SUPERINTENDENTS OF PREPARATORY SCHOOLS OF STATE CONVENE HERE

Mid-Winter Conference of Three Days' Duration Makes Use of College Plant During Xmas Recess

DISCUSS ELEMENTARY SCHOOL QUESTIONS

Correspondence from the President of the New Hampshire Association of Superintendents, Independent Orphans, and Officers of Highest of New Hampshire schools was read at the conference on December 26.

The conference was under the direction of Dr. Calvin J. Howland, of Keene, Rev. W. Butterfield, and Professor A. G. Rowel, of Concord.

The president of the New Hampshire Association of Superintendents is Dr. Calvin J. Howland, of Keene.

The conference was under the direction of Dr. Calvin J. Howland, of Keene, Rev. W. Butterfield, and Professor A. G. Rowel, of Concord.

One of the most important topics discussed here during the Christmas recess, was the question as to whether or not the secondary schools throughout the state should be opened on a different date than the primary schools on December 26.

The conference was under the direction of Dr. Calvin J. Howland, Rev. W. Butterfield, and Professor A. G. Rowel, of Concord.

What Is a Vacuum Furnace?

N is an ordinary furnace material burns and combine with the oxygen of the air. Melt zinc, cadmium, or lead in an ordinary furnace and a score of "dross" appears, an impurity formed by the oxygen. You see it in the lead pots that plumes under.

In a vacuum furnace, on the contrary, the air is pumped out so thoroughly, so that the heated object cannot combine with oxygen. Therefore in the vacuum furnace, the vacuum furnace offers a new field for the canning industry.

Clearly, the chemical processes that take place in the two types are different, and the difference is important. Copper, for instance, imparts, low in electrical conductivity. Vacuum-furnace copper is pure.

So the vacuum furnace has opened up a whole new world of chemical investigation. The Research Laboratories of the General Electric Company are working hard to find the possibilities under a new series of conditions.

And this is the result of scientific research.

Discover new facts, add to the sum total of human knowledge, and sooner or later, in many unexpected ways practical results will follow, General Electric Company, Schenectady, N. Y.

Customer: "Well, I'm not surprised."

FRIEND ME! You've got a peach of a room now.

"No, you goop. Surveying a lot.'

Then they were ate.

And meters for light; gas for heat; gas for cooking.

"Is your roommate a sound sleep­er?"

"No, you, goop."

"Surveying a lot."

"Then they were ate.

When the master, the tough, the master, had me,"

She left school in a huff,

"She is always virtuous in her actions;" she is always virtuous in her actions.

"She is always virtuous in her actions;" she is always virtuous in her actions.

"There's a switch at the next station."

sentative from each squad was elected
officers was appointed while a gen­
eral committee made up of one repre­
sentative from each squad was elected to
be military, with R. O. T. C. men
February were discussed at a recent
meeting of the committee was to pass a reso­
dution to the effect that admission to
the undertaking.

It seemed to be the general opinion
that the women should do the cooking,
while the men should do the work.

Many of the students were enthusiastic
about the work, and were keen to get
started.

A popular song of the past was sung,
and a series of games and activities
were planned for the next meeting.

The meeting adjourned with the
resolution that the undertaking be
continued.
