cola.unh.edu/unh-survey-center

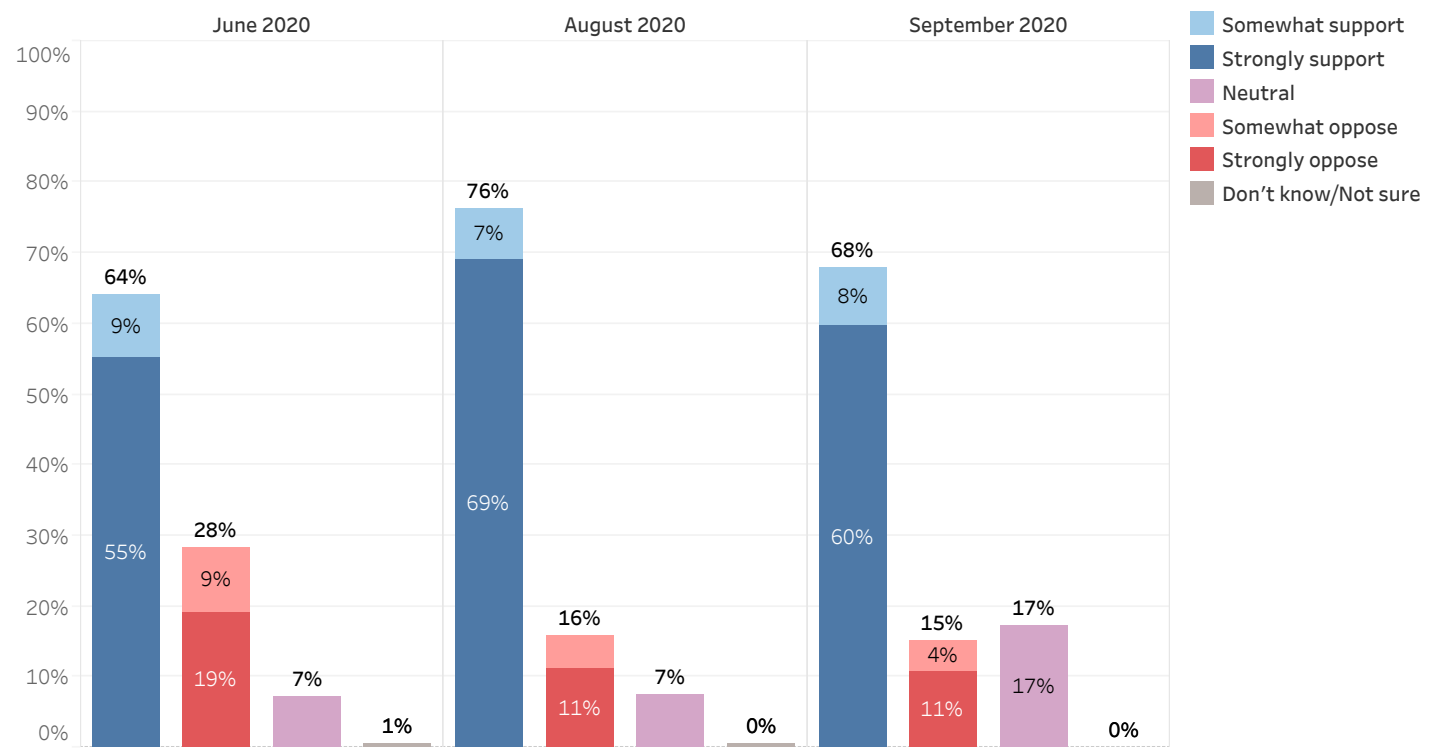

DURHAM, NH – Despite COVID-19 concerns, three-quarters of likely voters in New Hampshire plan to vote in-person in November. Likely voters are quite confident that their vote will be accurately counted. A slim majority believe that the replacement for Ruth Bader Ginsberg’s seat on the Supreme Court should be named after the next president is inaugurated in January.

These findings are based on the latest **Granite State Poll***, conducted by the University of New Hampshire Survey Center. One thousand and thirty (1,030) Granite State Panel members completed the survey online between September 24 and September 28, 2020. The margin of sampling error for the survey is +/- 3.1 percent. Included were 972 likely 2020 general election voters (MSE = +/- 3.1%). Data were weighted by respondent sex, age, education, and region of the state to targets from the most recent American Community Survey (ACS) conducted by the U.S. Census Bureau, as well as party registration levels provided by the New Hampshire Secretary of State and 2016 election results in NH. Granite State Panel members are recruited from randomly-selected landline and cell phone numbers across New Hampshire and surveys are sent periodically to panel members.

Absentee Voting

There has been a nationwide concern about voting in-person due to COVID-19 and states have expanded voting by mail and loosened absentee ballot restrictions. Any New Hampshire voter may choose to vote using an absentee ballot if they do not want to go to a polling location due to concerns about COVID-19. A clear majority of New Hampshire residents support this policy - more than two-thirds (68%) are strongly (60%) or somewhat (8%) in support, 15% somewhat (4%) or strongly (11%) oppose it, 17% are neutral, and less than 1% don't know or are unsure. Support for expanded absentee voting has declined somewhat since August but remains high.

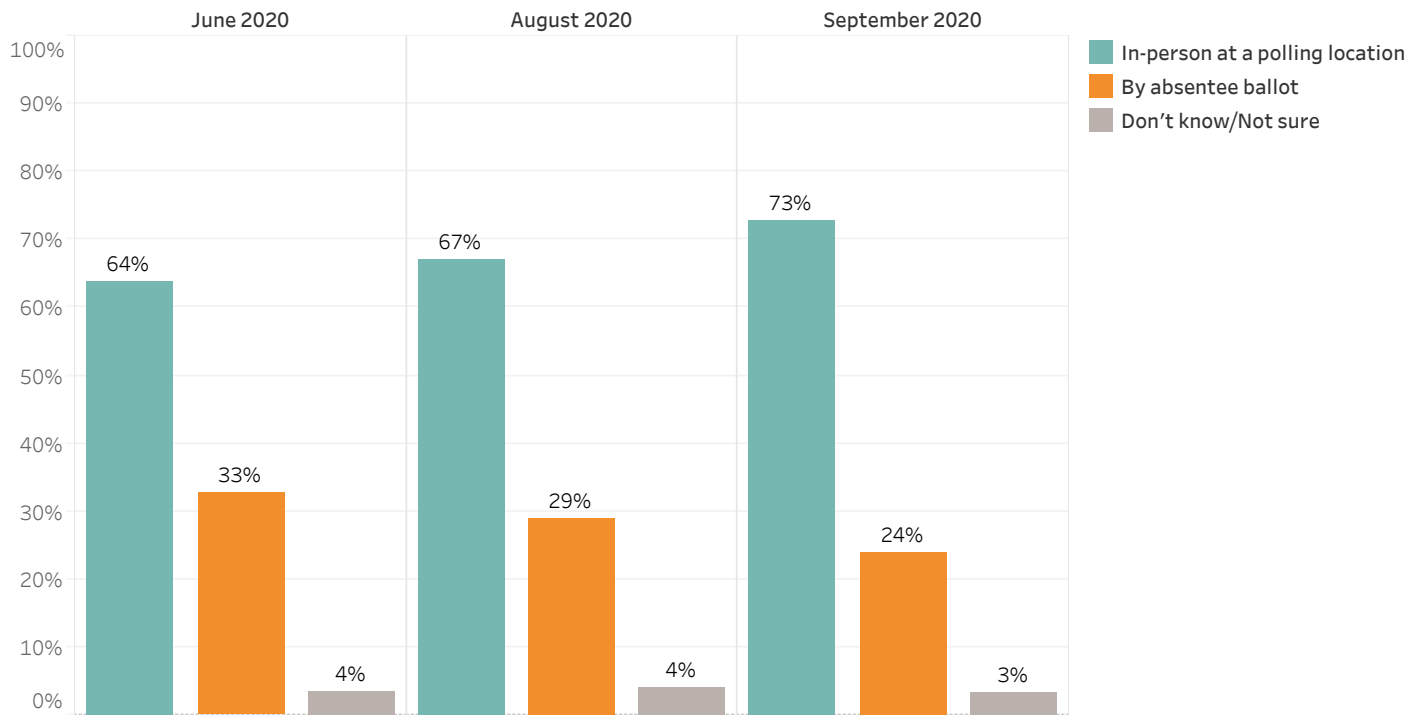

Support or Oppose Any NH Voter Being Able to Choose to Vote Absentee Due to COVID-19 Concerns

* We ask that this copyrighted information be referred to as *the Granite State Poll*, conducted by the University of New Hampshire Survey Center.

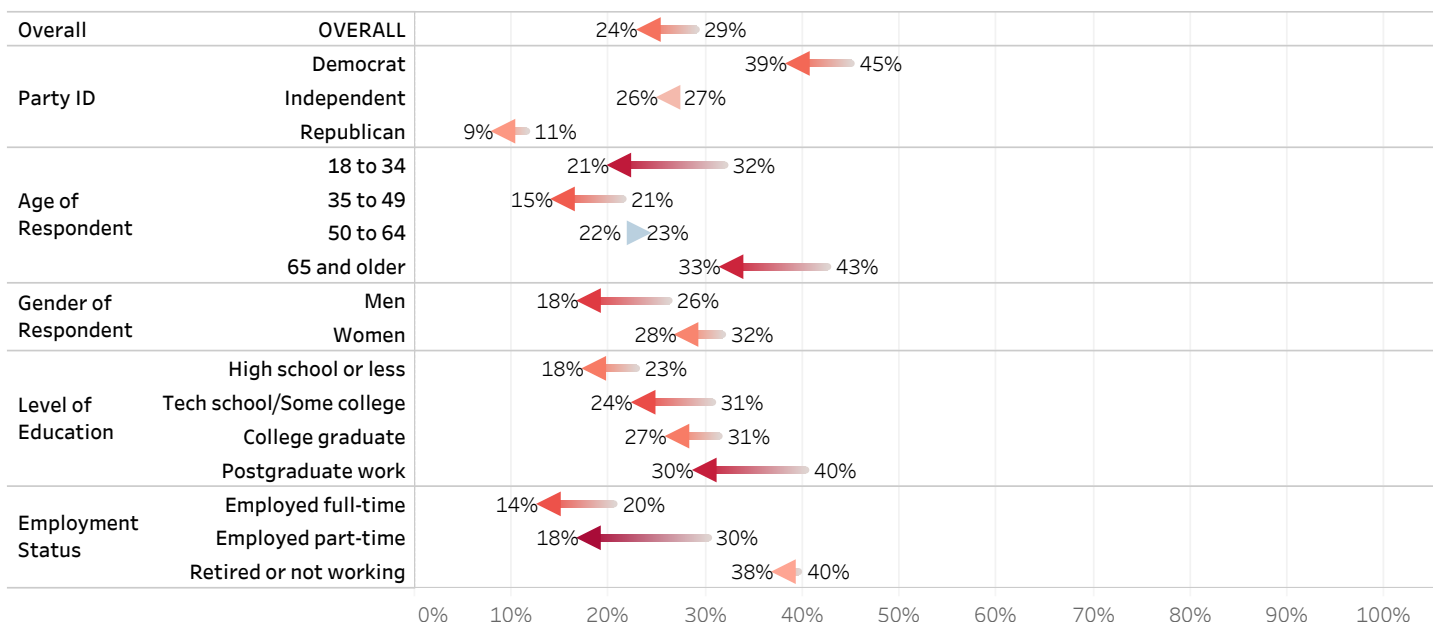

Despite their support for absentee voting, most New Hampshire voters (73%) say they plan to vote in-person at the polls on election day, 24% plan to vote by absentee ballot, and 3% don't know or are unsure. Granite Staters are slightly more likely (73%) than they were in June (64%) and August (67%) to say they plan to vote in-person.

Planned Method of Voting in General Election

- Democrats (-6 percentage points) are slightly less likely than in August to plan to vote by absentee ballot in the general election. However, Democrats (39%) remain more likely than Independents (26%) and Republicans (9%) to say they plan to vote absentee.
- Likely voters aged 18 to 34 and those aged 65 and older are less likely than in August to plan to vote by absentee ballot in the general election but voters aged 65 and older (33%) remain more likely than others to plan to vote absentee.
- Men (-8) are slightly less likely than in August to plan to vote by absentee ballot and are less likely than women to plan to vote absentee.
- Voters who are employed full or part time are a good deal less likely than those who are retired or not working to plan to vote absentee.

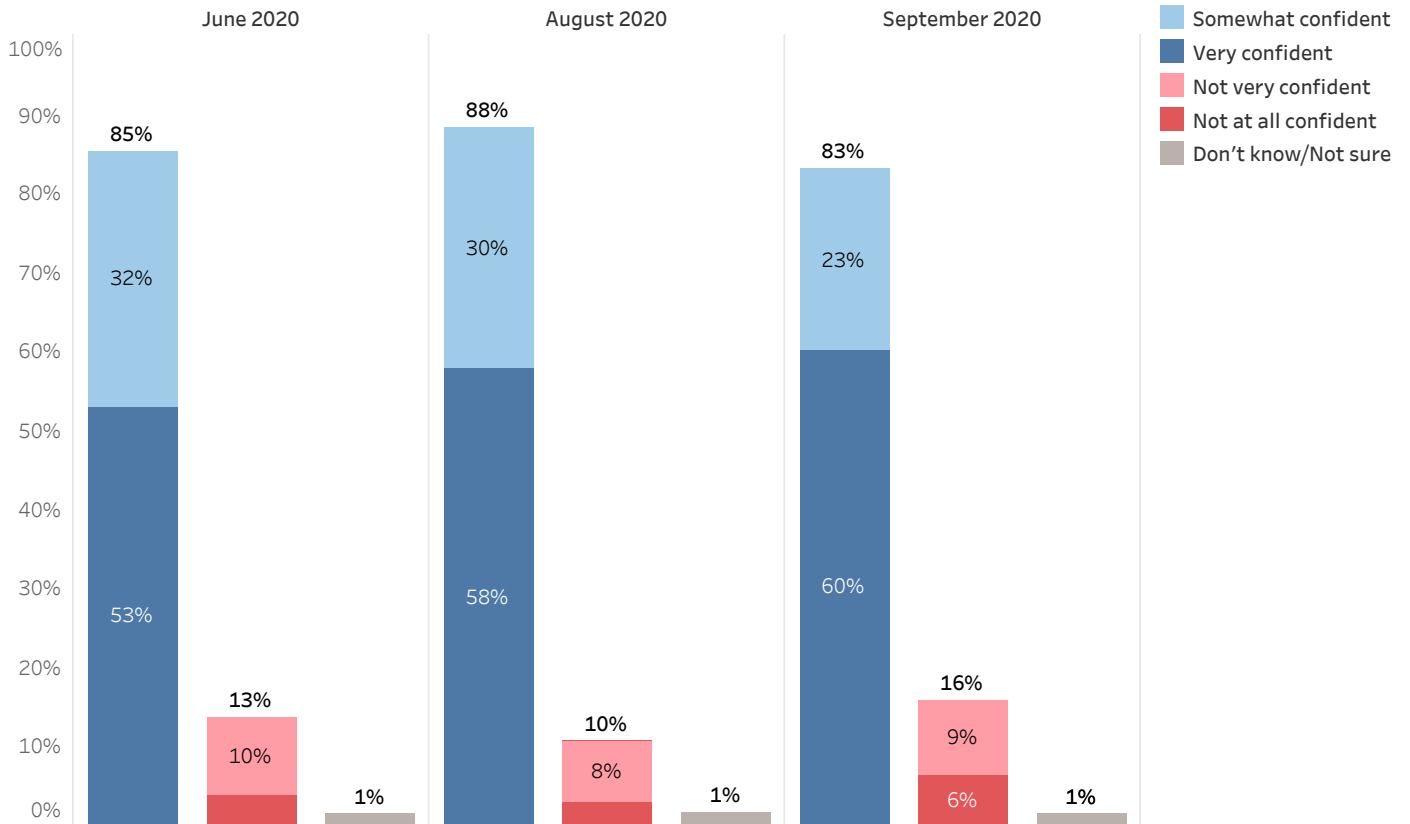

Plan to Vote by Absentee Ballot in General Election - Change from August to September 2020

Confidence in Accuracy of General Election Vote

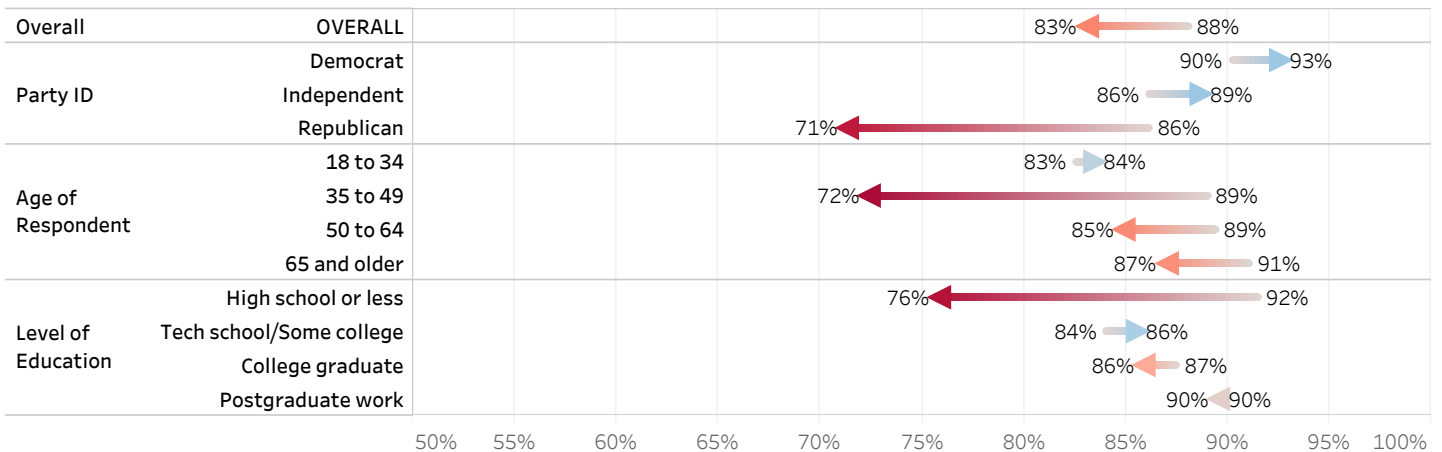

Amid continued concerns about election security, most likely voters in New Hampshire remain confident that their vote will be accurately counted: 83% are very (60%) or somewhat (23%) confident that their vote will be counted accurately. However, one in six (16%) likely voters in the state are not very (9%) or not at all (6%) confident that their vote will be accurately counted, and 1% don't know or are unsure.

Confidence General Election Vote Will Be Counted Accurately

- Republicans (-15 percentage points) are less likely than in August to say they are confident that their vote will be accurately counted. Meanwhile confidence among Democrats and Independents is largely unchanged since August and is a good deal higher than among Republicans.
- Confidence that their vote will be counted accurately has fallen among those aged 35 to 49 since August (-17) but remained largely stable among all other age groups.
- Respondents with a high school education or less are less confident than in August (-16) that their vote will be counted accurately while confidence among others has remained largely stable.

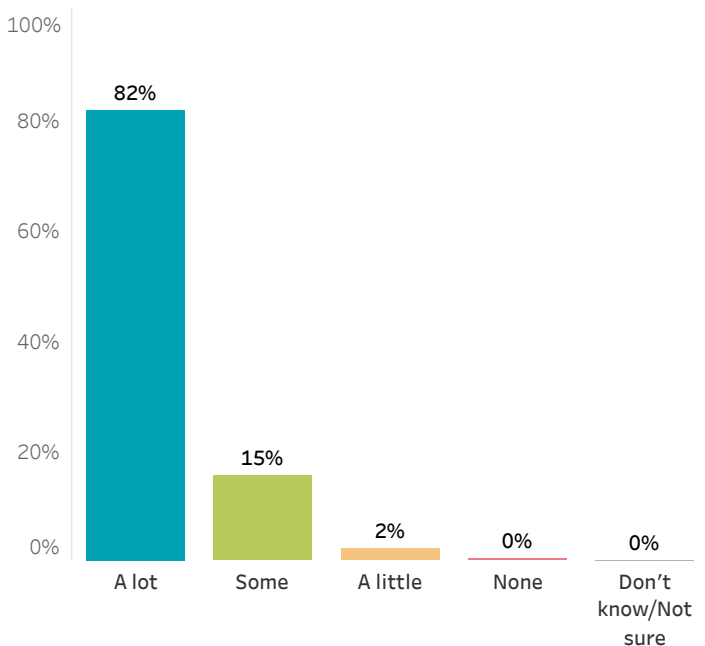

Very or Somewhat Confident Your General Election Vote Will Be Counted Accurately - Change from August to September 2020

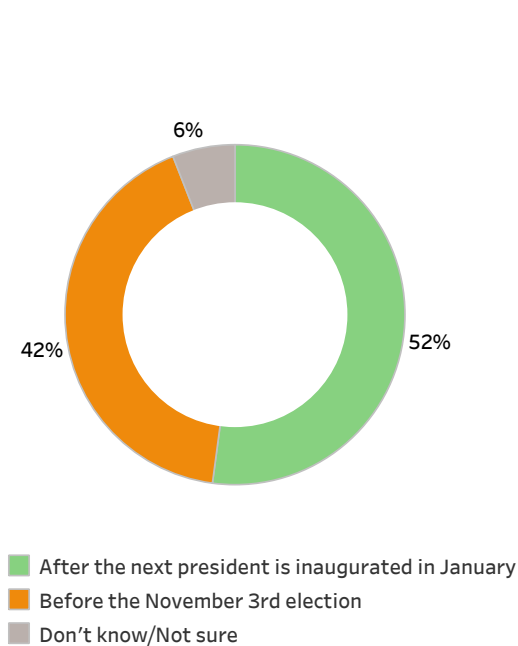

Supreme Court Vacancy

Supreme Court Justice Ruth Bader Ginsberg died on September 18, creating a vacancy on the Supreme Court. Granite Staters are very aware of Ginsberg's death and the controversy of filling her seat during the end of a presidential election campaign - 82% of residents say they heard a lot about this, 15% heard some, 2% heard a little, less than 1% heard nothing at all, and less than 1% don't know or are unsure. President Trump has nominated Amy Coney Barrett to replace Ginsberg on the court but she has not been confirmed by the Senate. Democrats argue that the nomination of a new Justice should be delayed until after the election, while Republicans argue that Trump holds the constitutional authority to nominate a Justice immediately. A slight majority (52%) of Granite Staters believe the nomination of the next Justice should be delayed until after the next president is inaugurated in January while 42% believe the nomination should take place before the November 3rd election and 6% don't know or are unsure.

How Much Heard About Possible Appointment of New Supreme Court Justice Following Death of Justice Ginsberg

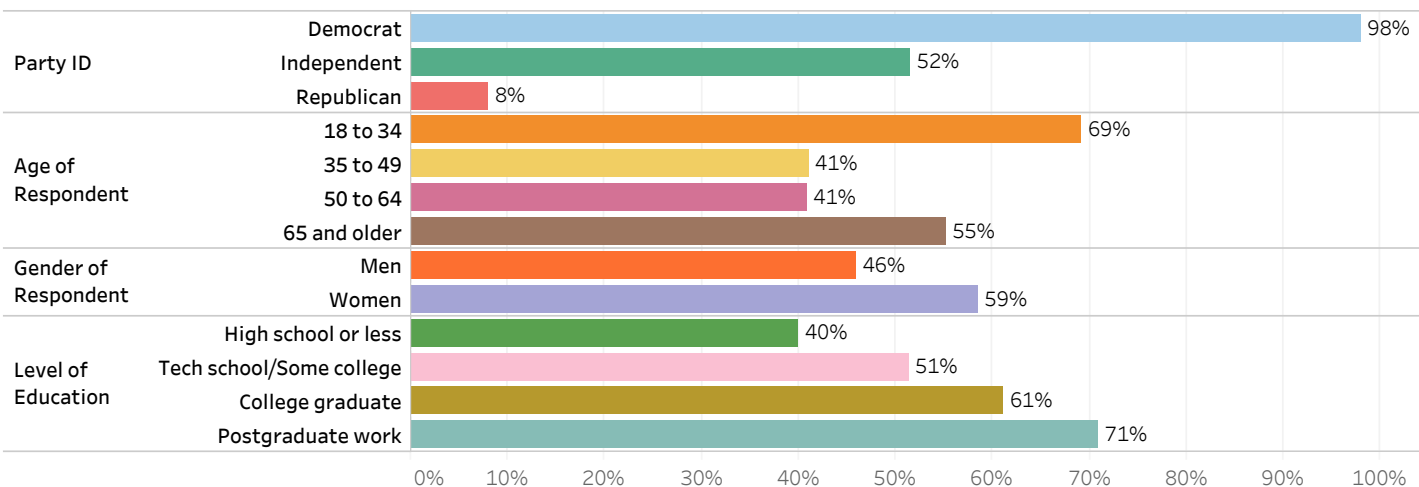

When Should Appointment of Next Justice Take Place

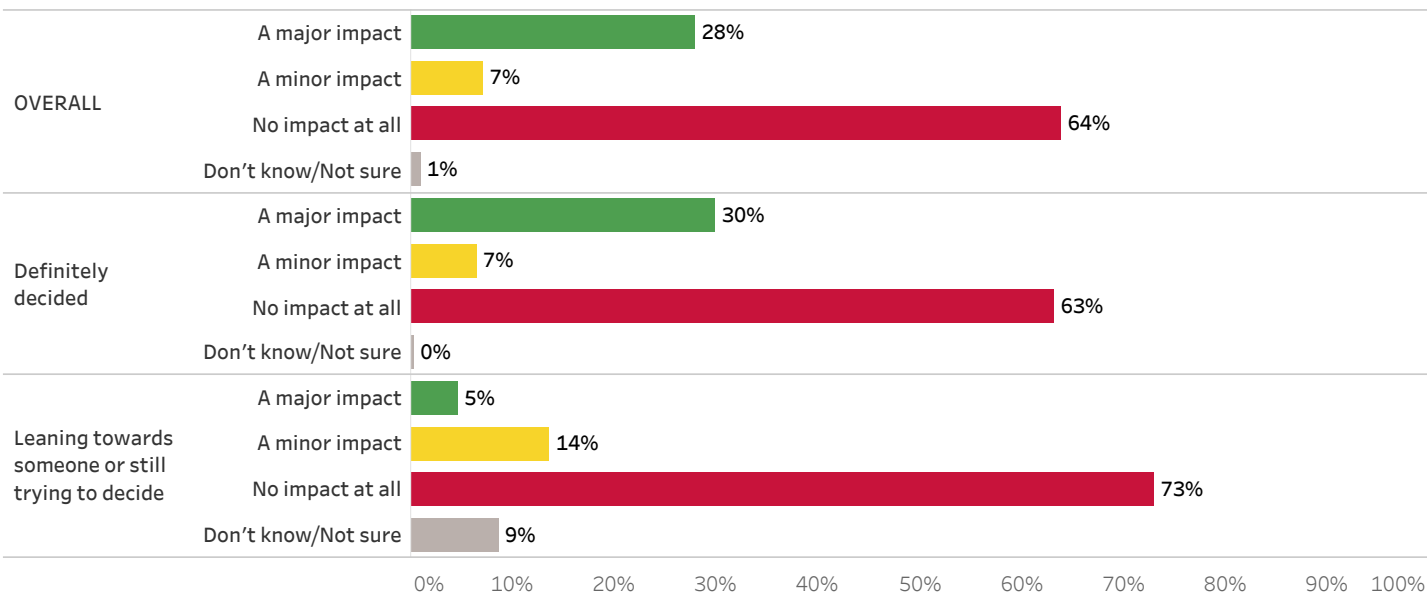

- Nearly all Democrats (98%) and a slight majority of Independents (52%) believe the nomination of the next Justice should be delayed until after the next president is inaugurated in January but only 8% of Republicans agree.
- More than two-thirds of residents aged 18 to 34 (69%) believe the appointment should be delayed until January, but only 41% of those aged 35 to 64 agree.
- Women (59%) are more likely than men (46%) to believe the appointment should be delayed until January.
- Seven in ten residents (71%) who have completed postgraduate work believe the appointment should be delayed but only 40% of those with a high school education or less agree.

Believe Appointment of Next Justice Should Be Delayed Until After Next President Inaugurated in January - by Demographics

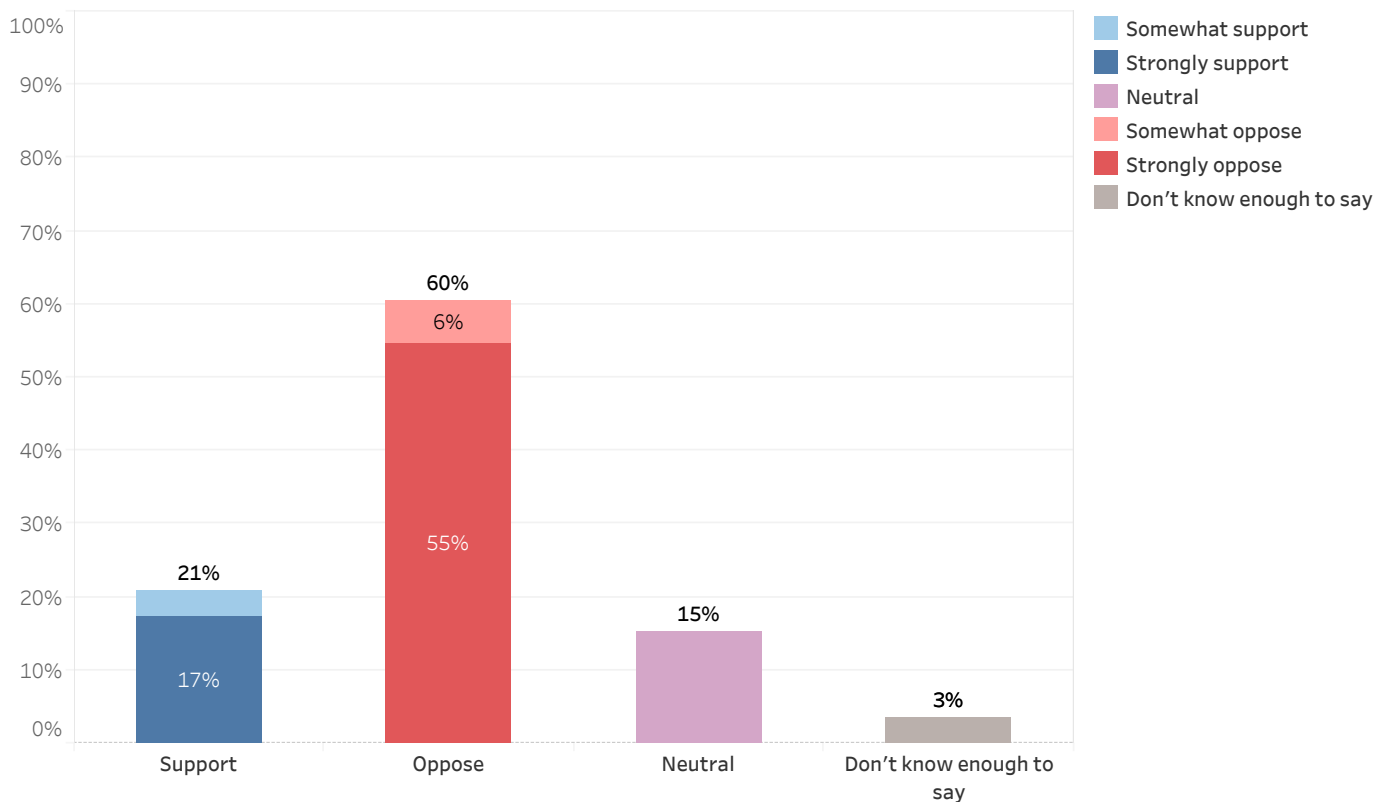

While many people have heard a lot about the possible appointment of a new Supreme Court Justice, nearly two-thirds (64%) of likely voters say this will have no impact at all on their vote in the presidential election, 28% say this will have a major impact on their vote, and 7% say this will make a minor impact. However, most of those who say this will have a major impact on their vote also say they have already decided on their presidential vote. Among those who are leaning towards someone or still trying to decide who to vote for, only 5% say this will have a major impact on their vote and 14% say it will have a minor impact.

Impact of Trump Appointment of New Justice on Vote in Presidential Election - September 2020

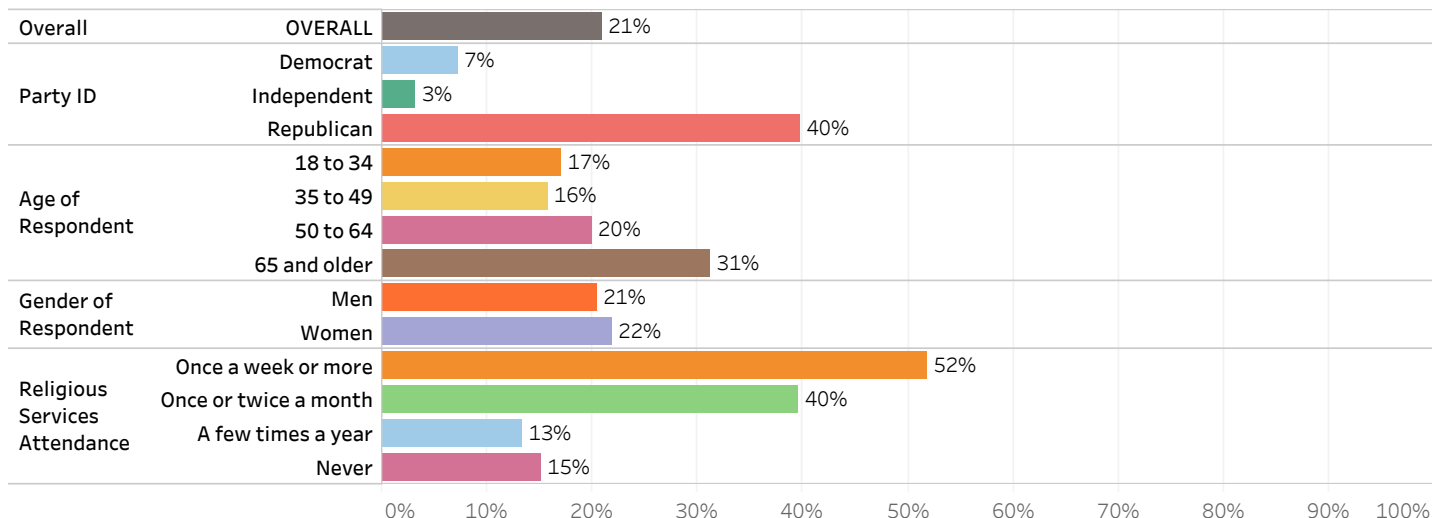

President Trump has said it "is certainly possible" that if confirmed, Amy Coney Barrett could be part of a Supreme Court decision overturning Roe v. Wade, the 1973 decision concerning abortion rights. However, a majority of Granite Staters oppose such a move - only 21% say they strongly (17%) or somewhat (4%) support the Supreme Court overturning Roe v. Wade, 60% strongly (55%) or somewhat (6%) oppose such a move, 15% are neutral, and 3% don't know enough to say.

Support or Oppose Supreme Court Overturning Roe v. Wade - September 2020

- Four in ten (40%) self-identified Republicans support overturning Roe v. Wade but only 7% of Democrats and 3% of Independents agree.
- Respondents aged 65 and older (31%) are more likely than younger respondents to favor overturning Roe v. Wade.
- Men (21%) and women (22%) are about equally likely to support overturning Roe v. Wade.
- Respondents who attend religious services once a week or more often (52%) and those who attend once or twice a month (40%) are far more likely than those who attend a few times a year (13%) or never (15%) to support overturning Roe v. Wade.

Support Supreme Court Overturning Roe v. Wade - September 2020 - By Demographics

Potential Political Changes

In response to President Trump's decision to appoint a new Justice immediately, some Democrats have proposed several possible political responses including abolishing the electoral college, abolishing the Senate filibuster, and expanding the number of Justices on the Supreme Court, commonly known as "court packing."

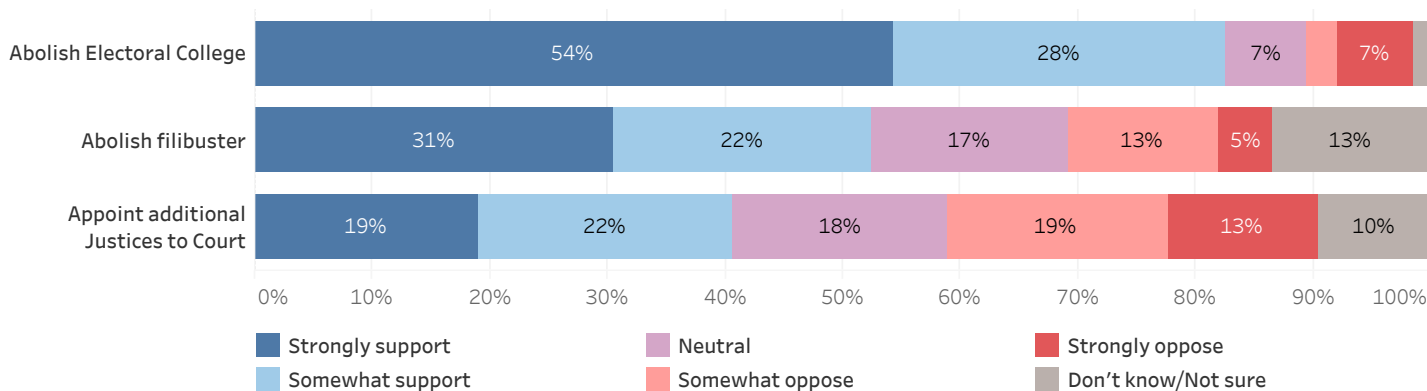

Joe Biden supporters were asked if they supported or opposed these proposed changes. There is widespread support for abolishing the Electoral College - 83% of Biden supporters strongly (54%) or somewhat (28%) support its abolition, 9% strongly (7%) or somewhat (2%) oppose it, 7% are neutral, and 1% don't know or are unsure.

Support is more tepid for abolishing the filibuster, the requirement that 60 U.S. Senators agree to end debate on a bill in order for a vote to be called - just over half (52%) of Biden supporters strongly (31%) or somewhat (22%) support abolishing it, 18% strongly (5%) or somewhat (13%) oppose abolishing it, 17% are neutral, and 13% don't know or are unsure.

Biden supporters are split on the idea of increasing the number of Justices on the Supreme Court - 41% strongly (19%) or somewhat (22%) support this move, 32% are strongly (13%) or somewhat (19%) opposed, 18% are neutral, and 10% don't know or are unsure.

Among Biden supporters, support for each of these political reforms is higher among self-described liberals and women than among self-described conservatives, moderates, and men.

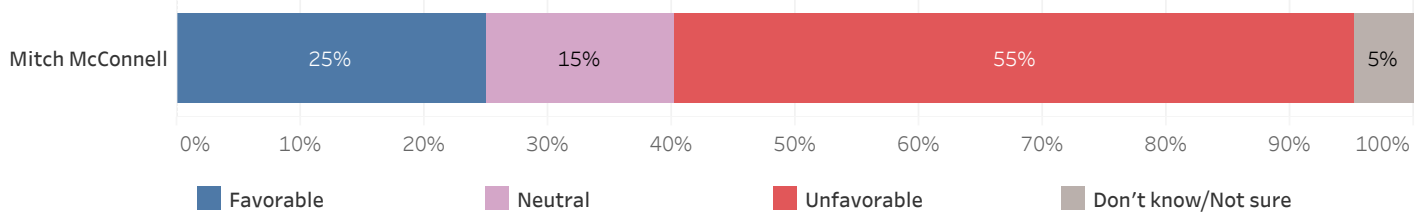

Support or Oppose Following Political Reforms - Among Biden Supporters - September 2020

National Figures Favorability

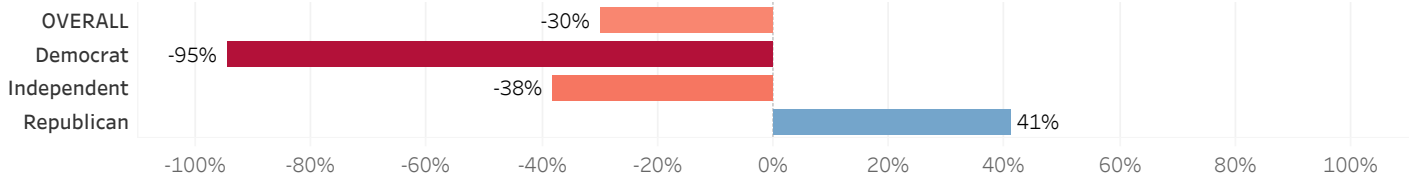

Kentucky Republican Senator and Senate Majority Leader Mitch McConnell is quite unpopular in New Hampshire - 25% have a favorable opinion of McConnell, 55% have an unfavorable opinion of him, 15% are neutral, and 5% don't know or are unsure.

McConnell (R) Favorability - September 2020

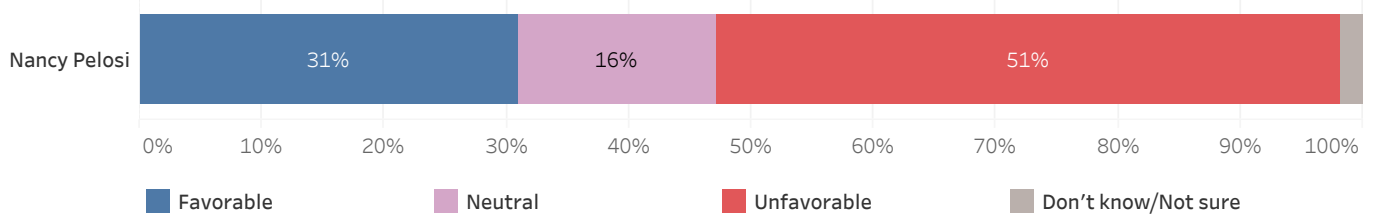

McConnell's net favorability rating (the percentage with a favorable opinion minus the percentage with an unfavorable opinion) is -30%, a good deal lower than impressions of Donald Trump (-12%). McConnell is popular among Republicans (+41%) but unpopular among Independents (-38%) and very unpopular among Democrats (-95%).

McConnell (R) Net Favorability - September 2020 - By Party ID

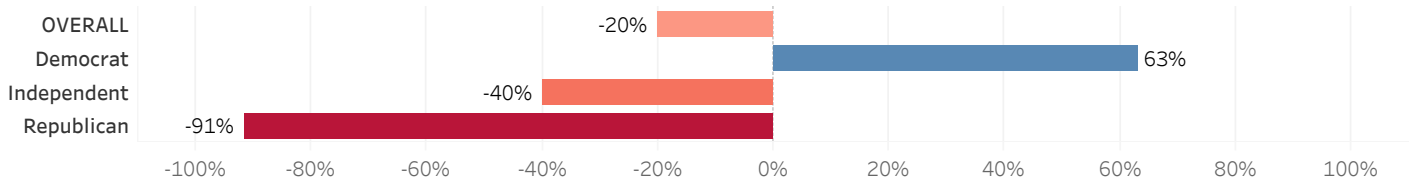

California Democratic Representative and Speaker of the House of Representatives Nancy Pelosi is also unpopular in New Hampshire - 31% have a favorable opinion of Pelosi, 51% have an unfavorable opinion of her, 16% are neutral, and 2% don't know or are unsure.

Pelosi (D) Favorability - September 2020

Pelosi's net favorability rating (the percentage with a favorable opinion minus the percentage with an unfavorable opinion) is -20%, a good deal lower than impressions of Democratic presidential nominee Joe Biden (-3%). Pelosi is popular among Democrats (+63%) but unpopular among Independents (-40%) and very unpopular among Republicans (-91%).

Pelosi (D) Favorability - September 2020 - By Party ID

Granite State Poll Methodology

These findings are based on the latest Granite State Poll, conducted by the University of New Hampshire Survey Center. One thousand and thirty (1,030) Granite State Panel members completed the survey online between September 24 and September 28, 2020. The margin of sampling error for the survey is +/- 3.1 percent. Included were 972 likely 2020 general election voters (MSE = +/- 3.1%). These MSE's have not been adjusted for design effect. The response rate for the September 2020 Granite State Poll is 37%. The design effect for the survey is 2.5%.

Data were weighted by respondent sex, age, education, and region of the state to targets from the most recent American Community Survey (ACS) conducted by the U.S. Census Bureau, as well as party registration levels provided by the New Hampshire Secretary of State and to 2016 election results in New Hampshire.

The Granite State Panel is part of an effort by the University of New Hampshire Survey Center to investigate new ways of gathering and understanding the opinion of New Hampshire residents. Approximately 5,750 New Hampshire adults were recruited from randomly selected landline and cell phone numbers to participate in the panel. Panelists are then asked to participate in online surveys sponsored by the UNH Survey Center.

The number of respondents in each demographic below may not equal the number reported in cross-tabulation tables as some respondents choose not to answer some questions. Due to rounding, percentages may not sum to 100%.

For more information about the methodology used in the Granite State Panel, contact Dr. Andrew Smith at (603) 862-2226 or by email..
