Price Five Cents

### "Lest We Forget"

Soon the poppies in Flanders fields will again be swaying gently in the warm breezes of the French countryside. But underneath lie sleeping the departed souls of a valorous generation. The memory of those who gave their lives in the hope that we might benefit should be with us more closely on Memorial Day than on any other day in the year. Especially should this be so in the case of the following who were so close to us in life, who at one time trod our campus paths with the same thoughts, the same hopes, the same aspirations which guide us

### **UNH WINS TRI-**STATE CONTESTS

All but Two of Winning **Contributions Printed** in Student Writer

MAINE 2nd-VT. 3rd

Brings University Third Consecutive Triumph Over N. E. Colleges

For the third consecutive year the University has won the annual Trithe University of New Hampshire. At the end of this year's contest, New Hampshire led with a score of sixteen points out of a possible thirty, with Maine second with five points and Vermont trailing Maine by one

the contest were the essay, the story, and the poem. In the essay class, John Starie tied for first place with his "For Sons and Sons to Come" Joseph M. Schenck and Darryl F. his "For Sons and Sons to Come," and Isabel Alden took third place with "The Upper Room." In the story class, Helen Ladd, with "Diminuendo" won second place, and Theadora Libbey followed her in third place with "Childish Dilemma." In poetry, "Childish Dilemma." In poetry, Shirley Barker won first place with "Sweet Heritage," but the second and third places are still to be decided. In this class that has not been heard from yet, are John Starie and Ralph

The story by Theadora Libbey is not in the Writer, but she is represented therein by four other contributions.

Coming so soon after the news of Marie Young's honorable mention in the Atlantic Monthly essay contest, this is very pleasing to the English Department, especially as there are the new of the contract demands, the magnitude of this show, and its newness, a minimum adult admission of thirty-five cents will be charged for both still other contests to be heard from, five cents will be charged for both including a national poetry contest afternoon and evening performances. and two national story contests, in all Admission for children will be fifteen of which the University is represented. cents for all shows.

## Critic Says '34 Student Writer Is Above Undergraduate Writing

by Richard Clarkson

I ask which one of these I love the

If it be life or love itself or You

Or me reduced to my imagined ghost. If I could live out years enough to

The answer, could it be that foolish I
Might hear the dream that kindles
heart and mind

Proved pitilessly dead in some reply? For fear of this I hold you, dear, as

With winter branches on the sky,

As one with autumn fields or holy

Perceiving what I love, but not how

This, it will be seen, is not under-

In this group, some people will like Theadora Libbey's essay best because

the sun,

The Student Writer for this year has the same number of pages as last year's issue, and about the same num-ber of contributors. The contributions consist, as last year, of stories, essays, and poems. There is a great variety of material, some of which is better, and some of which is incomparably better, than the rest of it. College students should find every one of the contributions well worth reading. The casual reader will find that a good number of the contribu-

come from Shirley Barker and Theadora Libbey. They are all poems: Sweet Heritage and Poet's Progress are the two best by Miss Barker; and a sonnet series by Miss Libbey, Sonnets On Rupert Brooke, is her outstanding contribution. Both Miss Kidder; and Late Spring, a story by Libbey and Miss Barker have improved Isabel Alden. considerably since last year and they were good then. Miss Barker seems better able to express herself in the less confining forms of poetry this year and at the same time to preserve most sincere. She has not a great year and at the same time to preserve most sincere. She has not a great relevancy; and Miss Libbey not only writes better poetry but seems also form and force and imagination. It to be sure enough of herself to rise from the merely ironic attitude shown how well she succeeded will be apparament.

These poems are good. To hell, as somebody said, with this almost and perhaps stuff and this good-of-its-kind stuff. I shoot the works I to have a succeeded will be apparent if you compare her essay with another of similar aim, Catherine Mason's Through The Dark.

Old Gibraltar, which works kind stuff. I shoot the works. It will be well to quote one of Miss Libbey's

### with birds That streak in purple trails across tions are distinctly above the class of undergraduate writing, and that therefore the volume is significant not only as an index of the student mind and as an indication of budding genius but also in the larger sense of words. I hold you, dear, as I hold all things literature as a mature criticism of life. This can be said of only a very few college magazines in this country. Keeping that fact firmly in mind, there is still plenty of fault to find. This, it will be seen, is not undergraduate poetry. The next classification, the better contributions, are mostly stories. These are: Old Gibraltar, a story by Alice Walker; Diminuendo, a story by Helen Ladd; Summer Hotel, a story by Robert Hatch; Tribute, an essay by Theadora Libbey; Except A Grain Of Wheat Fall, a story by Maurice Kidder: and Late Spring, a story by

The incomparably better subscriptions to the Student Writer this year

sonnets, since she has not achieved quite the recognition that Miss Barker enjoys:

THE LOVER

"I know not how I love; but since I do,

### WEEK-END WEATHER

Friday, June 1, 8 a. m. Pressure was below normal yesterday morning over almost the entire country and the skies were cloudy. A weak high pres-sure area was, however, moving slowly southeastwardly over Hudson Bay while a disturb-ance of considerable extent was centered over North Dakota and Alberta. Scattered showers had fallen in many places over the continent. The low now centered over the Great Plains will move slowly east during Friday and Saturday and it will be accompanied by scattered showers and somewhat higher temperatures. There does not seem to be any indication at present of the same sustained fair weather for the week-end.

Mostly overcast tonight and tomorrow with occasional showers. Cooler today but warm again tonight, Sunday, partly cloudy and warm, Possibly light showers. Gentle souther-

# Start on Wednesday

Mask and Dagger Presents "The Late Christopher Bean" at Murkland

Next Wednesday, Thursday and Friday nights at eight o'clock Mask and Dagger will present the spring term play, The Late Christopher Bean. Rehearsals have been progressing continuously for most of the term so the play should be well acted. To those familiar with the piece and with the past successes of the society under Mr. William Hennessy, there will be no doubt as to the quality of the entertainment to be provided this term. A single presentation of the play will be given in connection with the Commencement activities on Sat urday evening, June 16 at 8:30. Al but one of the cast have had previous experience in dramatics either at the University or elsewhere. The complete cast includes: Carolyn Welch as Abby; Warren Marshall as Dr. Haggert; Irene Couser, Mrs. Hag-gert; Donald Fassnacht, Davenport; Lucille Sterling, Susan Haggert; Donald McArthur as Warren Cramer; Frances French, Ada Haggert; Nathaniel Eiseman, as Tallant and Donald McIsaac as Rosen. The four best known, and to judge

from their records, the most experi enced members of the cast are Carolyn Welch, Irene Couser, Donald Fassnacht and Frances French. Miss Welch, who hails from south of the Mason and Dixon line, and is proud of the fact, is playing her third role with Mask and Dagger. She will be remembered for her work in Ladies of the Jury and Mrs. Moonlight. Miss Welch now lives in Andovor. She is Welch now lives in Andover. She is at present the vice-president of the United Student Christian Federation on campus. Irene Couser, who comes from Dover, has had experience in several plays at the University and played for some time last summer in a professional stock company. She is a member of Alpha Chi Omega sorori- 1923. He went from there into the cs, zoology, and anatomy. There will ty and was the 1933 winter carnival queen. Frances French, who is presablished a high record in scholar-ident of the Phi Mu sorority, has ship, leadership, and loyalty. Over worked in dramatics both in high school and in the University. Her his fifth year at the University. He previous experience includes Out-ward Bound and Ladies of the Jury. #### THE FUTURE FOR THE GRADUATE

During the coming month, our colleges are contributing thousands of graduates to a world already burdened with a surplus of job-seekers, where lucrative positions are abnormally few. Until six or eight years ago, such positions had sought out and secured, long before Commencement, properly qualified members of each Senior class. Those days will not return for a year or more, and the outlook at present may seem more or less discourag-

year or more, and the outlook at present may seem more or less discouraging, even to the best equipped graduate.

There is, however, excellent ground for optimism in the situation, which must not be ignored. The present jobless period has existed for several years. Throughout the last quadrennium, when thousands have generally been idle, this year's graduates have been holding a "steady job" bringing them remuneration which, although imponderable by methods of trade, far exceeds the maximum wages, in coin of the realm, that anyone of them could have obtained alsowhere at any time. Four years of training in lead or him. have obtained, elsewhere, at any time. Four years of training in leadership use of books, reading so as to acquire the most in the shortest time, of association with the most promising minds of the rising generation, to say nothing of enjoying expert guidance of those who have traveled the road they have been following, whose counsel prevented them from wasting time on false or blind trails,—all these advantages with a host of others that might be mentioned have given the student the kind of remuneration which nothing, short of mental disease, can ever take from him. Its investment will bring him returns not to be compared with those from investments in the marts

What a man learns in the classroom should be a small part of the equip ment he carries away from college. What he should get, among other things, is a knowledge of correct habits of logical, organized thought; the ability to see ideas in proper perspective, unconfused with the background; respect for sound things; aspiration for higher ideas; a true sense of discrimination;

machinery for sound reasoning and sound judgment. Today, with this equipment, he is turned loose, unfortunately, into a mad world, where "we are trying to prevent war in the ways that didn't prevent it before, to keep out of war by the methods that got us into it before, and to hold ourselves safe by the armaments that held nobody safe before. And when we meet in conference, to agree on the thing that we all know and pro-claim must be done, with one accord we refuse to do it." At least, he is no worse off than his unschooled fellows, but rather much better off when job-getting is concerned, and inestimably richer in all those things which go to make up a full and useful life—the only life that is really worth living.

In the present rather dubious outlook, especially from a financial stand-

point, let none forget these figures, which may not be true today, were true four or five years since, and will be approximately true a few years hence. They represent the percentages of those who have reached the age of 65, and are dependent upon nobody for their support. College graduates, 95%; High school graduates, 60%, eighth grade graduates, less than 40%. We leave it to you to decide whether a college education is valuable.

### CLASS CUTTING—A PROBLEM

With the coming of warm spring days the problem of class cuts assumes more serious proportions if one is to judge by the attendance at lectures. Unquestionably, too many people are staying away from classes. The ideal situation would be one in which all students realized their responsibilities and took no cuts. Since this is contrary to the nature of the average under

graduate, various methods must be tried in an effort to enforce attendance.

The two most used systems are the ones which allow of no cuts and those which permit a regulated number to all students. Several colleges in New England allow to every student a number of cuts equivalent to the term credits of each course. This then takes the responsibility for penalty out of the hands of the instructor and places it in the hands of a University or

While this theory of handling the problem is very desirable to the student if any regulation at all is to be made it brings about the false assumption that the student is entitled to cut classes. While we are attending college there are many others of the same age beginning work. To assume that the worker has a right to cut his job a certain percentage of his working hours every week for reasons other than illness would bring forth the ridicule of all business and industry. Why then is it not just as ridiculous for the educator to assume that one of the rights of a student is the cutting of

The other plan which is used enough to command mention is the one

The other plan which is used enough to command mention is the one employed by the University and many other schools in New England. It demands constant attendance for all except in cases of illness and on trips representing the University. The idea is sound and consistent with adult reasoning. The flaw in the theory lies in the placing of all responsibility for penalty in the hands of the instructor.

This might be correct if the student were not prone to cut. He has, however, the mistaken idea that cuts are his privilege and with many instructors lenient in the matter he is able to carry on with no regard to the effect his absences have on the scholastic standing of the University. True realization of this effect of constant absences explodes the old theory that the student made his own penalty when he absented himself from class. The ill effects go much farther than that, though, and can be seen in the standing of the whole school if the evil goes uncorrected for too long a time.

It is not fair to criticize all for the mistakes of a few but it does seem

important to call to the attention of the mistakes of a few but it does seem important to call to the attention of the majority the penalty that is being placed upon it by the minority. Some of our faculty as well as some of our student body seem to have the mistaken idea that there is no necessity for carrying on a college course according to the rules of business. Personal discretion is a fine thing but the more there is of it the more chances there

are of having the privilege abused.

Altogether too many students cut for no reason whatsoever. Add to these those who cut in order to study for an exam and those who find the Hood House a convenient excuse for cutting a class or two and it is possible to visualize the effect such a practise must have on the University as a whole.

Of course it is impossible to believe that all cutting will be abused by

the strict interpretation of the cut rule as it exists at present at the University. It will, however, do away with the idea of unexcused absences being a privilege of the student any more than it is of the worker in other fields. As soon as that realization becomes strong in the minds of the student then cutting will unquestionably come inside a reasonable figure. It will come that the fort the benefit it will give to the University it would seem hard at first but for the benefit it will give to the University it would seem worth the effort.

### AN INDICTMENT OF MODERN EDUCATION

Modern education, from grammar schools to colleges, stands before the tribunal of disappointed graduates on the charge that it has failed miserably in carrying out the object of its existence. Are modern educators so bluntly stupid that they cannot see the hand-writing on the wall? From top to bottom the educational system is hampered by old methods and techniques of teaching which were old when the first schools were established in America. Teachers and professors today are stereotyped, unchangeable, and their lectures reflect dead and dying theories of the studies they teach.

Granted that a student in an educational institution is taught what to think, why have not the teachers and professors developed a system that will teach their students HOW TO THINK? Certainly a psychology of learning

and thinking should be imbedded in a student's mind before he tries to attain culture in an institution of higher learning.

Routine assignments of little or no value, compulsory attendance to classes in which the professor fails abominably in putting across his points, periodical examinations on insignificant details of a course all typify a modern college education in all its antiquity of classroom procedure. Of course, prominent examples are brought to our attention of reforms made in remedying these evils. Perhaps the most significant of these examples is in the University of Chicago. A modern in the true sense of the word, President Hutchins has made revolutionary changes in the system employed at Chicago. Honors work, freedom to cut classes, and comprehensive courses

are among the novel but modern innovations at the institution.

The University of Illinois sounded the key-note of modernism in education when it made an attempt recently to humanize education. Realizing that the old methods of teaching did not appeal to many of the students, with the result that their grades suffered by their inattentiveness, special textbooks which dealt with a more practical and human side of the subjects were written. These "backward" students were placed in a separate division of the University under the tutelage of the more brilliant and appealing professors. Curiously enough, the "brighter" students found the more human textbooks to their liking, and the "dry as bone" books are being neglected more and more in favor of the newer literature. Certainly an education need not be made painful and students can appreciate the subject matter of a book just as well if it is couched in understandable terms.

If all these attempts to modernize education are found effective, and

students show more willingness to cooperate with professors under a humanized system of education, why are not all of these experiments applicable to all institutions of education, including all the better methods under trial and eliminating the more outstanding evils of our present system? A survey should be made, by correspondence or actual study on the scene, of the possibilities of the modern methods of teaching in vogue at many of our larger colleges, and a recommendation made to the University Administration and Board of Trustees as to the applicability of these innovations to the system of instruction at the University.

Critic Says '34 Student Writer is Above Undergraduate Writing

"The Witching Hour" Franklin Theatre **Coming to Franklin** 

Presentation of Famous Play Will Show on Sat., June 2

"The Witching Hour," Paramount's presentation of Augustus Thomas's famous play, is coming to the Franklin Theatre on Saturday, June 2. The old South with one of its most beautiful mansions was recreated for scenes in this picture.

by Jimmy Bannon

The play, a famous romance, tells of the memory of a beautiful love and how it returns to save the romance of a boy and a girl of a new man

picks up.—There, Bud, I didn't Brookfield, played by Judith Allen. Thorne has a peculiar complex, an aversion to cat's-eyes, a phobia that

When they got through dressing up the outside of "T" Hall we wonder if it wouldn't be a nice thing if they'd sort of dust the inside and move the tap dancing classes. "T" Hall's O. K. It's the tap that ales it.

The Golden Bull seems to be driving in the silver. The big problem is what it will drive out. Nevertheless, courage is the better part of valour,

aversion to cat's-eyes, a phobia that drives him to an emotional and mental hysteria. While under a hypnotic influence induced by one of these semi-precious jewels, he commits a fantastic crime, without being conscious of what has happened.

No one would defend him in his trial. An old love returns to save his romance, however, when Judge Prentice, a retired jurist, is persuaded to reits to save the boy. In a dramatic, tense scene, for which the play is famous, a fantastic defense is used to famous, a fantastic defense is used to We would call this boy Emery (of save the boy from the crime he com-

> The fad has now changed and the new wrinkle is how many closed house dances can we visit without getting the cold shoulder, or any refreshments, for that matter.

And those who were tired, or something, for the house dances certainly for a change didn't get tired trying to keep time with the Promorchestra. A little pep for a change and second hand for that.

Dorothy Foster, Chairman; Betty Hersey, Jacqueline Dondero, Jane Woodbury, Ruth Dodge, Mary Jeno, Jean Stevens, Ruth S. Johnson.

If the freshman women decide to abolish hazing next fall the committee will function in sponsoring functions such as class meetings in order

ciently pointed. It is an indication of the writer's talent that the story succeeds at all in spite of being crammed with maundering and egotistical irrelevancies.

The rest of the contributions show varying degrees of talent. They are all good pieces of undergraduate writers (Continued on Page 3)

Shoe. Looks like you took a running, boy.

We wonder if a little concentration on exams will by any chance lessen the general efforts about to imitate lowing new members were initiated: Phyllis Caswell, Flora Dimond, Milder Doyle, Nathaniel Eisman, Marter Furman, and James Burch.

# important new **Facts for Smokers!**

Science reveals

# Camel Smokers can verify these facts!

basic discovery that throws new light on our past knowledge of cigarettes. It embodies an "energizing effect"...a quick restoration of the flow of natural body energy...an experience well known to Camel smokers. When you smoke a Camel you feel an

A famous New York research laboratory announces a almost immediate relief from fatigue. You have released and made available the latent energy in your body. You've helped your body to help itself. During the day your energy curve hits certain low points. Camels raise your flow of energy...quickly, conveniently, and without jangling your nerves.

# There's a "Lift" in CAMELS that drives away Fatigue and Irritability

Feel "all in"? Then light a Camel.

It's cool and fragrant and delightful...but far more important than that, it brings your flow of energy up from the depths!

You feel fatigue vanish. Irritability seems to slip away. And you go back to work-or play —with the energy that is naturally yours.

This experience is no news to Camel smokers. But the explanation is news-and good news—to everyone.

The "lift" you get from smoking Camels is simply a release of the natural latent energy in your body. You have helped your body to help itself...easily, naturally.

Remember this explanation when your energy curve is "down"...times when you're irritable and your brain just doesn't seem to work and you feel too tired to move.

Camel fans smoke frequently—and they can -as often as they like. Camel's costlier tobaccos never get on the nerves.

Keep your flow of energy at a higher level with Camels.

CAMELS Camels are made from finer. **Costlier Tobaccos** MORE EXPENSIVE TOBACCOS - Turkish never get on and Domestic-than any other popuyour Nerves lar brand.

TOO TIRED FOR FUN...and then she smoked a Camel!

KNOW THIS FEELING? The feeling of being too "all in" to respond to the gaiety of the crowd? No taste for the pleasure and fun of the sort of social evening that you would ordinarily look forward to? That's one of the many times to light a Camel, enjoying its rich flavor while your flow of natural, healthful energy is restored. You'll like Camels—a matchless blend of costlier tobaccos!

"Get a LIFT with a Camel!"

#### INN EMPLOYEES IN TOURNAMENT

In a first-round match in the tennis In a first-round match in the celling tournament conducted by the College Inn boys, Walter Calderwood defeated Al Lyons in straight sets, 6-2 and 6-3. The tournament, although begun

late in the term, is intended to indicate the championship among the student employees of the College Inn, before the college year is over.

With seven first-round matches yet to be played, and no quarter finals yet played off, the tournament will offer entertainment to tennis fans for the few remaining weeks of the term which are otherwise blank of such

which are otherwise blank of such activities:

Those taking part in the tournament are: Warren Burns vs. Frank Brown; MacKenna vs. Duarte; Toolin vs. Ross; Paige vs. Shaw; Lyons vs. Calderwood; Speare vs. Hendricks; Belyea vs. Bogeart; Kerr vs. Barker, and Ranghynoski. and Ranchynoski.

providing for it, would be to coordinate the plans of the local governments, to conduct surveys and gather information concerning public affairs, and to lay plans for state action. Official Planning in New Hampshire is in only its initial stages, being based solely upon a gentleman's agreement between Governor Winant and the between Governor Winant and the National Planning Board. In accord-ance with the agreement, however, there has been formed the State Plan-ning Board, of which Mr. Langley is chairman. During the last six chairman. During the last six months it has made many studies, covering the whole range of social and political activities, and gaining many facts which will form the neconstructions of the state of t essary basis for future planning.

The Board of thirteen members had, until February 16, a staff of seventy-five. At that time it was reduced to about fifty. This staff has been chiefly occupied with the very difficult and complex task of assembling, checking, and coordinating facts, but has, as yet, done very little to disseminate the knowledge gained. One publication the Board has made, however, is the Town and City Zoning and Planning Primer. This is designed to aid local planning boards in their work. This is a brief discussion of state and local planning; instructions for survey of existing physical, economic, and social conditions; and finally, the procedure in the preparation of the town plan itself.

# of one point, and a loss to Spring-field College which in the opinion of many was a surprise. Coach Christensen will have plenty of veteran Javelin—Won by Regean (NH), 164 ft. 4 in.; second, Lindgren (SJ), 155 ft. 3 in.; third, Shields (NH), 152 ft. 7 in. TEAM DEFEAT GYMNAST TRACKSTERS-77 TO 58

## Critic Says '34 Student Writer is Above Un-

ing. Edward Averill's story, Poobah Was Four, is difficult to classify. It is interestingly, amusingly, and realistically written. It is about a baby, and there is no trace of sentimentality in its handling. But the story has no form and therefore no impact. You wonder why Mr. Averill saw fit to stop writing when he did. If some writers got a character like that under way they wouldn't stop until they'd written a novel.

Cecile Martin's story, Deliverance instance—135 ft. 51-8

Two-mile run—Won by Marlak, (NH); second, Glover (NH); tie for third, Webster and Murray, both of New Hampshire. Time—11m. 2s. 220 low hurdles—Won by Levenseler (NH); second, Funston (NH); third, Mackenzie (S). Time—27 1-5 seconds.

Running broad jump—Won by Parks (S); second, Taylor (NH); third, Haight (S). Distance—23 ft. 1-2 in. 880-yard dash—Won by Levenseler (NH); second, Funston (NH); tie for third, Webster and Murray, both of New Hampshire. Time—11m. 2s. 220 low hurdles—Won by Levenseler (NH); second, Funston (NH); third, Mackenzie (S). Time—27 1-5 seconds.

Running broad jump—Won by Marlak, (NH); second, Glover (NH); tie for third, Webster and Murray, both of New Hampshire. Time—11m. 2s. 220 low hurdles—Won by Levenseler (NH); second, Funston (NH); third, Mackenzie (S). Time—27 1-5 seconds.

Cecile Martin's story, Deliverance, just missed being one of the best contributions to the volume. As it stands, it leaves one with an air of irreality. The various incidents in the story are not handled realistically enough; they are related as one would tell of some-

not handled realistically enough; they are related as one would tell of something that happened a very long time ago, something that did not leave a clear impression.

It is not the purpose of criticism to concern itself with the direction of literary endeavour, but rather to judge of its form and its force. The contributions to this year's Writer, as a whole, have not quite the form nor the force displayed in the contributions to the 1933 issue. The essays particularly are wanting in form. Undergraduate writers sometimes lose their heads in a maze of detail and forget that, when writing an essay or anything else, it is well to keep clearly in mind just what one is writing about. As Robert Frost said: "Before I build a wall I'd like to know just what I'm walling in or walling out"—which is as applicable to literary endeavour as it is to the questionable separation of cows and pine trees. Now Sweet Heritage has form and force. Although it is couched in the language of poetic imagination and even of allegory, we

## NH SWEEPS MILE EVENTS

Wildcats Shut Out Staters Darling, Saliba, White, Gale, Johnson, Levenseler Take Firsts

> Running against Springfield College on a muddy track as a result of recent rainstorm, the Wildcat tracksters proved to be good mudders by defeating the Gymnasts last Sat-urday at Springfield by the score, 77-58. As a result of the condition of the track there was no spectacular times set, with the meet being

Captain Funston again proved to be the leading scorer for both teams taking firsts in the high hurdles and in the 220 yard dash and seconds in the 100 and low hurdles. Parks of the Gymnasts rivalled Capt. Fun-ston's feat by taking firsts in the cen-tury dash, second in the 220, and was tied with two of the teammates for the first place in the high jump. The Wildcats carried off the first

places in ten of the fifteen events of the dual meet. The pole vault, as the high jump ended in a tie for first between White of NH and Mahailoff and Farmer both of Springfield, with the bar at 11 ft. and six inches. New Hampshire made cleansweeps of the two-mile and mile runs.

The Wildcats took two places in

the javelin throw. Gale took first place with a beautiful throw of 175 feet 4½ inches. Johnson took third. In the other weight events, Johnson took first in the discus throw and

second in the shot put.

Saliba led the pack to the tape in the 440 yd. dash with the third positive height. tion being taken by Perreault. The 880 was a NH event with Darling taking first honors with his teammate Webster following him to the finish. This meet with Springfield closes the 1934 season of varsity spring track. Their record this year is no cause for sore eyes. With victories over Holy Cross, Springfield, and a close decision to Brown, their season ends victoriously. The only downfall of the track team was their showing in the New Frederick showing in the New Englands at Springfield three weeks ago, but off-days come in the life of all people.

The summary:
Shot put—Won by Smith (S);
second, Johnson (NH); third, McNeil (S). Distance—43ft. 8 5-8 in.
120 high hurdles—Won by Funston (NH); second, Smith (S);
third, Levenseler (NH). Time—16

High jump—Tie for first, Parks, Smith, Ellis, all of Springfield. Height —5 ft. 8 in. ter is Above Un-dergraduate Writing (S); second, Baker (NH); third, Gale (NH). Distance—135 ft. 5 1-8

880-yard dash—Won by Darling (NH); second, Webster (NH); third, Bigelow (S). Time—2m. 10

2-0s. 220-yard dash—Won by Funston (NH); second, Parks (S); third, Cunningham (NH). Time—22 1-5s.

### 4 Noted Geologists Here on Inspection

Local Glacial Features **Examined by Visitors** and Univ. Group

Geologists, specialists in glaciology, from several New England colges were in Durham over the weekend examining local glacial features under the guidance of Dr. George W. White and Dr. Donald H. Chapman.

Visitors present were Dr. James W. Goldthwait, Hall Professor of Geology at Dartmouth, noted expert on New England and Canadian physiography; Dr. Richard F. Flint, professor of physiogaphy at Yale; Dr. Edward H. Perkins of Colby, in charge of glacial geology on the Maine Geological Survey; and Dr. Floyd W. Fisher head of the Geology Department of Pates. ment at Bates.

On the first day of the field conference, the visitors were shown the deposits laid down in the sea whose evel was about 200 feet higher when the ice left than it is at present. Beaches and wave-cut cliffs formed along the shore of the higher sea were examined in detail at many places. On the second day, the geologists saw features of the glaciated upland between Durham and Concord, after which the party proceeded to Hanover where Professor Goldthwait demonstrated the evidence in the Con-necticut Valley of two glacial lakes.

There will be an important meeting of the University Student Council Monday evening at 10 p. m. Election of officers for next year will take place. Every member is required to at-

FRED WALKER.

pre-medical students and others interested in advance work in zoology

from a general teaching and research course to one devoted scientifically to Methods of Teaching Zoology. All students are planning to should sign for this course. Credits and hours are fixed and not flexible as during the past year. This course may be used in fulfilling part of the regular requirements in the department of education.

Pre-medical students will please note that the former course in comparative anatomy has been divided nto two separate courses. In the future, 33, 34, 35, Human Anatomy and Physiology, will be entirely lecture work, and required of pre-medical students. Paralleling this course is zoology 45, 46, 47, Comparative Zoology of the Vertebrates, which is entirely laboratory work, also required of pre-medical students. The two together constitute five units eredit. Other students may elect

these courses separately.

A new course is being offered in the department under the number of 54, 55, 56. This will be divided into wo sections; one section will deal with a general appreciation of outdoor life, its conservation and enjoyment. With the greater emphasis being placed on the utilization of leisure time and outdoor activity, it is thought that a general study of wild life and its distruction and impor-tance will be of value. The general approach will be from the angle of vertebrate ecology taking up the life history, destruction and identifica-tion of local vertebrates, with special attention given to the classification of the birds. Some time will be devoted to equipment for outdoor life and as a rule, field trips will be scheduled for Friday afternoons. Those interested in outdoor life would probably be allowed to register for this

In addition to the above, there will be a second section for students who may have some problems and wish to have opportunity of doing additional as to whether a few more concrete laboratory work. Students will be allaboratory work. Students will be allowed to register for this course only by special permission.
