Enzo D. Serafini, '31, will speak at the conference on modern architecture at the University of New Hampshire. His topic will be "The Evolution of Modern Architecture."
Professor Bisbee Speaks at Newport

Advises Change From One Hundred Point Scale to Three Point System in Secondary School Marking as Guide Toward Better Citizenship

Harlan M. Bisbee, assistant principal of the University school, spoke at the Newport Thursday, Professor Bisbee tried to point out the need for a university spirit that can be carried through all ranks of the student body. A presentation of a new idea of marks in the normal course was made by Professor Bisbee. The marks in the marking system would be abolished, the 100-point scale, which is absurd and impossible, to be three-point system of rating, grades of A, B, and C.

To gain promotion, a pupil should be required to pass with distinction or credit which would be granted only if he had performed according to expectancy, said Mr. Bisbee. This would put an end to the capitalizing of the standard of passing without the student's capabilities. This change is based on a logical test; scholarship rating is a drawback. Some people today

Freshman Quinet Wins From Hebron

MAINE BASKETBALL Low First Game of Season to Hebron's Kittles

The University of New Hampshire freshman defeated the Hebron academy team by the score of 22 to 15. This was an exciting game, the 12th in the series this year in twelve encounters, and the third time in a row for the Hebron team. Hebron defeated six teams in the season, and Maine freshman Karl Hill, M. I. A., made a grand performance.

At the end of the first quarter the score was Hebron 10, UNH 2. It was promising to be exciting and thrilling when the Reformer town and theG. H.other team met. But Hebron's Kittles were cramped of fast players and a draw started. The half ended with a score of ten to seven in favor of Hebron.

The Kittles started the short game in the third quarter and the Hebron backwoods were left in the lunch. The Kittles held them four feet, Hebron rescued several screen points from fast Goals. The high scorer for the Kittles was Marion Childs, who was through with the game as the High scorer for the UNH team was Herbert.

The New Hampshire vs. Hebron is a match between the two teams; the Kittles will continue their trip to the third quarter. Then in the fourth quarter the Kittles were victorious by a score of 15 to 10. The Kittles will take advantage of Hebron's mistakes by the time of 00.00.

Preservation of America's Forests
Becoming Popular Topic With Public

Fortunately the American public, especially the people at New Hamp­shire, has finally recognized the seri­ous problem confronting forestry. Thirty years ago, how­ever, a majority of the United States public had not even de­tected the real need of proper forest protection. By 1915, the public was educated enough to realize that forest conservation was the most important task of the nation.

In the meantime, the struggle has con­tinued, and the public's interest has grown. The public now realizes that the forests must be protected if the country is to maintain its agricultural and industrial productivity. The public's interest in forestry has grown to the point where it is now a major concern of public policy.

In addition to the public's interest, there is a growing corpo­rate interest in forestry. Many cor­porations now recognize the impor­tance of proper forest management for their own economic survival. This corporate interest is reflected in the growing number of corporate forest management programs and the increasing amount of corporate funding for forestry research.

The future of the American forest is in the hands of the public and of its elected officials. The public must continue to support the work of forestry agencies and to elect officials who will prioritize the protection of our forests. The future of our nation's economy and well-being depends on the continued health of our forests.
