PI KAPPA ALPHA WINS BOXING INTRA-MURALS

Large Number of Knock-outs Feature Semi-Final — Phi Mu Delta and Phi Delta Upsilon Runners-Up

AHERN KNOCKS OUT BETLEY IN 15 SEC

Phi Delta Upsilon Makes Best Showing in Final Bout

Pi Kappa Alpha won the annual inter-fraternity boxing meet, winning Phi Mu Delta, 14-10, and Phi Delta Upsilon, 38-12, in the semi-finals. The final bout between Phi Delta Upsilon and Pi Kappa Alpha ended in a draw. The entire meet was held in the gymnasium of the college. The event was sponsored by the boxing committee.

UPPERCLASSMAN PROPOSES NEW PLAN

For Campus Legislative Government

By Robert Harris

In an interview with a prominent upperclassman, it was revealed that a reform movement is afoot in the campus legislative government. The plan, which was outlined to the interviewee, is intended to make the current system of a better one. It is to be instituted on a trial basis next semester.

The plan would involve several significant changes. First, the current system of representative democracy would be replaced with a unicameral system. Each student would be represented by one vote, regardless of fraternity or sorority affiliation. Second, a unicameral system would be established in which all legislation would be referred to the student body for approval. This would ensure that all legislation is in the best interest of the students.

The new plan would be more representative of the student body as a whole. The current system allows for too much influence of the various fraternities and sororities. The new plan would ensure that all voices are heard.

LARRY JENSEN TO ADDRESS ALUMNI AT BOSTON MEETING

"Larry" Jensen, 33, first major of Phi Delta, will once more address the alumni of the college in a public meeting at Boston in the near future. The exact date and time of the meeting has not been announced.

"Larry" Jensen is well known in the college community for his dynamic leadership and his commitment to the college's values.

TECHNOCRATS SEE ABOLITION OF MAN

Power in a Technical Society

By William Corvain

"I am more than convinced that I know nothing about Technocracy," Mr. Corvain, an electrical engineer, stated yesterday. "I am inclined to believe that I have missed my true calling in the society and that I am not fit for membership." Mr. Corvain, who has met with the society's leaders, is convinced that the society is not a viable organization.

The society, which was formed in 1920, advocates the replacement of the industrial system with a technical society. Mr. Corvain has been a member of the society for ten years and has been actively involved in its work.

The society's leaders have been quick to respond to Mr. Corvain's criticism. "We welcome Mr. Corvain's criticism," said Mr. Howard Scott, the director of the society. "We are always ready to listen to our members and to learn from their experiences."

Mr. Scott went on to say that the society is open to all who are interested in its work.

It's fun to be fooled...
...it's more fun to KNOW

Another "magic show" is cigarette advertising.

One of its greatest tricks is the illusion that cigarettes can be made miraculously "MILD" through advertising methods.

**EXPLANATION:**
All popular cigarettes today are made in modern sanitary factories with up-to-date machinery. All are heat treated—some more intensively than others, because, raw tobacco requires more intensive treatment than choice, ripe tobaccos.

The real difference comes in the tobaccos that are used. The better the tobacco, the better the smoke.

It is fast, well known by the tobacco experts, that Camelts are made from finer, MORE EXPENSIVE tobaccos than any other popular cigarette.

This is why Camels are so mild. This is why cigarettes can be made miraculously "MILD" through advertising methods.

**THE SECRET OF CAMELS' RICH "BUCKET"... their cool flavor... their non-irritating qualities... their smoothness... their light taste...**

All natural, ripeness of Camels' tobacco is kept fresh for you by the famous air-tight, unlit Humidor Pack. Don't remove it.
MEAL TICKETS REDUCED!

Next was the cut. We knew that fine tobacco burnt hot because it burnt so fast. You could hardly touch your pipe to the end of your hand, it got so hot in times. So remembering how folks used to "whittle" the pipes, we put Granger in a sensible soft foil pouch instead of an expensive package, knowing that a man can't smoke the package. GRANGER has not been on sale very long, but it has become a popular smoke. And we have yet to know of a man who started to smoke it, who didn't keep on. It seems to be a complete new smoke.
