DURHAM, NH - Confidence among New Hampshire residents in the federal government's ability to respond effectively to the coronavirus (COVID-19) outbreak has declined since April. Trust in science agencies, such as the CDC, as a source of information on the outbreak has also declined since April. A majority continue to disapprove of President Trump's handling of the coronavirus situation and nearly half of the state strongly disapproves.

These findings are based on the latest **Granite State Panel*** survey, conducted by the University of New Hampshire Survey Center. Eight hundred forty (840) Granite State Panel members completed the survey online between May 14 and May 18, 2020. Data were weighted by respondent sex, age, education, and region of the state to targets from the most recent American Community Survey (ACS) conducted by the U.S. Census Bureau, as well as party registration levels provided by the New Hampshire Secretary of State. The Granite State Panel is part of an effort by the University of New Hampshire Survey Center to investigate new ways of gathering and understanding the opinion of New Hampshire residents. Granite State Panel members are recruited from randomly-selected landline and cell phone numbers across New Hampshire and surveys are sent periodically to panel members.

Handling of Coronavirus (COVID-19) Situation by President Trump

A majority of New Hampshire residents (57%) disapprove of President Trump's handling of the coronavirus (COVID-19) situation, and half (49%) strongly disapprove. Forty percent approve of Trump's handling of the situation while 3% neither approve or disapprove or don't know. Approval of Trump's handling of the coronavirus situation is largely unchanged since April.

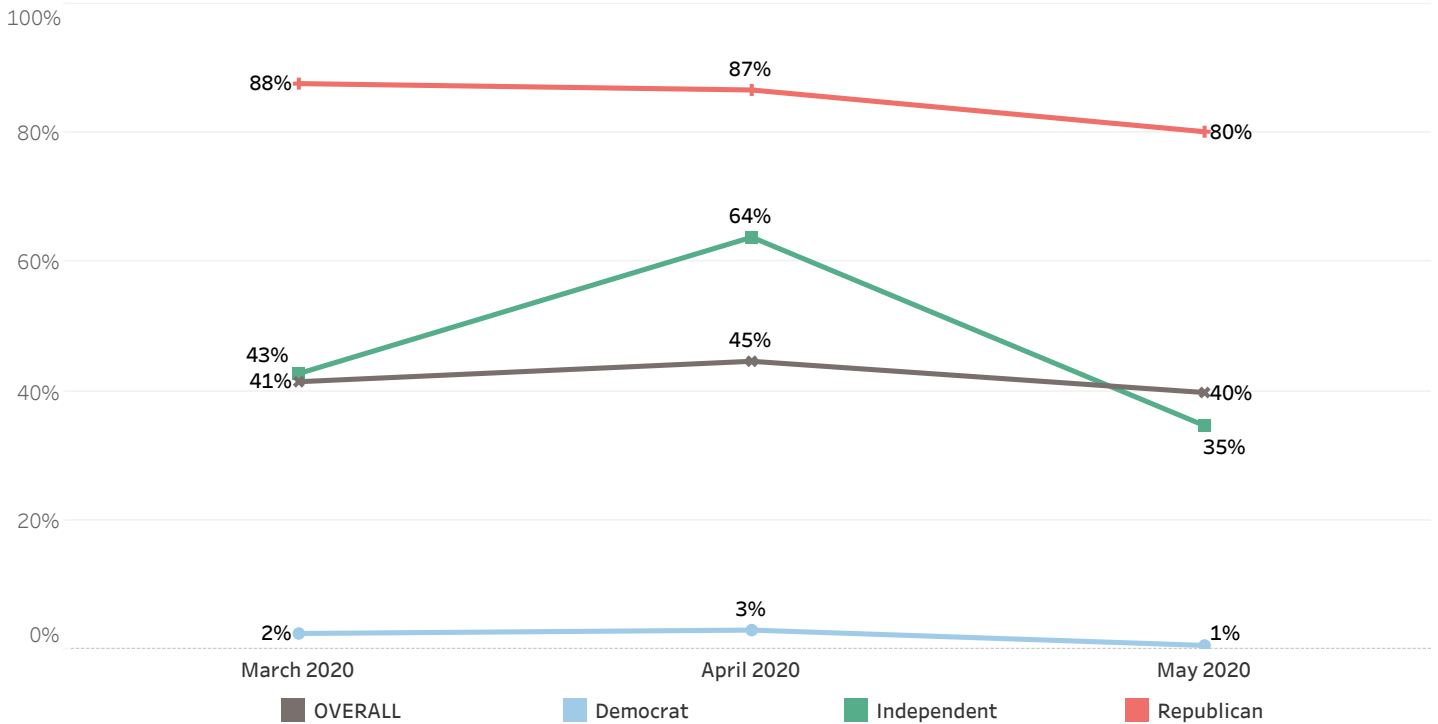

Approval of President Trump's Handling of Coronavirus (COVID-19) Situation

* We ask that this copyrighted information be referred to as *the Granite State Panel*, conducted by the University of New Hampshire Survey Center.

Approval of Trump's handling of COVID-19 is tied to partisanship as 80% of New Hampshire Republicans approve of how Trump is handling the situation but only 35% of Independents and virtually no Democrats (1%) agree. Approval among Independents has declined by 29 percentage points since April.

Approval of President Trump's Handling of Coronavirus (COVID-19) Situation - By Party ID

Approval of Trump's handling of the coronavirus (COVID-19) situation has:

- declined since April among those aged 18 to 34 but has increased among those aged 35 to 49;
- fallen somewhat among women;
- declined among those with a high school education or less; and
- fallen among Central/Lakes Region and Connecticut Valley residents but slightly increased among Seacoast residents.

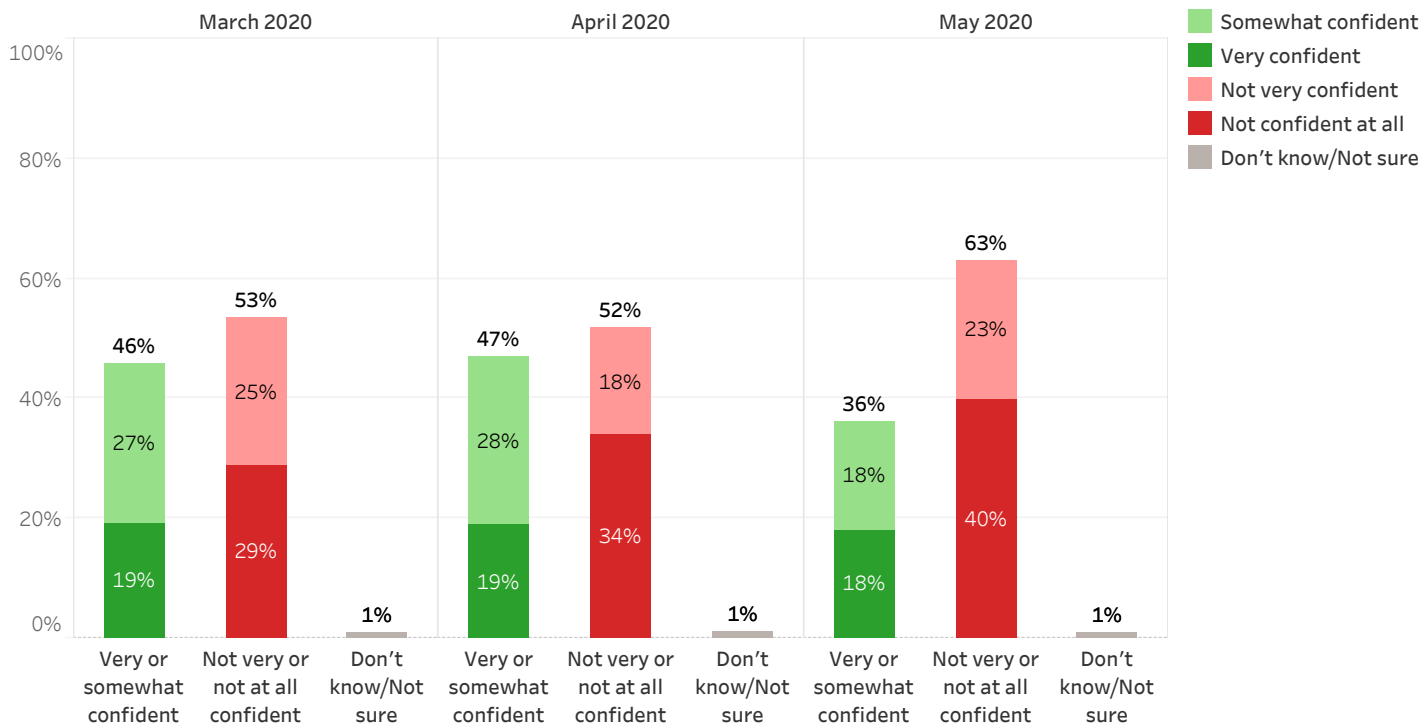

**Approval of President Trump's Handling of Coronavirus (COVID-19) Situation

Federal Government's Response to Coronavirus

Confidence in the federal government's ability to respond effectively to the coronavirus outbreak has declined among New Hampshire residents since April: only 36% are very (18%) or somewhat (18%) confident while 63% are not very (23%) or not at all confident (40%) and 1% don't know or are unsure. In April, nearly half (47%) of Granite Staters were very or somewhat confident in the federal government's ability to respond effectively.

Confidence in Federal Government's Ability to Respond Effectively to Coronavirus Outbreak

The percentage of respondents who are very or somewhat confident in the federal government's ability to respond effectively has:

- declined by 49 percentage points since April among Independents and declined somewhat among Republicans;
- fallen among self-described liberals, moderates, and conservatives;
- declined by 35 percentage points among those aged 18 to 34 but increased among those aged 35 to 49;
- fallen among women but stayed about the same among men; and
- declined among both those who approve of Trump's handling of the coronavirus situation and those who disapprove.

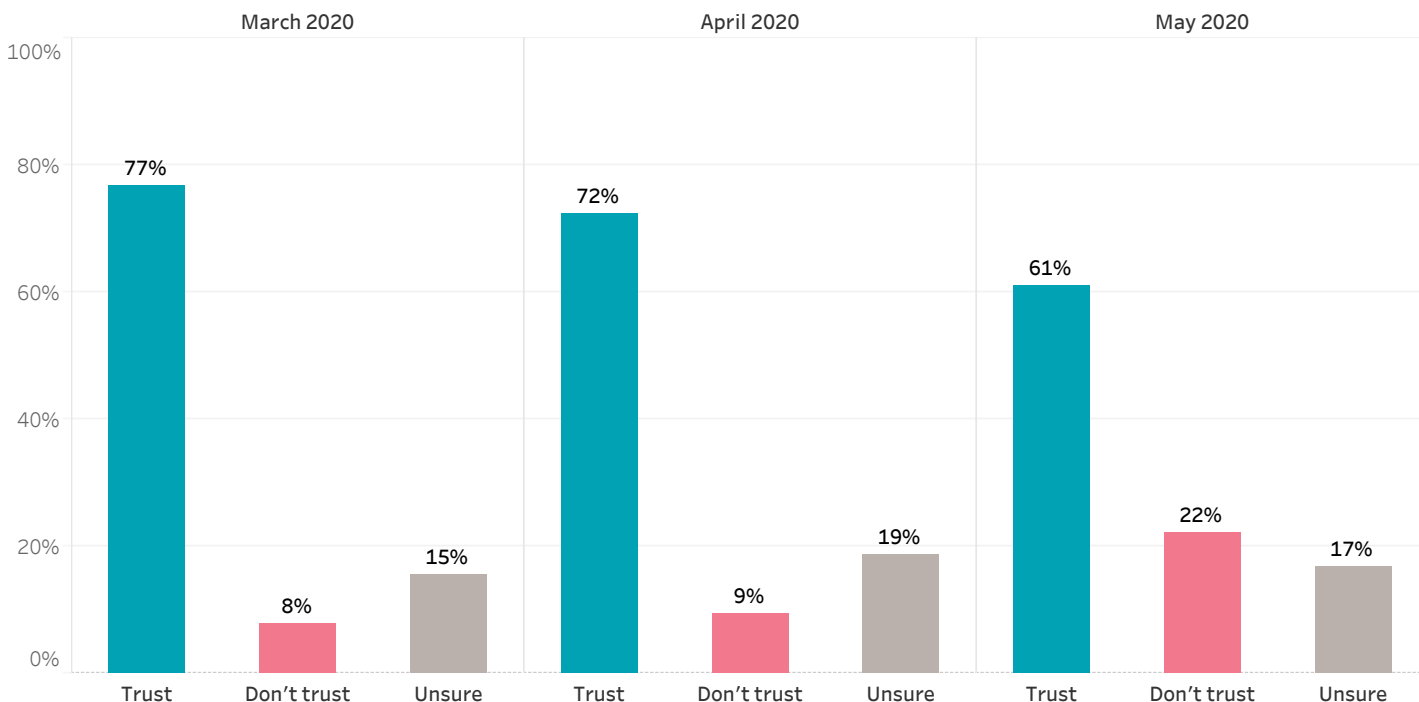

**Very or Somewhat Confident in Federal Government's Ability to Respond Effectively to Coronavirus Outbreak
Change from April to May 2020 - By Demographics**

Trust in Science Agencies

Trust in science agencies, such as the Centers for Disease Control (CDC), as sources of information about the coronavirus (COVID-19) continues to erode among Granite Staters. In May, only 61% trust such agencies as an information source, 22% don't trust them, and 17% are unsure. In April, 72% said they trusted such agencies as a source of information and only 9% said they did not trust them.

Trust Science Agencies Such as CDC as Source of Information About the Coronavirus

The percentage of respondents who trust science agencies such as the CDC as a source of information about the coronavirus (COVID-19) has:

- fallen since April among Independents and Republicans but has remained unchanged among Democrats;
- declined among self-described conservatives but remained the same among liberals and slightly increased among moderates;
- declined among all age groups, most strongly among those aged 50 to 64; and
- fallen by 26 percentage points among those who approve of Trump's handling of the coronavirus situation but has remained unchanged among those who disapprove of his handling of the situation.

Granite State Panel Methodology

These findings are based on the latest Granite State Panel survey, conducted by the University of New Hampshire Survey Center. Eight hundred forty (840) Granite State Panel members completed the survey online between May 14 and May 18, 2020. Data were weighted by respondent sex, age, education, and region of the state to targets from the most recent American Community Survey (ACS) conducted by the U.S. Census Bureau, as well as party registration levels provided by the New Hampshire Secretary of State.

The Granite State Panel is part of an effort by the University of New Hampshire Survey Center to investigate new ways of gathering and understanding the opinion of New Hampshire residents. Granite State Panel members are recruited from randomly-selected landline and cell phone numbers across New Hampshire. Respondents to the Granite State Poll were asked if they wished to participate in further research and asked to provide an email address. Those who agreed and provided an email address were added to the panel. Panel members were also recruited by texting a random sample of cellular telephones in the state and inviting the recipient to take a short survey.

For each survey which they complete, panel members are entered into quarterly drawings to earn rewards, such as gift certificates from statewide and internet companies. Due to rounding, percentages may not sum to 100%. The number of respondents in each demographic below may not equal the number reported in cross-tabulation tables as some respondents choose not to answer some questions.

For more information about the methodology used in the Granite State Panel, contact Dr. Andrew Smith at (603) 862-2226 or by email at andrew.smith@unh.edu.
