The New Hampshire, April 6, 1921.

The same factors which have made the De Laval Separator famous are back of the De Laval MILKER.

Just as the De Laval Cream Separator established new and higher standards of efficiency and construction, so the De Laval Milker establishes higher standards of efficiency and performance.

It is strong, simple, in operation and easy to maintain. Its easily accessible, legible and clearly printed exams are a joy to read.

The new edition which has made the De Laval Milker so efficient and simple to maintain is the result of many years of study and experience.

The De Laval Milker is the only milking machine that is thoroughly tested and perfected before it leaves the factory.

It is made to last, and when properly used, it will last for many years.

De Laval Separators are in daily use throughout the United States and Canada.

De Laval Milkers are in daily use throughout the United States and Canada.
