Delta Sigma Chi gives final performance

The combined glee club of the University gave its final performance of the year last night in the Memorial Auditorium. The glee club was well chosen and the concerts which they gave later in the season should be extraordinarily good. Particularly good were The Five Lamp Posters, conducted by Elbert Williams. The service included such a number of songs that the cards can be read upon to project the future success of these students. In its final song the cards were well chosen and the concerts which they gave later in the season should be extraordinarily good. Particularly good were The Five Lamp Posters, conducted by Elbert Williams. The service included such a number of songs that the cards can be read upon to project the future success of these students. (Continued on Page 4)

Cover Me, Please—An Essay

The combined glee club of the University has held its final meeting of the year last night in the Memorial Auditorium. The glee club was well chosen and the concerts which they gave later in the season should be extraordinarily good. Particularly good were The Five Lamp Posters, conducted by Elbert Williams. The service included such a number of songs that the cards can be read upon to project the future success of these students. (Continued on Page 4)

PLANNING NOTICE

The expanded glee club of Alpha Gamma Chi will take place on Saturday afternoon. The next concert will be the final concert of the season, and the service will include such a number of songs that the cards can be read upon to project the future success of these students. (Continued on Page 4)

Made FRESH—never parched, never toasted
CAMELS are KEEPT FRESH

You probably know that heat is used in the treatment of all cigarette tobaccos.
But you know too that excessive heat can destroy freshness and fragrance.

That's why there could be no truly fresh cigarette except for scientifically developed methods of applying heat.
Reynolds is proud of having discovered and perfected methods for getting the benefits of heat treatments and still avoid:

- Evaporating the contents
- Nutrients
- Flavor
- Oils
- Smoke
- Ash

With every assurance we tell you, Camels are truly fresh—not parched or toasted—and then they're kept fresh in the Camel Humidor Pack.
If you wish to know why the swing to Camels is nationwide and steadily growing, just leave them for just one day—then leave them, if you can.
