DURHAM, NH – With three days of campaigning left before the votes are counted in New Hampshire, Vermont Senator Bernie Sanders maintains a slim lead over former South Bend (IN) Mayor Pete Buttigieg among likely Democratic voters. Former Vice President Joe Biden and Massachusetts Senator Elizabeth Warren continue to trail, with Minnesota Senator Amy Klobuchar, Hawaii Congresswoman Tulsi Gabbard, and entrepreneur Andrew Yang further back. Klobuchar has experienced a slight uptick in support since the last polling period and now sits in fifth place. Sanders continues to hold a sizeable lead among self-described liberal likely Democratic voters while Buttigieg leads among moderates and conservatives.

These findings are based on the latest **CNN 2020 New Hampshire Primary Poll\***, conducted by the University of New Hampshire Survey Center. Seven hundred sixty-five (765) randomly selected New Hampshire adults were interviewed in English by landline and cellular telephone between February 5 and February 8, 2020. The margin of sampling error for the survey is +/- 3.5 percent. Included in the sample were 384 likely 2020 Democratic Primary voters (margin of sampling error +/- 5.0 percent) and 227 likely 2020 Republican Primary voters (margin of sampling error +/- 6.5 percent). Trend points prior to July 2019 reflect results from the Granite State Poll, conducted by the University of New Hampshire Survey Center.

**2020 Democratic Primary**

Fifty-three percent of likely Democratic primary voters say they have definitely decided whom they will support in the upcoming New Hampshire presidential primary, largely unchanged compared to the period from February 4-7. Twenty-eight percent say they are leaning towards someone, while 19% say they are still trying to decide. Among likely Democratic primary voters, 57% of registered Democrats say they have definitely decided while slightly fewer voters registered as undeclared (48%) feel this way.

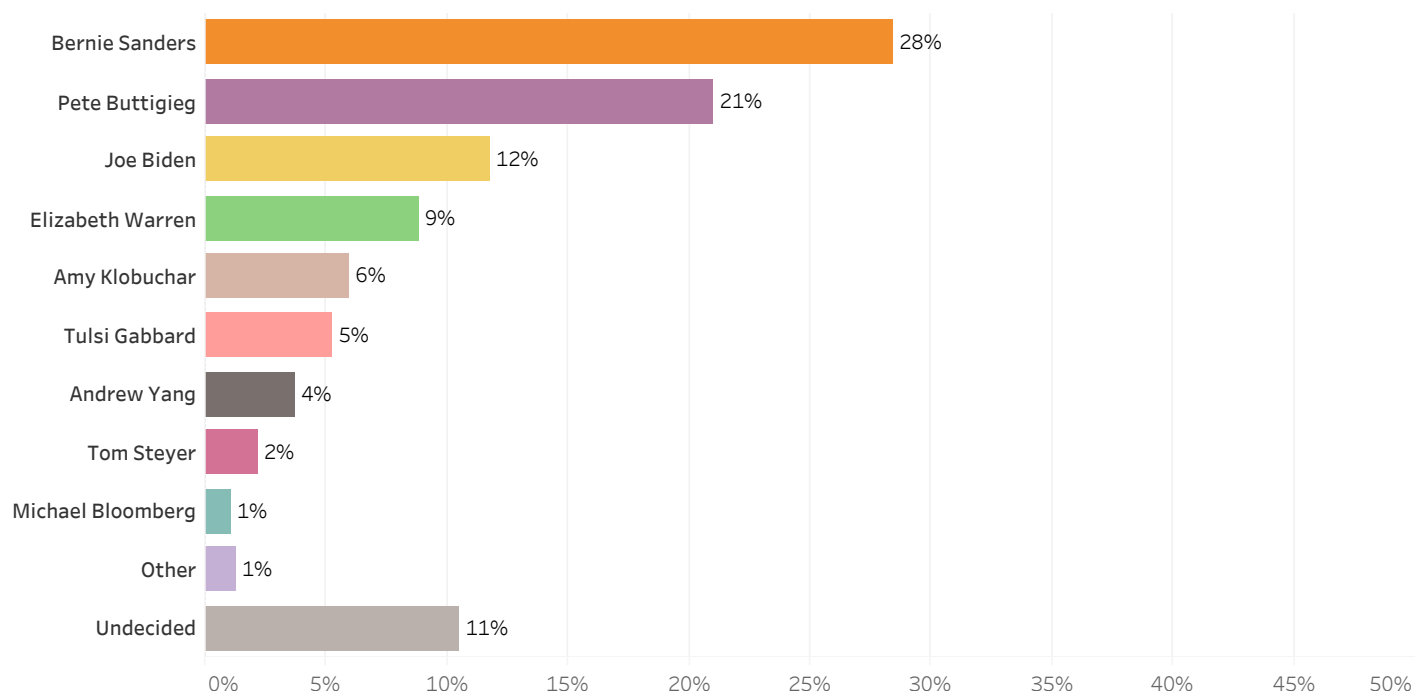

**Definitely Decided on Candidate - Democratic Primary Voters - October 2017 to February 5-8, 2020**

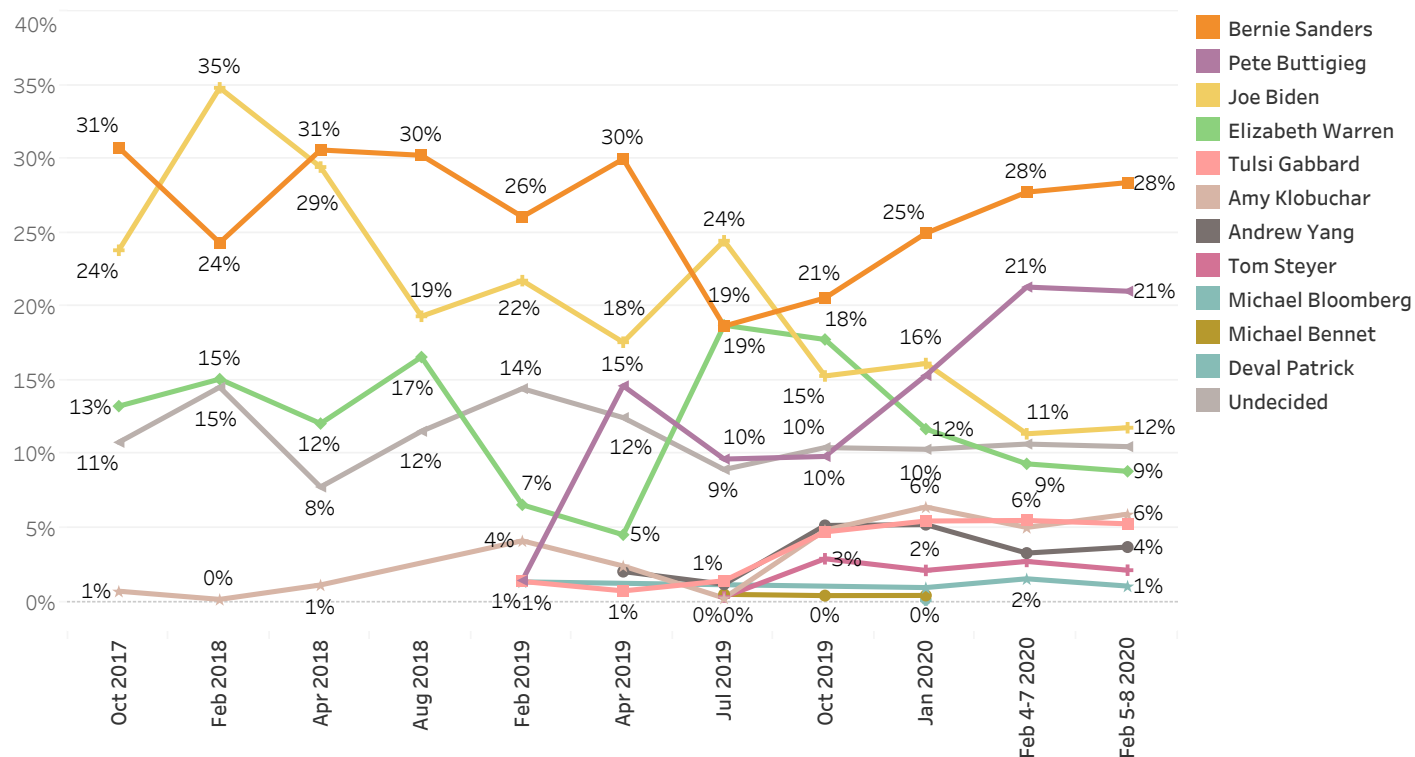

\* We ask that this copyrighted information be referred to as *the CNN 2020 New Hampshire Primary Poll*, conducted by the University of New Hampshire Survey Center.

If the 2020 New Hampshire Democratic primary were held today, 28% of likely primary voters say they would vote for Sanders, 21% would vote for Buttigieg, 12% would vote for Biden, and 9% would vote for Warren. Six percent say they would vote for Klobuchar, 5% would vote for Gabbard, 4% would vote for Yang, 2% would vote for businessman Tom Steyer, 1% would vote for former New York Mayor Michael Bloomberg, and 1% would vote for another candidate. Eleven percent of likely Democratic primary voters say they are undecided.

**Preferred Democratic 2020 Presidential Nomination Candidate - February 5-8, 2020**

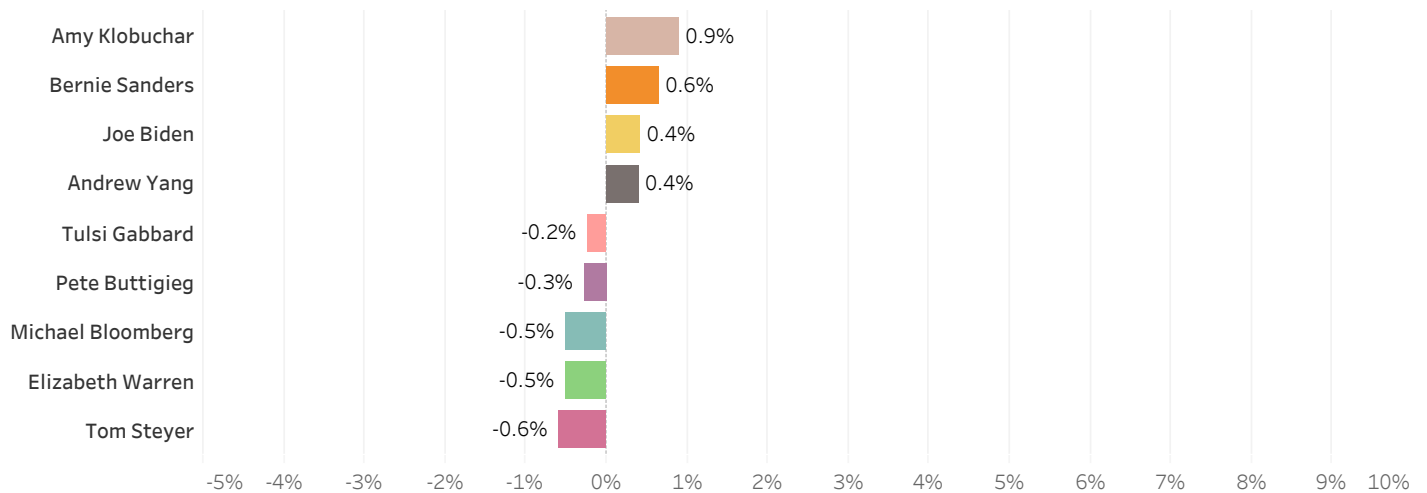

**Preferred Democratic 2020 Presidential Nomination Candidate - October 2017 to February 5-8, 2020**

Because Michael Bloomberg is not running in the New Hampshire primary, his name was not included in the list of candidates who were read aloud. However, responses from those who volunteered Bloomberg as their choice are included. Michael Bennet and Deval Patrick were included in the read list of candidates but did not receive support from any respondents.

Support for Klobuchar has increased very slightly compared to the period from February 4-7, but overall, responses to this question are largely unchanged.

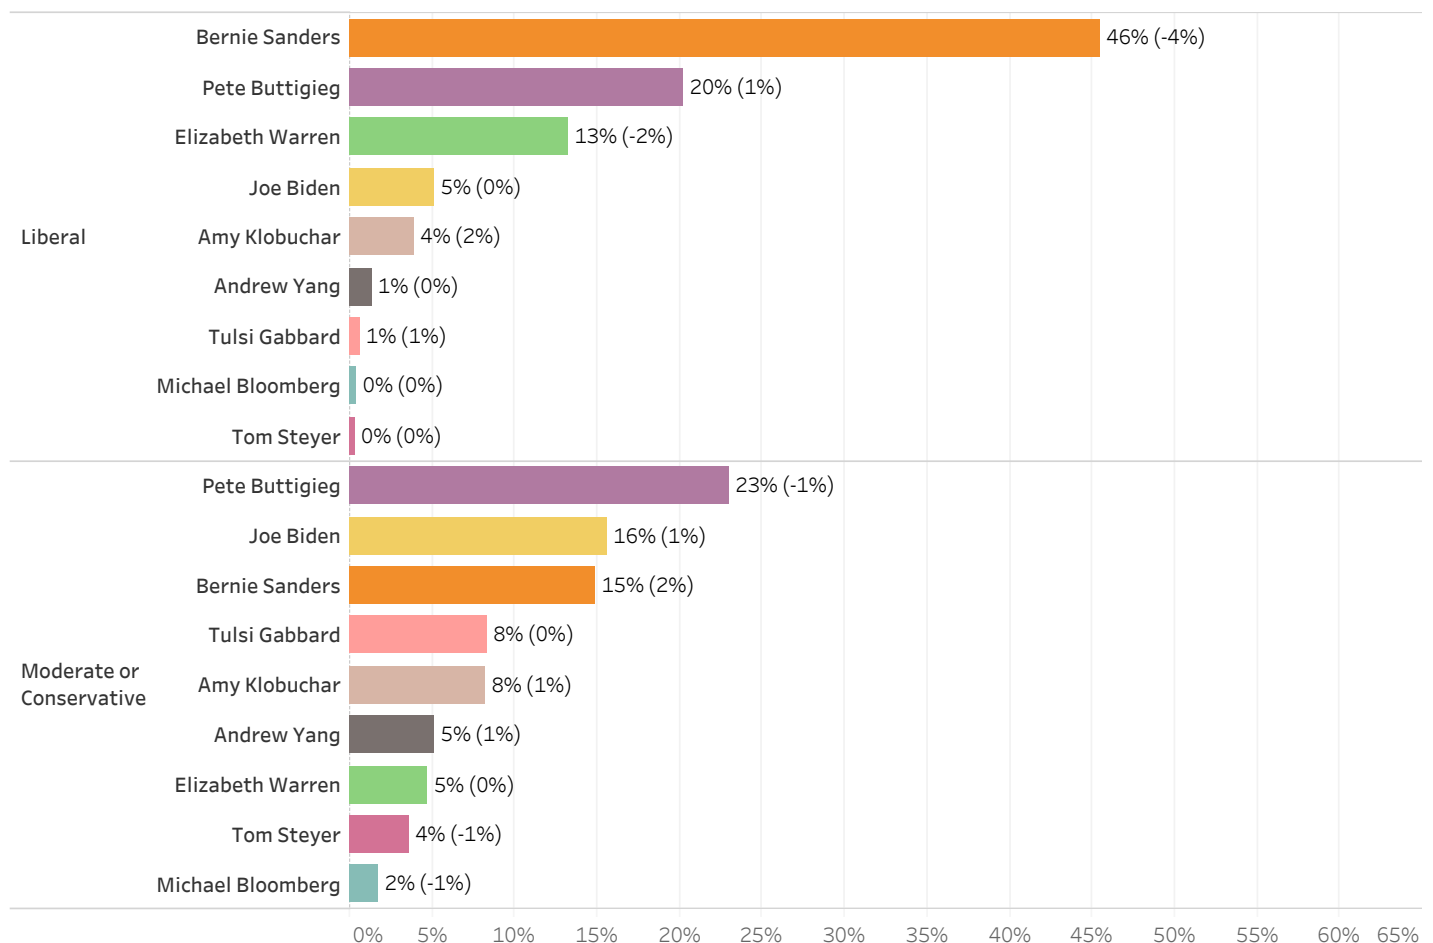

**Change in Preferred Democratic Candidate from February 4-7 to February 5-8, 2020**

Among likely Democratic voters who are self-described liberals, 46% support Sanders, 20% support Buttigieg, 13% support Warren, 5% support Biden, and 4% support Klobuchar.

Among self-described moderates and conservatives, 23% support Buttigieg, 16% support Biden, 15% support Sanders, and 8% each support Gabbard or Klobuchar. Buttigieg remains the favorite candidate of this group.

**Preferred Democratic Candidate by Ideology - February 5-8, 2020**

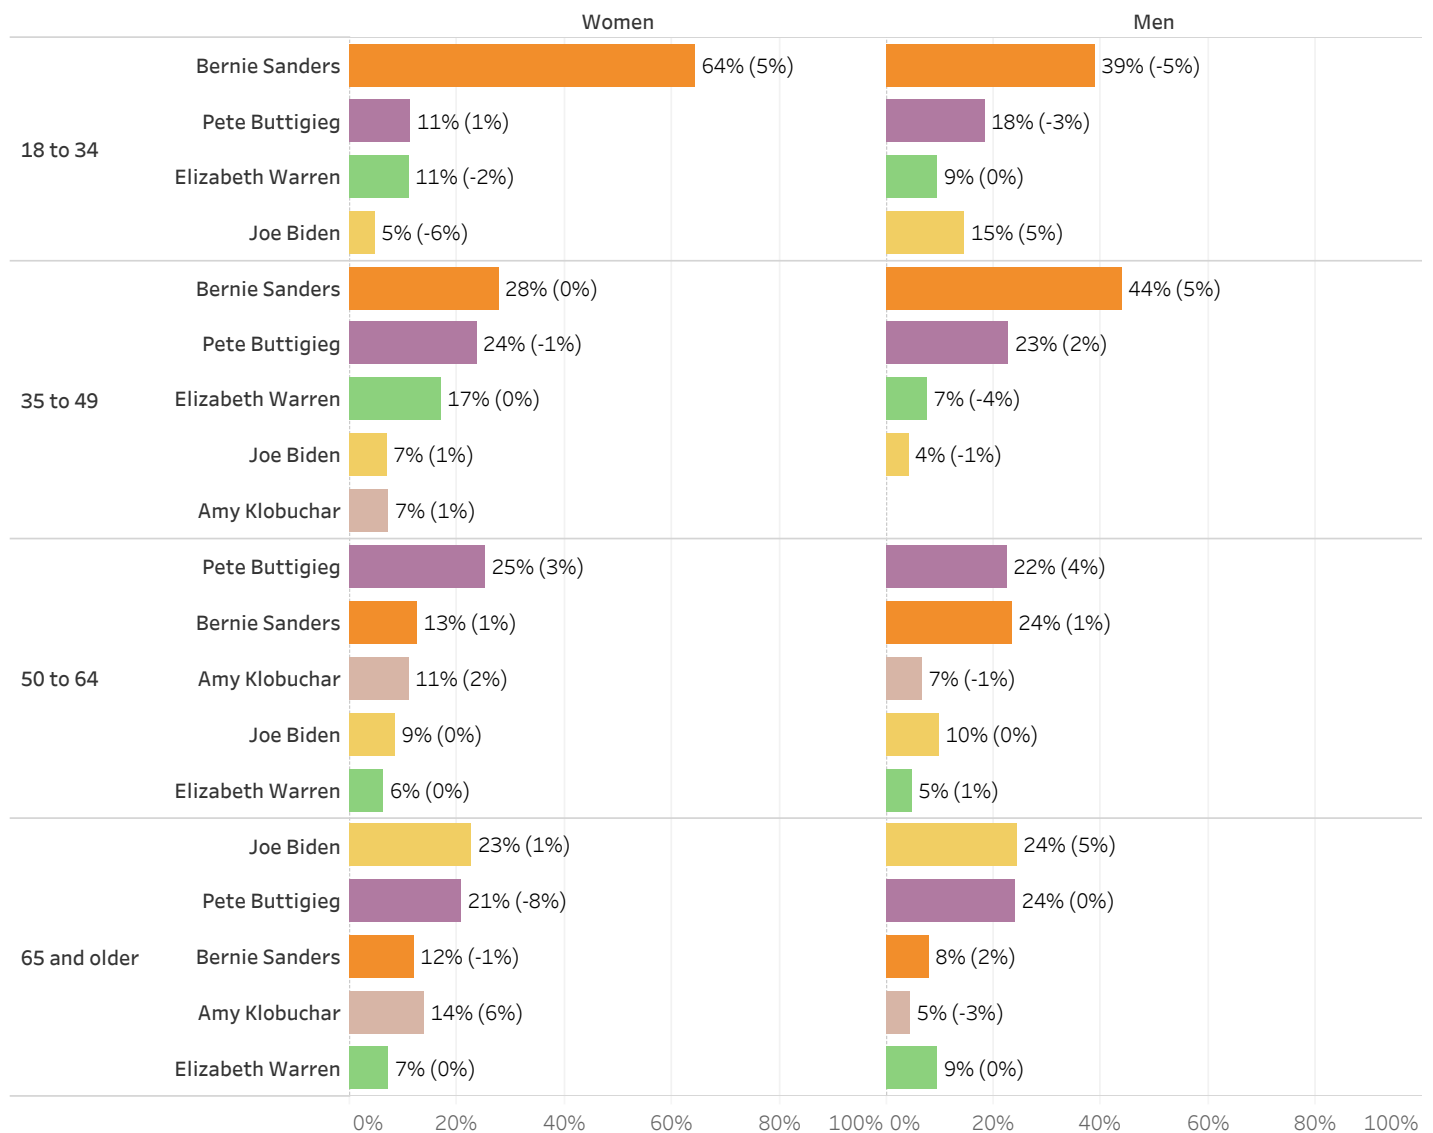

Support for Sanders continues to be highly concentrated among younger voters, particularly female voters under the age of thirty-five, 64% of whom support Sanders. Sanders also enjoys robust support and leads the field among men aged thirty-five to forty-nine. Support for Sanders is slightly higher compared to the period from February 4-7 among women under thirty-five (+5) and men aged thirty-five to forty-nine (+5) while support among men under thirty-five has slightly decreased (-5).

Buttigieg's support continues to be more balanced; he leads the field among women aged fifty to sixty-four and is virtually tied among all voters aged sixty-five and older but remains a very distant second to Sanders among men and particularly women under thirty-five and has lost ground among women sixty-five and older.

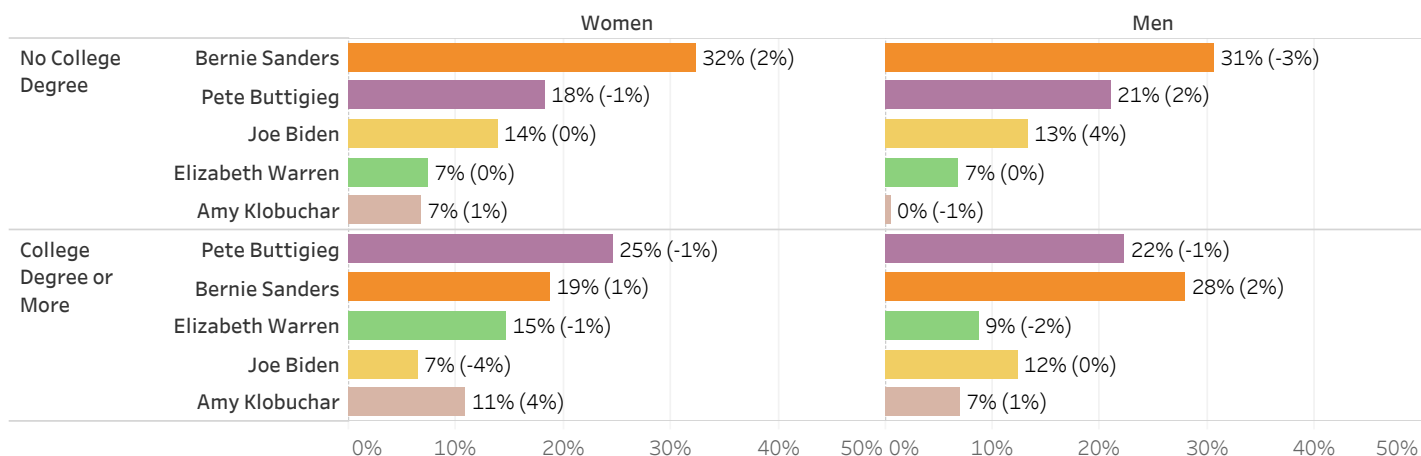

Support for Biden (+5) has slightly increased compared to the period from February 4-7 among men under thirty-five, but Biden's support remains largely concentrated among men and women sixty-five and older. Klobuchar is now third among women between fifty and sixty-four and women sixty-five and older, having increased her share of the vote among the latter group by 6 percentage points since the February 4-7 period.

**Preferred Democratic Candidate by Gender and Age - February 5-8, 2020**

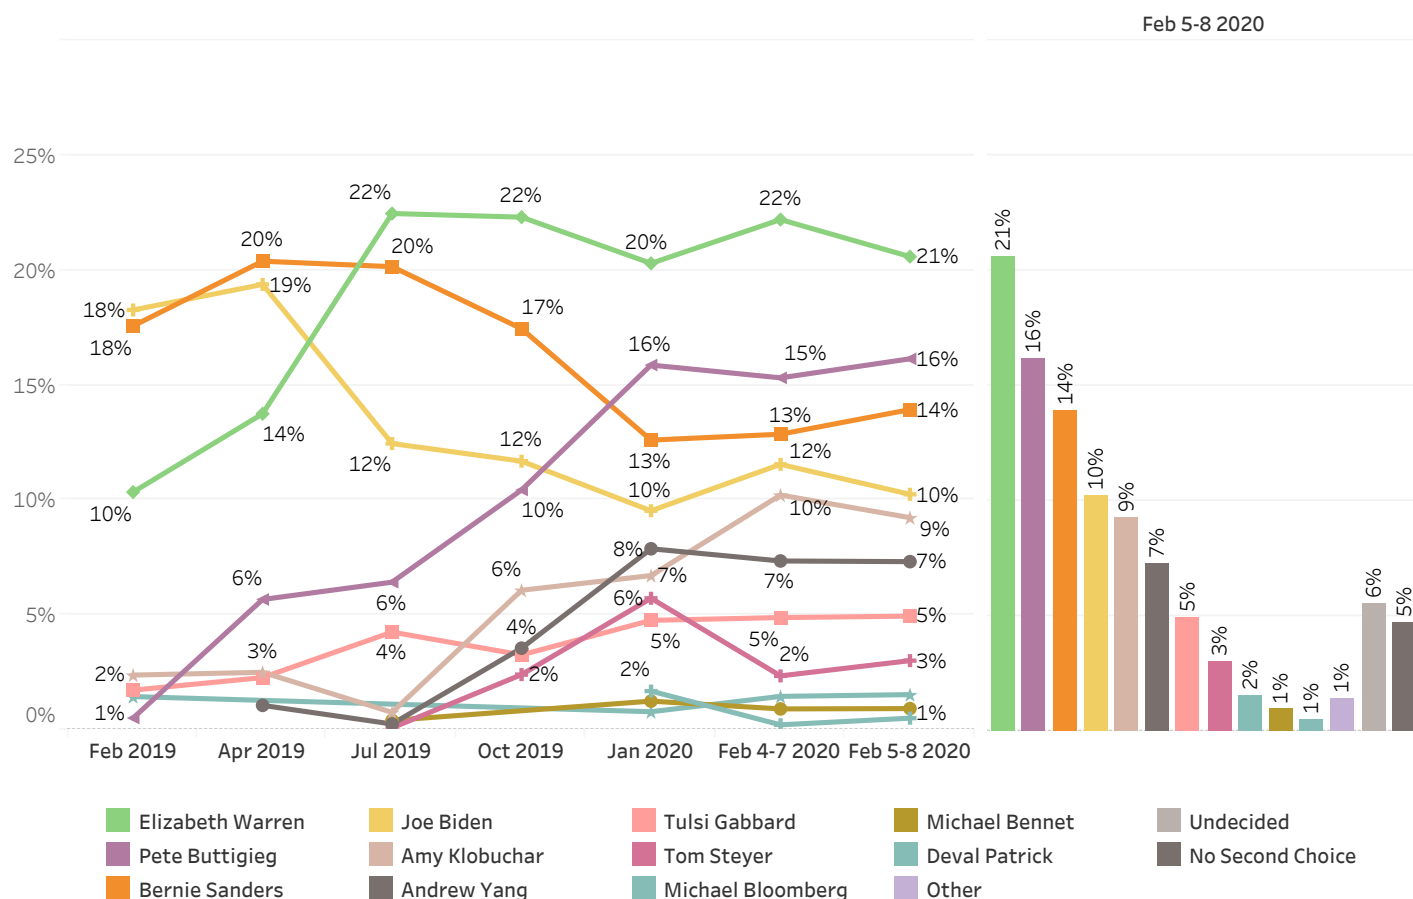

Sanders continues to lead Buttigieg among men and women without a college degree, though the gap has narrowed slightly compared to the period from February 4-7 among men without a college degree. Biden has gained slightly (+4) among men without a college degree, but has declined by the same amount among women with a college degree, while Klobuchar (+4) has seen her share of the vote among women with a college degree increase.

### Preferred Democratic Candidate by Education and Gender - February 5-8, 2020

Warren continues to be the candidate with the most support if the respondent's preferred candidate were not on the ballot. Twenty-one percent say they would support Warren as their second choice, 16% would support Buttigieg, 14% would support Sanders, 10% would support Biden, 9% would support Klobuchar, and 7% would support Yang. Five percent or less say their second choice would be Gabbard (5%), Steyer (3%), Bloomberg (2%), Colorado Senator Michael Bennet (1%), former Massachusetts Governor Deval Patrick (1%), or someone else (1%) as their second choice. Five percent say they don't have a second choice while 6% are undecided.

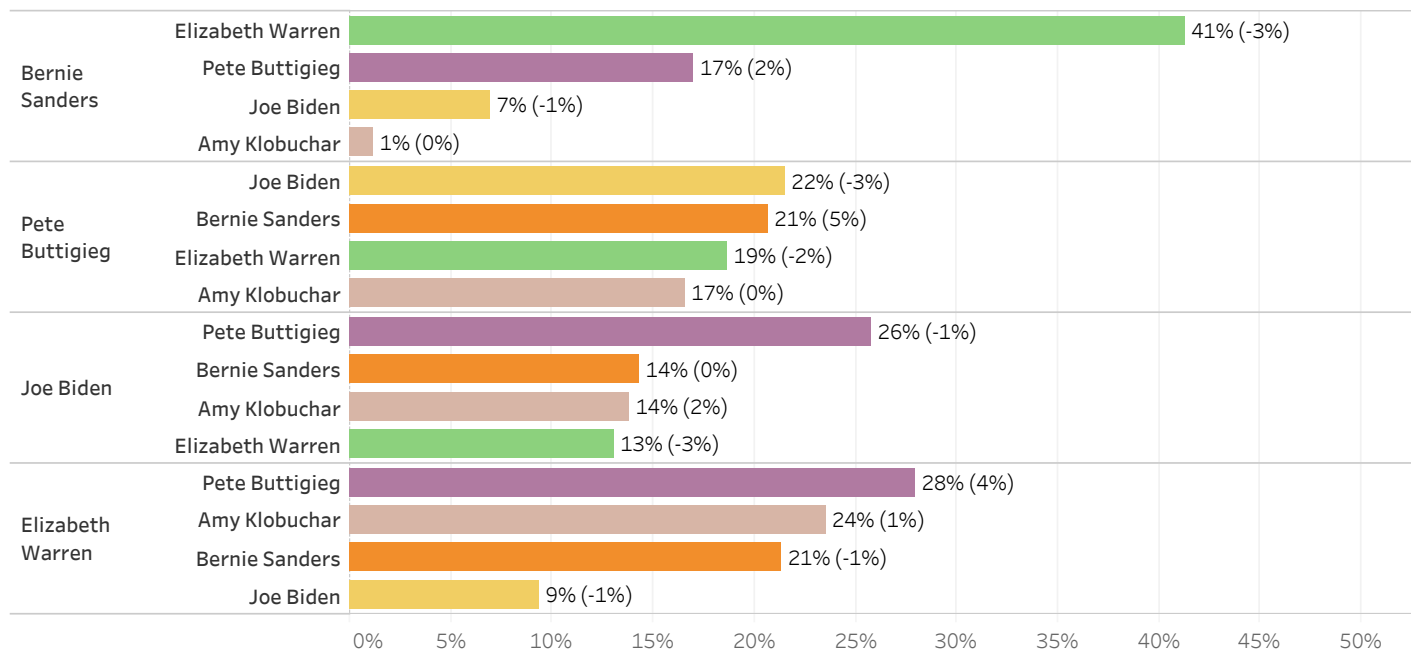

### Second Choice for Democratic 2020 Presidential Nomination - February 2019 to February 5-8, 2020

A plurality of Sanders supporters (41%) continue to say Warren is their second choice, while 17% would support Buttigieg and 7% would support Biden. Supporters of the other top candidates are more divided in their second choice. Among Buttigieg supporters, 22% pick Biden as their second choice, 21% select Sanders, 19% pick Warren, and 17% pick Klobuchar.

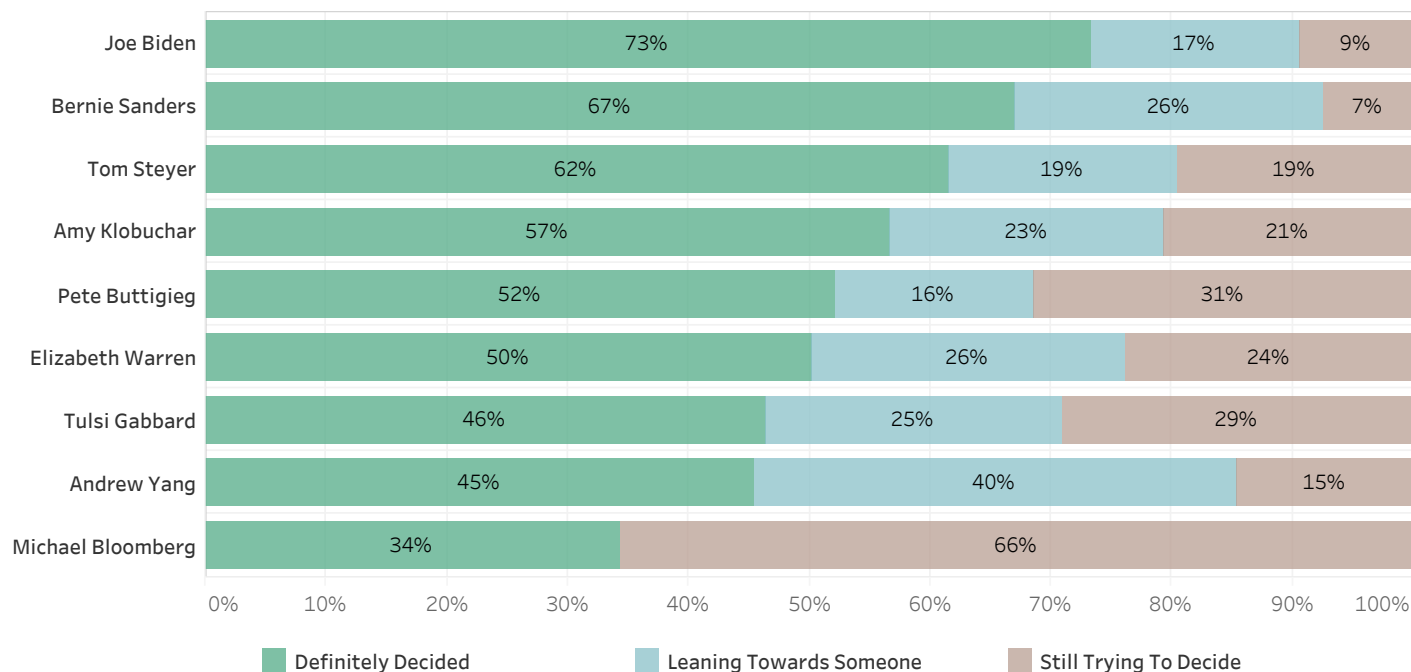

Among Biden supporters, 26% pick Buttigieg as their second choice, 14% each select Sanders or Klobuchar, and 13% pick Warren. In January, nearly half of Warren supporters selected Sanders as their second choice, but now 28% select Buttigieg and 24% select Klobuchar as their second choice and only 21% choose Sanders.

**Second Choice for Democratic 2020 Nomination by First Choice - February 5-8, 2020**

Nearly three-quarters of Biden supporters say they have definitely decided whom they will vote for. Two-thirds of Sanders supporters (67%) feel the same way about their candidate, 62% of Steyer supporters have definitely decided, and 57% of Klobuchar supporters have done so. About half of Buttigieg (52%), Warren (50%), Gabbard (46%), and Yang (45%) supporters say they have definitely decided, while only 34% of Bloomberg supporters feel that way about their vote.

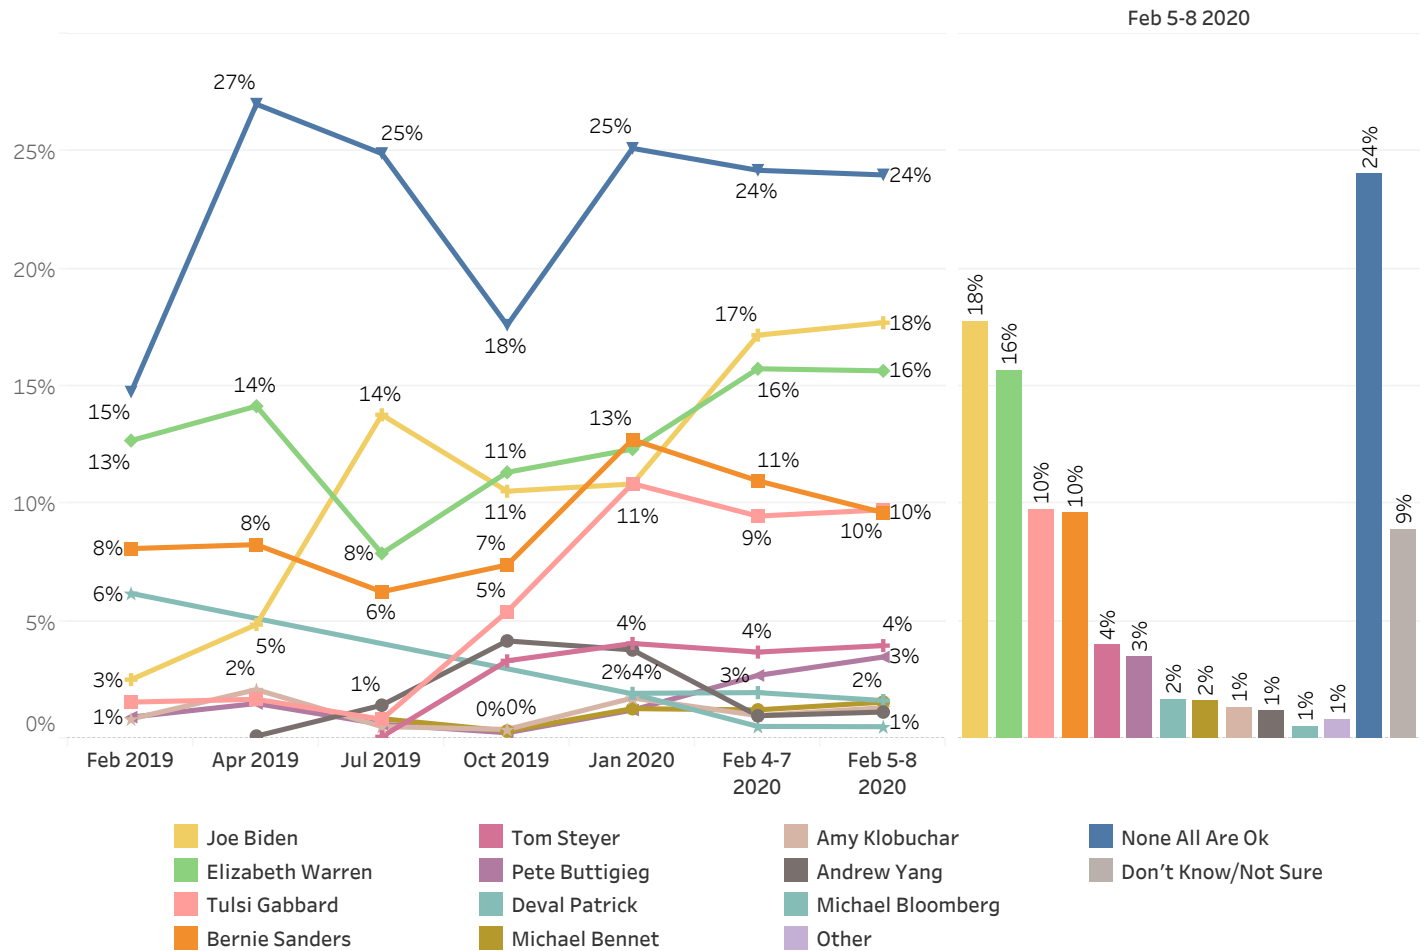

**Definitiveness of Decisions by Preferred Candidate - February 5-8, 2020**

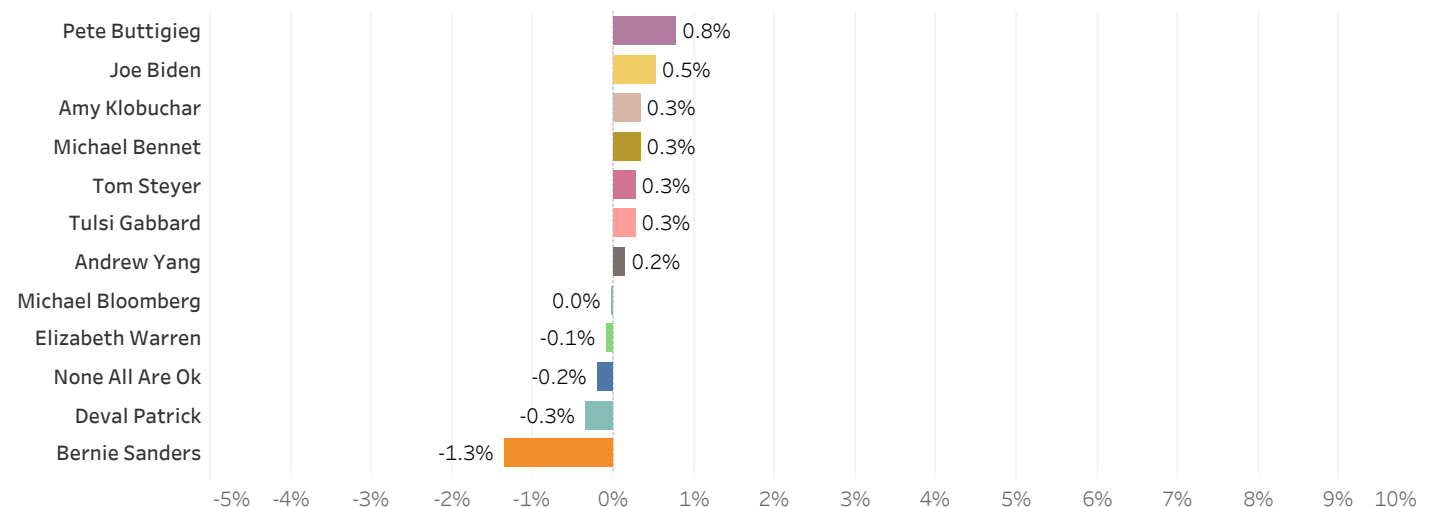

When asked which candidate they would not support under any circumstances, 24% of likely Democratic voters say that all of the candidates are acceptable to them. Eighteen percent say that they would not under any circumstances vote for Biden, 16% would not vote for Warren, and 10% each would not vote for Gabbard or Sanders. Fewer likely voters say they would not vote for Steyer (4%), Buttigieg (3%), Patrick (2%), Bennet (2%), Klobuchar (1%), Yang (1%), Bloomberg (1%), or another candidate (1%). Nine percent don't know or are unsure whom they wouldn't vote for under any circumstances.

Responses to this question are largely unchanged compared to the period from February 4-7.

## Voters' Predicted Winner of NH Primary

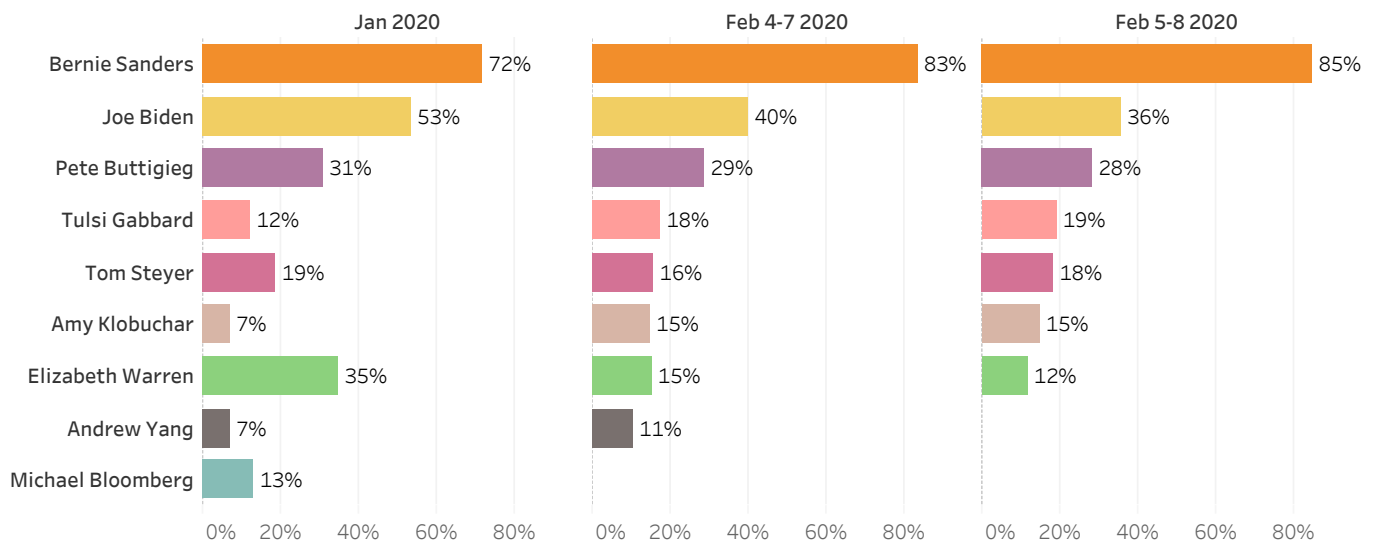

More than half (57%) of likely Democratic New Hampshire primary voters think that Sanders is most likely to win the New Hampshire primary, a significant increase since January (39%) but unchanged compared to the period from February 4-7. Eleven percent think that Buttigieg will win the primary, 9% think Biden is most likely to win, down from 22% in January, and 5% think that Warren will win. One percent or less believe that Steyer (1%), Klobuchar (1%), Gabbard (1%), Yang (<1%), or Bloomberg (<1%) is most likely to win the primary, while 14% are unsure who is most likely to win.

**Candidate Most Likely to Win the New Hampshire Primary - January 2020 to February 5-8, 2020**

Sanders supporters remain confident that he will win the New Hampshire primary; 85% of Sanders supporters believe he is most likely to win, largely unchanged compared to the period from February 4-7 but slightly higher than in January (72%). Thirty-six percent of Biden supporters believe he will win the primary, down from 40% in the February 4-7 period and 53% in January. Fewer Buttigieg (28%), Gabbard (19%), Steyer (18%), Klobuchar (15%), or Warren (12%), supporters believe their preferred candidate will win the primary.

**Believe Preferred Candidate Most Likely to Win the New Hampshire Primary - January 2020 to February 5-8, 2020**

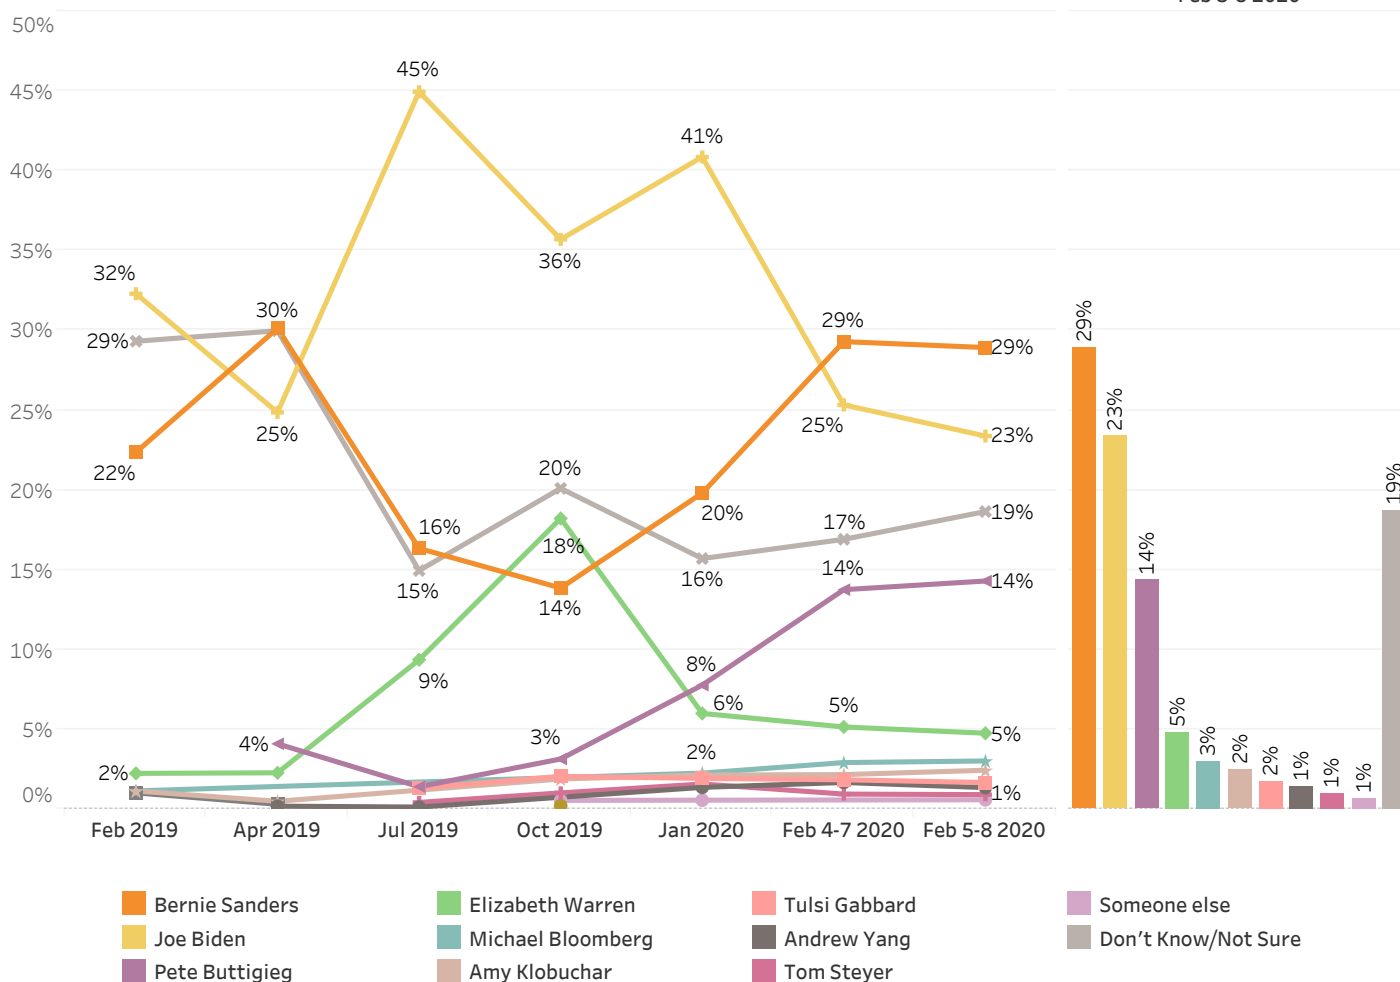

Twenty-nine percent of likely Democratic New Hampshire primary voters think that Sanders has the best chance to win the general election in November, while 23% think Biden has the best chance to win the general election. Biden had held a clear lead on this question since July 2019 but is seven percentage points behind Sanders. Fourteen percent meanwhile believe Buttigieg has the best chance.

Fewer likely voters think that Warren (5%), Bloomberg (3%), Klobuchar (2%), Gabbard (2%), Yang (1%), Steyer (1%), or someone else (1%) is most likely to win the general election, while 19% don't know or are unsure.

**Candidate With Best Chance to Win General Election - February 2019 to February 5-8, 2020**

Feb 5-8 2020

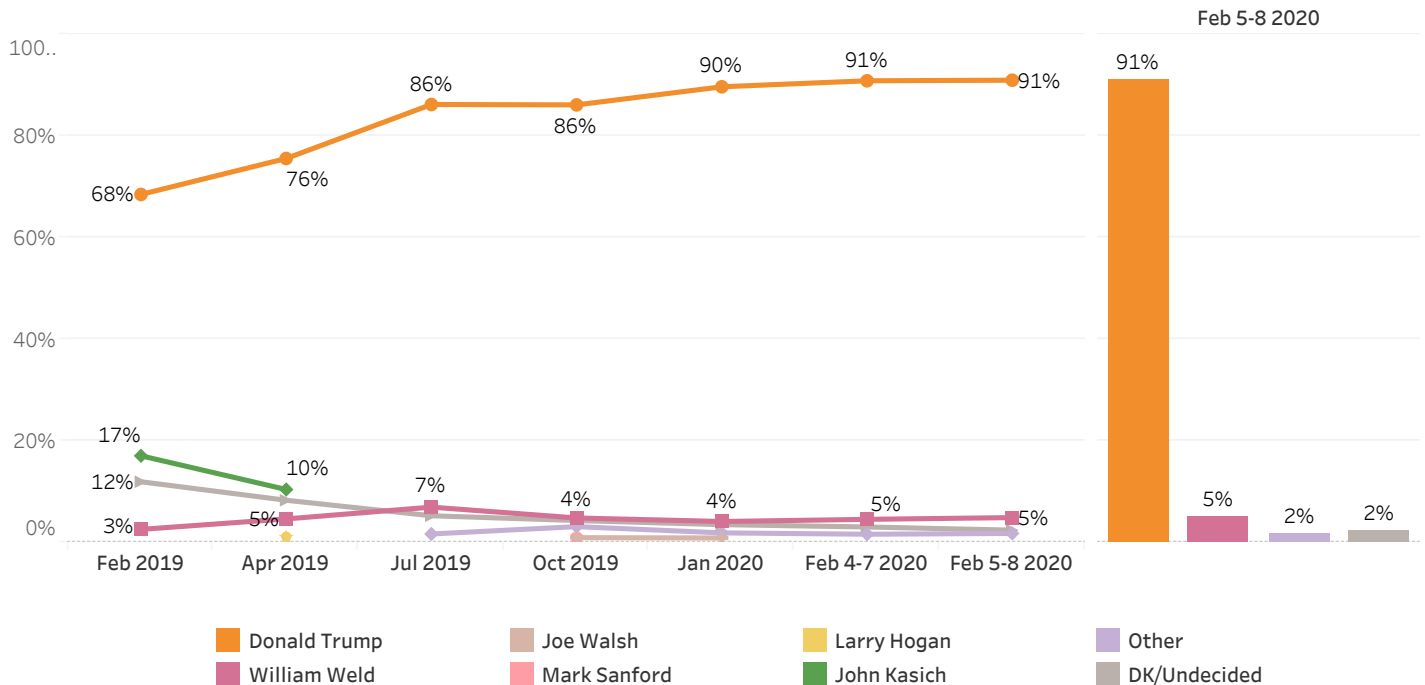

The vast majority of Biden (92%) supporters believe their candidate has the best chance to win the general election, while 71% of Sanders supporters feel the same way. Less than half of Warren (46%), Buttigieg (43%), and Klobuchar (36%) supporters believe their candidate has the best chance of winning the general election.

## Republican 2020 Presidential Nomination

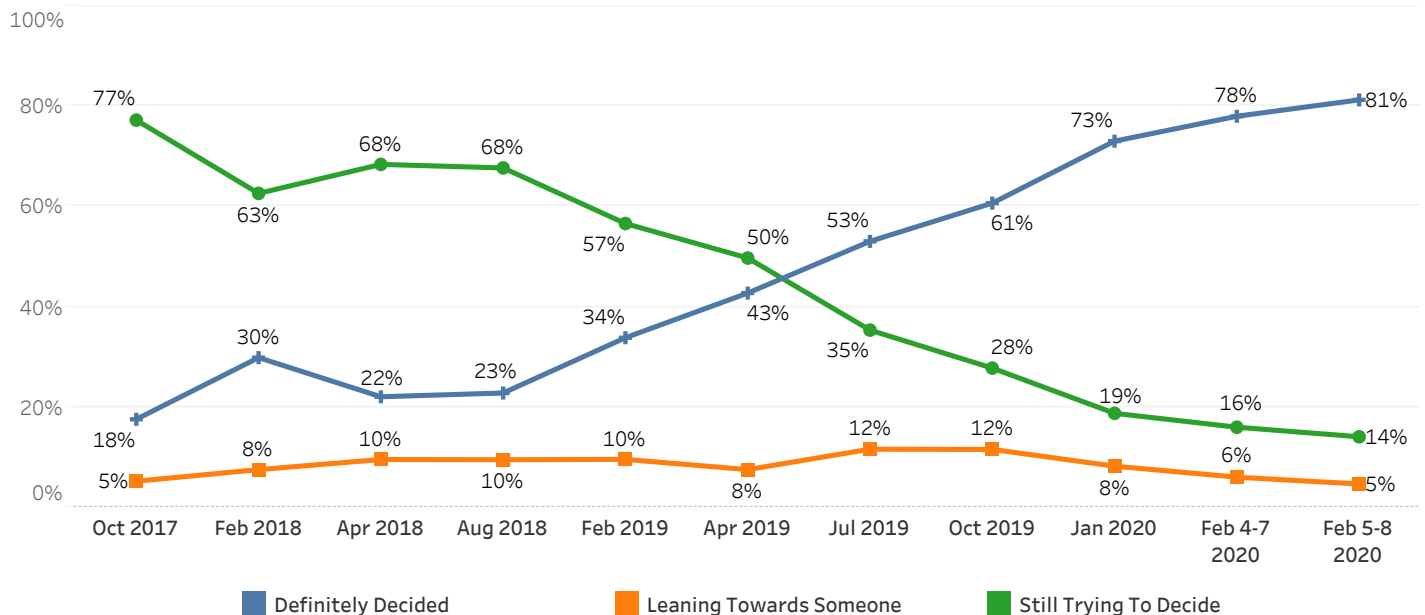

Support for primary challengers to President Trump in the New Hampshire Republican primary remains very low. The overwhelming majority of Republican primary voters (91%) say they would vote for Donald Trump if the primary were held today, 5% would support former Massachusetts Governor William Weld, 2% would support another candidate, and 2% don't know or are undecided. Results are nearly identical to those during the February 4-7 period and also closely mirror results in January and in July and October 2019.

### Preferred Republican 2020 Presidential Nomination Candidate - February 2019 to February 5-8, 2020

Four in five likely Republican New Hampshire primary voters (81%) have definitely decided whom they will support in the upcoming presidential primary. Five percent are leaning toward someone while 14% are still trying to decide. The proportion of respondents who say they have definitely decided continues to increase as the primary nears.

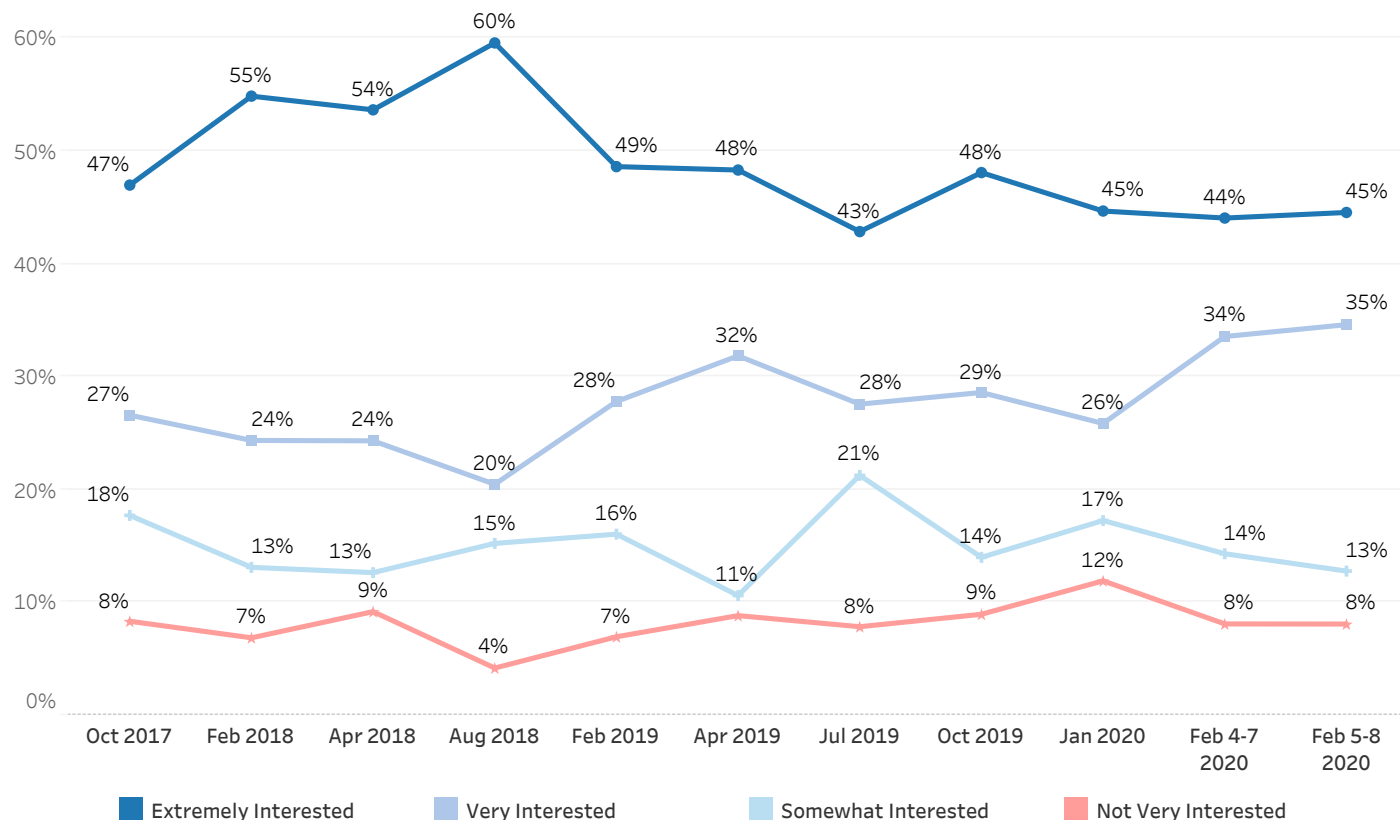

### Definitely Decided on Candidate - Republican Primary Voters - October 2017 to February 5-8, 2020

Joe Walsh, who suspended his campaign on February 7, was included in the list of Republican candidates for completed surveys from February 5 to February 7, but did not receive support from any respondents.

With the primary only two days away, the percentage of Granite Staters who say they are extremely interested in it (45%) is largely unchanged since January (45%). Thirty-five percent, the highest proportion saying so this primary cycle, say they are very interested, 13% are somewhat interested, and only 8% say they are not very interested.

**Interest in 2020 NH Presidential Primary - October 2017 to February 5-8, 2020**

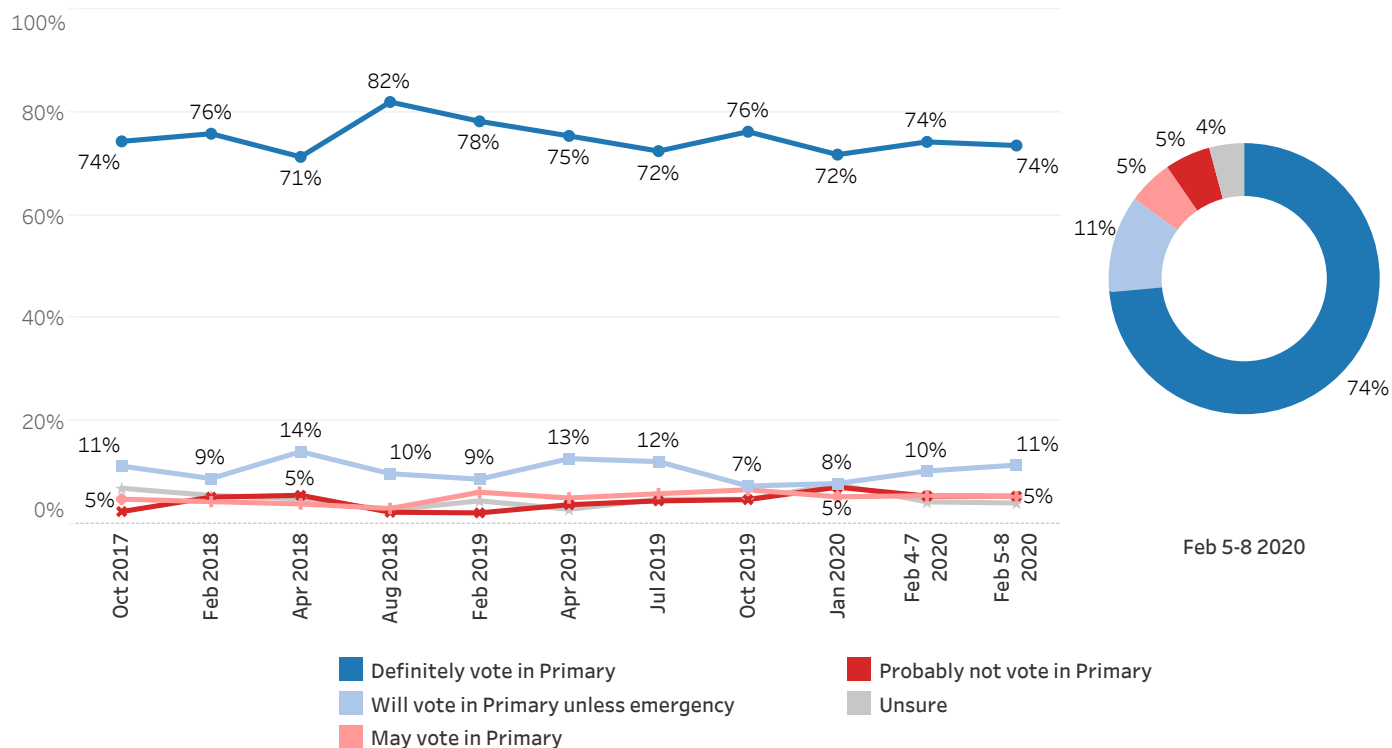

Likely Democratic primary voters (53%) are only slightly more likely to describe themselves as extremely interested than likely Republican primary voters (50%), while 32% of those who are likely to vote but are undecided on which primary in which they will vote say they are extremely interested.

In the run-up to the 2016 presidential election, likely Republican primary voters were slightly more likely to say they were extremely interested than Democratic voters and likely voters who were undecided on which primary they would vote in.

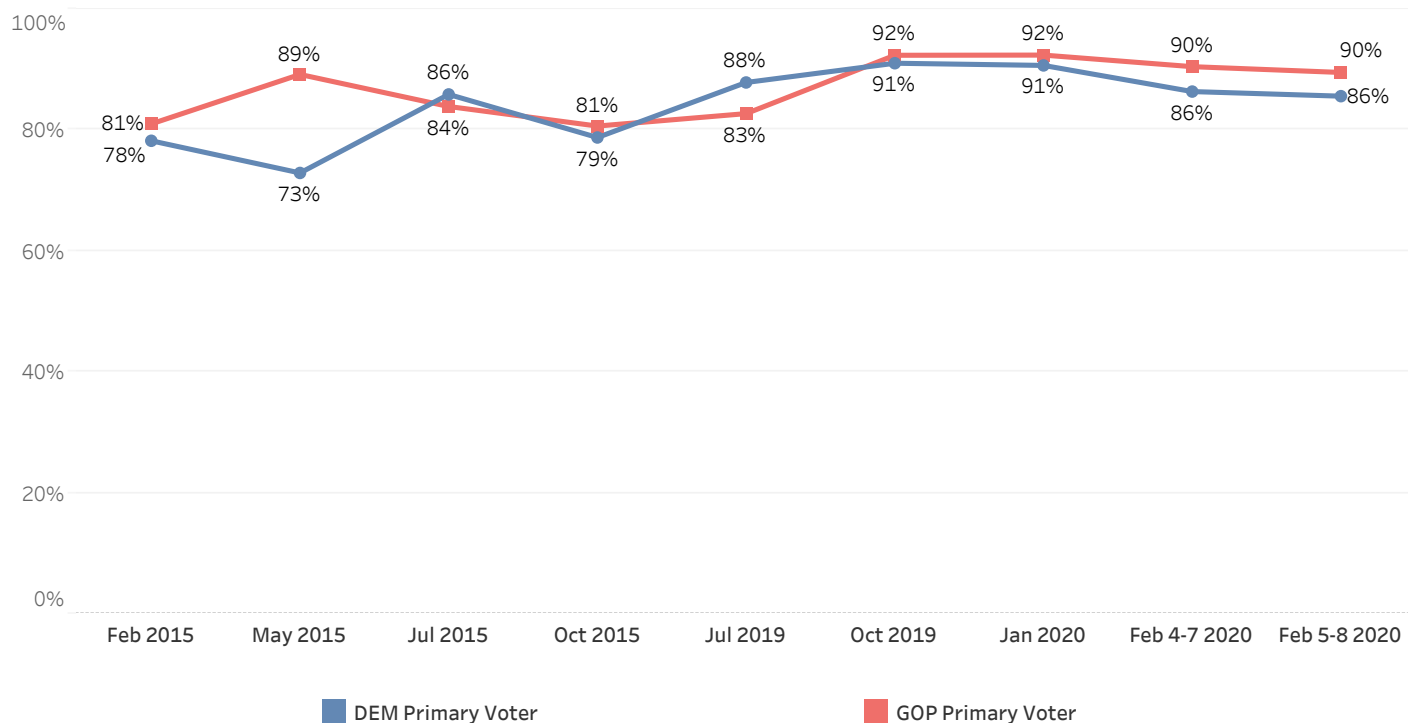

Seventy-four percent of New Hampshire residents say they will definitely vote in the primary, while 11% say they will vote unless there is an emergency. Five percent say they may vote, 5% probably will not vote, and 4% are unsure. Responses to this question are largely unchanged over the past year.

**Likelihood of Voting in Primary - October 2017 to February 5-8, 2020**

About the same percentage of likely Republican (90%) and likely Democratic voters (86%) say that they will definitely vote in the primary.

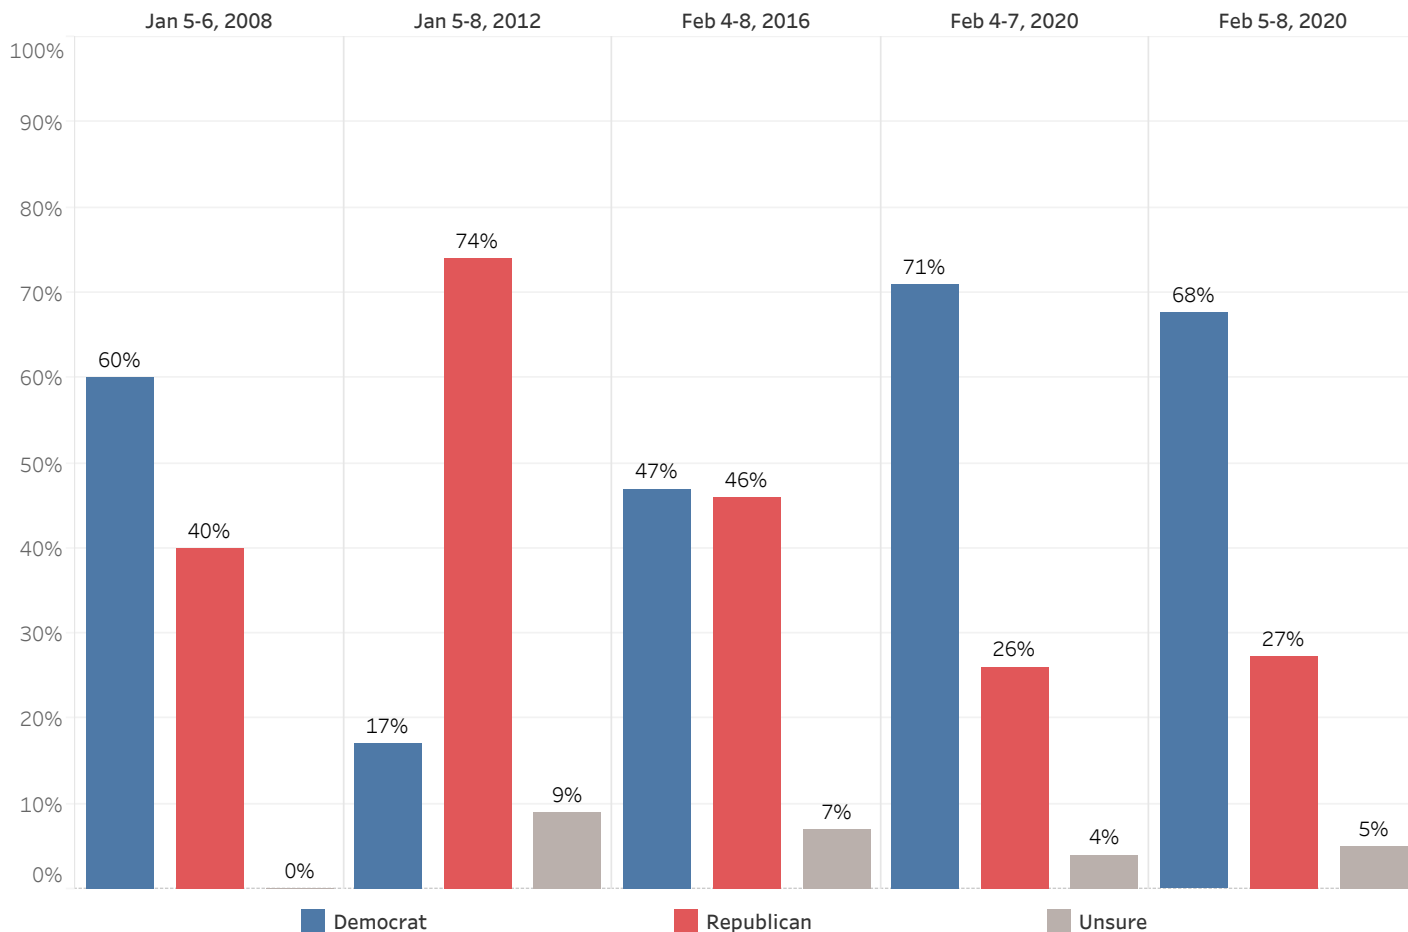

**Will Definitely Vote in Primary - By Likely Primary Participation - February 2015 to February 5-8, 2020**

In New Hampshire, undeclared voters are allowed to choose whether to vote in the Democratic or Republican presidential primary. Among this group, 68% say they plan to vote in the Democratic primary, 27% plan to vote in the Republican primary, and 4% don't know or are unsure. These results are largely unchanged compared to the February 4-7 period.

In the run-up to the 2016 presidential election, featuring competitive primaries for both parties, undeclared voters were nearly equally split on which primary they planned to participate in. In 2012, the last electoral cycle featuring a largely non-competitive primary for one party, undeclared voters planned to participate in the Republican primary at about a similar rate as undeclared voters plan to participate in the Democratic primary this year.

## CNN 2020 New Hampshire Primary Poll

These findings are based on the latest CNN 2020 New Hampshire Primary Poll, conducted by the University of New Hampshire Survey Center. Seven hundred sixty-five (765) randomly selected New Hampshire adults were interviewed in English by landline and cellular telephone between February 5 and February 8, 2020. The margin of sampling error for the survey is +/- 3.5 percent. Included in the sample were 384 likely 2020 Democratic Primary voters (margin of sampling error +/- 5.0 percent) and 227 likely 2020 Republican Primary voters (margin of sampling error +/- 6.5 percent). Trend points prior to July 2019 reflect results from the Granite State Poll, conducted by the University of New Hampshire Survey Center.

The random sample used in the CNN 2020 New Hampshire Primary Poll was purchased from Scientific Telephone Samples (STS), Rancho Santo Margarita, CA. STS screens each selected telephone number to eliminate non-working numbers, disconnected numbers, and business numbers to improve the efficiency of the sample, reducing the amount of time interviewers spend calling non-usable numbers. When a landline number is reached, the interviewer randomly selects a member of the household by asking to speak with the adult currently living in the household who has had the most recent birthday. This selection process ensures that every adult (18 years of age or older) in the household has an equal chance of being included in the survey.

The data have been weighted to adjust for numbers of adults and telephone lines within households. Additionally, data were weighted by respondent sex, age, education, and region of the state to targets from the most recent American Community Survey (ACS) conducted by the U.S. Census Bureau. In addition to potential sampling error, all surveys have other potential sources of non-sampling error including question order effects, question wording effects, and non-response. Due to rounding, percentages may not sum to 100%. The number of respondents in each demographic below may not equal the number reported in cross-tabulation tables as some respondents choose not to answer some questions.
