In another page of this issue we have published a picture and feature story about the new Alumnae House to be built, the new pastor recently re­ceiued, and the younger students in the boarding school, Mr. Bascomb's position is a new one in the college, and one that will fit in with the life of any member of the faculty.

The catalog is a synonym for the yearbook, and is the first step in the work of the school. He is here to help the student and his family, and to make the faculty as useful as possible.

They satisfy—and yet, they’re MILD

Any industrial worker who moves things by hand is doing work that Electricity can do for about 2 cents an hour

More than 60 per cent of the mechanical power used by American industry is applied through electric motors. But the electrodynamics of the tasks performed by man has barely begun. Electric power not only saves dollars; it conserves human energy for better purposes and raises standards of living. College men and women may well consider how electricity can lessen the burdens of industry and of farm and home life.
