**EMBARGO UNTIL**  
November 14, 2003  
6 p.m.

DURHAM, NH -- Howard Dean has opened a substantial lead over his closest rival, John Kerry, in the New Hampshire Democratic primary race. Dean supporters are more committed to him than are supporters of the other Democratic candidates.

These findings are based on the latest **WMUR New Hampshire Primary Poll**, conducted by the University of New Hampshire Survey Center, and sponsored by WMUR-TV, Manchester, New Hampshire.\* Four hundred forty-six (446) randomly selected likely Democratic primary voters were interviewed by telephone between November 6 and November 13, 2003. The margin of sampling error for the survey is +/-4.6 percent. (For more detailed results, visit the Survey Center web site at [www.unh.edu/survey-center](http://www.unh.edu/survey-center) and click on Press Releases.)

### Dean Grabs Lead

With less than three months to go before the January 27, 2004 New Hampshire primary, former Vermont Governor Howard Dean has expanded his lead in the Granite State while support for his opponents is either dropping or at best, staying the same. In the most recent WMUR New Hampshire Primary Poll, 38 percent of likely Democratic primary voters say they will vote for Dean, 16 percent say they will vote for Massachusetts Senator John Kerry, 5 percent say they will vote for General Wesley Clark, 5 percent support North Carolina Senator John Edwards, 4 percent support Connecticut Senator Joe Lieberman, 3 percent support Missouri Congressman Dick Gephardt, and 1 percent favor Ohio Congressman Dennis Kucinich. In the October 2003 Granite State Poll conducted by the UNH Survey Center, Dean led Kerry 30 percent to 17 percent.

While Dean has increased his lead over his rivals, a large segment of Granite State Democrats remain undecided about who they will vote for. Currently, 27 percent of likely Democratic primary voters are undecided about who they will vote for, up from 20 percent in October. "The fact that one quarter of the electorate has not made up their mind who to support this late in the campaign is evidence that many Democratic primary voters are not satisfied with any of the candidates," said Andrew Smith, Director of the UNH Survey Center. "Outside of Dean and Kerry, none of the other Democrats in the race are getting much attention from voters."

Both Wesley Clark and Joe Lieberman recently decided to skip the Iowa caucuses and concentrate their campaigns in New Hampshire and later states, but these decisions are not yet paying off. Clark has actually lost ground over the past month; dropping from 10 percent to 5 percent in New Hampshire, while support for Lieberman is unchanged -- 4 percent now compared to 6 percent in October. The New Hampshire Democratic electorate is quite liberal -- exit polls in 2000 showed that more than half of those voting in the Democratic primary considered themselves to be

politically liberal -- and moderate Democrat candidates are having a tough time competing with the more liberal message of Dean and Kerry.

Dean's supporters are also more committed to Dean than are supporters of the other candidates. Half (51%) of Dean voters say they are certain to support Dean and 49 percent say they may change their mind. By comparison, only 40 percent of Kerry voters say they are certain to support Kerry, 59 percent saying they may change their mind. Among the other candidates, 45 percent of Lieberman voters, 38 percent of Gephardt voters, 34 percent of Edwards' voters, and 32 percent of Clark voters say they are certain to support their candidate.

### **Second Choice**

Likely Democratic primary voters who expressed a preference for a candidate were also asked who their second choice would be in the New Hampshire primary. Overall, voters were rather evenly split between Kerry (21%), Dean (17%), Clark (14%), Edwards (11%), Lieberman (11%), and Gephardt (10%) with 5 percent favoring some other candidate and 11 percent undecided. One-third of Dean voters (30%) say they prefer Kerry as their second choice, 39 percent of Kerry voters say they prefer Dean.

On a related issue, most voters -- 77 percent -- indicate that they have not changed their mind during the course of the election campaign.

### **Expected Winner**

There is a deepening sense of inevitability to Dean's campaign in New Hampshire, despite the election being months away. When asked who they thought would win the New Hampshire primary, 61 percent of likely Democratic primary voters named Howard Dean, only 14 percent think John Kerry will win, 2 percent think Wesley Clark will win, 2 percent think Joe Lieberman will win, 1 percent think Richard Gephardt will win, 1 percent think John Edwards will win, and 19 percent don't know. One month ago, 51 percent thought Dean would win, 12 percent thought Kerry would win, and 5 percent thought Clark would win.

### **Favorability Ratings**

As the election comes closer, the net favorability ratings of most of the candidates have risen as more and more voters get to know them. Favorability ratings for Dean and Edwards have been increasing since the summer, favorability ratings for Kerry and Gephardt have been fluctuating, while those for Lieberman and Clark have remained the same. Currently, 75 percent of likely Democratic primary voters say they have a favorable opinion of Dean, 12 percent have an unfavorable opinion, 7 percent are neutral, and 6 percent say they don't know enough about him to say. Dean's net favorability rating, the percentage who have a favorable opinion minus the percentage who have an unfavorable opinion, is a very high +62 percent, up from +34 percent this spring and +47 percent in the summer.

Although he has not moved up in the polls, John Kerry is still popular among Granite State Democrats and his image has recovered much of the ground he lost earlier in the fall. Currently, Kerry is viewed favorably by 68 percent of likely Democratic primary voters, 20 percent have an unfavorable opinion of him, 9 percent are neutral, and 4 percent don't know enough about him to say. Kerry's net favorability rating is a very solid +48 percent, up from +34 percent in October, but down from +54 percent in the summer.

John Edwards' image has improved among Granite State Democrats in recent months. Currently, 48 percent of likely Democratic primary voters say they have a favorable opinion of Edwards, 16 percent have an unfavorable opinion, 17 percent are neutral, and 19 percent don't know enough about him to say. Edwards' net favorability rating is +32 percent, up from +20 percent in October.

Dick Gephardt is viewed favorably by 51 percent of likely Democratic primary voters, 25 percent have an unfavorable opinion of him, 17 percent are neutral, and 7 percent don't know enough about him to say. Gephardt's net favorability rating is +26 percent, up from +18 percent in October and equal to the +27 percent rating he had in July.

Wesley Clark has quickly become known to New Hampshire voters and he is generally well liked. Forty-five percent say they have a favorable opinion of Clark, 21 percent have an unfavorable opinion of him, 17 percent are neutral and 17 percent don't know enough about him to say. Clark's net favorability rating is a respectable +24 percent, unchanged since October.

Joe Lieberman's approval ratings have declined markedly in the past five months. Forty-eight percent of likely Democratic primary voters have a favorable opinion of Lieberman, 33 percent have an unfavorable opinion, 15 percent are neutral and 4 percent don't know enough about him to say. Lieberman's net favorability rating is +14 percent, down from +36 percent in June.

All of the other declared candidates are relatively unknown to New Hampshire voters. Dennis Kucinich has a +1 percent net favorability rating, Carol Mosely-Braun's stands at +5 percent, and Al Sharpton has a very low -44 percent net favorability rating.

### **Subgroup Analysis**

In New Hampshire, both registered Democrats and undeclared voters (often referred to as "independents") can vote in the Democratic primary. It is important to note that there is no difference in who registered democrats and undeclared voters say they will vote for. Similarly, there is no difference in who men and women support.

Dean gets his strongest support from liberals, older voters, those with more than 4 years of college and those with high incomes.

While Kerry's support is consistent across demographic groups, he gets his strongest support from voters with some college and residents of the New Hampshire Seacoast.

### **WMUR NH Primary Poll Methodology**

These findings are based on the most recent WMUR NH Primary Poll conducted by the University of New Hampshire Survey Center from November 6 to November 13, 2003. A random sample of 446 likely New Hampshire Democratic primary voters was interviewed by telephone. In 95 of 100 cases, the statewide estimates will be accurate to plus or minus 4.6 percent. Results reported for other subgroups have potential for somewhat larger variation than those for the entire population.

The data have been weighted to adjust for numbers of voters and telephone lines within households, respondent sex, and region of the state. In addition to potential sampling error, all surveys have other potential sources of non-sampling error including question order effects, question wording effects, and non-response.

**NH Dem. Primary Vote  
(Likely Dem. Primary Voters)**

"Which of the candidates for the Democratic presidential primary do you plan to vote for in the New Hampshire 2004 primary ... Carol Mosely Braun ... Wesley Clark ...Howard Dean ... John Edwards...
