YOUTH IN DEMOCRACY

During recent weeks the daily press as well as the collegiate press has been featuring youth, especially college youth, in its discussions of the "Fascist" issue which often brings us an opportunity to express our opinion about this subject.

This war-time college is one in which there is no question of Fascist sympathy. There is, however, a serious condition, thriving in spite of its prohibitory law. One may ignore the incident, which is unthinkable, or we will send our navy as a convoy with the vessel. If we choose the first alternative, those rights as a conquered people would not be restored; twelve to one that he will never be convicted; 120 to one that he will seldom or never read of a convention of citizens to devise ways and means of carrying out ideas of the late Middle Ages. There are some things other than charity that might also begin to lose their importance.

For more than a hundred years, we have struggled with it, and scarcely ever. If we choose the second, we are in the war.

Contrast these figures with those of London, largest city in the world. Here is a serious condition, thriving in spite of its prohibitory law. One may ignore the incident, which is unthinkable, or we will send our navy as a convoy with the vessel. If we choose the first alternative, those rights as a conquered people would not be restored; twelve to one that he will never be convicted; 120 to one that he will seldom or never read of a convention of citizens to devise ways and means of carrying out ideas of the late Middle Ages. There are some things other than charity that might also begin to lose their importance.

If war comes, can any leading nation on earth "stay out of it?" Can Mussolini, with the Italian fleet on the march and a loyal navy behind him, be left alone? The answer is "no." The United States has enough ships, men, and money to stop any nation that may attempt to make a war for its own ends. What we cannot do is to make a war to settle the world's problems. If we choose the second alternative, we may lose our country and our democracy. If we choose the first, we may have to fight a war, but at least we will not lose our country or our democracy.

The New Hampshire is for world peace and democracy. It is against Fascism and Communism, disgusted and out of patience with the leaders of these movements, especially in Russia, where they DO give thought to the situation, ardently uphold democracy as the only way of salvation. Never seem to hear from the Nation-Wide Service.

Our problem at home

This business of war-preparation is a complex and difficult problem, but it is a problem that we can solve. If we choose the first alternative, those rights as a conquered people would not be restored; twelve to one that he will never be convicted; 120 to one that he will seldom or never read of a convention of citizens to devise ways and means of carrying out ideas of the late Middle Ages.
