In the mean time the other students have little or no effect on the fire. They are lucky, but what of the thousands who were not so lucky? There is probably enough water in our town to surround and drench the flames? There is probably enough water in Laconia and in the Purchase. It is a relief to us too. When the fire was by any means controlled, a few days later, with the knowledge that they are about to be built in the campus as well as the whole town, we are all experts in their part. But is this sufficient? It is absurd to suppose that the university, one fire truck which is not an introduction to my theme, for the people of the state. Do what Toledo did

Once Toledo had a nuisance, a tract of swamp land near the lake, a breeder of mosquitoes, foul odors and logs. But an automatic pumping station, equipped with motors and pumps, was installed. The Company, turned the swamp into dry land—abandoned the menace to the city.

**PRELIMINARY INTEREST RAPID**

The enthusiasm of the V.I.M.C. for the Alumni Day program, and the reports which came during the last week have led to an early indication that on June 20th the Campus will be the scene of an event that has not been witnessed. Already 1500 members have already expressed interest in the affair, and this interest has increased so rapidly that the Scholarship Fund is going up the road.

The program will be unusual. There will be an apparatus parade, followed by a grand float and large general program. It is sure that the after dinner program will be a three ring circus.

The Card Balances for the banquet be sent out. The cards will be seated together and that the Girl's Alpha Rho and the Boys' Alpha Chi classes will be seated together and that the floor will be opened to cards.
