A WORD OF THANKS

Dear Sir:

The following list shows the winners and records for the baseball and football games of the last ten years. In these ten years the University took part in 27 games, winning 14, losing 10, and tying 3. Of these 27 games, the University won 7, lost 6, and tied 4, in the American League; and in the National League, the University won 7, lost 4, and tied 2.

The records for the last ten years are as follows:

**American League**

The threads are slowly breaking, the fabric of society falling apart. Perhaps this is an opportune time to ask ourselves: What is the purpose of our existence? What is our ultimate goal in life?

Yours sincerely,

 Blindfolded... in scientific test of leading Cigarettes, Princess Paul Chavchavadze selects Old Gold

"I was much intrigued by the invitation to make a blindfold test of your leading brands of American cigarettes, to see how they compared with each other and with those I had smoked abroad. Could one really taste the difference? I wondered.

"But when I was handed these cigarettes, one by one, I realized at once that there was a difference and that the test was conclusive. One cigarette was so much more appealing, so much more delicate in flavor. Oh, and so much smoother!"

"When the test was over and I was told that the cigarette of my choice was Old Gold, I understood at once why this cigarette is so popular among my American friends."

How Test Was Made

Subject was blindfolded, and, in the presence of two competent witnesses, was given one each of the four leading cigarettes to smoke. To clear the taste, coffee was served before each cigarette. The Princess was entirely unaware of the identity of these cigarettes during test.

"No. 3... which was Old Gold... which was so much more appealing, so much more delicate in flavor. Oh, and so much smoother!"

Old Gold has more flavor... more smoothness... more delight in flavor. It's the cigarette of your choice..smother and better - not a cough in a carload

The Princess is not only the sister of Mrs. W. A. Ramsey, but is a prominent prospect for the 1928 American Olympic team.
The military department of the University of New Hampshire is one of thirty-nine departments, each of which contributes to the total academic program of the university. The curriculum offers a wide variety of courses in military science and technology, preparing students for careers in the armed forces or other fields.

The basic course in military science is designed for cadets who wish to become commissioned officers, and the advanced course is for students who wish to become junior officers. The curriculum includes instruction in military tactics, strategy, and history, as well as in the technical aspects of warfare.

The University of New Hampshire has a long history of excellence in military education, and its graduates have made significant contributions to the nation's defense and security. The university is proud to continue its tradition of excellence in military science and technology, and to prepare its cadets for leadership roles in the armed forces and other fields.

Mortar and Ball Bids Eleven Men

Military Society Takes Coast Artillery Cadets

Frederick D. Kesterson President

Local Chapter Which Was Formed at Port West, Last Summer

Eleven students of the College of Technology, taking the advanced course in the Military Society have been enrolled as coast artillery cadets.

This arrangement was made by Frederick D. Kesterson, '28, of North Deering, present president of the organization. Mortar and Ball was formed by former cadets of the Massachusetts Institute of Technology several years ago and has been connected with the society ever since.

Contrary to popular belief, officers or old-timers in the organization are not paid, but are expected to support themselves from their own resources. The corps takes part in parades and other military exercises.
