DURHAM, NH - President Joe Biden's performance ratings in New Hampshire remain low, lower than former President Trump's at this point in his presidency. Seven in ten Granite Staters think Biden handled classified documents from his time as Vice President inappropriately, but a plurality think that Trump's handling of classified documents was worse. Many New Hampshire residents watched at least some of Kevin McCarthy's election as Speaker of the U.S. House, but few Granite Staters are pleased by McCarthy's election or view him favorably.

Presidential Approval

Starting his third year in office, President Joe Biden is unpopular in New Hampshire. A majority of New Hampshire residents continue to disapprove of the job Biden is doing as President - only 42% of Granite Staters approve of Biden's performance as President, 56% disapprove, and 3% are unsure. Biden's net approval rating (the percentage who approve minus the percentage who disapprove) among Granite Staters is -14, slightly lower than in December (-8). Former President Donald Trump's net approval rating at about the same point in his presidency was -10.

Eighty-seven percent of Democrats approve of Biden's performance as President but only 20% of Independents approve, his lowest rating among this group since August 2021, and only 4% of Republicans approve.

Ninety-five percent of Democrats approve of Biden's handling of foreign affairs, but only 23% of Independents and 5% of Republicans approve.

Granite State Poll Methodology

These findings are based on the latest Granite State Poll, conducted by the University of New Hampshire Survey Center. Eight hundred ninety-two (892) Granite State Panel members completed the survey online between January 19 and January 23, 2023. The margin of sampling error for the survey is +/- 3.3 percent. These MSE's have not been adjusted for design effect. The response rate for the January 2023 Granite State Poll is 26%. The design effect for the survey is 3.0%.

Data were weighted by respondent sex, age, education, and region of the state to targets from the most recent American Community Survey (ACS) conducted by the U.S. Census Bureau, as well as party registration levels provided by the NH Secretary of State and to 2020 election results in New Hampshire.

The Granite State Panel is part of an effort by the University of New Hampshire Survey Center to investigate new ways of gathering and understanding the opinion of New Hampshire residents. Approximately 7,500 New Hampshire adults have been recruited from randomly-selected landline and cell phone numbers to participate in the panel. Panelists are then asked to participate in online surveys sponsored by the UNH Survey Center.

The number of respondents in each demographic below may not equal the number reported in cross-tabulation tables as some respondents choose not to answer some questions. Due to rounding, percentages may not sum to 100%.

For more information about the methodology used in the Granite State Panel, contact Dr. Andrew Smith at (603) 862-2226 or by email at andrew.smith@unh.edu.
