DURHAM, NH - President Joe Biden's job approval rating in New Hampshire is holding steady. Only one-third of New Hampshire residents say they want Biden to run again in 2024 and even fewer want former President Donald Trump to run again.

These findings are based on the latest **Granite State Poll***, conducted by the University of New Hampshire Survey Center. One thousand nine hundred and forty-two (1,942) Granite State Panel members completed the survey online between April 16 and April 20, 2021. The margin of sampling error for the survey is +/- 2.2 percent. Data were weighted by respondent sex, age, education, and region of the state to targets from the most recent American Community Survey (ACS) conducted by the U.S. Census Bureau, as well as party registration levels provided by the NH Secretary of State and 2020 election results in NH. Granite State Panel members are recruited from randomly-selected landline and cell phone numbers across New Hampshire and surveys are sent periodically to panel members.

Presidential Approval

President Joe Biden's approval rating in New Hampshire is essentially unchanged since March, with just over half (51%) of Granite Staters approving of Biden's performance as president while 47% disapprove and 1% neither approve nor disapprove or don't know. Biden's net approval rating (the percentage who approve minus the percentage who disapprove) among Granite Staters is +4, slightly lower than in March (+8) and a good deal lower than in January (+18). Biden's net approval rating remains higher than former President Trump's was in May 2017 (-4) but is far lower than former President Barack Obama's in April 2009 (+34). Biden's net approval rating is +89 among Democrats but is -5 among Independents and -80 among Republicans.

Granite State Poll Methodology

These findings are based on the latest Granite State Poll, conducted by the University of New Hampshire Survey Center. One thousand nine hundred and forty-two (1,942) Granite State Panel members completed the survey online between April 16 and April 20, 2021. The margin of sampling error for the survey is +/- 2.2 percent. These MSE's have not been adjusted for design effect. The response rate for the April 2021 Granite State Poll is 32%. The design effect for the survey is 2.5%.

Data were weighted by respondent sex, age, education, and region of the state to targets from the most recent American Community Survey (ACS) conducted by the U.S. Census Bureau, as well as party registration levels provided by the NH Secretary of State and to 2020 election results in New Hampshire.

The Granite State Panel is part of an effort by the University of New Hampshire Survey Center to investigate new ways of gathering and understanding the opinion of New Hampshire residents. Approximately 6,000 New Hampshire adults were recruited from randomly selected landline and cell phone numbers to participate in the panel. Panelists are then asked to participate in online surveys sponsored by the UNH Survey Center.

The number of respondents in each demographic below may not equal the number reported in cross-tabulation tables as some respondents choose not to answer some questions. Due to rounding, percentages may not sum to 100%.
