DURHAM, NH - Most New Hampshire residents plan to travel or host for the December holidays this year, up significantly since 2020. Artificial Christmas trees remain more popular than real trees among Granite Staters, and one in five will not have any tree this year. One in five report high levels of stress related to the holidays, up slightly since last year. Christmas Vacation, It's a Wonderful Life, and Die Hard are mentioned most often by Granite Staters as their favorite holiday movie.

### December Holidays

Heading into the holiday season, New Hampshire residents are getting back to normal after two years of COVID-19. Granite Staters are more likely to have travel or hosting plans for the December holidays than they were in 2021 or 2020. This year, only 21% of New Hampshire adults have no plans to travel or host people for the December holidays, down from 33% in 2021 and 67% in 2020. Thirty percent of Granite Staters plan to travel within the state for the December holidays, while 29% plan to host friends or family from somewhere else in New Hampshire. Twenty-three percent plan to travel outside of the state for the December holidays, while 17% plan to host friends or family from outside of the state.

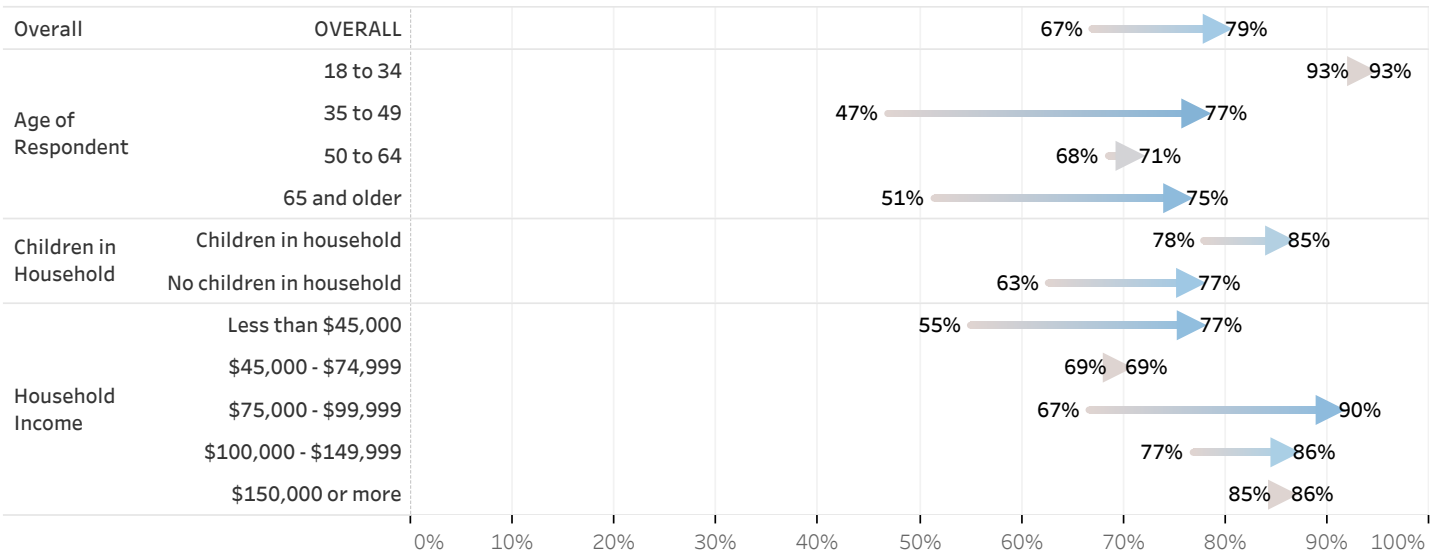

### December Holiday Plans

\* We ask that this copyrighted information be referred to as *the Granite State Poll*, conducted by the University of New Hampshire Survey Center.

Granite Staters aged 35 to 49 (+30 percentage points) and those aged 65 and older (+24) are much more likely than in 2021 to say that they have plans to travel or host people for the December holidays. Those with children in their household remain more likely than those without children to have plans to visit or host others for the December holidays, while those with higher incomes remain more likely to have plans than those with lower incomes.

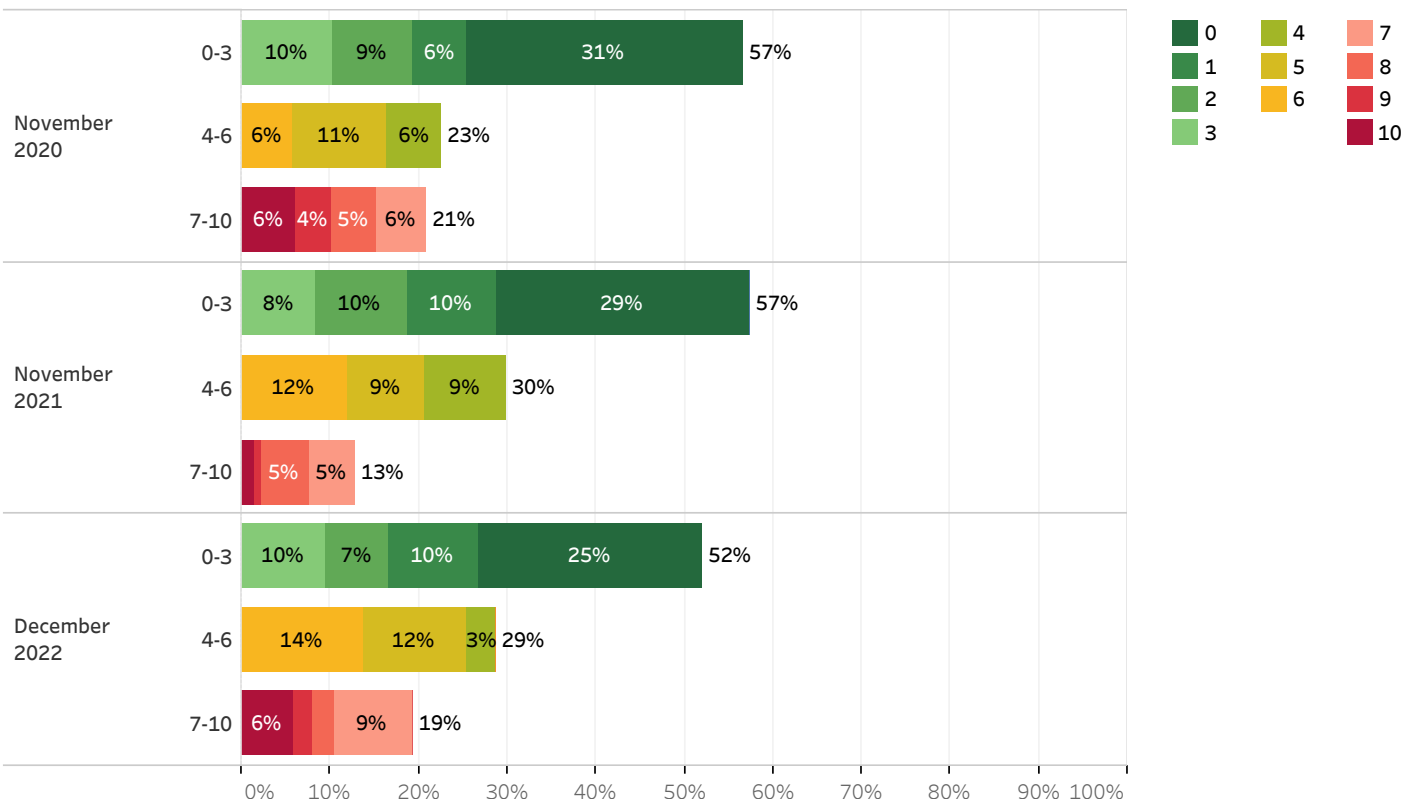

### Have Visiting or Hosting Plans for December Holidays - Change from 2021 to 2022

### Holiday Stress

But the holidays continue to be stressful for some. One in five Granite Staters (19%) say they are highly stressed about the upcoming holidays, placing their stress level at 7 or higher on a 10-point scale. This is an increase since 2021 (13%) and statistically the same as 2020. Another 29% say they are experiencing moderate stress (4, 5, or 6) and 52% say they are experiencing low levels of stress.

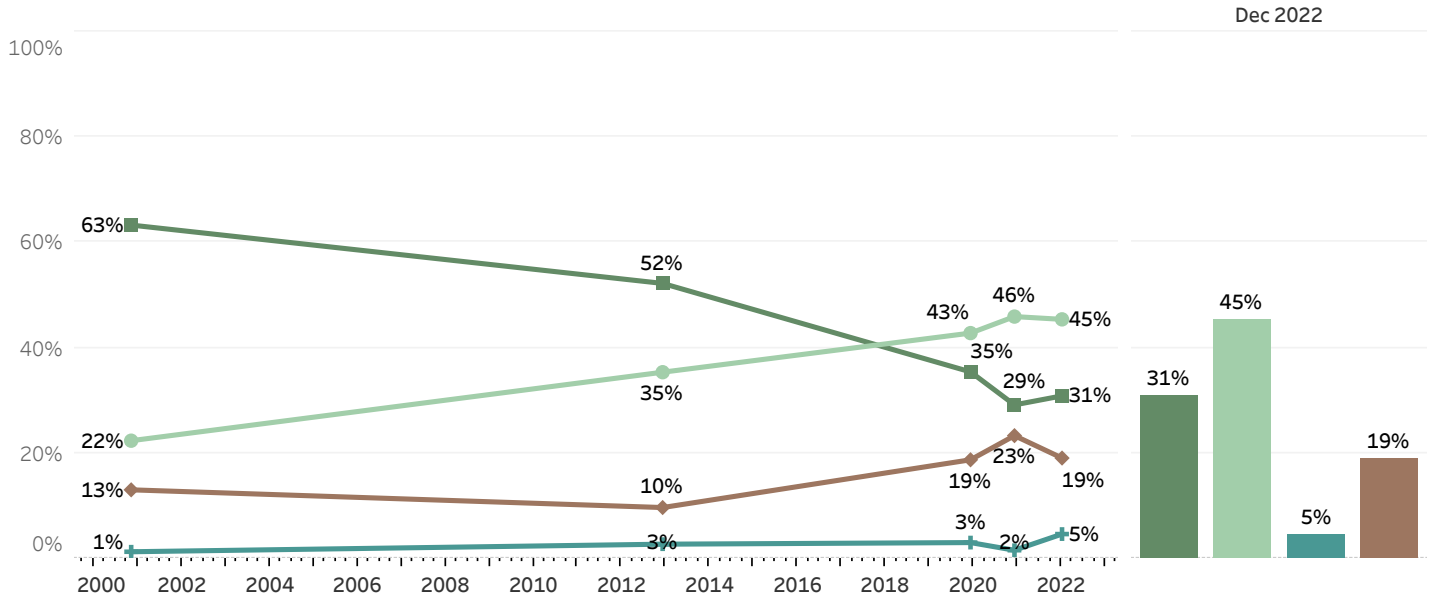

### General Stress Related to Upcoming Holidays

## Christmas Trees

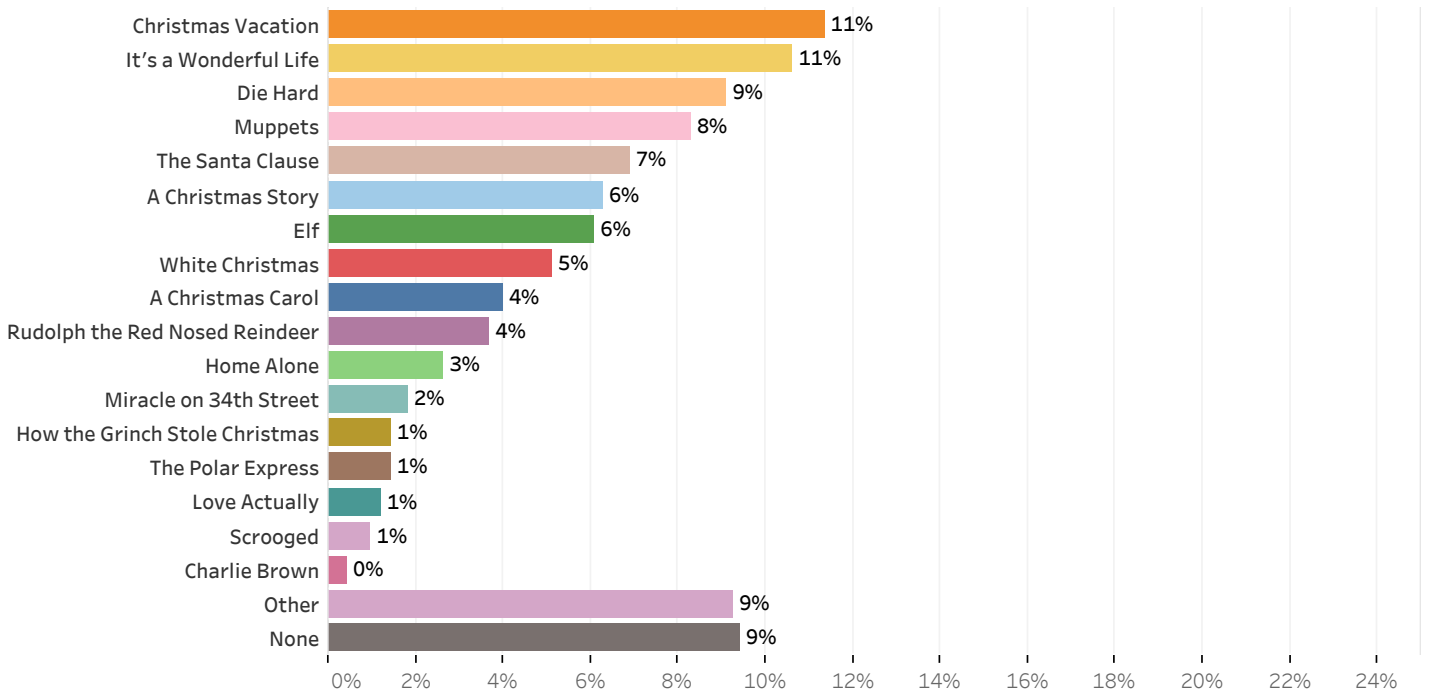

Despite living in one of the most forested states in the U.S., most New Hampshire households will not have a real Christmas tree this year. Only 31% of New Hampshire residents say they have or will have a real Christmas tree, 45% say they have or will have an artificial tree, and 5% say they have or will have both. The percentage of Granite Staters who have or will have a real tree (31%) is unchanged since 2021 (29%) but remains well below the proportion who had a real tree in 2013 (52%) and in 2001 (63%). Most Granite Staters aged 18-34 (88%) and 35-49 (86%) plan to or currently have a tree, and about half say they have a real tree. Seventy percent of those aged 65 and older say they have or will have a tree, and 46% plan to have an artificial tree.

### Plan to Put Up Christmas Tree

To drive off some of the holiday stress, Granite Staters can turn to their favorite holiday movies. When asked to name their favorite holiday movie, New Hampshire residents most frequently mention Christmas Vacation (11%), It's a Wonderful Life (11%), Die Hard (9%), the Muppets (8%), The Santa Clause (7%), A Christmas Story (6%), and Elf (6%). Those under the age of 50 most frequently mention the Muppets, The Santa Clause, Die Hard, and Christmas Vacation, while those 50 and older most frequently mention It's a Wonderful Life, Christmas Vacation, and A Christmas Story.

### Favorite Holiday Movie - December 2022

## Granite State Poll Methodology

These findings are based on the latest Granite State Poll, conducted by the University of New Hampshire Survey Center. Eight hundred ninety-three (893) Granite State Panel members completed the survey online between December 15 and December 19, 2022. The margin of sampling error for the survey is +/- 3.3 percent. These MSE's have not been adjusted for design effect. The response rate for the December 2022 Granite State Poll is 25%. The design effect for the survey is 3.1%.

Data were weighted by respondent sex, age, education, and region of the state to targets from the most recent American Community Survey (ACS) conducted by the U.S. Census Bureau, as well as party registration levels provided by the NH Secretary of State and to 2020 election results in New Hampshire.

The Granite State Panel is part of an effort by the University of New Hampshire Survey Center to investigate new ways of gathering and understanding the opinion of New Hampshire residents. Approximately 7,250 New Hampshire adults have been recruited from randomly-selected landline and cell phone numbers to participate in the panel. Panelists are then asked to participate in online surveys sponsored by the UNH Survey Center.

The number of respondents in each demographic below may not equal the number reported in cross-tabulation tables as some respondents choose not to answer some questions. Due to rounding, percentages may not sum to 100%.

For more information about the methodology used in the Granite State Panel, contact Dr. Andrew Smith at (603) 862-2226 or by email at [andrew.smith@unh.edu](mailto:andrew.smith@unh.edu).
