DURHAM, NH - Having just been re-elected, Senator Jeanne Shaheen is the most popular member of New Hampshire's congressional delegation. Ahead of a re-election battle in 2022, New Hampshire residents are divided in their opinion of Senator Maggie Hassan, whose popularity has fallen somewhat. Congressman Chris Pappas is somewhat popular in the First District while Second District residents are divided on their opinion of Congresswoman Ann Kuster.

These findings are based on the latest **Granite State Poll\***, conducted by the University of New Hampshire Survey Center. Two thousand and twenty-five (2,025) Granite State Panel members completed the survey online between January 21 and January 25, 2021. The margin of sampling error for the survey is +/- 2.2 percent. Included in the sample were 980 residents of New Hampshire's First Congressional District (MSE +/- 3.1%) and 1,037 from the Second District (MSE +/- 3.0%). Data were weighted by respondent sex, age, education, and region of the state to targets from the most recent American Community Survey (ACS) conducted by the U.S. Census Bureau, as well as party registration levels provided by the NH Secretary of State and 2020 election results in NH. Granite State Panel members are recruited from randomly-selected landline and cell phone numbers across New Hampshire and surveys are sent periodically to panel members.

### Favorability - Jeanne Shaheen

New Hampshire senior Senator Jeanne Shaheen was comfortably re-elected in November 2020 and continues to be modestly popular in the state. ## Granite State Poll Methodology

These findings are based on the latest Granite State Poll, conducted by the University of New Hampshire Survey Center. Two thousand and twenty-five (2,025) Granite State Panel members completed the survey online between January 21 and January 25, 2021. The margin of sampling error for the survey is +/- 2.2 percent. Included in the sample were 980 residents of New Hampshire's First Congressional District (MSE +/- 3.1%) and 1,037 from the Second District (MSE +/- 3.0%). These MSE's have not been adjusted for design effect. The response rate for the January 2021 Granite State Poll is 36%. The design effect for the survey is 2.5%.

Data were weighted by respondent sex, age, education, and region of the state to targets from the most recent American Community Survey (ACS) conducted by the U.S. Census Bureau, as well as party registration levels provided by the NH Secretary of State and to 2020 election results in New Hampshire.

The Granite State Panel is part of an effort by the University of New Hampshire Survey Center to investigate new ways of gathering and understanding the opinion of New Hampshire residents. Approximately 5,750 New Hampshire adults were recruited from randomly selected landline and cell phone numbers to participate in the panel. Panelists are then asked to participate in online surveys sponsored by the UNH Survey Center.

The number of respondents in each demographic below may not equal the number reported in cross-tabulation tables as some respondents choose not to answer some questions. Due to rounding, percentages may not sum to 100%.
