DURHAM, NH - Seven in eight Vermont adults say they are fully vaccinated against COVID-19 and more than four in five have already received a booster or plan to get one. Almost none of those who remain unvaccinated plan on receiving the vaccine, most frequently citing their beliefs that the vaccine is not safe or is not effective against contracting COVID-19. Clear majorities favor requiring large employers to ensure their employees are vaccinated or tested and requiring students aged five and older to be vaccinated to attend school. More than two-thirds of Vermonters approve of Phil Scott's handling of COVID-19 and his overall performance as Governor, with Democrats more likely than Republicans to approve.

These findings are based on the latest **Green Mountain State Poll***, conducted by the University of New Hampshire Survey Center. One thousand, five hundred and twenty-two (1,522) Vermont residents completed the survey online between November 15 and November 22, 2021. The margin of sampling error for the survey is +/- 2.5 percent. Data were weighted by respondent sex, age, education, and region of the state to targets from the most recent American Community Survey (ACS) conducted by the U.S. Census Bureau and to 2020 election results in Vermont. Vermont residents were randomly contacted through a text message to participate in the survey. Upon completing the survey, participants were invited to join the Green Mountain State Panel, through which members are asked to participate in online surveys sponsored by the UNH Survey Center.

COVID-19 Pandemic in Vermont

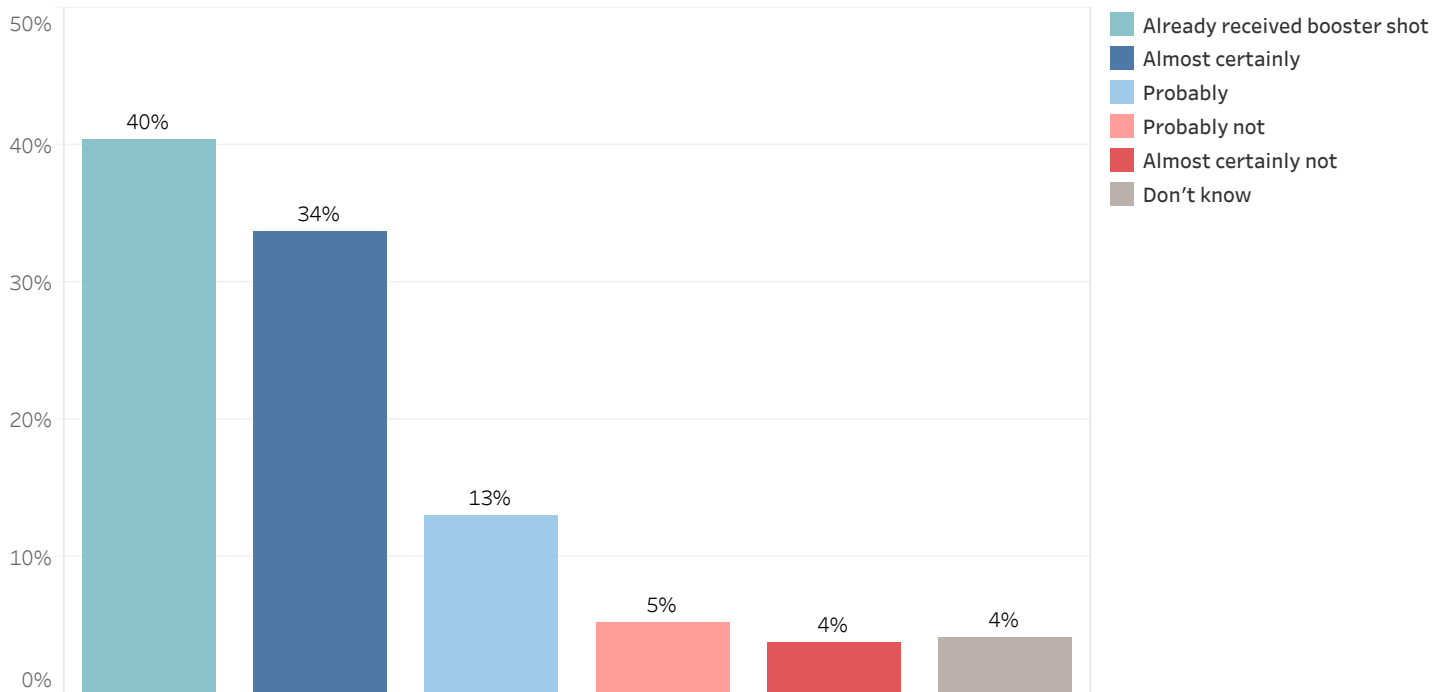

Seven in eight (88%) Vermont adults say they are fully vaccinated against COVID-19, 2% say they are partially vaccinated, and 10% say they are not vaccinated against COVID-19. Ninety-six percent of Democrats, 88% of Independents, and 71% of Republicans say they are fully vaccinated against COVID-19.

Vaccination Status - by Party ID - November 2021

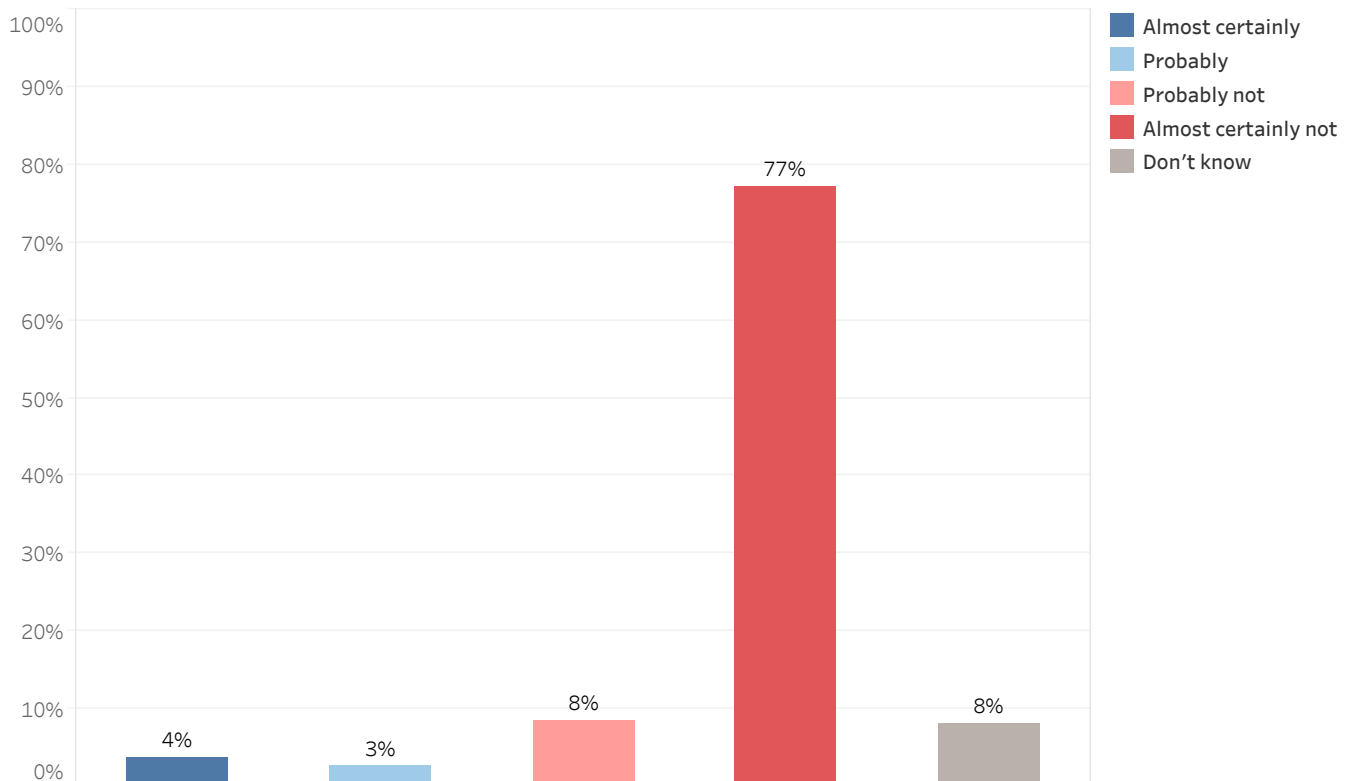

Among those who are fully or partially vaccinated (N=1,347), 40% say they have already received a booster shot of a COVID-19 vaccine, 34% say they will almost certainly get a booster, and 13% probably will. Five percent say they will probably not get a booster shot, 4% say they will almost certainly not get one, and 4% don't know. One in five vaccinated Republicans (21%) say they will probably not (11%) or almost certainly not (10%) get a COVID-19 booster, while 13% of vaccinated Independents and only 3% of vaccinated Democrats say the same.

Likelihood of Getting COVID-19 Booster Shot (Among Vaccinated) - November 2021

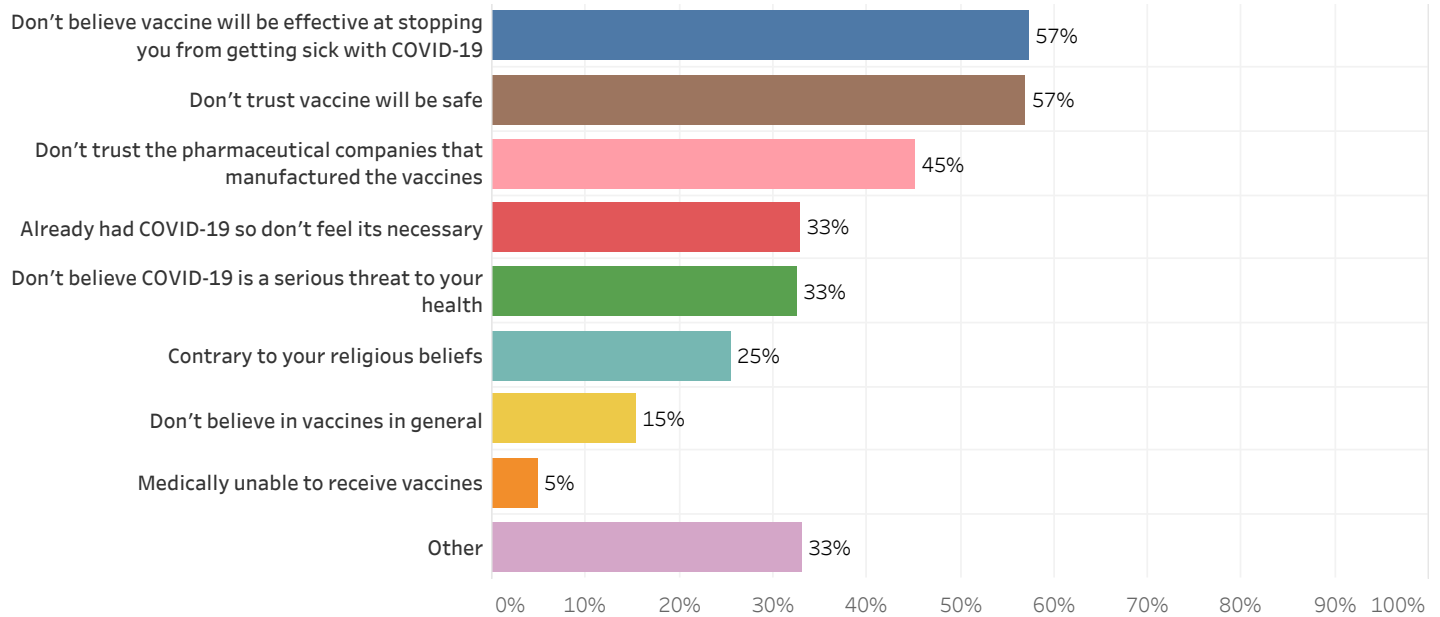

Among those who are not vaccinated against COVID-19 (N=154), only 4% say they will almost certainly get vaccinated, 3% say they probably will, 8% say they probably will not, 77% say they almost certainly will not, and 8% don't know.

Likelihood of Being Vaccinated (Among Unvaccinated) - November 2021

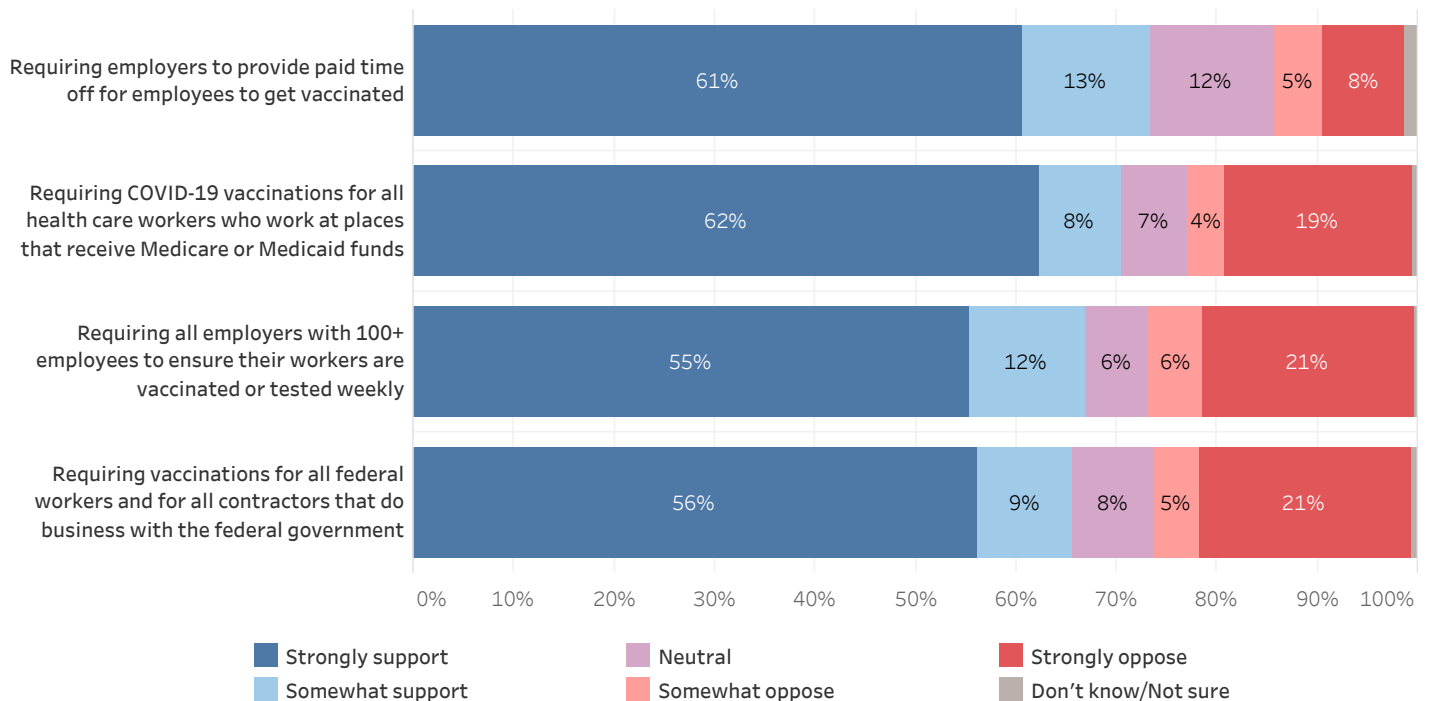

Among those say they will probably not or almost certainly not get a COVID-19 vaccine (N=114), 57% each say they don't plan to get vaccinated because they don't believe the vaccine will be effective at stopping them from getting sick with COVID-19 or because they don't trust that the vaccine will be safe, while 45% don't trust the pharmaceutical companies that manufactured the vaccines. Thirty-three percent each say they don't plan to get vaccinated because they have already had COVID-19 so they don't feel the vaccine is necessary or because they don't believe COVID-19 is a serious threat to their health, 25% say it is contrary to their religious beliefs, 15% say it is contrary to their religious beliefs, 15% don't believe in vaccines in general, 5% say they are medically unable to receive vaccines, and 33% cite another reason.

Reasons Unlikely to Get Vaccinated (Among Unvaccinated) (Select all that apply) - November 2021

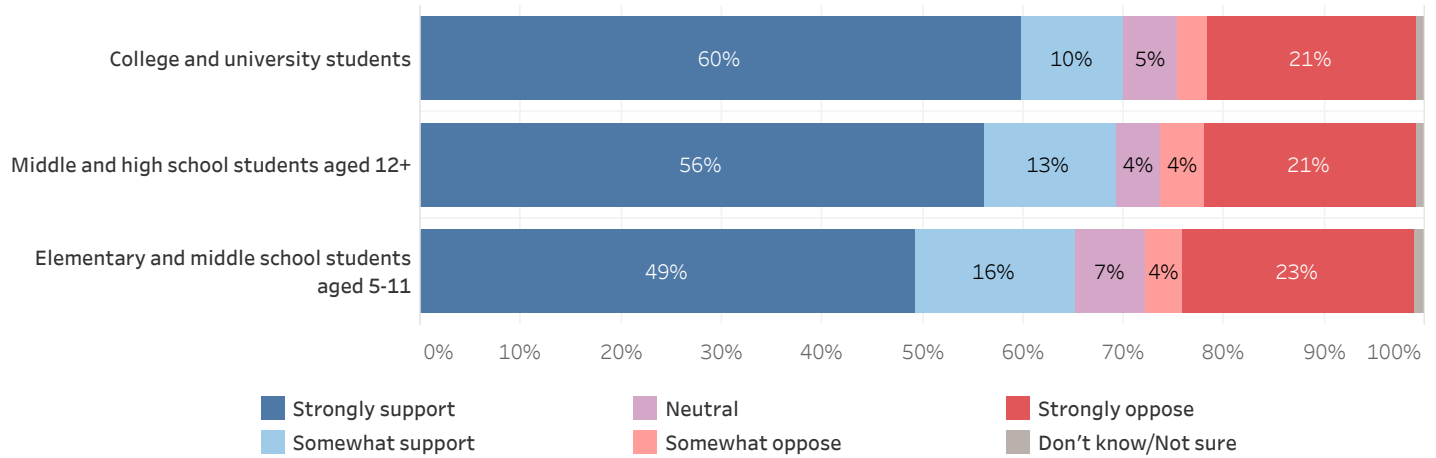

Vermonters are generally supportive of recent vaccination policies promulgated by the Biden administration. Nearly three-quarters (73%) strongly (61%) or somewhat (13%) support requiring employers to provide paid time off for employees to get vaccinated, 70% support requiring all health care workers who work at places that receive Medicare or Medicaid funds to be vaccinated, 67% support requiring employees with a hundred or more employees to ensure their workers are vaccinated or tested weekly, and 66% support requiring vaccination for all federal workers and for all contractors that do business with the federal government.

Support or Oppose Following COVID-19 Vaccination Policies - November 2021

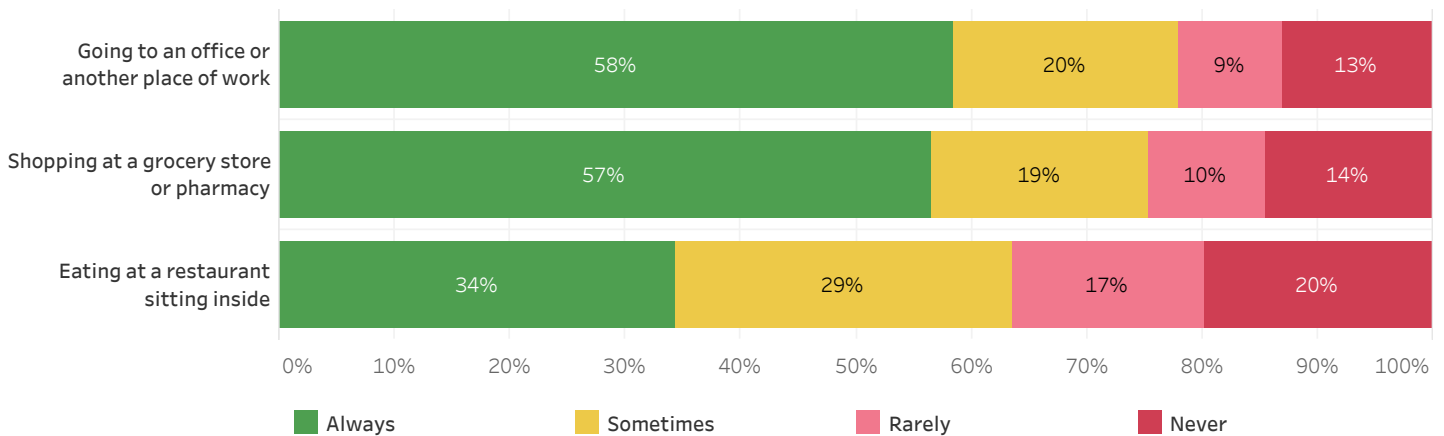

Vermonters are also generally supportive of requiring public school students of all applicable ages to be vaccinated against COVID-19 in order to attend school: 70% support such a policy for college and university students, 69% support such a policy for middle and high school students aged 12+, and 65% support such a policy for elementary and middle school students aged 5-11.

Support or Oppose COVID-19 Vaccination Mandates for Following Ages to Attend School - November 2021

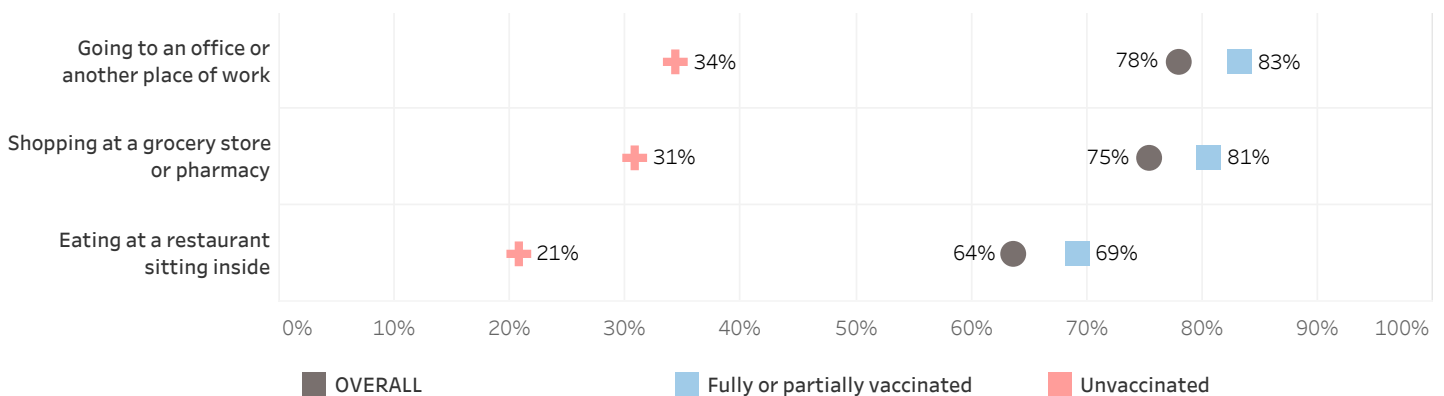

More than three-quarters (78%) of Vermont adults say that they always (58%) or sometimes (20%) wear a mask or face covering when going to an office or another place of work, 9% rarely do so in this situation, and 13% never do so. Slightly fewer (76%) always (57%) or sometimes (19%) wear a mask when shopping at a grocery store or pharmacy, 10% rarely do so, and 14% never do so while 63% always (34%) or sometimes (29%) wear a mask when eating at a restaurant sitting inside, 17% rarely do so, and 20% never do so in this situation.

Frequency Wearing Mask or Face Covering - November 2021

Residents who are fully or partially vaccinated against COVID-19 are far more likely than those who are unvaccinated to say they always or sometimes wear a mask or face covering in these situations.

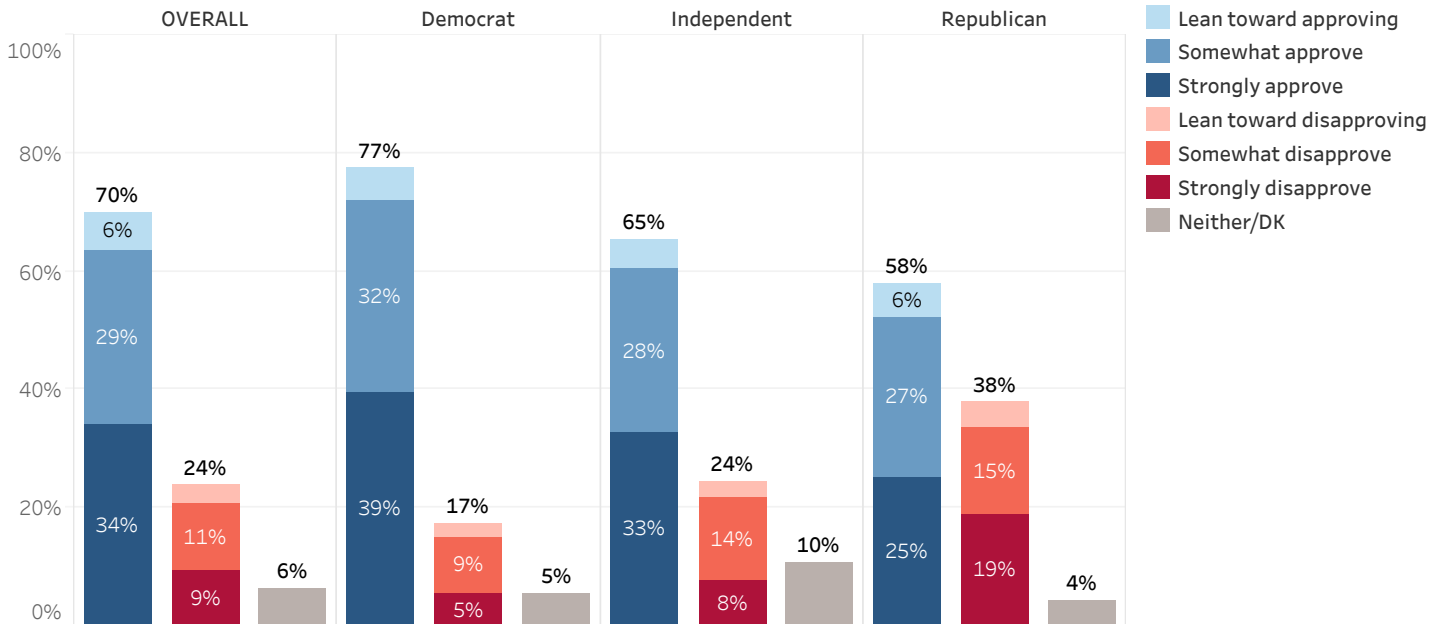

Always or Sometimes Wear Mask or Face Covering - by Vaccination Status - November 2021

Gubernatorial Approval

Vermonters continue to be quite positive in their assessment of Governor Phil Scott: 70% of Vermont residents approve of Scott's performance as governor, 24% disapprove, and 6% neither approve nor disapprove or don't know. Scott's net approval rating (the percentage who approve minus the percentage who disapprove) among Vermonters is +46. Despite being a Republican, Scott enjoys greater support among Democrats than among members of his own party: 77% of Democrats approve of the job Scott is doing while 65% of Independents and 58% of Republicans approve.

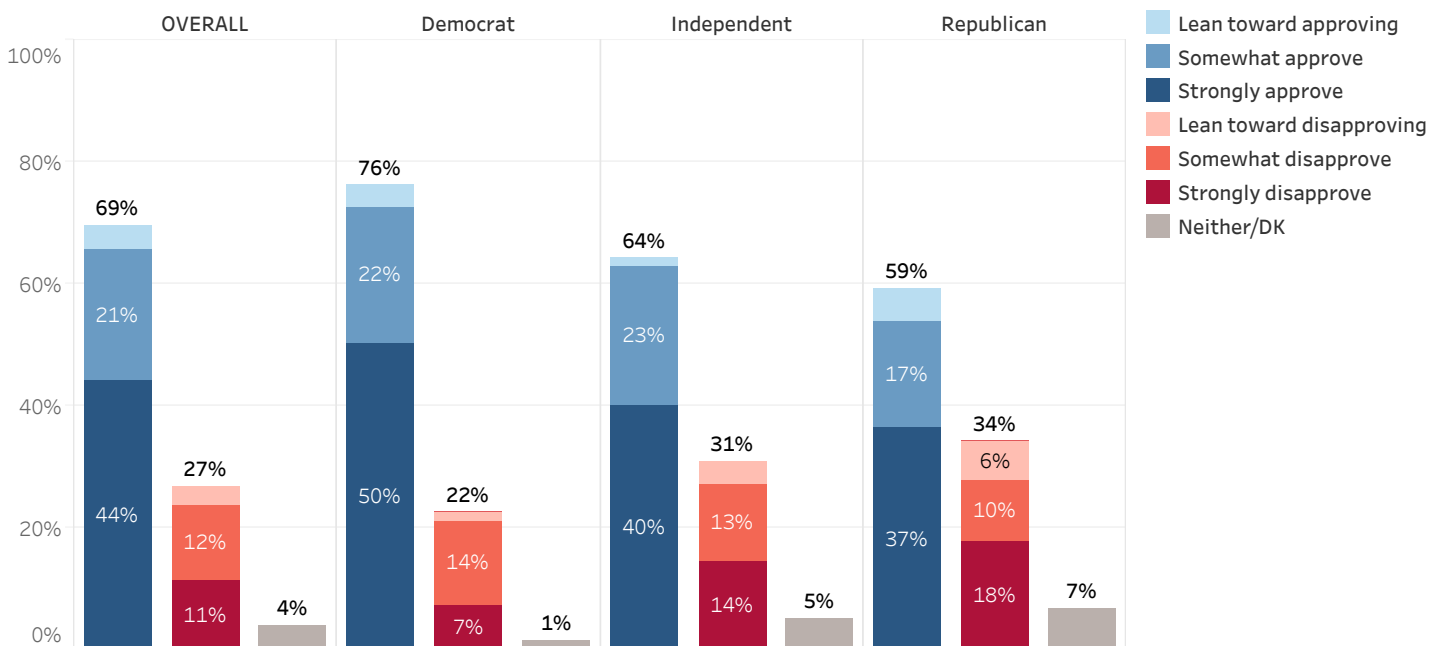

Approval of Governor Scott's Job Performance - November 2021

Gubernatorial COVID-19 Approval

Approval of Scott's handling of the COVID-19 pandemic closely mirrors approval of his job performance overall: 69% of Vermont residents approve of Scott's handling of COVID-19, 27% disapprove, and 4% neither approve nor disapprove or don't know. Once again, Democrats are most supportive: 76% of Democrats approve of Scott's handling of COVID-19 while 64% of Independents and 59% of Republicans approve.

Approval of Governor Scott's Handling of Coronavirus (COVID-19) Situation - November 2021

Green Mountain State Poll Methodology

These findings are based on the latest Green Mountain State Poll, conducted by the University of New Hampshire Survey Center. One thousand, five hundred and twenty-two (1,522) Vermont residents completed the survey online between November 15 and November 22, 2021. The margin of sampling error for the survey is +/- 2.5 percent. These MSE's have not been adjusted for design effect. The design effect for the survey is 1.5%.

Data were weighted by respondent sex, age, education, and region of the state to targets from the most recent American Community Survey (ACS) conducted by the U.S. Census Bureau and to 2020 election results in Vermont.

Vermont residents were randomly contacted through a text message to participate in the survey. Upon completing the survey, participants were invited to join the Green Mountain State Panel, which is part of an effort by the University of New Hampshire Survey Center to investigate new ways of gathering and understanding the opinion of Vermont residents. Panelists were then asked to participate in online surveys sponsored by the UNH Survey Center.

The number of respondents in each demographic below may not equal the number reported in cross-tabulation tables as some respondents choose not to answer some questions. Due to rounding, percentages may not sum to 100%.

For more information about the methodology used in the Green Mountain State Panel, contact Dr. Andrew Smith at (603) 862-2226 or by email at andrew.smith@unh.edu.
