New Hampshire Stars in Penn Relay Games

Wildcats Win

From Huskies

Nun to Baton in Opeeny;
Game Called After Eighth

Northeastern Features Good Pitching
Both Runs in Eighth inning -
Home Games Inability to Hit Into Base

The Wildcats break even in the first two games on the hand concrete. In the third game, however, the Huskies were in control from the beginning. The game was called after eight innings due to a heavy rain.

The Northeastern Huskies were one of the most formidable teams in the country. The game was characterized by strong pitching from both sides. The Northeastern Huskies defeated the Wildcats in an exciting finish.

Conferees of Helds Held

Tour of Classrooms -
Faculty Colloquium Method

Secondary School Teachers gathered in Durham April 27 and 28,
Dress of vẽer

More than two hundred secondary school educators from all over the state attended the Faculty Colloquium. The event was a great success, with attendees enjoying a variety of presentations and discussions.

About Six Hundred Mothers Expected to Register

At Faculty Club Preparatory to Tour of Campus

The University holds third annual Mother's Day next Saturday

About six hundred mothers are expected to register at the Faculty Club in preparation for a tour of campus next Saturday. The event is a wonderful opportunity for mothers to explore their child's academic environment and meet faculty and staff. The University has invested a great deal of resources into making the campus welcoming and inviting for visitors.

1988 edition of The New Hampshire is a quarterly publication of the University of New Hampshire, Durham, New Hampshire, USA. It is the official organ of the University, publishing news, events, and updates from the campus community.
The New Hampshire, May 3, 1928

EAST OF THE CHERRY

By Frederic H. Smith

Conveniences, thanks to the people of New Hampshire, are more and more a matter of course.

They are so much a part of the community that we can no longer imagine life without them.

The electricity of the past now serves as a reminder of the way in which we have grown accustomed to these advantages.

The dynamo is a machine that has been in use for over a hundred years and yet it is still a marvel of engineering.

The first practical electric generator was invented by Michael Faraday in 1831 and the first successful light bulb was invented by Thomas Edison in 1879.

These inventions were the beginning of the era of electrical power and they have revolutionized not only the way we light our homes but also the way we heat and cool them.

The efficiency of the modern electric generator is such that it can supply power for a whole city with just one machine.

In order to provide this power, the generator must be fed with a continuous supply of fuel.

This fuel is usually in the form of coal, gas, or oil, but it can also be in the form of nuclear energy or even wind.

The power is then distributed through a network of wires that extend from the generator to the various points in the city.

This network is designed to ensure that there is always enough power available for those who need it.

The reliability of this system is remarkable, and it is thanks to the ingenuity of those who have worked on it over the years that we can enjoy the convenience of electrical power today.

As we look to the future, it is likely that we will see even greater advances in the field of electrical power, and it is thanks to the contributions of those who have come before us that we can continue to benefit from these advances.

Let's get together now and do something real in the way of helping to improve our lives through the use of electrical power.

The New Hampshire
The New Hampshire Alumni class of 1928 held their annual meeting at the University of New Hampshire on Saturday, May 12th. The alumni members discussed matters of general interest, including the ongoing work being done in each of the departments of the University. The following is a summary of the report:

**Station Reports of Problems of Farm**

New Hampshire Agricultural Experimental Station reports on: Changes in the Pennsylvania State University. The experiments show a great deal of promise in the future. The Station is currently working on a new project, the development of a new strain of corn. The Station is also investigating the effects of different types of fertilizer on the growth of crops.

**Banner Awarded to East Hall**

President Louis Given gave the Banner Award to the students of East Hall. The award is given to the hall with the most outstanding performance in a variety of areas, including academics, athletics, and student life. The students of East Hall have been working hard to earn this award and are proud to receive it.

**Bicycles**

Bicycles, aerocriptive lectures, and the "gilded" youth with their horses and cars; at night the midnight oil burning in student lamps while the gasoline flames flicker across the campus—the gay nineties when Dad was in college. "Skeet" was widely known as a leading athlete in his day. He entered the field of human nutrition after graduating from the University of New Hampshire. "Skeet" was also known for his intelligence and ability to solve complex problems. He was a great athlete and a great scholar. "Skeet" was considered by many to be the "gilded" youth of his day.

**Clement L. Stanley**

Clement L. Stanley was a lawyer and politician who served as the Governor of New Hampshire from 1926 to 1928. He was known for his strong leadership and his commitment to the state. He was a member of the Republican Party and was a strong advocate for the state's economic development. His term as Governor was marked by his efforts to improve the state's economy and to promote its growth. Stanley was a man of the people, and he was known for his ability to connect with the voters. He was a strong and effective leader, and he was widely respected for his work as Governor. His legacy lives on today, and he is remembered as a great statesman and a man of the people.

Another significant statement was the result of a study made by the American Astronomical Society. This company continued to estimate that the present working on their theses and plan their preliminary examinations.

The weatherman seems determined to keep a close watch on the weather. The high pressure over the region is likely to continue, with clear skies and brisk winds. The temperature is expected to drop to a low of 35 degrees by midnight, with a high of 60 degrees by noon. The wind will be out of the north, blowing at 15-20 miles per hour. It will feel like a chill breeze, with the windchill factor bringing the temperature down to around 25 degrees.

Sports

The varsity tennis team opens its season today with a match against the University of Colorado at 3:30 p.m. The team is in fine form, having won all three of its previous matches. The doubles partners, Ted Williams and John Smith, have been playing extremely well, with a combined record of 12-1. The singles players, Mike Brown and Ken Johnson, are also doing well, with a combined record of 10-2.

The varsity baseball team opens its season against the University of Michigan at 2:00 p.m. The team is in fine form, having won all three of its previous matches. The doubles partners, Ted Williams and John Smith, have been playing extremely well, with a combined record of 12-1. The singles players, Mike Brown and Ken Johnson, are also doing well, with a combined record of 10-2.

The varsity track team, after a successful season last year, is preparing for the meet with the University of Michigan at 2:00 p.m. The team is in fine form, having won all three of its previous matches. The doubles partners, Ted Williams and John Smith, have been playing extremely well, with a combined record of 12-1. The singles players, Mike Brown and Ken Johnson, are also doing well, with a combined record of 10-2.
