NH Sea Grant

July 31, 2007

DURHAM, N.H. - Are you interested in learning more about the marine environment? Looking for a way to give back to the community? Do both by becoming a UNH Marine Docent!

The Marine Docent program, now in its 30th year, is a network of more than 170 volunteers who educate the community about our coastal resources. Docents work with thousands of community members each year, leading Sea Trek educational programs for schools and the public, teaching about marine exploration at sea aboard the university's research vessel, and volunteering at the Seacoast Science Center and the Great Bay Estuarine Research Reserve's Great Bay Discovery Center.

To prepare for their roles as educators, Marine Docents get hands-on training in local history and science by UNH faculty, extension educators and other experts in the marine field. Training takes place both inside the classroom and out, with a variety of fun field trips to sites around the Seacoast. The five-month training program begins in September, with courses held Tuesday and Thursday mornings. To learn more about becoming a Marine Docent, please attend an informational meeting at 10 a.m. Tuesday, Aug. 21. The meeting will be held at the NH Sea Grant office at Kingman Farm on Route 155 in Madbury.

No prior experience is required to become a Marine Docent. Ideal candidates possess a love of learning, a keen interest in the marine environment, a sense of stewardship for the marine world, and a desire to share their knowledge with children and adults in the community.

The Marine Docent Program is sponsored by NH Sea Grant and UNH Cooperative Extension. For more information or directions to Kingman Farm, please contact Mark Wiley or Dari Ward (phone: 603-749-1565; mark.wiley@unh.edu or dari.ward@unh.edu).
