TERM-HOUR PLAN TAKES EFFECT IN SEPTEMBER, 1933

DEAN CHARLES H. PETTEE

Charles H. Pettee, Dean of Faculty, Eighty Years Old Today—Has Spent More Than Half Century In Excellent Service To University

Charles H. Pettee, Dean of Faculty and the only surviving member of the University's first faculty, passed away Friday, January 21, 1933. He was 80 years old.

Charles H. Pettee was born in New Hampshire, February 2, 1853. He was advanced to the Eagle Order of Kappa Kappa Kappa and graduated from high school in 1870. He took the four-year classical course at Dartmouth College and received the B.A. degree in 1874.

He taught English in the high school in New Hampshire and also practiced law for some time before he entered the college faculty in 1877. Since then he has occupied a prominent position in the college faculty and has been known as a noted scholar and educator.

During his long career at the University, Dr. Pettee has been active in many educational and community activities. He has been a member of the New Hampshire State Board of Education, and has served as a member of the University Board of Trustees.

In his capacity as Dean of Faculty, Dr. Pettee has worked tirelessly to improve the quality of education at the University. He has been a strong advocate of the term-hour plan, which he introduced in 1913, and has been instrumental in its development and implementation.

Dr. Pettee was a master teacher and a respected scholar. He was a member of the American Association of University Professors and a fellow of the American Association for the Advancement of Science.

He leaves a wife, Miss Mary S. Pettee, and a son, Charles H. Pettee, Jr., who is also a member of the University faculty.

A memorial service will be held at 2 p.m. on Saturday in the Memorial Hall of the Bowdoin College Library.

For the first time in the history of the University, the term-hour plan takes effect in September, 1933.

This plan, which is a combination of the term-hour and the credit-hour systems, is designed to provide a more flexible and individualized approach to education.

The new system will allow students to choose courses and schedule their courses to suit their individual needs and interests. It will also enable them to transfer credits from other institutions with ease.

The term-hour plan is being introduced in September, 1933, and will be in effect for the remainder of the academic year.

Chesterfield is the only good cigarette . . . the makers of Chesterfield Cigarettes are the only ones that can buy good tobacco and manufacture cigarettes scientifically . . . would be nothing short of foolish.

For all tobacco is sold in open auctions—where anyone can bid if he will pay the price. Even the machines on which different cigarettes are made are alike.

This much, however, is true: By using the best kinds of Turkish and Virginia tobaccos in just the right proportions . . . by blending and cross-blending them together in their right proportions . . . we make Chesterfield what smokers say . . . the cigarette that's milder, that tastes better. Just try them.

Bates Shatters Early New Hampshire Led to Come-From-Behind Victory

After overthrowing an early New Hampshire lead, Bates poured on to win in the final period. Bates goalie, Bob, had given up only a single tally in the first period to defeat the Wildcat nine 1-0 at the University gymnasium Saturday afternoon.

Jim Steffy opened the scoring of the
game for Bates in the first period, on a pass from Gaw, giving the Bobcats the lead 1-0.
