October 31, 2002

DURHAM, NH -- Republican Craig Benson holds a comfortable lead over Democrat Mark Fernald heading into the final weekend of the campaign for Governor of New Hampshire.

These findings are based on the latest **WMUR / UNH Poll**, conducted by the University of New Hampshire Survey Center. The WMUR / UNH Poll is sponsored by WMUR-TV of Manchester, New Hampshire. Six hundred eighty (680) New Hampshire likely voters were interviewed between October 23 and October 29, 2002 (margin of sampling error, +/-3.8 percent). (For more detailed results, visit the Survey Center web site at [www.unh.edu/survey-center](http://www.unh.edu/survey-center) and click on Press Releases.)

After winning a bruising 3-way battle for the Republican nomination, Craig Benson, Cabletron co-founder, appears headed for a solid win over his Democratic challenger, State Senator Mark Fernald. In the most recent WMUR / UNH Poll, Benson is supported by 49 percent of likely voters, 37 percent favor Fernald, 2 percent favor Libertarian John Babiarez, 2 percent favor some other candidate, and 10 percent are undecided. Benson's lead has narrowed over the past two weeks. He led 49 percent to 33 percent in a WMUR / UNH Poll earlier this month. However, Fernald still trails Benson by more than the polls margin of sampling error.

Benson holds this significant lead, in part, because swing voters support him over Fernald by 53 percent to 27 percent. Benson gets his strongest support from Republicans, residents of the 1<sup>st</sup> Congressional District, and abortion opponents. Fernald's strongest support comes from Democrats, voters who favor legal abortions, and residents of the 2<sup>nd</sup> Congressional District.

## NH Gubernatorial Election

### Likely Voters

	<u>June '02</u>	<u>Oct. 3-8</u>	<u>Oct. 23-29</u>
Benson (R)	48%	49%	49%
Fernald (D)	35	33	37
Babiarz	--	2	2
Other	2	4	2
Don't Know	15	11	10
	(N=518)	(N=612)	(N=651)

### WMUR / UNH Poll Methodology

These findings are based on the most recent WMUR / UNH Poll conducted by the University of New Hampshire Survey Center from October 23 to October 29, 2002. A random sample of 680 likely voters in New Hampshire was interviewed by telephone. In 95 of 100 cases, the statewide estimates will be accurate to plus or minus 3.8 percent. Results reported for other subgroups have potential for somewhat larger variation than those for the entire population.

The data have been weighted to adjust for numbers of adults and telephone lines within households, likelihood of voting in the November election, respondent sex, and region of the state. In addition to potential sampling error, all surveys have other potential sources of non-sampling error including question order effects, question wording effects, and non-response.

Respondents to the WMUR / UNH Poll were asked:

- “Suppose the election for New Hampshire Governor was being held TODAY. Would you vote for Craig Benson, the Republican ... Mark Fernald, the Democrat ... or John Babiarz, the Libertarian?”
