DURHAM, NH - New Hampshire residents generally support Governor Chris Sununu's plan to re-open the New Hampshire economy in the wake of the COVID-19 crisis. However, support for "Stay at Home 2.0" is more tepid than support for Sununu's original stay at home order and there are significant differences based on partisanship concerning which industries and public places should be allowed to be open. Large majorities of Democrats and Republicans approve of how Governor Sununu is handling the COVID-19 situation in New Hampshire.

These findings are based on the latest **Granite State Panel*** survey, conducted by the University of New Hampshire Survey Center. Eight hundred forty (840) Granite State Panel members completed the survey online between May 14 and May 18, 2020. Data were weighted by respondent sex, age, education, and region of the state to targets from the most recent American Community Survey (ACS) conducted by the U.S. Census Bureau, as well as party registration levels provided by the New Hampshire Secretary of State. The Granite State Panel is part of an effort by the University of New Hampshire Survey Center to investigate new ways of gathering and understanding the opinion of New Hampshire residents. Granite State Panel members are recruited from randomly-selected landline and cell phone numbers across New Hampshire and surveys are sent periodically to panel members.

Handling of Coronavirus (COVID-19) Situation by Governor Sununu

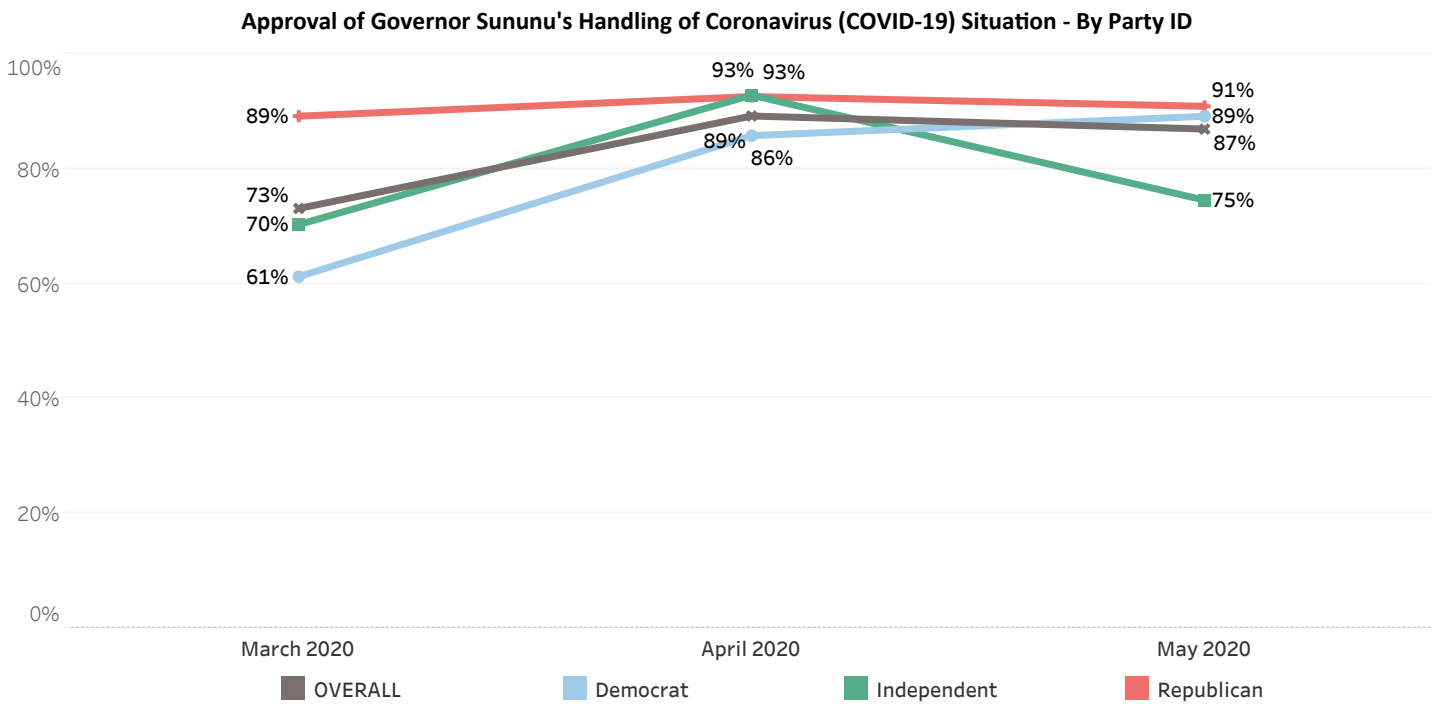

Seven in eight New Hampshire residents (87%) approve of Governor Sununu's handling of the coronavirus (COVID-19) situation, while just 11% disapprove and 2% neither approve nor disapprove or don't know. Overall approval of Sununu's handling of the COVID-19 situation remains considerably higher than in March (73%).

Approval of Governor Sununu's Handling of Coronavirus (COVID-19) Situation

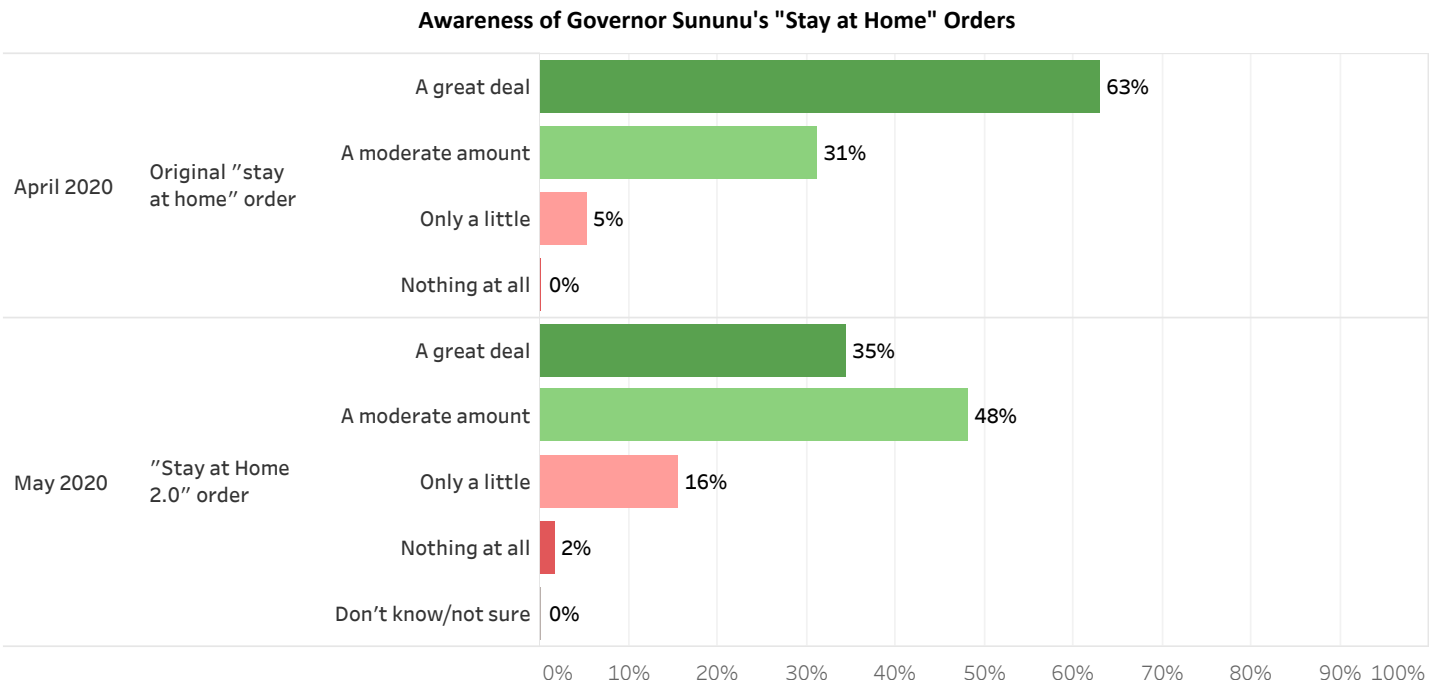

* We ask that this copyrighted information be referred to as *the Granite State Panel*, conducted by the University of New Hampshire Survey Center.

Large majorities of self-identified Republicans (91%) and Democrats (89%) approve of Sununu's handling of the coronavirus (COVID-19) situation, while three-quarters (75%) of Independents agree. Approval among Republicans and Democrats is largely unchanged since April but approval among Independents has declined by eighteen percentage points since then.

On May 1st, Governor Sununu issued an update to his original "stay at home" order for the state of New Hampshire, entitled "Stay at Home 2.0," which will remain in effect until the end of May. The order immediately allowed changes regarding campgrounds, interior state parks, manufacturing, and hospitals and permitted operation of golf courses, barbers and hair salons, retail establishments, drive-in theaters, dental offices, and outdoor seating at restaurants later in the month of May.

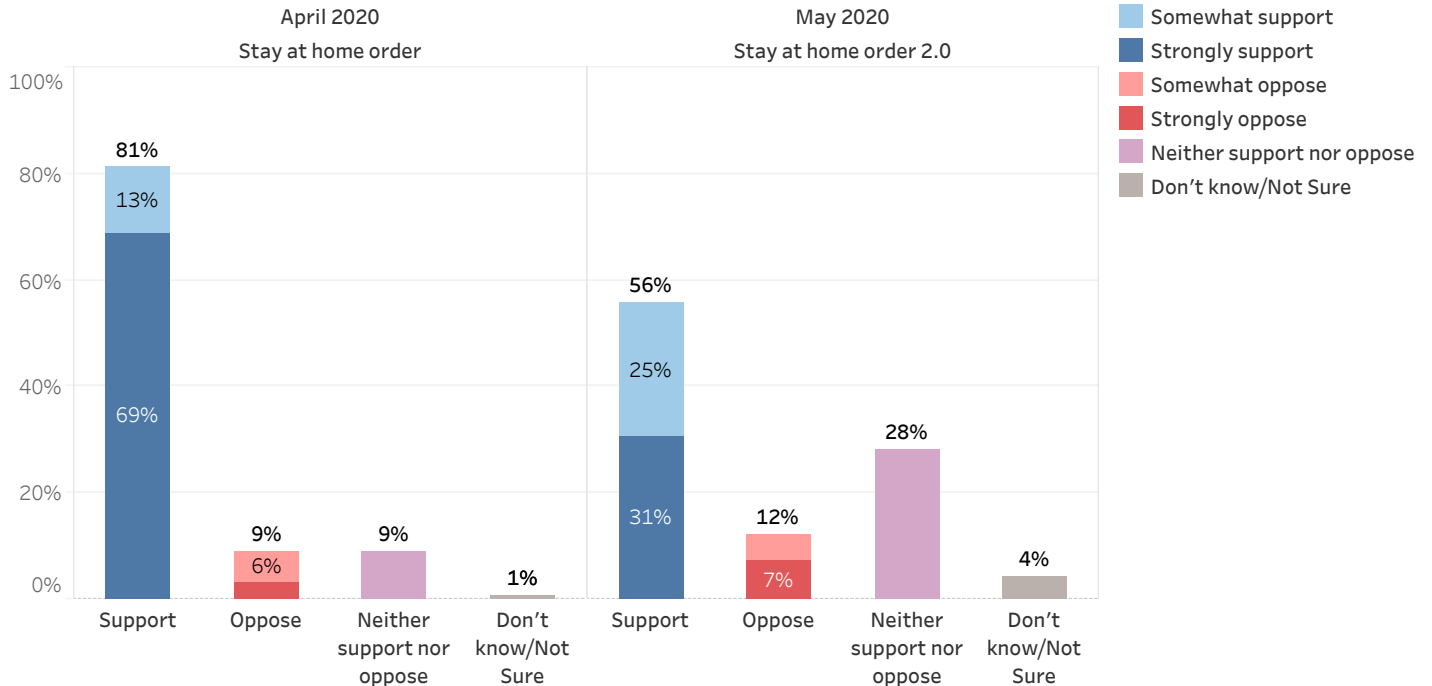

Thirty-five percent of Granite Staters have heard a great deal about this order, nearly half (48%) heard a moderate amount about it, 16% have heard only a little, 2% have heard nothing at all, and less than 1% don't know or are unsure. While most New Hampshire residents have heard about the "Stay at Home 2.0" order, Granite Staters in April reported hearing more about the Governor's original "stay at home" order.

More than half (56%) of New Hampshire residents strongly (31%) or somewhat (25%) support Governor Sununu's "Stay at Home 2.0" order, while 12% strongly (7%) or somewhat (5%) oppose it, 28% neither support nor oppose it, and 4% don't know or are unsure.

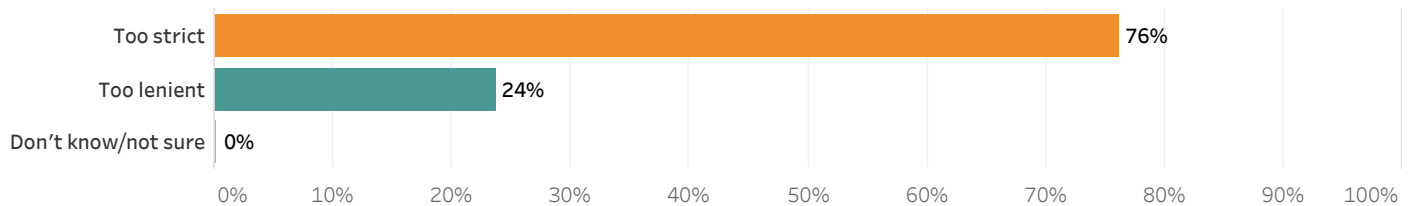

Support for Sununu's "Stay at Home 2.0" order lags well behind the support Granite Staters felt in April for his original "stay at home" order, though most of the difference is due to a larger percentage of respondents neither supporting nor opposing "Stay at Home 2.0."

Approval of Governor Sununu's "Stay at Home" Orders

Among those who oppose Sununu's "Stay at Home 2.0" order (N=102), three-quarters (76%) disapprove because they believe the order is too strict, 24% disapprove because they believe the order is too lenient, and less than 1% don't know or are unsure.

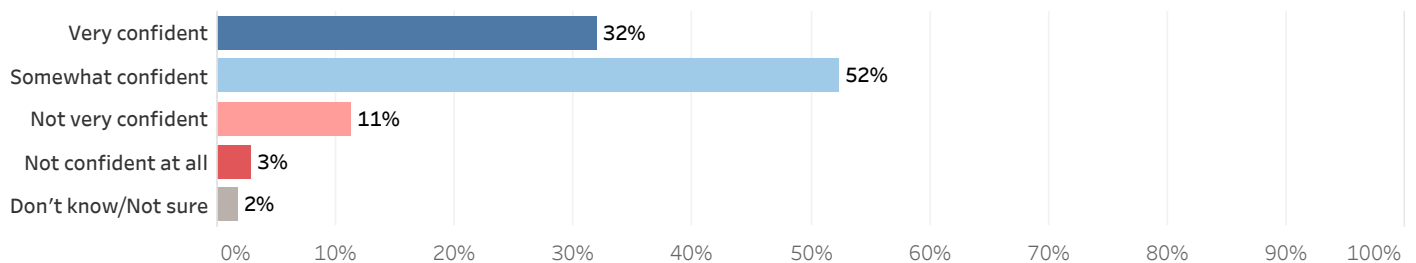

Reason for Disapproving of "Stay at Home 2.0" Order - May 2020

One-third (32%) of New Hampshire residents say they are very confident in the state government's ability to respond effectively to the COVID-19 crisis while just over half (52%) are somewhat confident. Only 14% of Granite Staters say they are not very (11%) or not at all (3%) confident in the state government's ability to respond effectively while 2% don't know or are unsure.

Self-identified Republicans (49%) are considerably more likely than self-identified Independents (32%) and Democrats (15%) to be very confident in the state government's ability to respond effectively.

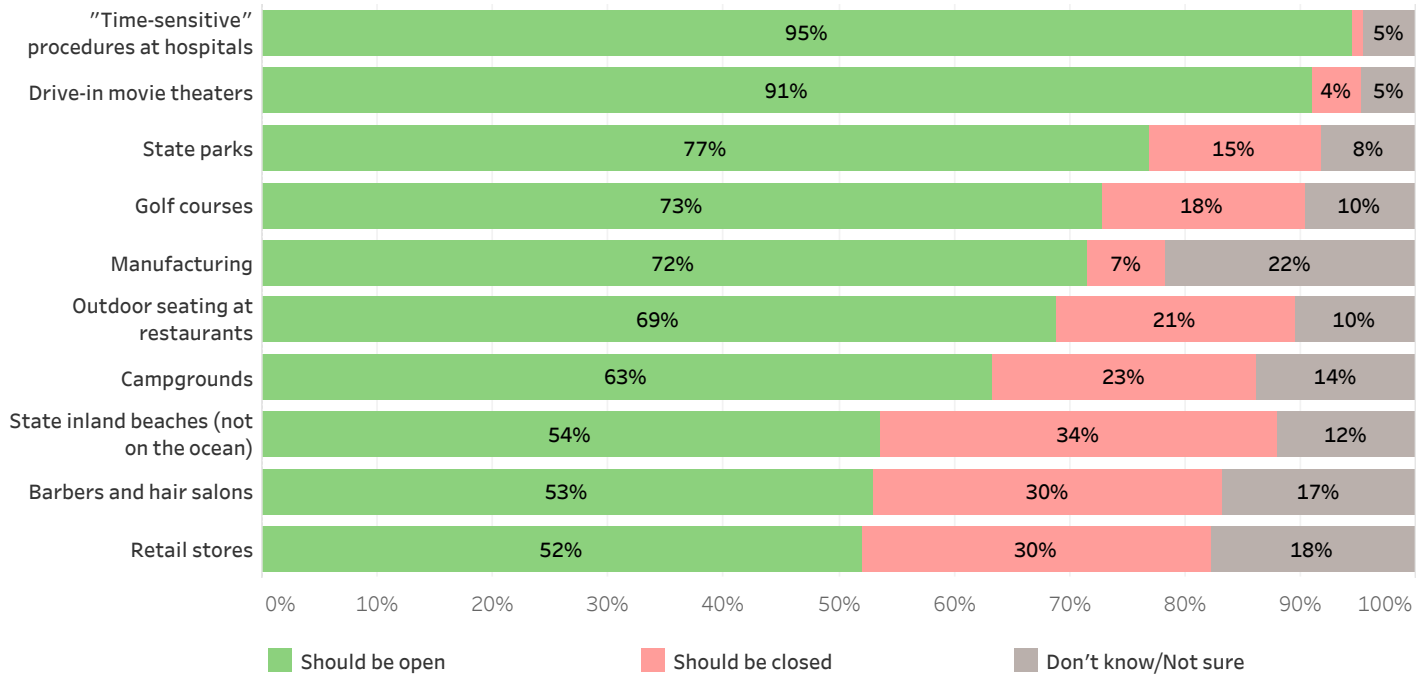

Confidence in State Government's Ability to Respond Effectively to COVID-19 Crisis - May 2020

Under "Stay at Home 2.0" the following industries and public places have been allowed to reopen under specified conditions and New Hampshire residents support their reopening.

More than 90% of New Hampshire residents agree that "time-sensitive" procedures at hospitals (95%) should be allowed and drive-in movie theaters (91%) should be allowed to operate under "Stay at Home 2.0," while about three-quarters believe state parks (77%), golf courses (73%), and manufacturing (72%) should be allowed to operate. Slightly fewer residents believe that outdoor seating at restaurants (69%) should be allowed or that campgrounds (63%) should be allowed to open, while only slight majorities believe that state inland beaches (not on the ocean) (54%), barbers and hair salons (53%), and retail stores (52%) should be open under "Stay at Home 2.0."

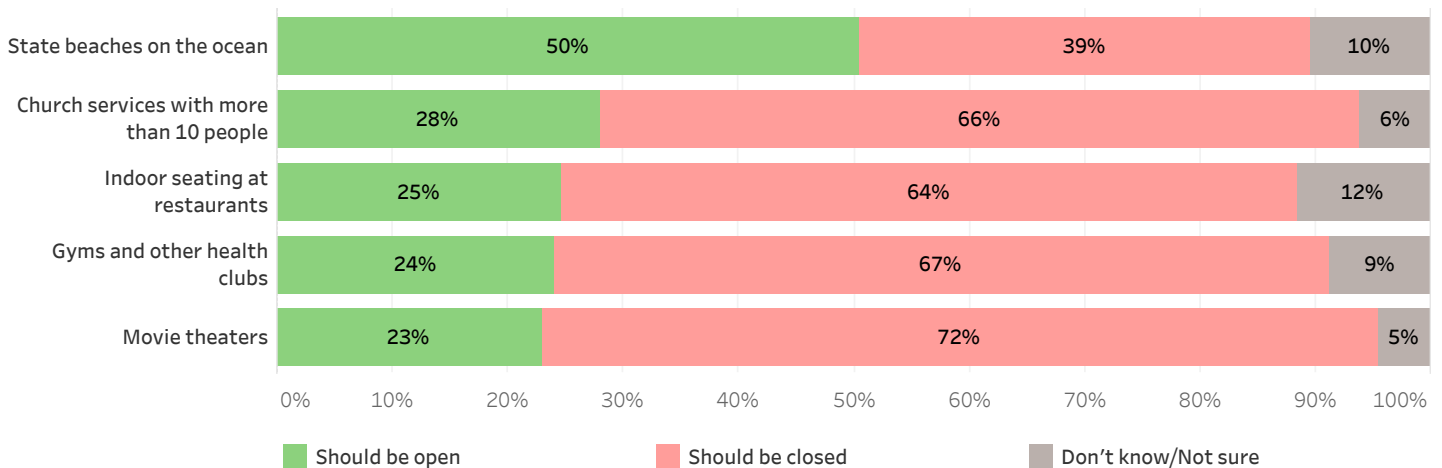

Should Following Industries and Public Places Be Allowed to be Open During "Stay at Home 2.0?" - Permitted Industries and Public Places

Under "Stay at Home 2.0," the following industries and public places will remain closed until June 1st at the earliest.

Half (50%) of New Hampshire residents disagree with one aspect of "Stay at Home 2.0" and believe that state beaches on the ocean should be open. By contrast, only about a quarter of Granite Staters believe that church services with more than ten people (28%), indoor seating at restaurants (25%), gyms and other health clubs (24%), or movie theaters (23%) should be open under "Stay at Home 2.0."

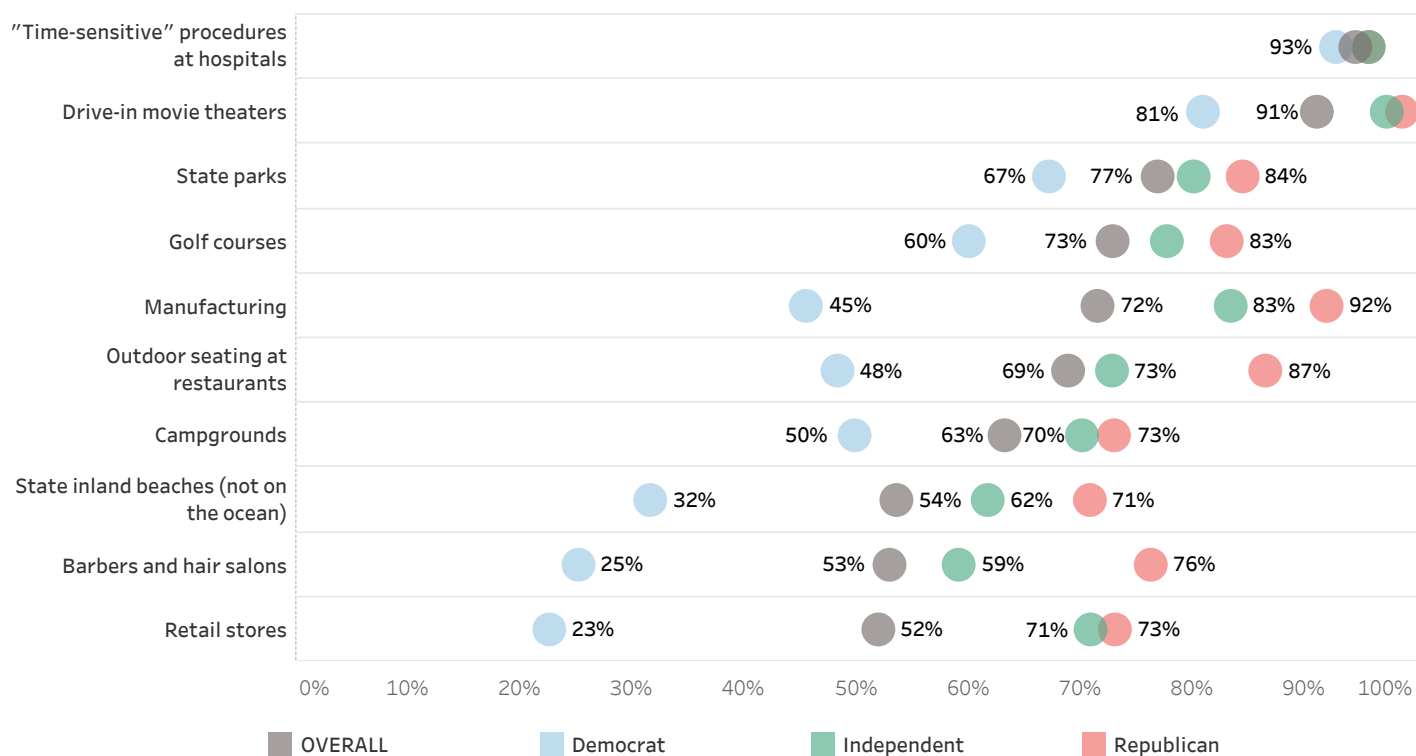

Should Following Industries and Public Places Be Allowed to be Open During "Stay at Home 2.0?" - Prohibited Industries and Public Places

While Granite Staters overall tend to agree with "Stay at Home 2.0" about what should and should not be open, there are sharp partisan differences on what should and what should not be open.

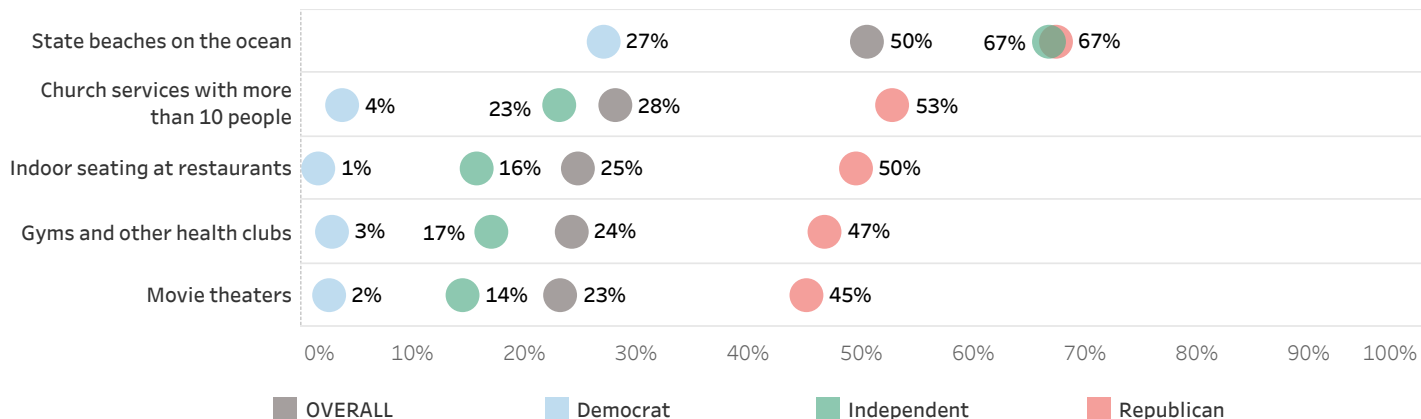

Seventy percent or more of self-identified Republicans believe that each of these permitted industries or public places currently should be open or allowed to operate under "Stay at Home 2.0." while 59% or more of Independents agree for each one. However, among self-identified Democrats, a majority only support "time-sensitive" procedures at hospitals, drive-in movie theaters, state parks, and golf courses being allowed under "Stay at Home 2.0," and less than a third support the opening of state inland beaches, barbers and hair salons, or retail stores. These very strong partisan differences exist despite the fact that the vast majority of both self-identified Republicans and Democrats approve of Governor Sununu's handling of the COVID-19 crisis.

Should Following Industries and Public Places Be Allowed to be Open During "Stay at Home 2.0?" - Permitted Industries and Public Places - By Party ID

Similarly large partisan gaps exist on whether the following prohibited industries and public places should be allowed to be open under "Stay at Home 2.0": two-thirds of self-identified Republicans and Independents believe state beaches on the ocean should be open but only just over a quarter of Democrats agree. About half of Republicans believe that church services with more than 10 people, indoor seating at restaurants, gyms and other health clubs, and movie theaters should be open while less than a quarter of Independents and less than 5% of Democrats agree.

Should Following Industries and Public Places Be Allowed to be Open During "Stay at Home 2.0?" - Prohibited Industries and Public Places - By Party ID

Granite State Panel Methodology

These findings are based on the latest Granite State Panel survey, conducted by the University of New Hampshire Survey Center. Eight hundred forty (840) Granite State Panel members completed the survey online between May 14 and May 18, 2020. Data were weighted by respondent sex, age, education, and region of the state to targets from the most recent American Community Survey (ACS) conducted by the U.S. Census Bureau, as well as party registration levels provided by the New Hampshire Secretary of State.

The Granite State Panel is part of an effort by the University of New Hampshire Survey Center to investigate new ways of gathering and understanding the opinion of New Hampshire residents. Granite State Panel members are recruited from randomly-selected landline and cell phone numbers across New Hampshire. Respondents to the Granite State Poll were asked if they wished to participate in further research and asked to provide an email address. Those who agreed and provided an email address were added to the panel. Panel members were also recruited by texting a random sample of cellular telephones in the state and inviting the recipient to take a short survey.

For each survey which they complete, panel members are entered into quarterly drawings to earn rewards, such as gift certificates from statewide and internet companies. Due to rounding, percentages may not sum to 100%. The number of respondents in each demographic below may not equal the number reported in cross-tabulation tables as some respondents choose not to answer some questions.

For more information about the methodology used in the Granite State Panel, contact Dr. Andrew Smith at (603) 862-2226 or by email at andrew.smith@unh.edu.

Approval of Governor Sununu's Handling of Coronavirus (COVID-19) Situation

Generally speaking, do you approve or disapprove of the way Governor Sununu is handling the coronavirus (COVID-19) situation?

	<u>Approve</u>	<u>Disapprove</u>	<u>Neither/DK</u>	<u>N</u>
March 2020	73%	15%	12%	643
April 2020	89%	7%	3%	1,153
May 2020	87%	11%	2%	815

Awareness of Governor Sununu's "Stay at Home 2.0" Order

As you may know, on May 1st Governor Sununu issued a new modified stay at home order, known as Stay at Home 2.0, which will be in effect until May 31st. This new order will continue certain restrictions under the original stay at home order while allowing certain industries and public places to re-open this month under certain guidelines. How much have you seen, heard, or read about "Stay at Home 2.0"?

	<u>A great deal</u>	<u>A moderate amount</u>	<u>Only a little</u>	<u>Nothing at all</u>	<u>Don't know/not sure</u>	<u>N</u>
May 2020	35%	48%	16%	2%	0%	840

Support or Oppose "Stay at Home 2.0" Order

Generally, do you support or oppose Stay at Home 2.0?

	<u>Support</u>	<u>Oppose</u>	<u>Neither support nor oppose</u>	<u>Don't know/Not Sure</u>	<u>N</u>
May 2020	56%	12%	28%	4%	837

Is "Stay at Home 2.0" Too Lenient or Too Strict (Among those who Oppose)

In your opinion, do you think Stay at Home 2.0 is too lenient or too strict?

	<u>Too lenient</u>	<u>Too strict</u>	<u>Don't know/not sure</u>	<u>N</u>
May 2020	24%	76%	0%	102

Confidence in State Government's Ability to Respond Effectively to Current Outbreak of Coronavirus in New Hampshire

How confident are you in the state government's ability to respond effectively to the current outbreak of coronavirus in New Hampshire?

	<u>Very confident</u>	<u>Somewhat confident</u>	<u>Not very confident</u>	<u>Not confident at all</u>	<u>Don't know/Not sure</u>	<u>N</u>
May 2020	32%	52%	11%	3%	2%	837
