DURHAM, NH - One-third of Granite Staters report receiving at least one dose of a COVID-19 vaccine, including more than four in five residents aged 65 and older, but about one-quarter say they will probably or definitely not get vaccinated. The vast majority of those who have received a shot report mild side effects or none at all. About half of those who plan to get vaccinated have a preferred vaccine, but most would take whatever vaccine was available if they could not get their preferred one. More than three-quarters of those who have received at least one dose of the COVID-19 vaccine or signed up for one (prior to 3/22) say scheduling the appointment was easy.

These findings are based on the latest **Granite State Poll\***, conducted by the University of New Hampshire Survey Center. One thousand seven hundred and forty-four (1,744) Granite State Panel members completed the survey online between March 18 and March 22, 2021. The margin of sampling error for the survey is +/- 2.3 percent. Data were weighted by respondent sex, age, education, and region of the state to targets from the most recent American Community Survey (ACS) conducted by the U.S. Census Bureau, as well as party registration levels provided by the NH Secretary of State and 2020 election results in NH. Granite State Panel members are recruited from randomly-selected landline and cell phone numbers across New Hampshire and surveys are sent periodically to panel members.

### Likelihood of Getting COVID-19 Vaccine

Nearly three-quarters (72%) of New Hampshire residents say they almost certainly (27%) or probably (5%) will get vaccinated when a COVID-19 vaccine is offered to them or say they have already received at least one dose of the vaccine (35%) or have scheduled an appointment (5%). A quarter (25%) say they will probably not (8%) or almost certainly not (17%) get the vaccine when it is offered to them, while 3% are unsure. The percentage who say that they will almost certainly or probably get the vaccine or already have (72%) is largely unchanged since February (73%).

Likelihood of Getting Vaccinated When COVID-19 Vaccine is Offered

\* We ask that this copyrighted information be referred to as *the Granite State Panel*, conducted by the University of New Hampshire Survey Center.

Respondents who voted for Donald Trump in 2020, North Country and Connecticut Valley residents, self-identified Republicans, self-described conservatives, those aged 35 to 49, and those with a high school education or less are most likely to say they almost certainly or probably will not get vaccinated when the COVID-19 vaccine is offered to them.

### Almost Certainly Not or Probably Not Get Vaccinated When COVID-19 Vaccine is Offered - By Demographics - March 2021

- Democrats (40%) and Independents (37%) are slightly more likely than Republicans (30%) to say they are partially or fully vaccinated against COVID-19.
- More than four in five (82%) Granite Staters aged 65 and older say they are partially or fully vaccinated against COVID-19, while far fewer younger respondents say so.
- Women (38%) are slightly more likely than men (31%) to say they are partially or fully vaccinated against COVID-19.
- Nearly half (46%) of Granite Staters who have completed postgraduate work say they are partially or fully vaccinated against COVID-19 while those with lower levels of education are less likely to say so.
- Granite Staters who identify as Caucasian or White (37%) are slightly more likely than those who identify as any other racial or ethnic group (26%) to say they are partially or fully vaccinated against COVID-19.

### Partially or Fully Vaccinated Against COVID-19 - Change from February 2021 to March 2021

One-third (33%) of Granite Staters think it is very (17%) or somewhat (16%) likely that they already have had or currently have COVID-19, 23% think it is not very likely they had or have it, 39% think it is not at all likely, and 6% are unsure.

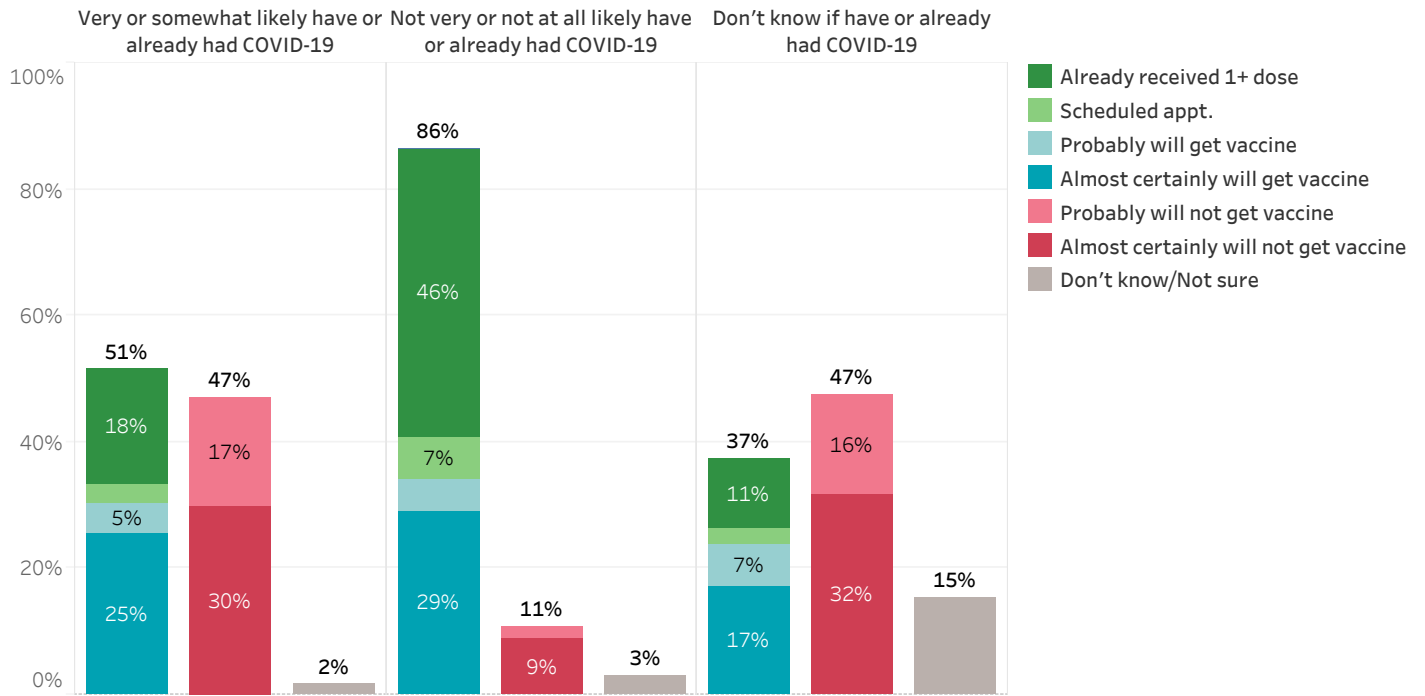

Those who identify as Non-White/Caucasian, those aged 18 to 34, Central/Lakes Region residents, self-identified Independents, and those with a high school education or less are most likely to think it is very or somewhat likely that they already have had or currently have COVID-19.

**Likelihood Self Already Had or Currently Has COVID-19 - March 2021**

Among those who think it is very or somewhat likely that they have already had COVID-19 or have it now, nearly half (47%) say they will probably not or almost certainly not get vaccinated when it is available to them and only 18% have already received at least one dose of the vaccine. By contrast, only 11% of those who think it is not very or not at all likely that they have already had COVID-19 say they will probably not or certainly not get vaccinated and nearly half (46%) have already received at least one dose.

**Likelihood of Getting Vaccinated When COVID-19 Vaccine is Offered - By Likelihood Had or Currently Have COVID-19 - March 2021**

Nearly all (95%) Granite Staters say that they know someone who has received at least one dose of a COVID-19 vaccine. However, among the small number who do not know anyone who has received the vaccine (5%), more than three-quarters (76%) say they will probably not or certainly not get vaccinated against COVID-19.

**Likelihood of Getting Vaccinated When COVID-19 Vaccine is Offered - By Know Anyone Who Has Received 1+ Dose - March 2021**

Among those who have received at least one dose of a COVID-19 vaccine (N=603), only 3% describe the side effects as serious or very serious. Seventeen percent describe the side effects as moderate, half (50%) describe them as mild (15%) or very mild (35%), and 30% say they experienced no side effects at all. Respondents are slightly more likely than they were in February to describe the side effects as mild, very mild, or non-existent.

Among those who have received at least one dose of a COVID-19 vaccine, those aged 35 to 49 are far more likely than others to describe the side effects as moderate, serious, or very serious.

### How Describe Side Effects as a Result of Receiving a COVID-19 Vaccine

### Concerns About the COVID-19 Vaccine

Just under three-quarters of New Hampshire residents say they are very or somewhat confident that the COVID-19 vaccine will stop them from getting sick with COVID-19 (73%), that the vaccine will be safe (72%), and that the vaccine has gone through an appropriate approval process (67%). Sixty-two percent are very or somewhat confident that the vaccine will have few or minimal side effects, 56% are confident it will provide long-lasting protection against COVID-19, and 52% are confident it will remain effective against COVID-19 mutations.

### Confidence in Aspects of COVID-19 Vaccine - March 2021

New Hampshire residents are slightly more confident that the COVID-19 vaccines will remain effective against COVID-19 mutations (+5 percentage points) than they were in February. Otherwise, confidence in these aspects of the vaccine is largely unchanged.

### Confidence in Aspects of COVID-19 Vaccine

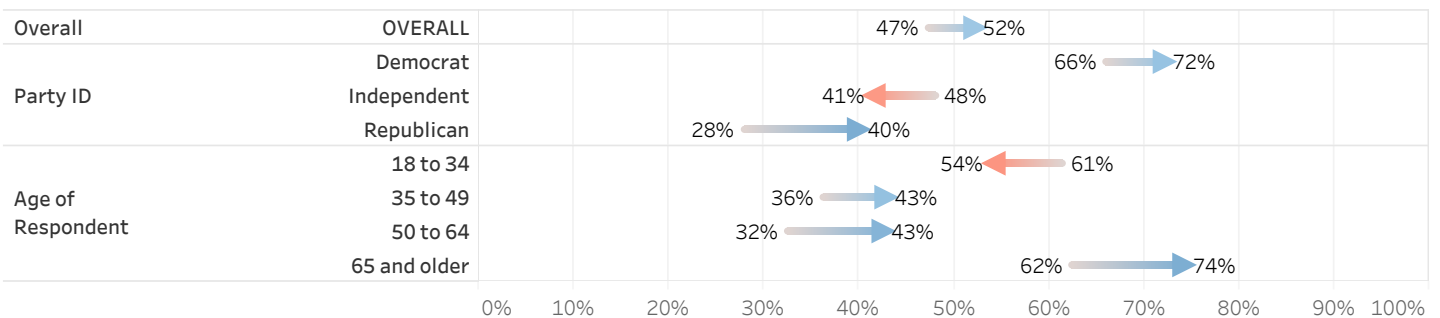

Overall, 62% of Granite Staters are very or somewhat confident that the COVID-19 vaccines will have few or minimal side effects, unchanged since February. Democrats (86%) remain far more likely than Independents (55%) and Republicans (45%) to believe this to be the case. Respondents aged 65 and over (85%) are more likely than younger respondents to be very or somewhat confident that this is the case.

#### Very or Somewhat Confident COVID-19 Vaccine Will Have Few or Minimal Side Effects - Change from February 2021 to March 2021

Overall, 52% of Granite Staters are very or somewhat confident that the COVID-19 vaccines will remain effective against mutations, up from 47% in February. Democrats (72%) remain far more likely than Independents (41%) and Republicans (40%) to believe this. Respondents aged 65 and over (74%) are more likely than younger respondents to be very or somewhat confident about this.

#### Confidence COVID-19 Vaccine Will Remain Effective Against Mutations - Change from February 2021 to March 2021

Among those who have not yet received a dose of a COVID-19 vaccine but plan to get vaccinated when it is offered to them (N=708), 44% say they have a preference of which vaccine they would like to receive, 39% say they don't have a preference, and 17% are unsure.

**Have Preference For Which COVID-19 Vaccine to Receive - March 2021**

Among those who have not yet received a dose of a COVID-19 vaccine but plan to get vaccinated when it is offered to them, those aged 50 to 64, those with a household income of \$150,000 or more, and Massachusetts Border residents are more likely than others to say that they have a preference of which vaccine they would like to receive. Those who identify as non-white/Caucasian, those aged 18 to 34, Central/Lakes Region residents, and those who went to technical school or have some college education are less likely to say so.

**Have Preference For Which COVID-19 Vaccine to Receive - By Demographics - March 2021**

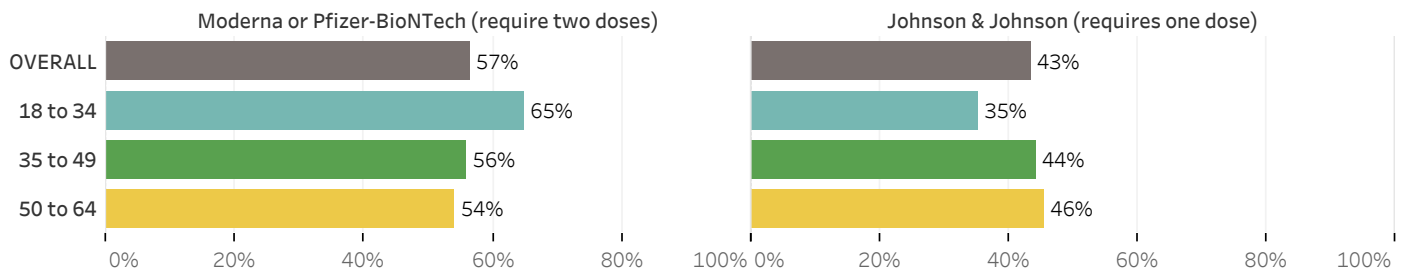

Among those who have a preference for a vaccine (N=310), 43% say they prefer the Johnson & Johnson vaccine (requires one dose), 29% prefer the Pfizer-BioNTech vaccine (requires two doses), 27% prefer the Moderna vaccine (requires two doses), and less than 1% are unsure.

**Preferred COVID-19 Vaccine - March 2021**

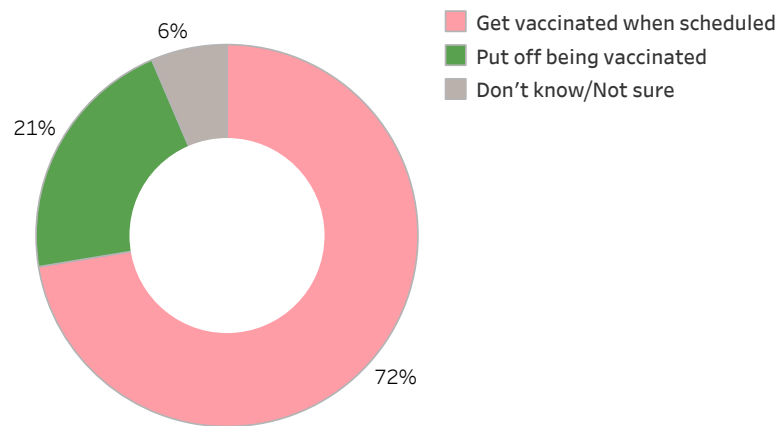

Granite Staters aged 18 to 34 are more likely than those aged 35 to 64 to prefer the Moderna or Pfizer-BioNTech vaccine.

### Preferred COVID-19 Vaccine - by Age - March 2021

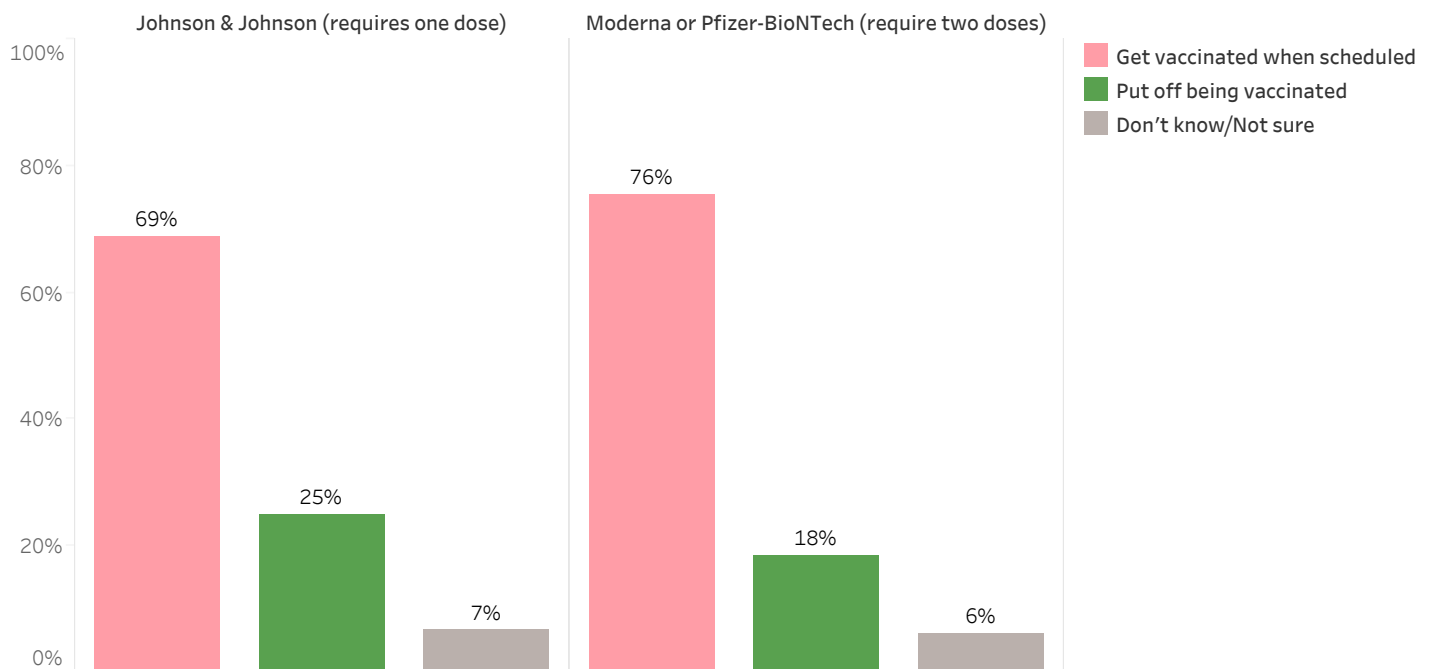

Among those who have a preference of which vaccine they receive (N=310), nearly three-quarters (72%) say that they would get vaccinated when scheduled even if their preferred vaccine was not available, 21% say they would put off being vaccinated in order to receive the vaccine they prefer, and 6% don't know or are unsure.

### Decision if Preferred Vaccine is Not Available When Scheduled to Receive Vaccine - March 2021

Among those who prefer to receive the Johnson & Johnson vaccine, a quarter (25%) say they would put off being vaccinated in order to receive the vaccine they prefer, very slightly higher than among those who would prefer the Moderna or Pfizer-BioNTech vaccines.

### Decision if Preferred Vaccine is Not Available When Scheduled to Receive Vaccine - by Preferred Vaccine - March 2021

Among those who have received at least one dose of a COVID-19 vaccine or scheduled an appointment to do so before March 22 (N=693), 45% say they found it very easy to sign up for their appointment(s), 32% say it was somewhat easy, 14% say it was somewhat difficult, 7% say it was very difficult, and 2% don't know or are unsure.

Among individuals who found the process difficult to navigate, difficulties included getting an appointment for the second vaccine within the recommended timeframe, lack of simplicity in the computer sign up process, and long wait times calling 211 for help.

**Ease of Signing Up for COVID-19 Vaccination Appointment(s) - March 2021**

Among those who plan to get vaccinated when it is available but have not yet made an appointment to do so (N=617), 80% say they understand very well (39%) or somewhat well (41%) when they will be eligible to receive a COVID-19 vaccine. Fifteen percent say they don't understand very well when they will be eligible and 5% say they do not understand at all well. Those aged 50 to 64 (88%) and those aged 18 to 34 (79%) are more likely than those aged 35 to 49 (59%) to say they understand very or somewhat well when they will be eligible to receive a COVID-19 vaccine.

**How Well Understand When Will be Eligible to Receive COVID-19 Vaccine - March 2021**

Among those who plan to get vaccinated when it is available but have not yet made an appointment to do so (N=617), 62% say they understand very (28%) or somewhat (34%) well how to sign up for their COVID-19 vaccination appointment(s). Twenty-nine percent say they don't understand very well how to sign up and 8% say they don't understand at all well how to do so. Four in five (80%) respondents aged 50 to 64 say they understand very or somewhat well how to sign up for their COVID-19 vaccination appointment(s) but only 59% of those aged 35 to 49 and 47% of those aged 18 to 34 understand very or somewhat well.

**How Well Understand How to Sign Up for COVID-19 Vaccination Appointments - March 2021**

## Granite State Poll Methodology

These findings are based on the latest Granite State Poll, conducted by the University of New Hampshire Survey Center. One thousand seven hundred and forty-four (1,744) Granite State Panel members completed the survey online between March 18 and March 22, 2021. The margin of sampling error for the survey is +/- 2.3 percent. These MSE's have not been adjusted for design effect. The response rate for the March 2021 Granite State Poll is 30%. The design effect for the survey is 2.7%.

Data were weighted by respondent sex, age, education, and region of the state to targets from the most recent American Community Survey (ACS) conducted by the U.S. Census Bureau, as well as party registration levels provided by the NH Secretary of State and to 2020 election results in New Hampshire.

The Granite State Panel is part of an effort by the University of New Hampshire Survey Center to investigate new ways of gathering and understanding the opinion of New Hampshire residents. Approximately 5,750 New Hampshire adults were recruited from randomly selected landline and cell phone numbers to participate in the panel. Panelists are then asked to participate in online surveys sponsored by the UNH Survey Center.

The number of respondents in each demographic below may not equal the number reported in cross-tabulation tables as some respondents choose not to answer some questions. Due to rounding, percentages may not sum to 100%.

For more information about the methodology used in the Granite State Panel, contact Dr. Andrew Smith at (603) 862-2226 or by email at [andrew.smith@unh.edu](mailto:andrew.smith@unh.edu).

### Granite State Poll, March 2021 Demographics

		%	N
Gender of Respondent	Men	49%	841
	Women	51%	872
Age of Respondent	18 to 34	27%	462
	35 to 49	20%	339
	50 to 64	33%	575
	65 and older	21%	357
Level of Education	High school or less	36%	624
	Tech school/Some college	31%	535
	College graduate	21%	361
	Postgraduate work	13%	220
Region of State	Central/Lakes	17%	301
	Connecticut Valley	16%	270
	Manchester Area	17%	298
	Mass Border	27%	460
	North Country	8%	138
	Seacoast	16%	270
Party ID	Democrat	41%	696
	Independent	18%	300
	Republican	41%	703
Voting Registration	Registered Democrat	28%	480
	Registered Undeclared/Not Reg.	42%	720
	Registered Republican	30%	502
2020 Presidential Vote	Voted for Biden	52%	898
	Voted for Trump	45%	773
	Voted for other 2020 candidate	2%	28
	Did not vote in 2020	2%	35
Children in Household	Children in household	30%	529
	No children in household	70%	1,208
Race/Ethnic Identification	Identify as Caucasian/White	93%	1,552
	Identify as Non-White	7%	125

### Likelihood of Getting Vaccinated When COVID-19 Vaccine is Offered

How likely is it that you will get vaccinated when a COVID-19 vaccine is offered to you?

	<u>Already received 1+ dose</u>	<u>Scheduled appt.</u>	<u>Almost certainly will get vaccine</u>	<u>Probably will get vaccine</u>	<u>Probably will not get vaccine</u>	<u>Almost certainly will not get vaccine</u>	<u>Don't know/Not sure</u>	<u>N</u>
December 2020			42%	19%	10%	21%	8%	1,834
January 2021	6%		57%	12%	5%	17%	3%	2,023
February 2021	19%		44%	10%	6%	18%	3%	1,861
March 2021	35%	5%	27%	5%	8%	17%	3%	1,742

### How Describe Side Effects as a Result of Receiving a COVID-19 Vaccine

How would you describe the side effects, if any, you felt as a result of receiving a COVID-19 vaccine?

	<u>Very serious</u>	<u>Serious</u>	<u>Moderate</u>	<u>Mild</u>	<u>Very mild</u>	<u>None at all</u>	<u>Don't know/Can't remember</u>	<u>N</u>
February 2021	1%	3%	24%	12%	31%	29%	0%	360
March 2021	0%	3%	17%	15%	35%	30%	0%	603

### Confidence COVID-19 Vaccine Will Stop People Getting Sick with COVID-19

Now that some vaccines have been approved for general use for COVID-19, how confident are you it will stop me from getting sick with COVID-19?

	<u>Very confident</u>	<u>Somewhat confident</u>	<u>Not very confident</u>	<u>Not at all confident</u>	<u>Don't know/Not sure</u>	<u>N</u>
December 2020	17%	45%	17%	12%	8%	1,850
January 2021	30%	44%	12%	11%	4%	1,975
February 2021	30%	42%	11%	12%	5%	1,854
March 2021	36%	37%	10%	13%	4%	1,737

### Confidence COVID-19 Vaccine Will Provide Long-Lasting Protection

Now that some vaccines have been approved for general use for COVID-19, how confident are you it will provide long-lasting protection against COVID-19?

	<u>Very confident</u>	<u>Somewhat confident</u>	<u>Not very confident</u>	<u>Not at all confident</u>	<u>Don't know/Not sure</u>	<u>N</u>
December 2020	8%	41%	25%	14%	12%	1,862
January 2021	16%	42%	16%	16%	10%	2,011
February 2021	16%	38%	18%	18%	10%	1,830
March 2021	14%	42%	16%	17%	11%	1,738

### Confidence COVID-19 Vaccine Will Be Safe

Now that some vaccines have been approved for general use for COVID-19, how confident are you it will be safe?

	<u>Very confident</u>	<u>Somewhat confident</u>	<u>Not very confident</u>	<u>Not at all confident</u>	<u>Don't know/Not sure</u>	<u>N</u>
December 2020	19%	40%	24%	13%	5%	1,856
January 2021	35%	38%	10%	13%	4%	2,000
February 2021	40%	31%	12%	14%	3%	1,840
March 2021	39%	32%	11%	13%	4%	1,731

### Confidence COVID-19 Vaccine Will Have Few or Minimal Side Effects

Now that some vaccines have been approved for general use for COVID-19, how confident are you it will have few or minimal side effects?

	<u>Very confident</u>	<u>Somewhat confident</u>	<u>Not very confident</u>	<u>Not at all confident</u>	<u>Don't know/Not sure</u>	<u>N</u>
December 2020	10%	35%	28%	19%	8%	1,862
January 2021	25%	39%	12%	16%	8%	2,011
February 2021	26%	36%	15%	18%	5%	1,853
March 2021	28%	33%	15%	17%	6%	1,743

### Confidence COVID-19 Vaccine Will Have Gone Through an Appropriate Approval Process

Now that some vaccines have been approved for general use for COVID-19, how confident are you it will have gone through an appropriate approval process?

	<u>Very confident</u>	<u>Somewhat confident</u>	<u>Not very confident</u>	<u>Not at all confident</u>	<u>Don't know/Not sure</u>	<u>N</u>
December 2020	24%	34%	18%	20%	4%	1,861
January 2021	36%	35%	10%	15%	3%	2,004
February 2021	39%	31%	12%	16%	2%	1,853
March 2021	41%	25%	15%	17%	1%	1,742

### Confidence COVID-19 Vaccine Will Remain Effective Against Mutations

Now that some vaccines have been approved for general use for COVID-19, how confident are you it will remain effective against COVID-19 mutations?

	<u>Very confident</u>	<u>Somewhat confident</u>	<u>Not very confident</u>	<u>Not at all confident</u>	<u>Don't know/Not sure</u>	<u>N</u>
January 2021	12%	39%	19%	17%	13%	2,014
February 2021	10%	37%	21%	20%	11%	1,856
March 2021	12%	40%	20%	19%	8%	1,743

### Likelihood Self Already Had or Currently Has COVID-19

How likely do you think it is that you already had (or currently have) COVID-19?

	<u>Very likely</u>	<u>Somewhat likely</u>	<u>Not Very likely</u>	<u>Not at All likely</u>	<u>Don't Know</u>	<u>N</u>
March 2021	17%	16%	23%	39%	6%	1,744

### Know Anyone Who Has Received at Least One Dose of COVID-19 Vaccine

Do you know anyone who has received at least the first dose of a COVID-19 vaccine?

	<u>Yes</u>	<u>No</u>	<u>N</u>
January 2021	68%	32%	2,024
February 2021	89%	11%	1,861
March 2021	95%	5%	1,744

### Have Preference For Which COVID-19 Vaccine to Receive

Do you have a preference for which of the COVID-19 vaccines you would like to receive?

	<u>Yes</u>	<u>No</u>	<u>Don't know/Not sure</u>	<u>N</u>
March 2021	44%	39%	17%	708

### Preferred COVID-19 Vaccine

Which vaccine would you prefer to receive?

	<u>Johnson &amp; Johnson (requires one dose)</u>	<u>Moderna (requires two doses)</u>	<u>Pfizer-BioNTech (requires two doses)</u>	<u>Don't know/Not sure</u>	<u>N</u>
March 2021	43%	27%	29%	0%	310

### Decision if Preferred Vaccine is Not Available When Scheduled to Receive Vaccine

If the vaccine you prefer is not available when you are scheduled to receive the vaccine, what would you do?

	<u>Get vaccinated when scheduled even if the vaccine you prefer isn't available</u>	<u>Put off being vaccinated in order to receive the vaccine you prefer</u>	<u>Don't know/Not sure</u>	<u>N</u>
March 2021	72%	21%	6%	309

### Have Signed Up for an Appointment to Receive COVID-19 Vaccine

Have you signed up for an appointment to receive a COVID-19 vaccine?

	<u>Yes</u>	<u>No</u>	<u>Don't know/Not sure</u>	<u>N</u>
March 2021	13%	86%	1%	708

### Ease of Signing Up for COVID-19 Vaccination Appointment(s)

How easy or difficult did you find it to sign up for your COVID-19 vaccination appointment(s)?

	<u>Very easy</u>	<u>Somewhat easy</u>	<u>Somewhat difficult</u>	<u>Very difficult</u>	<u>Don't know/Not sure</u>	<u>N</u>
March 2021	45%	32%	14%	7%	2%	693

### How Well Understand When Will be Eligible to Receive COVID-19 Vaccine

How well do you understand when you will be eligible to receive a COVID-19 vaccine?

	<u>Very well</u>	<u>Somewhat well</u>	<u>Not very well</u>	<u>Not at all well</u>	<u>N</u>
March 2021	39%	41%	15%	5%	617

### How Well Understand How to Sign Up for COVID-19 Vaccination Appointments

How well do you understand how to sign up for your COVID-19 vaccination appointment(s)?

	<u>Very well</u>	<u>Somewhat well</u>	<u>Not very well</u>	<u>Not at all well</u>	<u>N</u>
March 2021	28%	34%	29%	8%	617

### Likelihood of Getting Vaccinated When COVID-19 Vaccine is Offered

		<u>Already received 1+ dose</u>	<u>Scheduled appt.</u>	<u>Almost certainly will get vaccine</u>	<u>Probably will get vaccine</u>	<u>Probably will not get vaccine</u>	<u>Almost certainly will not get vaccine</u>	<u>Don't know/Not sure</u>	<u>N</u>
