well, we folks, in a natural language representation:

**The New Hampshire, May 1, 1930**

**Editorial Staff**

**Business Staff**

**Faculty Advisors**

**Senior Editors**

*The New Hampshire* is a student publication of Dartmouth College. Its purpose is to express the opinions of the students of the College and to promote a better understanding of the College community.

**SUBSCRIBE**

Everyone realizes that the scholarship fund drive, which is conducted each year by faithful and natural-minded members of the graduating class, who appear throughout the campus, collecting signatures to the fund pledge, is a most important project. Each year by faithful and useful subscribers will please notify the Circulation Manager as to the number of copies ordered. For simplicity, the Class of '30. The committee is trying to get as many pledges toward the scholarship fund as possible. If you have any suggestions regarding the scholarship fund, please notify the Circulation Manager.

**Pledging Notice**

No Chapter of Alpha Chi Sigma, honorary chemistry society, has been more active in applying for funds to help the scholarship fund drive than Dartmouth College. We hope that all members will do their utmost to help the scholarship fund this year.

**Building in Which You Take Pride**

On the campus, where classes buildings and memorial structures are so often distinguished by their different and charming characteristics, a few lights, some of which are more and some less, can be seen. These lights, which are often referred to as the first point of interest, are the lights that refresh.

The pause that gives poise

Comes a time (as they say) every day when it is good to do things—well done and, when you do them, to enjoy the high order of your accomplishment.

You say it too, a moment or two, and then, to refresh and give yourself a rest.

To refresh and give yourself a rest.

We wonder why they do not play a few games between classes?

Other colleges use these.

**Gates and Doors**

We may be interested in the number of times the gates and doors of the gym. As it happens these gates and doors are opened and closed frequently, both in and out of school hours.

As far as the gym, the campus is very frequently in our officers' attention.

We think of our officers and by them they ask:

**Collegians**

Our idea of an optimist is the man who can see the best side of everything.

Light is the first of points.

OLD GOLD cigarettes

in a stunning new velour box!

Have you seen them... those velvety golden velour packages of fifty OLD GOLES? They are as trim as a Tiffany cigarette case... smart as a cigarette box from Paris. College people all over America are buying them to supplement the familiar OLD GOLD pocket package... to pass to their friends... to take on trips and outings... or just to keep on their study tables. They are now on sale everywhere... at the standard price for fifty OLD GOLES.

Marine Lab to Open June 23

Isles of Shoals School
To Begin Third Session

Reservations Being Made to Accommodate More Students Than in Former Years—Admission Course to be Offered for First Time

The third session of the University of New Hampshire Marine Laboratory will be held at the Isles of Shoals from June 23 to August 17. The past two sessions have been a success from every point of view. Twenty-four students have attended each year, and more world students are expected in attendance if accommodations allow.

The Isles of Shoals make an ideal place for summer studies, for there is a bias for generous and advanced students to conduct problems and to complete work under more favorable conditions than on a college campus. Material is on hand for study of specific and broad forms, and comparison of the world of the mainland with that of the islands are being made.

There have been many students from other colleges at the laboratory as it is quite necessary for teachers, research workers and other scientists to work at least a season's attendance at some marine laboratory. Teacher connections will be made.

The students of the Isles are given an ideal place for summer studies, for there is a bias for generous and advanced students to conduct problems and to complete work under more favorable conditions than on a college campus. Material is on hand for study of specific and broad forms, and comparison of the world of the mainland with that of the islands are being made.
