DURHAM, NH – Six in ten New Hampshire residents approve of Chris Sununu's performance as Governor and his approval is slightly higher than that of his predecessor Maggie Hassan at the same point in her governorship. However, Granite Staters are divided on whether he should be reelected to the governorship in 2020 and his personal favorability among Democrats has declined. Nearly three-quarters of residents think the state is headed in the right direction.

These findings are based on the latest **Granite State Poll***, conducted by the University of New Hampshire Survey Center. Five hundred two (502) randomly selected New Hampshire adults were interviewed in English by landline and cellular telephone between July 29 and August 8, 2019. The margin of sampling error for the survey is +/- 4.4 percent.

Gubernatorial Approval

More than a year before the 2020 election, New Hampshire Governor Chris Sununu remains popular. Six in ten Granite Staters (60%) approve of Sununu's performance as governor, 23% disapprove, and 17% neither approve nor disapprove or don't know. Approval of Sununu (60%) is virtually unchanged over the past two years.

Gubernatorial Approval - Chris Sununu

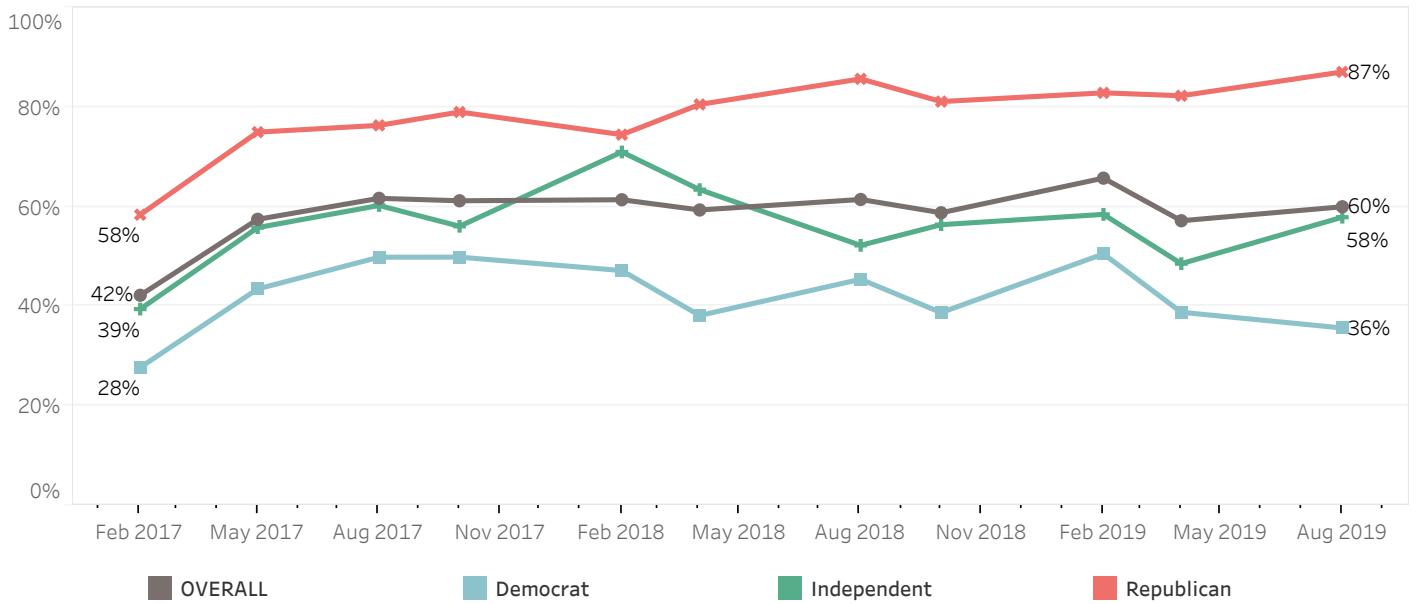

* We ask that this copyrighted information be referred to as *the Granite State Poll*, conducted by the University of New Hampshire Survey Center.

Eighty-seven percent of New Hampshire Republicans approve of the job Sununu is doing while 58% of Independents and 36% of Democrats approve.

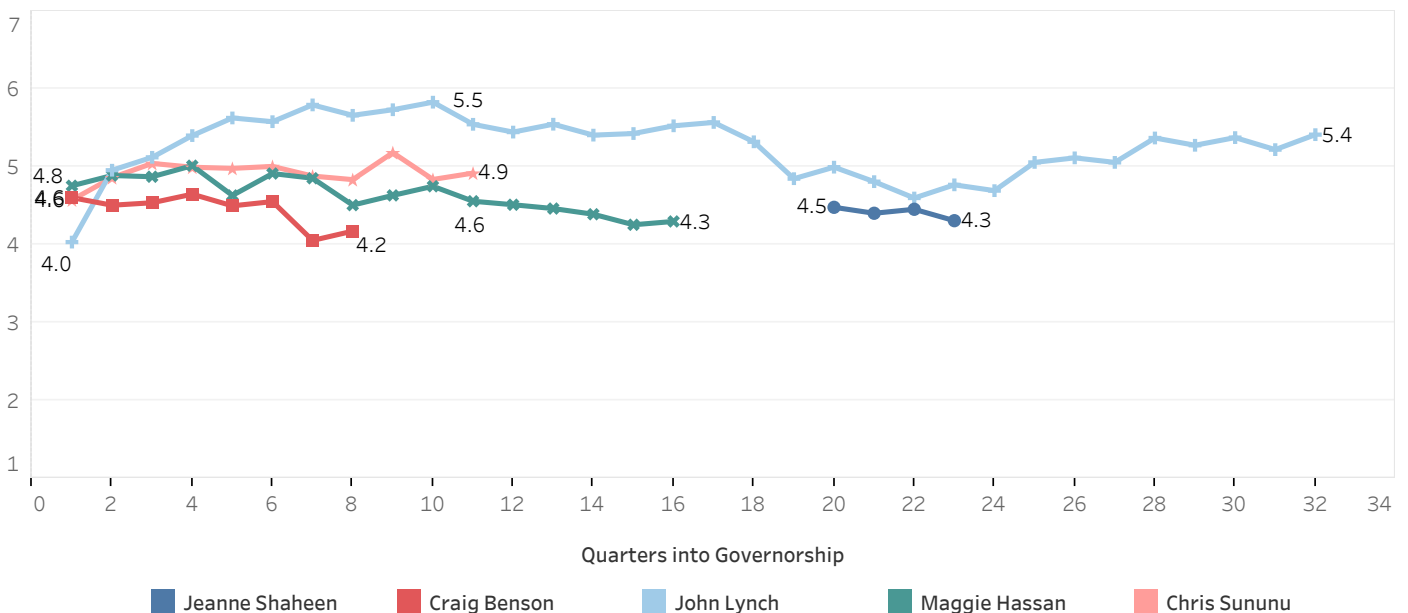

Self-described conservatives, conservative radio listeners, those who voted for Donald Trump in 2016, those who attend religious services once a week or more often, *Union Leader* readers, Central/Lakes Region residents, those aged 50 to 64, and WMUR viewers are most likely to approve of Sununu's performance. Self-described liberals, North Country residents, those who did not vote in 2016 or voted for Hillary Clinton, those aged 18 to 34, those who have completed postgraduate work, and NHPR listeners are least likely to approve of Sununu's performance. Approval of Sununu has increased significantly in the past year among Central/Lakes Region residents and self-described conservatives but fallen significantly among North Country residents.

Job Approval - Governor Chris Sununu - By Party Identification

On a scale where "strongly approve" equals 7 and "strongly disapprove" equals 1, Sununu's average approval score (4.9) has been largely unchanged since he was first inaugurated. Sununu's approval score is higher than than of his predecessor Maggie Hassan (4.6) at the same point in her governorship, but lower than former Governor John Lynch's level of support at the same point in his governorship (5.5).

Gubernatorial Average Approval Score by Quarters Into Governorship
(7=Strongly Approve, 1= Strongly Disapprove)

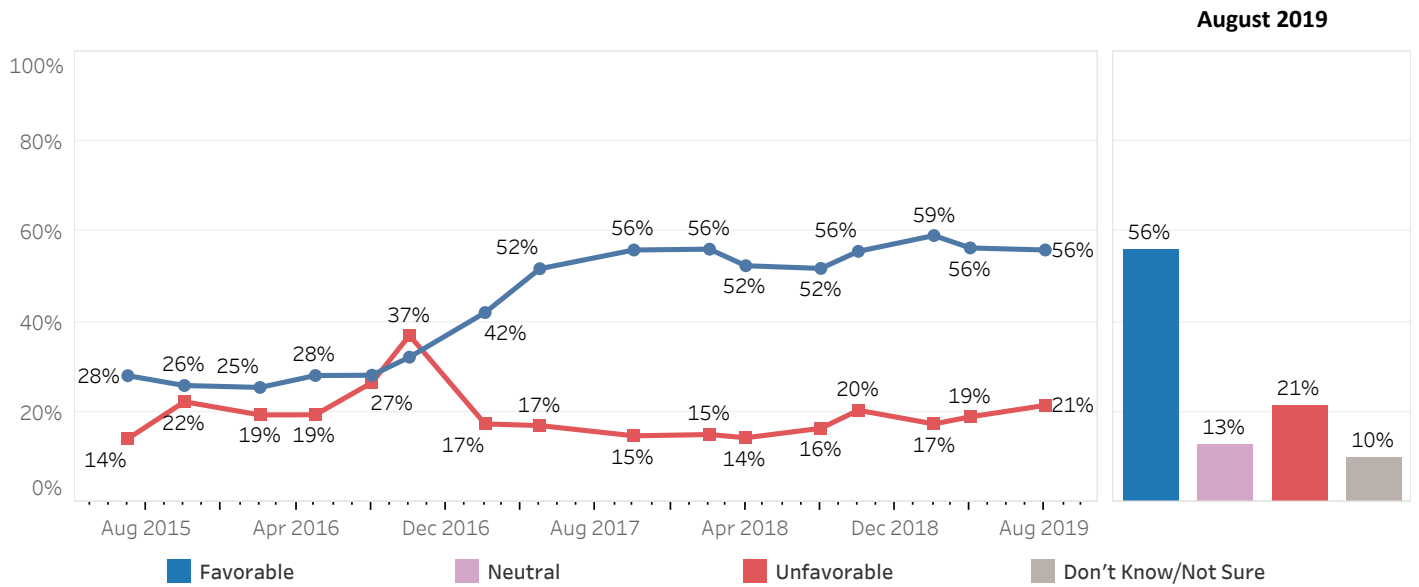

Favorability Ratings - Governor Chris Sununu

Just over half of New Hampshire residents (56%) have a favorable opinion of Sununu, 21% have an unfavorable opinion of him, 13% are neutral, and 10% don't know or are unsure. Sununu's personal favorability is largely unchanged over the past year.

Those who voted for Donald Trump in 2016, self-described conservatives, conservative radio listeners, Central/Lakes Region residents, WMUR viewers, those aged 50 to 64, those who attend religious services once a week or more often, and gun owners are most likely to have a favorable opinion of Sununu. Self-described liberals, North Country residents, those who did not vote in 2016 or voted for Hillary Clinton, NHPR listeners, those aged 18 to 34, and those who attend religious services once or twice a month are least likely to have a favorable opinion of Sununu.

Favorability - Chris Sununu

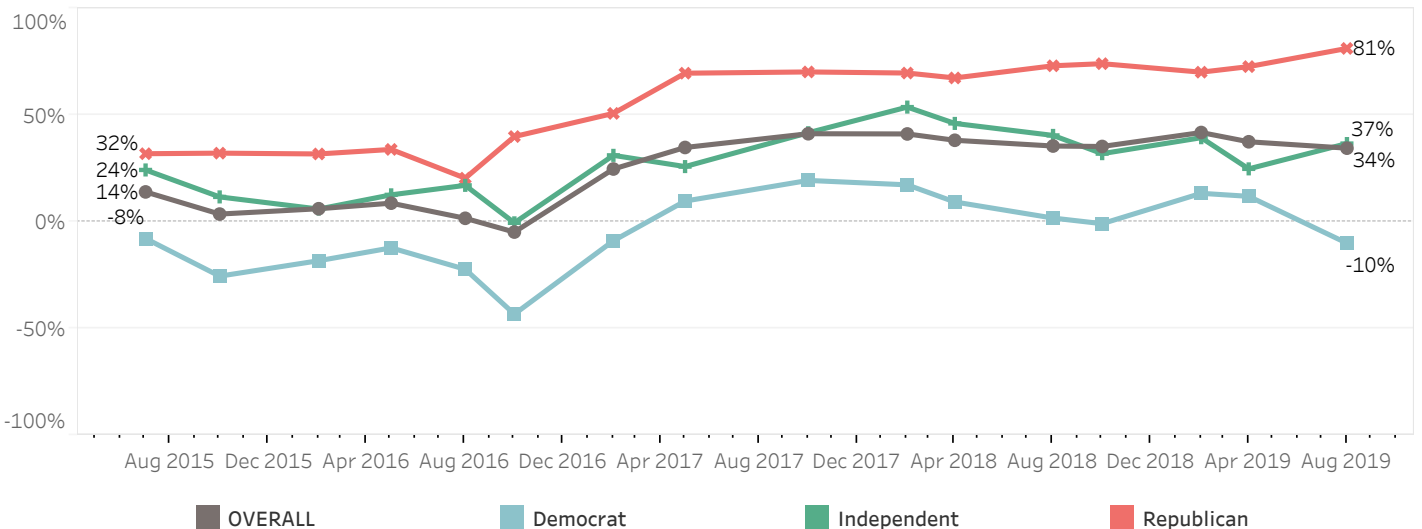

Net Favorability Rating - Governor Chris Sununu

Sununu's net favorability rating, the percentage of people who have a favorable opinion minus the percentage who have an unfavorable opinion, is +34%, largely unchanged since April (+37%). Sununu's net favorability rating among Republicans (+81%) is the highest during his time as governor. His net favorability among Independents (+37%) is largely unchanged over the past year while his net favorability among Democrats (-10%) is below 0% for the first time since February 2017.

Net Favorability Rating - Chris Sununu

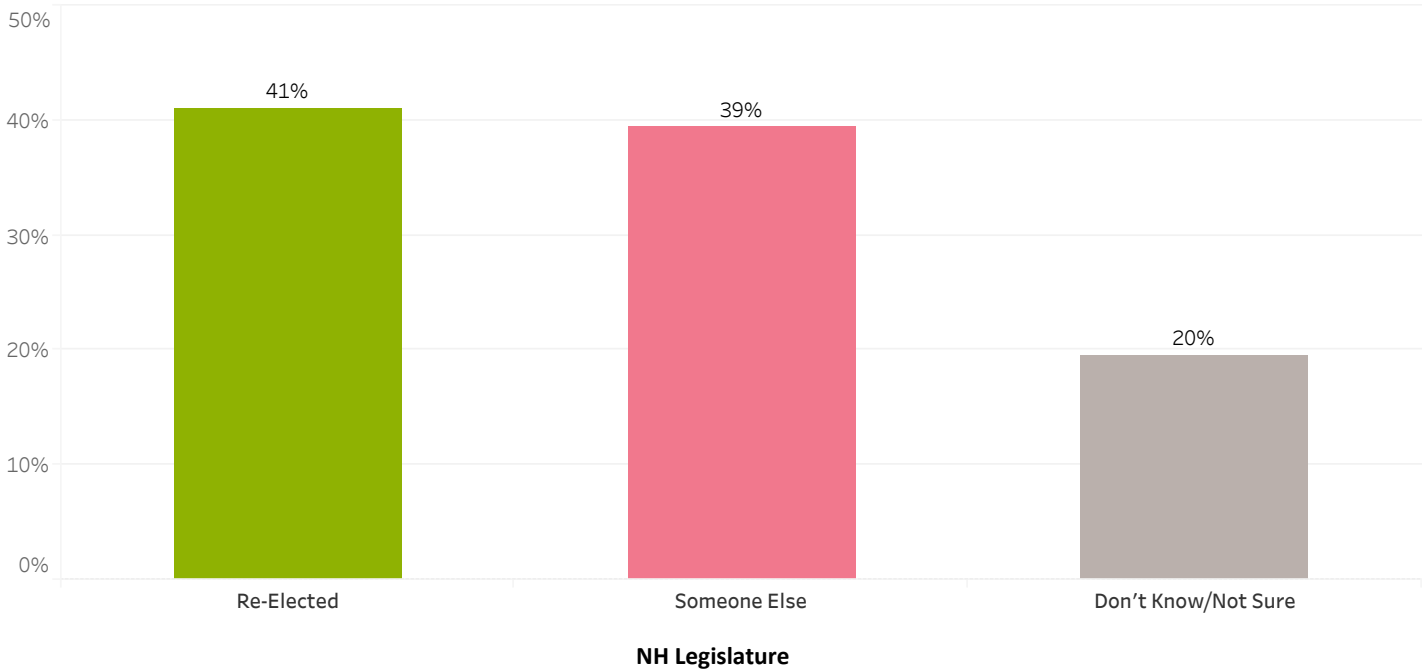

Net Favorability = (% Favorable - % Unfavorable)

While six in ten Granite Staters approve of his performance as governor, respondents are divided on whether Sununu should be reelected: 41% think Sununu should be reelected to the governorship in 2020, 39% think someone else should be elected, and 20% don't know or are unsure.

Conservative radio listeners, those who voted for Donald Trump in 2016, self-described conservatives, those aged 50 to 64, those who attend religious services once a week or more often, Central/Lakes Region residents, and gun owners are most likely to say Sununu should be reelected. Self-described liberals, local newspaper readers, those who voted for Hillary Clinton or did not vote in 2016, North Country residents, and NHPR listeners are most likely to say someone else should be elected.

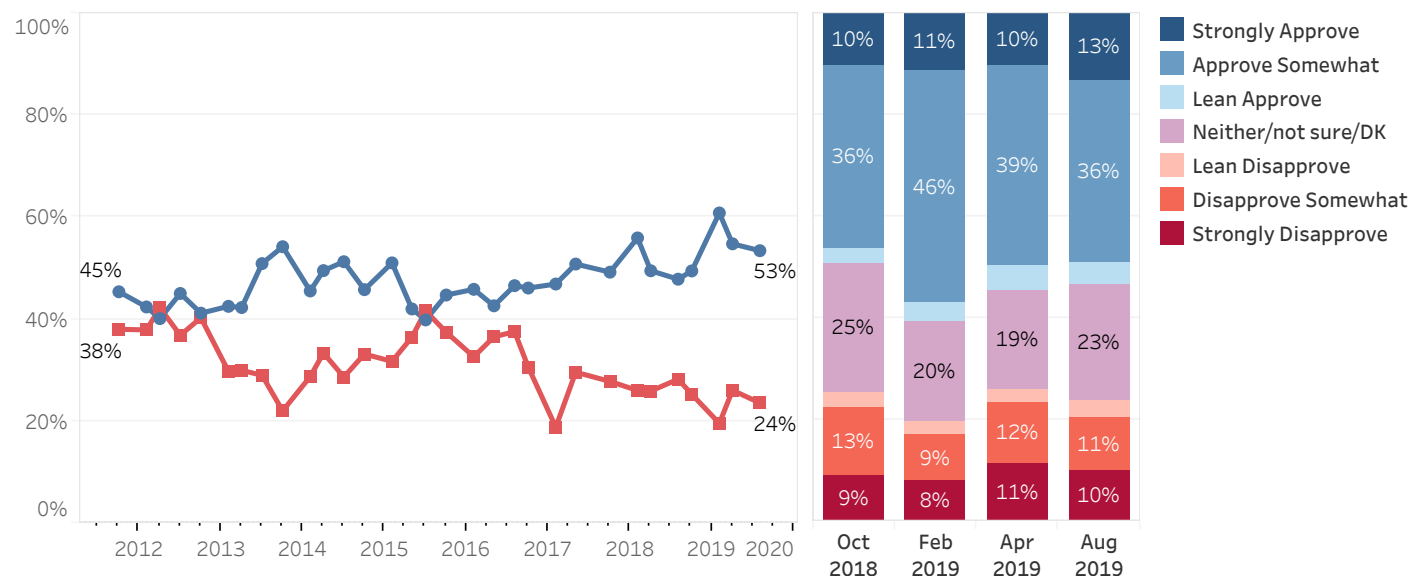

Should Sununu be Reelected or Should Someone Else be Elected?

Just over half (53%) of Granite Staters approve of how the Democratic-controlled State Legislature is doing its job, a quarter (24%) disapprove, and 23% neither approve nor disapprove or are unsure.

Approval of the State Legislature is bipartisan: 59% of Republicans and 54% of Democrats approve of the job the legislature is doing, while 42% of Independents agree.

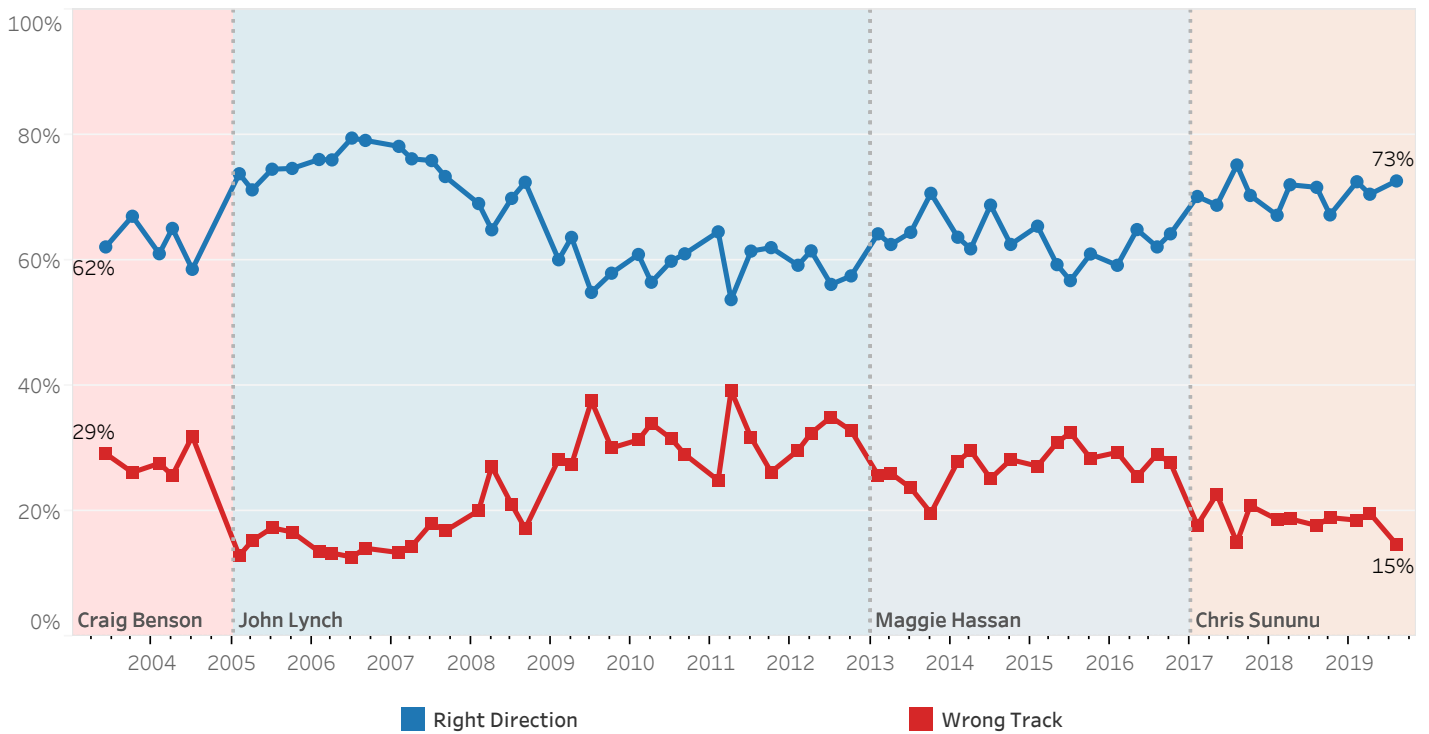

Legislature Approval

NH Heading in Right Direction or On Wrong Track

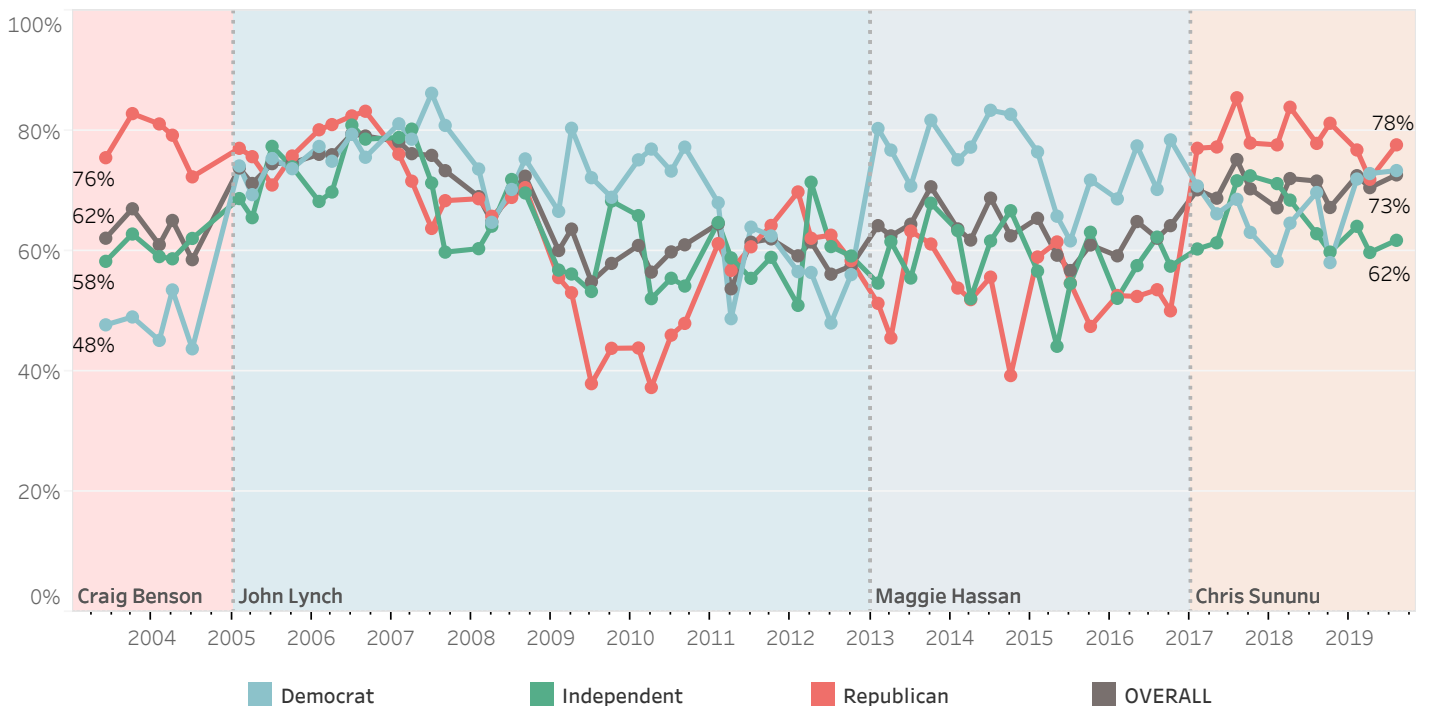

Granite Staters continue to believe the state is headed in the right direction. Seventy-three percent of Granite Staters say things in NH are generally going in the right direction, while 15% say things are seriously off on the wrong track and 13% don't know or are unsure.

NH Right Track – Wrong Track

Optimism about the state's future is bipartisan: 78% of Republicans, 73% of Democrats, and 62% of Independents feel the state is headed in the right direction. Optimism among Democrats is at its highest point in Chris Sununu's governorship and is at similar levels as periods of Maggie Hassan's governorship.

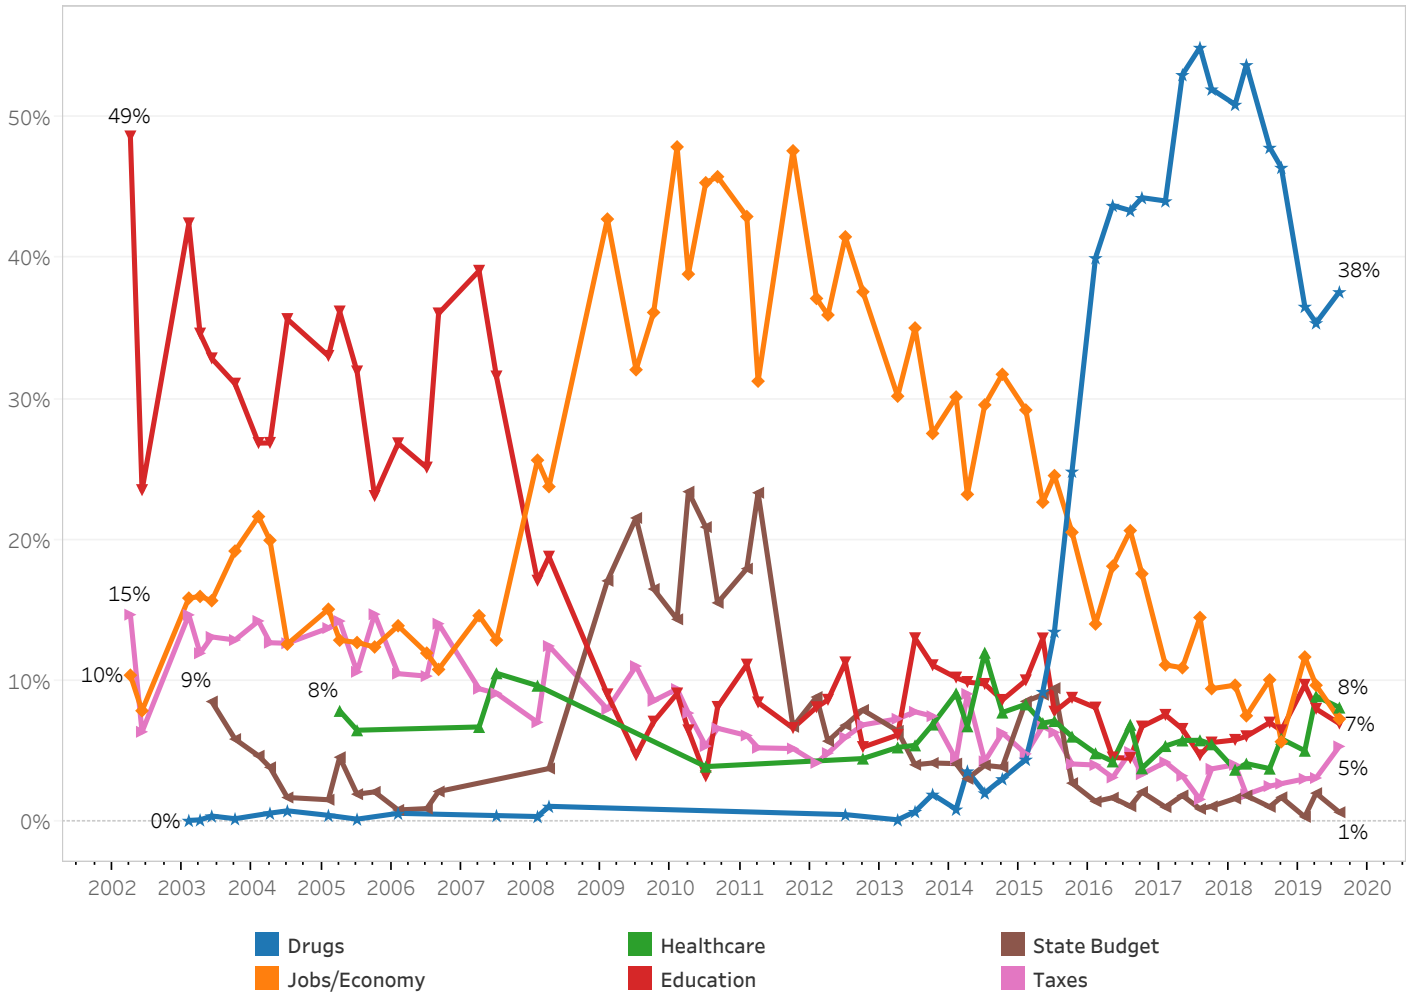

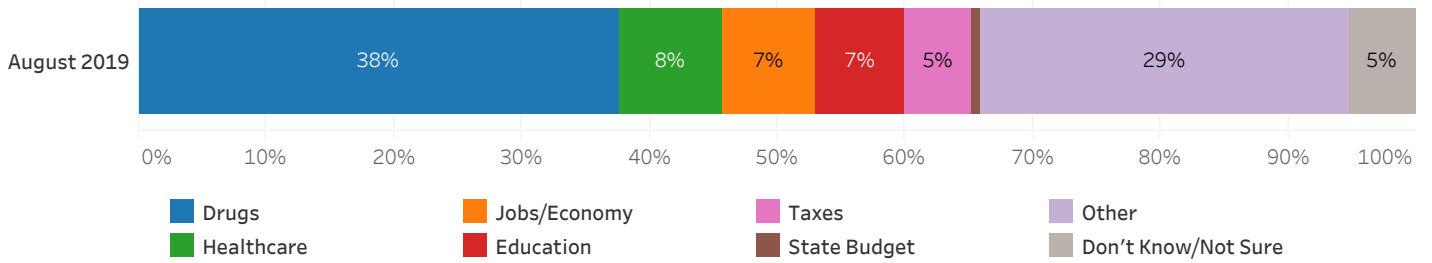

NH Right Track - By Party ID

Most Important Problem Facing New Hampshire

The drug crisis remains the most important problem facing the state, but is well below the level of concern reported in 2017 and 2018. Thirty-eight percent of Granite Staters believe the drug crisis is the most important problem facing New Hampshire, 8% say that health care is the most important problem, 7% cite jobs or the economy, 7% mention education, 5% mention taxes, and 1% say the state budget is the most important problem. Twenty-nine percent of respondents mention another problem while 5% don't know or are unsure.

Local newspaper readers, those aged 18 to 34, and those who did not vote in 2016 are more likely than others to say the drug crisis is the most important problem facing the state. Those who have completed postgraduate work, North Country residents, self-described liberals, those aged 50 and older, those who attend religious services once a week or more, and those who voted for Hillary Clinton in 2016 are less likely to say so.

Granite State Poll Methodology

These findings are based on the latest Granite State Poll, conducted by the University of New Hampshire Survey Center. Five hundred two (502) randomly selected New Hampshire adults were interviewed in English by landline and cellular telephone between July 29 and August 8, 2019. The margin of sampling error for the survey is +/- 4.4 percent. These MSE's have not been adjusted for design effect. The design effect for the survey is 1.2%.

The random sample used in the Granite State Poll was purchased from Scientific Telephone Samples (STS), Rancho Santo Margarita, CA. STS screens each selected telephone number to eliminate non-working numbers, disconnected numbers, and business numbers to improve the efficiency of the sample, reducing the amount of time interviewers spend calling non-usable numbers. When a landline number is reached, the interviewer randomly selects a member of the household by asking to speak with the adult currently living in the household who has had the most recent birthday. This selection process ensures that every adult (18 years of age or older) in the household has an equal chance of being included in the survey.

The data have been weighted to adjust for numbers of adults and telephone lines within households. Additionally, data were weighted by respondent sex, age, education, and region of the state to targets from the most recent American Community Survey (ACS) conducted by the U.S. Census Bureau. In addition to potential sampling error, all surveys have other potential sources of non-sampling error including question order effects, question wording effects, and non-response. Due to rounding, percentages may not sum to 100%. The number of respondents in each demographic below may not equal the number reported in cross-tabulation tables as some respondents choose not to answer some questions.

For more information about the methodology used in the Granite State Poll, contact Dr. Andrew Smith at (603) 862-2226 or by email at andrew.smith@unh.edu.
