One High Honor
For Freshman

Small Senior Class Has Most Top-Rank Students

Twenty-eight High Rank Students in New Hampshire State Public Schools in 1927;
Four First Term Freshmen

Yvonne Beatty of Claremont, graduate of St. Paul’s school, high school, and the highest ranking student in a class of more than 1,000, has been selected for the Freshman class at the University for the fall term. The only other student in her class scheduled to enter the University of New Hampshire this fall was the third highest ranking student in the class. The University of New Hampshire has been the highest ranking student in the class for the past nine years. The highest ranking student in the class, according to an announcement made today, will receive a scholarship in the amount of $500. The University of New Hampshire has been the highest ranking student in the class for the past nine years.

Learning from the High Honors List

The University of New Hampshire, is divided into four groups. The first group consists of students on the high honors list, while in the second group are those who have been pledged to the High Honors List. Those in the third group are those who have been pledged to the High Honor Freshman List, while those in the fourth group are those who have been pledged to the High Honor Senior List.

Basketball Men Begin Practice

Varnum Prepares To Meet Heavy Schedule

New Hampshire State College has a 1928 basketball team.

The Wildcat varsity basketball team will get into the swing of the season against the Albertus Magnus College on Thursday night.

The first practices for the Blue and White quintet will be held on the campus of the University of New Hampshire this week.

nevertheless, its action did not help the committee last winter in re-admitting students for reinstatement now rests with the University to place the University on the high road. The judging of the eligibility of students for reinstatement is a policy established by the administration. This has proved himself unfit. The policy of the nation's oldest and most famous university is to make such a statement. It was done with the utmost care and concern and will be taken as a signal for the future. It seems to us to be one of the most significant events of the year.

Of the fifty-five students who were dropped from the University student body last year, one term was given to the student body to reconsider. This is the only time in the history of the University that this has occurred.

THEIR LOVE AFFAIR WITH COLUMBUS

I don't doubt it, nor do I wonder why. Just open a tidy red tin and get that full fragrance of Nature's noblest gift to pipe-smokers. Then take a load in the business-end of your own pipe, and you've got it—just that taste—just that sense of contentment which will come to you as if by magic. It's a real change from the usual tobacco, both in hand and on the shoulder. Why, you'll want to use it always. It's just as satisfying as a rich meal, and it's sure to give you just what you want. Try a box today, and taste the difference in your own tobacco. You'll never go back to ordinary tobacco again. It's a real change from the usual and it's very, very, very nice.

Behind the scenes with Columbus
THERE is a forgotten chapter in the life of Columbus which in its way had as much to do with the discovery of America as the voyage itself. We refer to the years spent in preparation before he set sail—years filled with painstaking study, planning his voyage with the aid of what could maps and geographical data he could procure. In telephonic, too, the success of each new development depends upon intensive research and careful planning that precede actual construction. Bell telephone men are continually mapping out the course of this great industry for years to come.

ALUMNI NOTES
Alumni Office — It is three weeks or more since we chatted with you in this column and we have received the usual flood of letters from the alummi. We are happy under such circumstances. It is always a delight to hear from our friends in the Alumni. There have always been two big questions in the minds of Alumni. They are Here-Tomorrow Day and Alumni Day. Many of our friends and classmates have "come back" to us and have given us a chance to see them again. It is a privilege to see these friends and pore over the happenings of the Alumni in Durham. Now that the season is well advanced, there are many items of interest for the graduates of our Alma Mater.

January Thaw Indicates That Spring Cannot Be Far Behind

By Vanity Beaulieu, '31

Unusually early April weather for the first week-end of January calmed the fears of those who had been worried about the possibility of a spring frost. The period of the January thaw, a rare event in New Hampshire, brought with it the promise of warmer weather to come.

WINTER'S SPAN OF LIFE HAD EBBED WITH FEBRUARY

The winter's span of life had ebbed with February. The days were growing longer, and the sun was shining more frequently. The snow was melting in the fields, and the first flowers were beginning to bloom. The world was waking up from its winter slumber.

Second Hockey Game of Year Cancelled

University of New Hampshire hockey fans who were looking forward to the spring hockey season may be somewhat disappointed, as the New Hampshire hockey team has been forced to cancel its second game of the year. The game was scheduled for January 10, but due to unforeseen circumstances, it has been postponed.

GRANT'S

America Discovered for $7200

Old records show that the cost of Columbus' first expedition to America amounted, in modern exchange, to only $7200. To finance Columbus, Isabella, Queen of Spain, offered to pawn her jewels. Today word comes from Spain indicating that a twelfth century improvement from the new world is fast effecting a sufficient saving to ransom many royal jewels. The Spanish Northern Railway reports that the American equipment which with in 1924 the railroad electrified a mountainous section of its lines from Ujo to Pajares has accomplished the following economies:

1. A 10% saving in the cost of power.
2. A reduction of 40% in the number of engine miles for the same traffic handled.
3. A saving of 12% in the cost of repairs and upkeep of locomotives.
4. A saving of 30% in crew expenses.
5. A reduction of 45% in the cost of moving a ton-mile.

In every part of the world, electricity has replaced less efficient methods and is saving sums far greater than the ransom of a queen's jewels. You will always find an important advantage in your work and in your home.

THE HOLLAND TUNNEL

The Holland Tunnel is one of engineering's greatest triumphs, because—

...it doubles the size of any tunnel ever bored beneath the bed of the Hudson River.

...it is over a mile and a half long.

...it is designed for automobiles to use.

...because they generate poisonous carbon monoxide gas,
