SUCCESSFUL SEASON FOR FROSH BARRIERS

The freshman cross-country season was one of the most successful in the history of the University. The young runners, being the first of their division to meet one of the three meets set for the New England intercollegiate and intervarsity competitions. Unquestionably other freshmen aggregations in this section have had more or better results, but the fact that only three have had any real experience is taken into consideration in the true merit of the performances. All of the three freshmen, Karl Dahlberg, '26; Roy Stewart, '26; and Natalie Moulton, '26, did some excellent work.

The opening was well started. Until October 15, when Edith School Band was due tackle the next meet at the hands of Bates College, the Frosh had been scored a win after the other. On October 31, the out-standing performances were made by Norman, who laid down the third in the Maine Intercollegiate meet and who at present is the second man in the world in his class. The latest performance was made at Lake Placid by Charles F. Dickens, '26, on November 24 and 25, for three years intercollegiate champion. The frosh star cannot be compared with a true varsity star, but he can bring the public in closer touch with the sport.

MATERIAL ON RESERVE LIST

The freshman cross-country season depends greatly on the participation of Dickson, who is the only man to have won in the country more than three times. The frosh star does not appear on the varsity list until after the Frosh has made three meets.

WINTER SPORTS START STRONG

Eleanor Conant, Leading Female Role

M. TAYLOR OR BRECK

To Be Presented in Community House on Wednesday and Thursday of Next Week, Tickets Priced at Fifty Cents.

In the first tryout play, Mask and Dagger will present "The Sorrows of Satan" on Monday and Tuesday of this week. The performances will commence at 8 p.m. sharp. The scenes of the play are laid in Yavna and Israël in the Iranian Renaissance. Unquestionably other productions aggregations in this section have had more or better results, but the fact that only three have had any real experience is taken into consideration in the true merit of the performances. All of the three freshmen, Karl Dahlberg, '26; Roy Stewart, '26; and Natalie Moulton, '26, did some excellent work.

The New Hampshire, December 3, 1925.

To the Editor:

Your very timely editorial upon "bull" is last week's main event-especially as the term was used in my paper to state that he was a "white jacket." This might seem does disparage, but it is the best way to make it clear why you are not allowed to use the term in your paper. Proctor.

New Remington Portable

-40

“THAT’s a clean, neat, intelligent piece of work”

The press work of other papers was not equal to that of the New Remington Portable. By the time that the other papers were ready to begin the first sheet, the New Remington Portable was ready. It was ready, and the other papers were not ready. The New Remington Portable is the only machine that will not be delayed by any other machine. It will work when other machines fail. It will work when other machines break down. It will work when other machines are not ready. It will work when other machines are not prepared. It will work when other machines are not designed for rapidity. It will work when other machines are not designed for legibility. It will work when other machines are not designed for speed. It will work when other machines are not designed for accuracy.

When the orchestra stops its surge of music—and the applauding couples begin to leave the floor—when you join the good fellows for jolly talk and friendship—have a Camel!

When the orchestra gives you one more encore, but fails distinctly. And the complete dressing with happiness, because you have the best. When you join the circle for jolly talk and the circle does not break up—have a Camel!

For no friend so enhances the joys of life as the New Remington Portable. New Remington Portable is the only machine that will not be delayed by any other machine. It will work when other machines fail. It will work when other machines break down. It will work when other machines are not ready. It will work when other machines are not prepared. It will work when other machines are not designed for rapidity. It will work when other machines are not designed for legibility. It will work when other machines are not designed for speed. It will work when other machines are not designed for accuracy.
