FOR RELEASE
November 6, 2000
EMBARGO UNTIL 6:01 p.m.

BUSH AND SHAHEEN LIKELY WINNERS IN NEW HAMPSHIRE

DURHAM, NH -- Texas Governor George W. Bush has taken a small lead over Vice President Al Gore in the final weekend of the campaign. Incumbent Democrat Jeanne Shaheen has seen her once wide lead over former U.S. Senator, Republican Gordon Humphrey narrow considerably in the race for New Hampshire Governor.

These findings are based on the latest **WMUR / Eagle-Tribune / UNH Poll**, conducted by the University of New Hampshire Survey Center. The WMUR / Eagle-Tribune / UNH Poll is sponsored by WMUR-TV, Channel 9 in Manchester, New Hampshire and the Eagle-Tribune. Eight-hundred one (801) likely voters were interviewed between November 1 and November 5, 2000. The margin of sampling error for the survey is +/-3.5%. The margin of sampling error for the 358 1st Congressional District likely voters is +/-5.2% and the sampling error for the 373 2nd District likely voters is +/-5.1%

PRESIDENTIAL ELECTION

In the race for President, Texas Governor George W. Bush has surpassed Vice President Al Gore and holds a slim lead among New Hampshire likely voters just days before the election. In the latest WMUR / Eagle-Tribune / UNH Poll, 45% of likely voters say they plan to vote for Bush, 39% favor Gore, 5% favor Green Party candidate Ralph Nader, 2% favor Reform Party candidate Pat Buchanan, 3% favor some other candidate, and 6% remain undecided. In an October WMUR / UNH Poll, Gore held a 43% to 39% lead over Bush.

Swing voters, those voters who do not vote consistently for either party, are split between Bush and Gore with 35% favoring Bush, 34% favor Gore, 8% favor Nader, 2% favor Buchanan, 7% favor other candidates, and 14% are undecided.

Green Party candidate Ralph Nader continues to hurt Gore in New Hampshire – 6% of core Democratic voters say they plan to vote for Nader. On the other hand, Reform Party candidate Pat Buchanan is getting 3% of the core Republican vote.

In general, Republican voters in New Hampshire are more interested in the election and more likely to say they will vote than are Democrats. This advantage in enthusiasm should also help Bush.

The gender gap among women that Democrats have enjoyed for the last several election cycles is not evident in New Hampshire in 2000. While Gore holds a slight 3 percentage point lead over Bush among women, Bush holds a commanding 15 percentage point lead over Gore among men.

Bush runs strongest among Republicans, Perot voters, and older voters. Gore's strongest support comes from Democrats and divorced voters.

FINAL PRESIDENTIAL PROJECTION

When undecided voters are allocated to the candidates they are most likely to support, Bush winds up with 48% of the vote, Gore ends up with 42%, Nader with 6%, Buchanan with 2%, and other candidates with 3%. "Both Bush and Gore had significant advantages in New Hampshire -- Gore had the power of incumbency and Bush was helped by the Republican advantage in numbers in New Hampshire. Bush has made better use of his advantage than Gore," said pollster Andrew Smith, Director of the UNH Survey Center.

NEW HAMPSHIRE GOVERNOR

In the race for New Hampshire Governor, incumbent Democrat Jeanne Shaheen has lost much of her lead over former U.S. Senator Gordon Humphrey. In the final WMUR / Eagle-Tribune / UNH Poll, 43% of likely voters favor Shaheen, 37% favor Humphrey, 7% prefer Independent Mary Brown, 2% say they will vote for Libertarian John Babiarez, 2% favor other candidates, and 9% remain undecided. Humphrey has closed the 19 percentage point lead Shaheen enjoyed in early October with an effective advertising campaign which suggested that Shaheen will pass an income tax if she is elected.

“The Humphrey campaign has been effective in convincing voters that Shaheen is planning to pass an income tax and the Governor has not effectively countered this charge. Although the electorate in New Hampshire has changed over the last 10 years, there is still more opposition to an income tax than there is support,” said Smith.

Shaheen once enjoyed modest support among Republicans but they have moved to the Humphrey camp over the last several weeks. However, the all important swing voters are breaking for Shaheen by an almost 2 to 1 margin. Currently, 45% of swing voters say they will vote for Shaheen while 24% say they will vote for Humphrey. Shaheen enjoys a 17 percentage point lead among women voters but Humphrey now holds a 5 percentage point lead among men.

FINAL GUBERNATORIAL PROJECTION

The high percentage of undecided voters is a particular problem for Governor Shaheen. Typically, undecided voters end up voting against the incumbent. When undecided votes are allocated to the candidates they are most likely to support, the New Hampshire Governor’s race stands at 47% for Shaheen, Humphrey gets 42%, Brown gets 8%, Babiarez gets 2%, and other candidates get 2%.

U.S. CONGRESS - 1ST DISTRICT

In the race for Congress in the First District, Incumbent Republican John Sununu has a modest lead over Democrat State Representative Martha Fuller Clark. Sununu is favored by 52% of First District likely voters, Clark by 41%, 1% favor other candidates, and 7% remain undecided. Clark has narrowed Sununu’s once commanding lead in the last several weeks as most undecided voters have moved to Clark. In the October poll, Sununu enjoyed a 53% to 28% lead over Clark, 6% favored other candidates, and 14% were undecided.

When undecided votes are allocated, Sununu ends up with 55%, Clark gets 44% and 1% prefer some other candidate.

There is a definite gender gap in the First District. Sununu holds a staggering 63% to 32% lead among men while Clark has a slight 48% to 42% lead among women.

U.S. CONGRESS - 2ND DISTRICT

In the Second District, Republican Charlie Bass still holds a lead over his Democratic challenger, Barney Brannen. Bass is favored by 54% of likely voters in the Second District, 30% prefer Brannen, 3% favor other candidates, and 12% remain undecided. In early October, Bass lead Brannen 54% to 25%, 7% favored other candidates and 14% were undecided.

When undecided votes are allocated, Bass ends up with 58%, Brannen gets 38% and 4% prefer some other candidate.

NEW HAMPSHIRE SENATE

The New Hampshire Senate, which currently has 12 Democrats and 12 Republicans, is likely to remain split. Currently, 42% of New Hampshire likely voters say they will vote for the Republican candidate from their district for the New Hampshire Senate, 38% will vote for the Democratic candidate, and 20% are undecided. When undecided votes are allocated, the margin narrows somewhat with Republican candidates ending up with 51% of the vote and Democrats getting 49%.

NEW HAMPSHIRE HOUSE OF REPRESENTATIVES

The New Hampshire House of Representatives currently has a Republican majority and this should not change after the November 7 election. Currently, 43% of New Hampshire likely voters say they will vote for the Republican candidate from their district for the New Hampshire House, 35% will vote for the Democratic candidate, and 22% are undecided. When undecided votes are allocated, Republican candidates end up with 53% of the vote and Democrats get 47%

HOME RULE

New Hampshire voters will vote on an important Constitutional amendment on Tuesday which has been referred to as the “home rule” amendment. This amendment, if passed by two-thirds of voters, will give towns the right to pass laws and ordinances in areas not specifically prohibited by state law. This amendment is not likely to reach the 2/3 necessary for it to pass. Currently, 40% of New Hampshire likely voters say they will vote for the home rule amendment, 30% will vote against, and 30% are undecided.

NH Gubernatorial Election - Shaheen vs Humphrey (Likely Voters)

	<u>Sept. 00</u>	<u>Oct. 00</u>	<u>Nov. 00</u>	<u>Undecideds Allocated</u>

Undecided	30
	(N=779)

WMUR / Eagle-Tribune / UNH Poll Methodology

These findings are based on the most recent WMUR / Eagle-Tribune / UNH Poll conducted by the University of New Hampshire Survey Center. A random sample of 801 likely New Hampshire voters was interviewed by telephone from November 1 through November 5, 2000. In 95 of 100 cases, the statewide estimates will be accurate to plus or minus 3.5%. Results reported for other subgroups have potential for somewhat larger variation than those for the entire population. The margin of sampling error for the 358 1st Congressional District likely voters is +/-5.2% and the sampling error for the 373 2nd District likely voters is +/-5.1%.

The data have been weighted to adjust for numbers of voters and telephone lines within households, and for likely voter turnout. In addition to potential sampling error, all surveys have other potential sources of non-sampling error including question order effects, question wording effects, and non-response.

Respondents to the WMUR / Eagle-Tribune / UNH Poll were asked:

- "Suppose the 2000 presidential election were being held TODAY. If you had to choose between George W. Bush, the Republican; Al Gore, the Democrat; Pat Buchanan of the Reform Party; Ralph Nader, of the Green Party; Harry Browne, the Libertarian; and Howard Phillips of the Constitution Party, who would you vote for?" (IF OTHER, UNDECIDED, NEITHER, DK): "As of today, do you LEAN more toward Bush, the Republican; Gore, the Democrat, Buchanan of the Reform Party; Nader of the Green Party; Browne, the Libertarian; or Phillips of the Constitution Party?"
- (1ST DISTRICT) "I'd like you to think about the election for your representative to the U.S. Congress. As of today, do you plan to vote for John Sununu, the Republican candidate ... Martha Fuller Clark, the Democratic candidate ... or do you plan to skip the election for U.S. Congress at this time?" ROTATE CANDIDATES (IF OTHER, UNDECIDED, NEITHER, DK): "As of today, do you LEAN more toward Sununu, the Republican; or Clark the Democrat?"
- (2ND DISTRICT) "I'd like you to think about the election for your representative to the U.S. Congress. As of today, do you plan to vote for Charlie Bass, the Republican candidate ... Barney Brannen, the Democratic candidate ... or do you plan to skip the election for U.S. Congress at this time?" ROTATE CANDIDATES (IF OTHER, UNDECIDED, NEITHER, DK): "As of today, do you LEAN more toward Bass, the Republican; or Brannen the Democrat?"
- "Suppose the 2000 election for New Hampshire Governor was being held TODAY. Would you vote for Gordon Humphrey, the Republican, or Jeanne Shaheen, the Democrat, John Babiartz, the Libertarian, or Mary Brown, the Independent?" ROTATE CANDIDATES (IF OTHER, UNDECIDED, NEITHER, DK): "As of today, do you lean more toward Jeanne Shaheen, the Democrat, or Gordon Humphrey, the Republican, John Babiartz, the Libertarian, or Mary Brown, the Independent?"
- "Now, think about the upcoming election for your representative to the New Hampshire Senate. As of today ... do you plan to vote for the Democratic or Republican candidate for the New Hampshire Senate?" (IF OTHER, UNDECIDED, NEITHER, DK): "Suppose you had to vote right this minute ... do you think you would vote for the Democratic candidate to the New Hampshire Senate ... that you would vote for the Republican candidate, ... or do you think you would decide NOT to vote for your representative to the New Hampshire Senate?"
- "Please think about the upcoming election for your representative to the New Hampshire House of Representatives. As of today ... do you plan to vote for the Democratic or Republican candidate for the New Hampshire House of Representatives?" (IF OTHER, UNDECIDED, NEITHER, DK): "Suppose you had to vote right this minute ... do you think you would vote for the Democratic candidate to the New Hampshire House ... that you would vote for the Republican candidate, ... or do you think you would decide NOT to vote for your representative to the New Hampshire House?"
- "There is a Constitutional amendment on the ballot this year which has been referred to as 'home rule'. I'm going to read you the text of the amendment and I would like you to tell me if you plan to vote for or against it ... "Are you in favor of amending the New Hampshire State Constitution to provide that municipalities shall have home rule authority to exercise such powers and perform such functions pertaining to its government and affairs which are not prohibited by the state constitution, state statute, or common law, and that the state shall retain its right of preemption over municipal powers and functions?" "Do you plan to vote for or against this amendment?" IF DK, UNDECIDED: "Do you lean towards voting for or voting against this amendment?"
