DURHAM, NH - Vice President Kamala Harris holds a massive lead over former President Donald Trump in the presidential race in Vermont, fueled by an extraordinary lead among women and those with college degrees. Harris is far more personally popular than Trump and is rated considerably better on several personal attributes, particularly temperament, honesty, and integrity. About four in ten Vermonters are not confident that there will be a peaceful transfer of power following the November election. The Democratic vice presidential nominee, Minnesota Governor Tim Walz, is quite popular in Vermont and most Harris supporters are enthusiastic about his selection. President Joe Biden's job performance remains unchanged and Vermonters are divided on Biden's overall tenure in office.

#### 2024 Presidential Race

If the presidential election were held today, 67% of likely voters in the state say that they would vote for Harris, 27% would vote for Trump, 3% would vote for Independent Robert F. Kennedy Jr., and less than 1% would vote for Libertarian candidate Chase Oliver or for Independent Cornel West, while only 1% are undecided. If they could only vote for Harris or Trump, 70% of likely voters say that they would vote for Harris and 29% say they would vote for Trump. In June, before the first presidential debate and President Joe Biden's withdrawal from the race, 61% of Vermonters supported Biden and 24% supported Trump in Vermont.

Harris has the support of 92% of self-described socialists and 79% of moderates, slightly outperforming Biden's support among those groups in June. Harris also enjoys overwhelming support from liberals (99%) and progressives (91%) while most self-described conservatives (90%) and libertarians (87%) support Trump. Harris holds very large leads among women (81% to 12%) and those with college degrees (80% to 14%) while Harris holds smaller leads among men (53% to 44%) and those without a college degree (58% to 36%).

## Green Mountain State Poll Methodology

These findings are based on the latest Green Mountain State Poll, conducted by the University of New Hampshire Survey Center. Eight hundred forty-one (841) Green Mountain State Panel members completed the survey online. The response rate for panel respondents to the August 2024 Green Mountain State Poll is 37%. In addition, 147 Vermont residents completed the survey after receiving an invitation via text message to complete the survey online. Overall, 988 individuals completed the survey between August 15 and August 19, 2024. The margin of sampling error for the survey is +/- 3.1 percent. Included in the sample were 924 likely general election voters (margin of sampling error +/- 3.2 percent). In addition to potential sampling error, all surveys have other potential sources of non-sampling error including question order effects, question wording effects, and non-response. These MSE's have not been adjusted for design effect. The design effect for the survey is 2.2%.

The Green Mountain State Panel is a probability-based web panel of Vermont residents. Approximately 2,750 Vermont adults have been recruited from phone, text-to-web, or mail-to-web surveys sent to randomly-selected phone numbers or addresses. Panelists are then asked to participate in online surveys sponsored by the UNH Survey Center.

Data were weighted by respondent sex, age, education, and region of the state to targets from the most recent American Community Survey (ACS) conducted by the U.S. Census Bureau and to 2020 election results in Vermont. Surveys were taken in English, all respondent data included passes Qualtrics data quality checks, and single-use survey links were used to prevent multiple submissions by respondents.

The number of respondents in each demographic below may not equal the number reported in cross-tabulation tables as some respondents choose not to answer some questions. Due to rounding, percentages may not sum to 100%. All coding of open-ended responses is conducted by human coders.
