgin, W. S. Akerman, I. W. Hedburg, J. Bloomfield, C. J. O'Leary, Jr., A. H. Moody, K. D. Blood, R. Carpenter, L. Jenness, E. Anderson, W. Shuttleworth, C. W. McNeil, R. C. Greer, B. R. Fowler, T. J. Craig, F. A. Keane, A. Davis, B. Mitchell, H. I. Leavitt, Shea, T. Crosby, G. Crosby, Elkins, H. S. Dunn, E. Stuart, R. Varrill, D. Ewer, R. Calpin, F. Ladd, P. Lawrence, J. C. Hillard, C. B. Murther, Cassilo, W. H. Day, C. E. Bishop, F. Lagasse, M. Vose, R. Litch, Cavanaugh, County, J. Gould and H. W. Ladd.

DEAN E. R. GROVES REFUSES APPOINTMENT AS CHAIRMAN.

Dean E. R. Groves attended a meeting of a commission on under-privileged boys which was held at Boston on February 5, that he might discuss the sociological aspects of the problem with the commission. During the Christmas recess he was invited to speak before the National Association of Leaders of Boys' Work at New York.

Dean Groves has had to refuse the appointment of chairman of the New Hampshire Collaboration on Character Education for Children. A committee of five has been appointed representing each state and a prize of twenty thousand dollars is to be awarded the collaboration that are judged to have had the best report.

During the March vacation Prof. Groves is to speak at St. John, N. B., and Halifax, Nova Scotia, upon sociological subjects. He will address the Rotary Clubs at both cities.

Tomorrow Dean Groves speaks at Peterborough on "Social Progress in Rural Communities."

FAIRCHILD HALL MEN PLAN TO HOLD SMOKER.

At a recent meeting of the men of Fairchild Hall a committee to be appointed by A. F. Brooks, '20, chairman of the Students' Government Committee, was voted upon and passed. The object of this committee is to make arrangements for a smoker which will probably be held Saturday evening, February 8, in Fairchild Hall.

It was also voted to raise \$50, as is the custom, from the men in Fairchild Hall, to defray the expense of a piano. Wilfred Duffy, '22, was elected to fill the position of collector.

The meeting was in charge of O. W. Pike, '20, in the absence of A. F. Brooks, '20.

MISS B. E. TITSWORTH ENTERTAINS AT TEA.

Miss Bertha E. Titsworth was hostess on Wednesday afternoon, January 30, for a tea given in honor of Mrs. Earle P. Robinson, wife of the new county agent leader, who has recently assumed his duties here in connection with the college. Other guests were Mrs. Mary I. Wood, Miss Grace M. Smith and Miss Morton of Washington, D. C., Dr. Inez J. Nason of Dover and the Junior Club leaders and Home Demonstration agents.

SECOND INFORMAL OF YEAR TONIGHT AT GYMNASIUM.

The second informal of the year will be held tonight in the gymnasium. The college orchestra will furnish the music. It is hoped that a large number will turn out to help make this informal a success.

WOMEN FACULTY MEMBERS HAVE ENJOYABLE REUNION.

Conda J. Ham, formerly registrar at the college, who is now Corporate Auditor of the Bangor and Aroostook railroad with offices in Bangor, Me., was present at a very enjoyable reunion of former New Hampshire College faculty members, on Sunday last.

The reunion took place at the home of Mr. and Mrs. C. H. Bachelor in Orono, Me. Mr. Bachelor is a graduate of New Hampshire and was for three years instructor in zoology at the college. He is now engaged in entomological work for the government and is stationed at the experiment station at the University of Maine. This summer he expects to be stationed at Presque Isle in the very heart of the great Aroostook potato regions, where he will be special expert advisor for the Maine potato growers. Mrs. Bachelor will be remembered by Durham people as Miss Mildred Pierce, for some time the principal of the Durham school.

Besides Mrs. Ham and son, Rex, there were also present Mr. and Mrs. W. D. Emerson. Mr. Emerson was an instructor in mechanical engineering at New Hampshire during the year 1916-17. He is now instructor in the same subject at the University of Maine. Mr. and Mrs. Emerson are now the proud parents of a seven-months-old daughter, Ruth.

MISS PEARSON LEAVES THE HOSTESS HOUSE.

It is with great regret that the college saw this week the departure of Miss Jesse E. Pearson, who has been acting as hostess at the Hostess House. Miss Pearson, with Miss Crowther, who left last week, came here at the opening of the house last November. Instantly she caught the spirit of the house, and from then on she worked in every way possible to make the project a success. That she has succeeded can be ascertained from any member of the S. A. T. C. here. It was Miss Pearson's jolly spirit and cheery "come right in and make yourself at home, the house is yours, do what you wish," that brought the faraway home to many a lonesome boy's heart. When it looked as though the House would not be continued after the disbanding of the army camp here, Miss Pearson's "never-say-die" spirit carried it through.

Certainly this lady will not soon be forgotten by the Hostess House frequenters, and all of the other many friends that she made in her short stay here. She is returning to her home in Webster, N. H., for a short visit, after which she may take up work in Portland, Me.

MAJOR HOWARD N. HALLS NEW COMMANDANT AT N. H. C.

Major Howard N. Halls is to be the new commandant at New Hampshire College. Previous to his coming here, Major Halls was stationed at the University of Maine, where he has been in command of the S. A. T. C. Plans of the military training for the coming year are not yet completed, owing to the temporary absence of Major Halls.
