DURHAM, NH - A small majority of New Hampshire residents disapprove of former Speaker Kevin McCarthy's recent decision to launch an impeachment inquiry into President Joe Biden about his actions related to Hunter Biden's foreign business activities. Only four in ten Granite Staters think that Biden's actions in this matter are impeachable. Few state residents think it is likely that Biden will be impeached by the House of Representatives or convicted by the Senate as a result of this investigation. Republicans are far more likely than Democrats and Independents to think Biden has committed impeachable offenses or will be impeached by the House. Biden's job approval rating remains low, only 44% approve of the job he is doing as president.

Granite State Poll Methodology

These findings are based on the latest Granite State Poll, conducted by the University of New Hampshire Survey Center. Nine hundred and ninety-eight (998) Granite State Panel members completed the survey online between September 28 and October 2, 2023. The margin of sampling error for the survey is +/- 3.1 percent. In addition to potential sampling error, all surveys have other potential sources of non-sampling error including question order effects, question wording effects, and non-response. These MSE's have not been adjusted for design effect. The response rate for the September 2023 Granite State Poll is 33%. The design effect for the survey is 2.9%.

The Granite State Panel is a probability-based web panel of New Hampshire residents. Approximately 6,500 New Hampshire adults have been recruited from phone, text-to-web, or mail-to-web surveys sent to randomly-selected phone numbers or addresses. Panelists are then asked to participate in online surveys sponsored by the UNH Survey Center.

Data were weighted by respondent sex, age, education, and region of the state to targets from the most recent American Community Survey (ACS) conducted by the U.S. Census Bureau, as well as party registration levels provided by the NH Secretary of State and to 2020 election results in New Hampshire. Surveys were taken in English, all respondent data included passes Qualtrics data quality checks, and single-use survey links were used to prevent multiple submissions by respondents.

The number of respondents in each demographic below may not equal the number reported in cross-tabulation tables as some respondents choose not to answer some questions. Due to rounding, percentages may not sum to 100%. All coding of open-ended responses is conducted by human coders.
