DURHAM, NH - Following President Biden's withdrawal from the 2024 presidential race, Democrats in New Hampshire clearly favor Vice President Kamala Harris as the Democratic nominee. Harris holds a slim lead over former President Donald Trump and is slightly more popular than Trump or Biden. While a majority of Granite Staters do not believe Biden should resign as President, many state Democrats are relieved and hopeful in the wake of his withdrawal from the race. And in the wake of the assassination attempt on Trump, most state Republicans do not trust the FBI to conduct a thorough investigation. More than three-quarters of state residents are concerned about future attacks on political leaders, leaders using violence or illegal methods to obtain power, or people violently or illegally interfering in upcoming elections.

2024 Presidential Race

President Biden's decision to drop out of the presidential race and back Vice President Harris has shaken the dynamics of the 2024 campaign. While Harris is not yet the official Democratic nominee, the party has clearly closed ranks behind her. In a matchup between Harris and Trump, 49% of New Hampshire likely voters say they would vote for Harris if the election were held today, 43% would vote for former president Trump, 4% support Independent Robert F. Kennedy Jr., and less than 1% would vote for Libertarian candidate Chase Oliver, Green Party candidate Jill Stein, or Independent Cornel West. If they could only vote for Harris or Trump, 53% of likely voters say that they would vote for Harris and 46% say they would vote for Trump. In May 2024, before the first presidential debate and Biden's withdrawal from the race, Biden held a three percentage point lead over Trump in New Hampshire.

Ninety-four percent of self-identified Democrats support Harris, up from 84% who supported Biden in May. Eighty-eight percent of Republicans support Trump, while 45% of Independents support Harris and 33% support Trump. Harris has a slightly larger lead (+13 percentage points) among voters aged 18 to 34 than Biden had over Trump in May (+9)

Granite State Poll Methodology

These findings are based on the latest Granite State Poll, conducted by the University of New Hampshire Survey Center. One thousand, nine hundred and seventy-three (1,973) Granite State Panel members completed the survey online. The response rate for panel respondents to this July 2024 Granite State Poll is 42%. In addition, 1,043 New Hampshire residents completed the survey after receiving an invitation via text message to complete the survey online. Overall, 3,016 individuals completed the survey between July 23 and July 25, 2024. The margin of sampling error for the survey is +/- 1.8 percent. Included in the sample were 2,875 likely general election voters (margin of sampling error +/- 1.8 percent). In addition to potential sampling error, all surveys have other potential sources of non-sampling error including question order effects, question wording effects, and non-response. These MSE's have not been adjusted for design effect. The design effect for the survey is 2.0%.

The Granite State Panel is a probability-based web panel of New Hampshire residents. Approximately 8,000 New Hampshire adults have been recruited from phone, text-to-web, or mail-to-web surveys sent to randomly-selected phone numbers or addresses. Panelists are then asked to participate in online surveys sponsored by the UNH Survey Center.

Data were weighted by respondent sex, age, education, and region of the state to targets from the most recent American Community Survey (ACS) conducted by the U.S. Census Bureau, as well as party registration levels provided by the NH Secretary of State and to 2020 election results in New Hampshire. Surveys were taken in English, all respondent data included passes Qualtrics data quality checks, and single-use survey links were used to prevent multiple submissions by respondents.

The number of respondents in each demographic below may not equal the number reported in cross-tabulation tables as some respondents choose not to answer some questions. Due to rounding, percentages may not sum to 100%. All coding of open-ended responses is conducted by human coders.
