DURHAM, NH - More than six in ten New Hampshire residents believe that former President Donald Trump will be convicted in at least one of the cases currently being brought against him. However, less than one-quarter expect Trump will spend one or more days in prison. Majorities of state residents feel that Trump committed a crime in each of the four cases for which he has been indicted. Most Granite Staters also believe that Hunter Biden has done something illegal and that he is receiving favorable treatment because he is Joe Biden's son.

Trump Investigations

Former President Donald Trump was recently indicted in a case concerning whether he illegally interfered with the 2020 presidential election in Georgia and over the past four months has been indicted in three other cases. Fifty-eight percent think that Trump definitely (46%) or probably (11%) committed a crime in a case alleging Trump illegally mishandled classified documents, (40%) believe he probably (19%) or definitely (21%) did not commit a crime in this case, and 2% are unsure. Similar majorities believe that Trump definitely or probably committed a crime in the cases alleging Trump tried to overturn the results of the 2020 election and aided the January 6th riot in Washington D.C. (57%), illegally interfered with the 2020 presidential election in Georgia (56%), and in the case related to alleged "hush money" payments to adult movie actress Stormy Daniels late in his 2016 presidential campaign (55%). The percentage of Granite State residents who think Trump committed a crime in each of these cases is essentially unchanged since April.

Overall, 63% of Granite Staters believe that Trump has committed a crime in at least one of the four investigations. Almost all respondents say they have heard a lot or some about each of these cases.

Granite State Poll Methodology

These findings are based on the latest Granite State Poll, conducted by the University of New Hampshire Survey Center. One thousand, one hundred and fifty-six (1,156) Granite State Panel members completed the survey online between August 17 and August 21, 2023. The margin of sampling error for the survey is +/- 2.9 percent. These MSE's have not been adjusted for design effect. The response rate for the August 2023 Granite State Poll is 28%. The design effect for the survey is 2.9%.

Data were weighted by respondent sex, age, education, and region of the state to targets from the most recent American Community Survey (ACS) conducted by the U.S. Census Bureau, as well as party registration levels provided by the NH Secretary of State and to 2020 election results in New Hampshire.

The Granite State Panel is part of an effort by the University of New Hampshire Survey Center to investigate new ways of gathering and understanding the opinion of New Hampshire residents. Approximately 7,250 New Hampshire adults have been recruited from randomly-selected landline and cell phone numbers to participate in the panel. Panelists are then asked to participate in online surveys sponsored by the UNH Survey Center.

The number of respondents in each demographic below may not equal the number reported in cross-tabulation tables as some respondents choose not to answer some questions. Due to rounding, percentages may not sum to 100%.
