Two-Mile Snowshoe Race Won by Pease, N. H., 20

TWO-MILE BARTON TIME RECORDS SET BY MICHELSO

In a cross-country event at the University of Vermont on Sunday, the Vermontian made the fastest two-mile time on record in Vermont and the fastest two-mile time in the New England ski association with his time of 20 minutes, 16 seconds. The Vermontian was the fastest two-mile time ever set in the New England ski association with his time of 20 minutes, 16 seconds. The Vermontian was the fastest two-mile time ever set in the New England ski association with his time of 20 minutes, 16 seconds. The Vermontian was the fastest two-mile time ever set in the New England ski association with his time of 20 minutes, 16 seconds.

New Hampshire is listed third in the Intercollegiate Ski and Snowshoe Meet held recently in the Southern New England Winter Carnival at the Dartmouth Outing Club, and Dartmouth College again received the second place in the ski meet.

In the ski obstacle race, the New Hampshire men, led by Captain Metcalf and McKinley, won the first place with a total score of 5,500 points, with McGill second with 4,500 points, and the Dartmouth men third with 3,500 points.

The jumping contest was won by T. D. Frost, Dartmouth, '25, with R. G. Towne, Harvard, second, and R. D. Drake, Colby, third.

NEW PLAYS

AT THE LIBRARY

New plays are being prepared for production, and the author is at work on the script. The new plays are entitled "The Merchant of Venice," "The Lady of Shalott," and "The Merry Wives of Windsor." The author has been working on these plays for the past few months, and is expected to complete them by the end of the month.

Choice of a Career

From the Yule News

The VINTAGE FOUR

Someone, probably an insurance agent, was recently seen saying that from the mass of one hundred college graduates one individual only rose to the Pole and Harvard, per­fect near the top of the financial bul­letin. Five others became comfortably well-off and found themselves after twenty years in the small yachts and chauffeur cars. The other sixty-four person­ally congregate in the great sections of the American people, die their days, and never live to tell of the glorious days, dreaming about being rich and successful. The idea of a college degree is something else again.

Waller told us he had only a hammer as a weapon. Their success is based on a far different order of things. They are the people who, by sheer courage and ability, work their way to the top. A college degree is useful to mankind.

Between now and Commencement, let us consider the question of "Careers." Of all the other choices, this one is the most important.

For this he was sent to prison

Roger Bacon may not have invented gun­powder, as has been claimed by some biogra­phers of the famous Franciscan friar, but he exploded some of the outstanding errors of the Middle Ages, by the act of his advanced teachings, Bacon spent many years of his life in prison.

In an age of abstract speculation, he boldly asserted the motions of the planets on the basis of advanced mathematical calculation, he showed, he must be verified by ex­periment, which discovers truths that specu­lation cannot.

In the Research Laboratories of the Gen­eral Electric Company, Bacon’s principles are followed in every experimental investi­gation. The gas-filled electric lamp and the electron tube were worked out on paper, but it was experimental verification of the underlying mathematical theory that showed they were feasible.

And therein lies the secret of Bacon’s pres­ence of mind and the exactness of his reasoning—first, the abstract truth, and next, the concrete verification.
