DURHAM, NH - Optimism about business conditions in New Hampshire over the next 12 months is at an all-time high. However, deep partisan differences persist in perceptions of the short and long-term economic outlook for the country as well as perception of personal finances.

These findings are based on the latest **Business and Industry Association (BIA) Report on Consumer Confidence\***, conducted by the University of New Hampshire Survey Center. Six hundred and forty-three (643) randomly selected New Hampshire adults were interviewed in English by landline and cellular telephone between October 10 and October 18, 2018. The margin of sampling error for the survey is +/- 3.9 percent.

**N.H. Business Conditions**

Confidence in the New Hampshire economy has set another new an all-time high. When asked how they expect New Hampshire businesses will do in the upcoming year, 71% of Granite Staters think state businesses will enjoy good times financially, 12% think they will experience bad times, and 16% anticipate mixed conditions. Seven in eight Republicans (87%), two-thirds of Independents (67%), and 55% of Democrats anticipate good times. Optimism among Democrats is at its highest point during Governor Sununu's administration.

"We continue to see very strong numbers in areas tied to residents' direct experiences, such as New Hampshire business conditions, their household finances, and confidence in making major purchases," said BIA Senior Vice President of Public Policy David Juvet. "But the continuing partisan divides over the US economic outlook, with Republicans expressing optimism while Democrats feel far less positive, is troubling. Midterm elections winners from both parties need to be aware of the effect their rhetoric is having on consumer confidence."

**Business Conditions in NH - Next 12 Months**

\*We ask that this copyrighted information be referred to as *the BIA Report on Consumer Confidence*, sponsored by the New Hampshire Business and Industry Association, and conducted by the University of New Hampshire Survey Center.

## U.S. Business Conditions

Granite Staters are less optimistic about the U.S. economy, but a majority still anticipate good times nationally. Fifty-four percent think businesses across the country will experience good times in the next 12 months, 29% anticipate businesses will have bad times, and 17% think conditions will be mixed.

### Business Conditions in US - Next 12 Months

Eighty-three percent of Republicans feel U.S. businesses will experience good times over the next year but only 41% of Independents and 27% of Democrats agree. Optimism among Independents (41%) has fallen dramatically since the beginning of Trump's presidency (70%) and optimism among Democrats has declined for three consecutive quarters.

### Anticipate Good Times in US Business Conditions Over Next 12 Months - By Party ID

Looking further into the future, just under half (43%) of New Hampshire residents believe the U.S. economy will enjoy continuous good times over the next 5 years, 28% expect periods of widespread unemployment and depression, and 30% see a mix of good and bad conditions. Long-term expectations about the U.S. economy have been consistently high for the past three years.

**US 5 Year Economic Outlook**

Optimism among Republicans about the country's long-term economic outlook (70%) has declined since its all-time high in February (88%) but remains very high. Forty-three percent of Independents foresee a good long-term economic outlook but only 15% of Democrats agree.

**US 5 Year Economic Outlook - By Party ID**

## Personal Financial Conditions

Turning to personal finances, 46% of New Hampshire residents consider themselves to be better off financially than they were a year ago, matching an all-time high, while 35% say their finances are about the same, and 19% say they are worse off.

### Household Financial Condition - Compared to 1 Year Ago

Sixty-nine percent of Republicans and nearly half (46%) of Independents say they are better off than they were a year ago, but only a quarter (25%) of Democrats think the same. The partisan gap in the assessment of personal finances compared to a year ago remains far larger during the Trump presidency than it was during the Bush and Obama presidencies.

### Household Financial Condition - Compared to 1 Year Ago - By Party ID

Half (50%) of Granite Staters expect their household will have about the same financial condition next year as they do today, 39% think they will be better off, and 11% think they will be worse off. Responses to this question have remained largely stable over Trump's administration.

Republicans (60%) are nearly twice as likely as Independents (35%) and more than three times as likely as Democrats (18%) to say they anticipate being better off financially in 12 months.

Overall, 27% of New Hampshire adults say they are better off than a year ago and anticipate being better off in a year, 23% say they are financially just about the same as last year and anticipate being just about the same a year from now, and just 5% say they are worse off than a year ago and anticipate being worse off a year from now.

**Household Financial Condition - 12 Months From Now**

Seven in ten New Hampshire adults (71%) think it is a good time to buy major items for their home. Just 18% think it is a bad time, and 11% think it depends on a person's finances. This is an indicator that points to continuing consumer spending and economy growth.

Eighty-five percent of Republicans believe now is a good time to buy major items for their home, while 62% of Democrats and 53% of Independents agree.

**Good Time to Buy a Major Household Item**

## Business and Industry Association Report on Consumer Confidence Methodology

These findings are based on the latest Business and Industry Association (BIA) Report on Consumer Confidence, conducted by the University of New Hampshire Survey Center. Six hundred and forty-three (643) randomly selected New Hampshire adults were interviewed in English by landline and cellular telephone between October 10 and October 18, 2018. The margin of sampling error for the survey is +/- 3.9 percent. These MSE's have not been adjusted for design effect. The design effect for the survey is 1.2%.

The random sample used in the BIA Report on Consumer Confidence was purchased from Scientific Telephone Samples (STS), Rancho Santo Margarita, CA. STS screens each selected telephone number to eliminate non-working numbers, disconnected numbers, and business numbers to improve the efficiency of the sample, reducing the amount of time interviewers spend calling non-usable numbers. When a landline number is reached, the interviewer randomly selects a member of the household by asking to speak with the adult currently living in the household who has had the most recent birthday. This selection process ensures that every adult (18 years of age or older) in the household has an equal chance of being included in the survey.

The data have been weighted to adjust for numbers of adults and telephone lines within households. Additionally, data were weighted by respondent sex, age, education, and region of the state to targets from the most recent American Community Survey (ACS) conducted by the U.S. Census Bureau. In addition to potential sampling error, all surveys have other potential sources of non-sampling error including question order effects, question wording effects, and non-response. Due to rounding, percentages may not sum to 100%. The number of respondents in each demographic below may not equal the number reported in cross-tabulation tables as some respondents choose not to answer some questions.

For more information about the methodology used in the BIA Report on Consumer Confidence, contact Dr. Andrew Smith at (603) 862-2226 or by email at [andrew.smith@unh.edu](mailto:andrew.smith@unh.edu).

### Good Time to Buy Major Household Item

Now thinking about the big things people buy for their home – such as furniture, a refrigerator, a stove, television and things like that. Generally speaking, do you think now is a good time or a bad time for people to buy major household items?
