DURHAM, NH - President Trump continues to encounter low job approval ratings from New Hampshire residents for both his overall job performance and his handling of COVID-19. The percentage of Republicans who approve of Trump is at an all-time high for his presidency while approval among Democrats is at an all-time low. Republicans express far more confidence than Democrats in the federal government's ability to respond to the COVID-19 pandemic but are far less trusting of science agencies like the CDC.

These findings are based on the latest **Granite State Poll***, conducted by the University of New Hampshire Survey Center. One thousand and thirty (1,030) Granite State Panel members completed the survey online between September 24 and September 28, 2020. The margin of sampling error for the survey is +/- 3.1 percent. Data were weighted by respondent sex, age, education, and region of the state to targets from the most recent American Community Survey (ACS) conducted by the U.S. Census Bureau, as well as party registration levels provided by the New Hampshire Secretary of State and 2016 election results in NH. Granite State Panel members are recruited from randomly-selected landline and cell phone numbers across New Hampshire and surveys are sent periodically to panel members.

Presidential Approval

Presidential re-election bids are typically referenda on the incumbent and with just over a month before the election, New Hampshire residents do not think Donald Trump has done a good job in his first term. Currently, 44% of New Hampshire residents approve of Donald Trump's performance as President, 55% disapprove, and less than 1% don't know or are unsure. Trump's net approval rating (the percentage who approve minus the percentage who disapprove) among Granite Staters is -11%, up from -20% in August 2020 but unchanged from a year ago. It should be noted that these data were collected before the first presidential debate on September 29th.

Presidential Approval - Donald Trump

* We ask that this copyrighted information be referred to as *the Granite State Panel*, conducted by the University of New Hampshire Survey Center.

Ninety percent of Republicans approve of Trump's job performance, while 43% of Independents and only 1% of Democrats approve. Support among Republicans (90%) is at its highest point in Trump's presidency while support among Democrats (1%) is at its lowest point.

Job Approval - President Donald Trump - By Party Identification

- Residents under the age of 35 are far less likely than older voters to approve of Trump's job performance. Residents aged 35 and older are more likely than in August to approve of Trump's performance.
- Men remain more likely than women to approve of Trump's job performance.
- Residents with lower levels of education continue to be more likely than those with high levels of education to approve of Trump's performance.
- Connecticut Valley, Manchester Area, and Central/Lakes Region residents are more likely than in August to approve of Trump while Massachusetts Border and North Country residents are slightly less likely than in August to approve.

**Approval of President Trump's Job Performance
Change from August to September 2020 - By Demographics**

Fifty-seven percent of New Hampshire residents disapprove of President Trump's handling of the coronavirus (COVID-19) situation and 55% strongly disapprove. Forty-two percent approve of Trump's handling of the situation - 29% strongly approve and 12% somewhat approve - while less than 1% neither approve nor disapprove or don't know.

Approval of Trump's overall job performance tracks closely with approval of his handling of COVID-19: only 2% of respondents disapprove of Trump's handling of COVID-19 but approve of his overall job performance and less than 1% approve of Trump's handling of COVID-19 but disapprove of his overall job performance.

Approval of President Trump's Handling of Coronavirus (COVID-19) Situation

Federal Government's Response to Coronavirus

Confidence among New Hampshire residents in the federal government's ability to respond effectively to the coronavirus outbreak has ticked slightly upward since August but a majority remain unconvinced: 41% say they are very (26%) or somewhat (15%) confident while 58% are not very (17%) or not at all confident (41%) and less than 1% don't know or are unsure. In April, nearly half (47%) of Granite Staters reported they were very or somewhat confident in the federal government's ability to respond effectively.

Confidence in Federal Government's Ability to Respond Effectively to Coronavirus Outbreak

The percentage of Republicans who are very or somewhat confident in the federal government's ability to respond effectively to the coronavirus outbreak (77%) remains slightly higher than in May and June, while confidence among Independents is also markedly higher than in the late spring and early summer. Confidence among Democrats has remained low since the onset of the pandemic.

Very or Somewhat Confident in Federal Government's Ability to Respond Effectively to Coronavirus Outbreak - By Party Identification

Trust in Science Agencies

Trust in science agencies, such as the Centers for Disease Control (CDC), as sources of information about COVID-19 remains well below levels seen in March and April. Currently, only 48% of New Hampshire residents say they trust such agencies as an information source, 23% don't trust them, and 29% are unsure. In March, 77% said they trusted such agencies and only 8% said they did not trust them.

Trust Science Agencies Such as CDC as Source of Information About the Coronavirus

Trust in science agencies like the CDC among Republicans (29%) has declined precipitously since March (74%). Trust in the CDC and other science agencies among Democrats (68%) and Independents (45%) has fallen since July.

Trust Science Agencies Such as CDC as Source of Information About the Coronavirus - By Party Identification

Economic Approval

Currently, 48% of New Hampshire residents approve of President Trump's handling of the economy, 51% disapprove, and 1% neither approve nor disapprove or don't know. Approval of Trump's handling of the economy remains lower than before the COVID-19 pandemic: in February 2020, 57% approved of Trump's handling of the economy and only 38% disapproved.

Nearly all (96%) Republicans approve of Trump's handling of the economy while 47% of Independents and only 3% of Democrats feel this way. Approval among Republicans is largely unchanged since the onset of the COVID-19 pandemic, while approval among Independents and Democrats has slightly fallen.

Approval of President Trump's Handling of the Economy

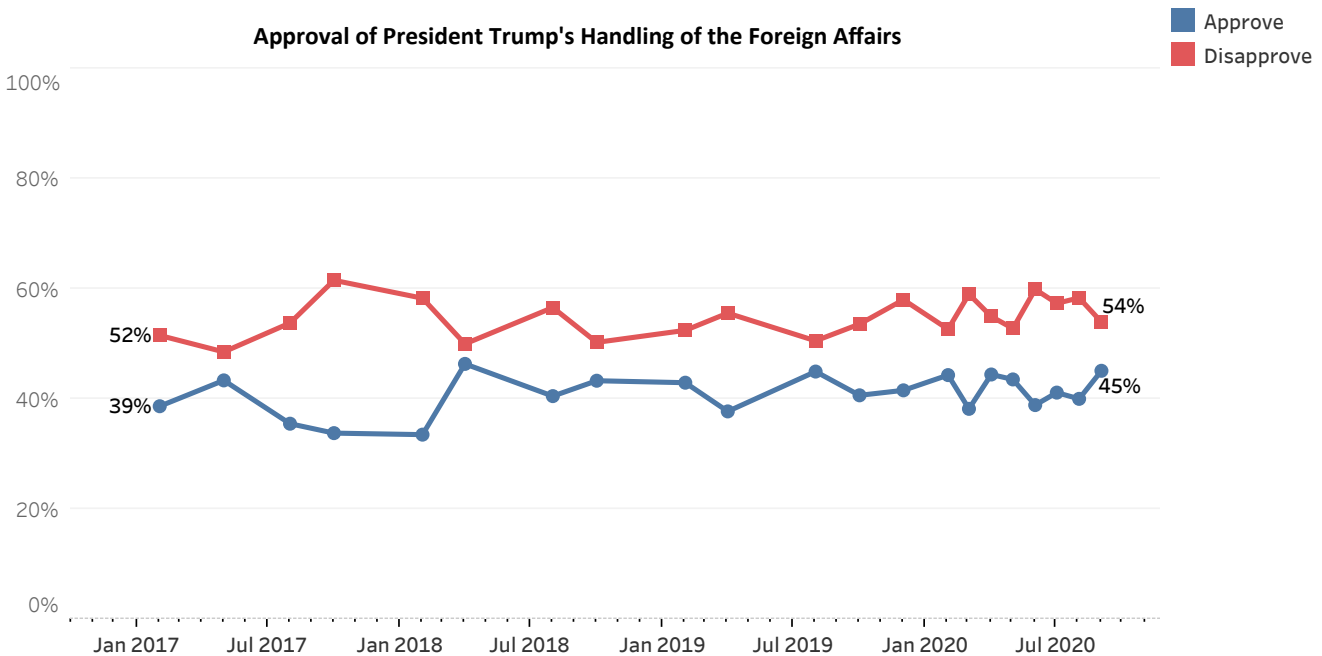

Foreign Affairs Approval

Forty-five percent of New Hampshire residents approve of President Trump's handling of foreign affairs, 54% disapprove, and 1% neither approve nor disapprove or don't know.

Ninety-one percent of Republicans approve of Trump's handling of foreign affairs, an all-time high, but only 45% of Independents and 1% of Democrats feel this way.

Approval of President Trump's Handling of the Foreign Affairs

Granite State Poll Methodology

These findings are based on the latest Granite State Poll, conducted by the University of New Hampshire Survey Center. One thousand and thirty (1,030) Granite State Panel members completed the survey online between September 24 and September 28, 2020. The margin of sampling error for the survey is +/- 3.1 percent. These MSE's have not been adjusted for design effect. The response rate for the September 2020 Granite State Poll is 37%. The design effect for the survey is 2.5%.

Data were weighted by respondent sex, age, education, and region of the state to targets from the most recent American Community Survey (ACS) conducted by the U.S. Census Bureau, as well as party registration levels provided by the New Hampshire Secretary of State and to 2016 election results in New Hampshire.

The Granite State Panel is part of an effort by the University of New Hampshire Survey Center to investigate new ways of gathering and understanding the opinion of New Hampshire residents. Approximately 5,750 New Hampshire adults were recruited from randomly selected landline and cell phone numbers to participate in the panel. Panelists are then asked to participate in online surveys sponsored by the UNH Survey Center.

The number of respondents in each demographic below may not equal the number reported in cross-tabulation tables as some respondents choose not to answer some questions. Due to rounding, percentages may not sum to 100%.

For more information about the methodology used in the Granite State Panel, contact Dr. Andrew Smith at (603) 862-2226 or by email at andrew.smith@unh.edu.
