The Junior Engineers, consisting of students from various departments of the University, plan to make an inspection trip to the plants of Westinghouse and General Electric in May.

The trip is sponsored by the Department of Engineering and will be accompanied by lecturers and experts in the field.

DEAR BRUTUS

A Fantastic modern comedy in three acts by Sir James Matthew Barrie

PRESENTED BY MASK AND DAGGER PLAYERS EXCELLENT IN "DEAR BRUTUS"

John Fleming, Charlotte Hirscher, and William Nelson Deliver Credit for Leading in Honors Term Play

Barrie's Drama Makes III in First Night Presentation—Play is a Combination of Comedy, Pathos, and Romance, Said the Mask and Dagger

"Dear Brutus" is a hit, undoubtedly and unconditionally. A performance like the one given by Mask and Dagger in this season's production of Barrie's "Dear Brutus," is rare, indeed, and if there are any among the company of cynics who will believe that there is no play so difficult, at least for a company of amateurs, then the boys of Mask and Dagger would be able to give a very complete demonstration of their powers.

The play opened on Tuesday night in the Little Theatre, with Miss Florence Brown, Mr. William Nelson, Miss Elia Hirschner, and Mr. Edward Dardanell as the principal actors, and with Mr. A. J. Mundt and Mr. Coggeshall as the leading members of the chorus.

The play is a modern comedy, and is the second in the series of plays presented by Mask and Dagger this season.

A SUGGESTION

That improvement in the intellectual side of the University is to be looked for only in the work of the students themselves. The intellectual life of the student is looked for now that the growth of the physical side has been provided for, is the warning that has been given. We refer to the requirements for the admission of in-state students. The faculty seem to have brought forward the suggestion we respectfully await action on. The faculty to the administration concerning the above campus. 

If the above statements are true, we believe that our readers will recognize a poor teacher when he sees one. If the above statements are true, the University is one of the few that has been proved many hundreds of times. The faculty to the administration concerning the above campus. We do not believe that our readers will recognize a poor teacher when he sees one. If the above statements are true, the University is one of the few that has been proved many hundreds of times that teachers are individuals. 

To the Editor,—In the February 23 issue of your paper there was printed an article concerning the faculty of the University. We refer to the administration concerning the above campus. We do not believe that our readers will recognize a poor teacher when he sees one. If the above statements are true, the University is one of the few that has been proved many hundreds of times that teachers are individuals.

A very confidential "lowdown" on the first blonde flapper. From the story of a girl who had neither beauty nor talent—only dreams. Judged by modern standards, Helen's methods might have been some­what enigmatic. This feature is a picture so strange, so weird, so gripping that it baffles description. A Universal Comedy—BUSTER'S HANDICAP

By Frederic Smith, '29

Last week, in the closing moments of this paper, there was printed an article concerning the faculty of the University. We refer to the administration concerning the above campus. We do not believe that our readers will recognize a poor teacher when he sees one. If the above statements are true, the University is one of the few that has been proved many hundreds of times that teachers are individuals. 

We are not making any general statement concerning the above campus. We do not believe that our readers will recognize a poor teacher when he sees one. If the above statements are true, the University is one of the few that has been proved many hundreds of times that teachers are individuals.

THE NEW HAMPSHIRE, MARCH 8, 1928

Alumni News

The mid-winter meeting of the Board of Directors of the present Alumni Association was held at the Hotel Savoy in Seattle, March 3, in Boston at the office of C. J. O’Leary, ’92. Mr. O’Leary very kindly loaned his office to the Board for the meeting and its thereafter.

Eight members of the Board were present and we believe that this fact alone makes the meeting a bit out of the ordinary. C. J. O’Leary, ’92 was in Florida and so was not able to attend. You know, we don’t think the average member of the association considers it necessary to attend such meetings. As a matter of fact, they come, at their own personal expense, from Philadelphia, Hartford and Springfield, Danville and other places to be present. Rather a record, isn’t it?

The Alumni Secretary brought forth a most interest­ ing and important which deserved attention, and in three hours time the board had disposed of a large number of important matters.

Due to the reorganization efforts of this fall a few changes will have to be made in the Constitution of the Alumni Association. These amend­ ments will be presented to the gen­ eral assembly at the annual meeting.

A committee was appointed by Mr. C. J. O’Leary, ’92, to cooperate with the faculty in planning an Alumni Banquet to be held early in the fall, and each year several of the leaders among the alumni in the professional, industrial and commercial fields can be present to address the student body. Definite plans are being formulated to make this an annual event. Similar efforts have been made by the Board as the Alumni Representative on the board of Christian Work, Inc.

The board received with many thanks the offer of President Huse to present to the association a handsome plaque which will be engrossed and preserved as the permanent trophy of the Alumni Association. Several members are present and we believe that this fact alone makes the meeting a bit out of the ordinary. C. J. O’Leary, ’92 was in Florida and so was not able to attend. Cowell Honored by Basketball Coaches

Director W. H. Cowell Elected to Chairmanship of Committee to Draw Up Constitution for N. E. Basketball Coaches' Association

Director of Athletics William H. Cowell of the University was appointed by the Sunday morning chairman of a committee to draw up a constitution for the new New England Basketball Association. At the recent Empire Basketball Association meeting in New York, Coach W. H. Cowell was elected associate member of the New England group, which was represented by Coach W. H. Cowell of Harvard. This new association, which consists of the coaches of the New England Basketball Association and the National Basketball Coaches Association, formed last July.

Director Cowell, who coached Harvard from 1893 up to the present season, recently turned over his charge to Coach Hartley, who is now in charge of the Harvard basketball team. The new association meets in the future with the old New England group to draw up a national basketball constitution.

Lloyd Atwood Elected President of Theta Chi

Lord Atwood of Boston was elected president of the Theta Chi fraternity at a meeting of the Voyager club held Sunday night. Other officers chosen at the meeting were Robert L. Stenzel, president; Charles T. Kennedy, vice-president; E. S. Morse, secretary, and George E. Mather, treasurer.

The newly-elected president of Theta Chi is vice-president of the Alpha chapter and a member of the Chi chapter. Atwood also holds the position of assistant to the director of the National Society of American College Men.

1939 Sphinx Adopts New Membership Plan

In Constitution Accepted, Membership Will Be Limited to Two Representatives from Each Fraternity by Award of Three

At the last meeting of the 1939 Sphinx held in New Hampshire Hall Monday at 2:00 o'clock a new constitution was adopted by the society. This constitution contains several important changes, from those of previous years, in the work and membership of the organization.

The greatest change is in the one relative to the change in the membership of the society. Membership has been decreased to two men from each fraternity which is represented in Campus and Greek. Previously there has been little attempt to maintain the balance, but in the increase in the number of fraternities, it was deemed advisable to decrease the membership.

The Sphinx Society was instituted at the University in 1921 and during that time there has been one of the most active of fraternity societies in the University. This society is largely connected with the non-athletic teams and other non-athletic teams who are visiting the University.

Lloyd Atwood Elected President of Theta Chi

The second half saw the tables reversed with the shooting ability regained and the decisive superiority established and again led the score. The final score was 30-23 in favor of the Engineers.

The great approach to the game by the Engineers was deemed advisable to decrease the membership. One of the most important changes in the constitution was that of membership, which is represented in Casque and Eller. Previously the membership has been decreased, and the number of men has been lessened, but in the increase in the number of fraternities, it was deemed advisable to decrease the membership.

The Sphinx Society was instituted at the University in 1921 and during that time there has been one of the most active of fraternity societies in the University. This society is largely connected with the non-athletic teams and other non-athletic teams who are visiting the University.

The Great Northern Electrification

Westinghouse

The Great Northern is one of the largest and most important electrification systems in the United States. It was inaugurated in 1921 and has since grown into one of the largest systems in the country. The Great Northern system covers a total length of 4,000 miles and consists of approximately 12,000 miles of railway track.

The system is powered by a fleet of 2,400 electric locomotives, each capable of drawing up to 1,250 tons of freight at speeds of up to 80 miles per hour.

The Great Northern Electrification is an example of the benefits that electrification can bring to a transportation system. By providing a more efficient and reliable method of transporting goods, the Great Northern Electrification has helped to improve the economy of the region it serves.
