

Devens Comes Here Probably to Take Place of Anderson

New Officer Naval Academy Graduate—Served in Regular Army

Orders assigning First Lieutenant W. George Devens, Coast Artillery Corps, to duty here at the University at the close of the academic year have been received recently from the War Department. It is expected that Lieutenant Devens will relieve First Lieutenant George B. Anderson, Coast Artillery Corps, who has served as assistant professor of military science and tactics at the University since 1929. No orders relieving Lieutenant Anderson have been received as yet, although it is the custom of the War Department to rotate officers about a variety of duties, and Lieutenant Anderson has served New Hampshire for nearly six years.

Served in France

Lieutenant Anderson received his B.S. degree in electrical engineering from Norwich University in 1916 and in the following year entered regular army service as first lieutenant in the railway artillery forces of the A. E. F. in France. From 1919 to 1921 he was absent from active duty, returning in the latter year to be stationed successively in Portland, Me., New Bedford, Mass., and in the Philippine Islands. In 1929, he was transferred here to the University where he has been ever since.

Lieutenant Devens

STEWART NOMINATED FOR SCHOLARSHIP

Glenn Stewart has been nominated by the local chapter to represent it in the competition for the Thomas Arkle Clark scholarship, an award given annually by the national chapter of Alpha Tau Omega.

This award is given to one member in each province, and is awarded on the basis of 50% for scholarship, 25% for manly character, and 25% for fraternity leadership.

The winner will receive a free trip to Memphis, Tenn., in connection with the award. It is

LOVEREN RESTING AFTER OPERATION

Harold W. Loveren, superintendent of University property, underwent a successful operation for chronic appendicitis Wednesday morning at the Exeter hospital. Mr. Loveren had been suffering from the ailment for some time and decided upon an operation before a severe attack might set in upon him. He is resting as comfortably as can be expected and will probably return to Durham within two weeks.

QUEER RECREATIONS INTEREST STUDENTS

"The cub reporter" walked out of "T" Hall, down the steps, and started down the walk toward Main street, pondering over his interview with the dean. As he passed in front of the bookstore steps, wandering eyes fell surprisedly upon a student sitting upon a box, dressed in high hip rubber boots, an oilskin hat, and an abbreviated oilskin jacket, fishing from a small tin bucket.

Meditating upon this, he was startled from his reverie by a weird horn sounding in his ears, coming from the "T" Hall road next to him. Looking up quickly, he saw an extremely dilapidated Ford of the model T type, lacking top, windshield, mudguards, a door or two, in fact everything but the bare necessities.

He continued down the street, but came to a sudden stop and leaped to one side just in time to avoid being run down by a pair of runaway co-eds whose roller skates were out of control. Looking up he noticed a pair of fellows rolling along on a tandem bike. He retraced his steps back to Murkland Hall, walked up three flights of stairs, and enrolled in Dr. Ekdahl's abnormal psychology course!

Drunken Driving Arrest Made Mon.

Resident of Durham Fined One Hundred Dollars and Court Costs

Walter G. King, a resident of Durham, was arrested last Monday, April 1, on the charge of driving while under the influence of liquor. The arrest was made on Main street by Inspector Foss and Chief Louis P. Bourgoin, and the case was tried before Judge Alexander in court on April 2. The fine imposed was one hundred dollars and the costs, which amount to \$8.82.

Chief Bourgoin announced Wednesday that the police department is making plans for a drive to be made in the near future against drunken driving, driving with only one light, and non-stopping at street signs. Tests are to be made on brakes, and some way of remedying the prevalent lawlessness will be put into effect.

FROSH HOLD DANCE AT GYM SAT. NIGHT

The freshman class will hold its informal dance tomorrow night in the Men's Gym. Dancing, with music furnished by Lew Joubert and his ten-piece orchestra from Manchester, will be from 8 to 11:45 p. m.

President and Mrs. Edward M. Lewis and Dean and Mrs. Norman Alexander have been invited to attend the affair by the chaperon committee.

Economist Speaks Before Large Group in Murkland Hall

Rautenstrauch Discusses Phases of Industrial Economy

Speaking at the final lecture forum of the season in Murkland Hall on Wednesday evening, Walter Rautenstrauch discussed the subject, "Some Fundamentals of Our Industrial Economy." A large audience greeted the lecturer who, at the completion of his talk, carried on an open forum.

Mr. Rautenstrauch was concerned first with the problem of the distribution of our national income. Using statistics he showed how in 20 years, from 1909 to 1929, our national income distribution had increased 60 billions, while in the previous 130 years, from 1779 to 1909, the distribution increased only to 27 billions. Further he showed that the income allotted to the productive groups during recent years has decreased, while the income of the overhead group, which includes those not primarily concerned with production, has increased.

Comments on Conditions

Commenting on the present condition of the country, Mr. Rautenstrauch said: "We have expanded our debt structure beyond production." Also he pointed out that the people are living beyond their present means. In discussing the factor of employment in production, he showed how, for many years prior to 1929, there had been a 4% decrease in the employment of production per unit commensurate with a 4% increase in production. However, since 1929 there has been a 7% decrease in the employment of production; in short, machinery has displaced these men engaged in industrial pursuits.

Ken Reeves to Play for Sophomore Hop

Sophomore Girl Will Be Chosen Miss 1937 at Dance

The Sophomore Hop committee is confident that the annual dance to be held April 12 will be an unusual success. The class is setting a new tradition by presenting Miss 1937, who is to be a sophomore girl chosen for all-round popularity on campus. She will be selected by judges during the evening, and at intermission will be presented with a unique award. In case of a tie duplicate prizes will be given. This new feature of the dance is being enthusiastically received.

Ken Reeves' orchestra from Melrose, Mass., will furnish the music, and from all reports it is one of the best which will play on campus this term. He is very popular at Harvard and M. I. T. At both these institutions he has played for many of the big dances. One of the fraternities at M. I. T. wrote "Ken Reeves' orchestra is the best the house has had." He was featured last summer at the nationally-known *Fo'cas'le* at Marblehead, the most colorful dine-and-dance rendezvous of the north shore. Other colleges which

FIRST WALL OF NEW STADIUM STARTED

At exactly quarter to eight Wednesday morning the first of two thousand bags of cement were poured with sand and stone into rotary mixers and sent sliding down chutes into the huge wooden mould that forms the main wall of the new football stadium at the new athletic field.

Aided by arc lights, the pouring of the cement continued without interruption until 11 o'clock that night with not one of the 35 men employed on the construction quitting until the last inch of the form had been filled.

Year Course Plan Favored by Faculty

Forum Committee Against Having Guest Speakers at Meetings

At a meeting of the Liberal Arts faculty called on last Monday, April 1, by Dean C. F. Jackson, it was shown almost unanimously that the year course plan is favored by the faculty of this college after a show of hands was asked on the question by Dean Jackson.

At a previous meeting the dean had spoken about inviting outside speakers to address the Liberal Arts faculty at their meetings, and he appointed a committee on forum to discuss the matter and present their opinions at this meeting held last Monday. The committee decided that for the present there were enough questions to be taken up concerning the college at the meetings without inviting outside speakers.

On Monday, April 15, another meeting of the Liberal Arts faculty will be held. At this meeting the first forum will be held taking up the question of the year versus the term plan of organization.

TWELVE REMAIN IN RIFLE COMPETITION

The annual freshman rifle competition, open only to members of the class of 1938 enrolled in the R. O. T. C., started yesterday and continued through this afternoon to eliminate all but twelve freshmen who will compete for the record in the final to be held some time next week. Final enlistments for the contestants totaled 30 members from the infantry, and 20 from the coast artillery section.

To the man with the highest score, a gold medal will be given; to the winner of second place, a silver medal; third place, a bronze medal.

have enjoyed his music are Smith, B. U., Wellesley, Radcliffe, Tufts, Northeastern, Simmons, Andover and Exeter Academies.

Non-Fraternity Men Will Hold Meeting for Organization

Eiseman, Hemm, Call Group Together—Plan Active Campus Program

Monday evening, at 7 o'clock, there will be a special meeting of the non-fraternity men in the Commons' organization room. This meeting is for the purpose of providing a definite organization for this group and for the election of representatives to the Student Council for next year. Otto Hemm and Nathaniel Eiseman, at present non-fraternity representatives on the Council, will be in charge of this meeting.

Hope to Enter Intramurals

Correspondence with other colleges has been carried on since last fall to get information concerning the organization of neutral groups on other campuses. The results of these investigations will be made known to the non-fraternity men at this meeting. In general these men on other campuses have been able, through organization, to take an active part in campus affairs and to participate in intramural sports. At this meeting a tentative constitution based on the results of the inquiries will be presented to the group for their approval.

Eiseman and Hemm Appointed

The Student Council this year, recognizing the size of the non-fraternity group, appointed Eiseman and Hemm to the Council to study with them the problem of providing this body with the representation which it deserves. Both Hemm and Eiseman feel that many advantages can accrue to the non-fraternity men through proper organization. In this way, they feel certain that permanent representation on the Student Council can be assured and immediate participation in intramural sports made possible.

WEEK-END WEATHER

Friday, April 5, 8 a. m.

A storm of considerable extent was developing yesterday over the central Great Plains states, and rain or snow was falling from California and Washington eastward as far as the Mississippi Valley. If this storm continues to gain strength and follows its customary path, it should reach the Atlantic seaboard some time Saturday.

Friday: Increasing cloudiness with rising temperature. Gentle wind becoming easterly.

Saturday: Cloudy and warmer with some rain or snow during the day. Increasing easterly wind.

Sunday: Clearing during the day and colder at night. Winds becoming westerly or north-westerly.

DURHAM, N. H., APRIL 5, 1935.

War and College Men

One week from today we commemorate once again the anniversary of our entry into the World War. Apparently there are as many fools and fanatics today as there were eighteen years ago. All Europe prepares itself for another struggle, and the U. S. regards the situation as calmly and as fatalistically as in 1917.

On one hand there are those who would have us scrap our own armies and prepare to turn the other cheek, on the other are those who say that capital may want another war for profit but that labor is now too well educated to tolerate such a possibility.

In between these two is a group to whom the subject war is of more vital concern. The youth of the country will in any event be forced to bear the brunt of whichever plan either of these two force upon us, and strangely enough it is possible to see that both factions can shape causes to one ultimate result.

Let us consider those who would have us refuse to fight and who spread propaganda to the effect that the U. S. will never enter another war. They, as much as any other group, work to the detriment of peace. With human nature the poor thing it is and with universal social education a nonentity, they betray an optimism which makes them either fools or fanatics.

The U. S. is yet young and because of its youth is the possessor of a fullblooded fighting spirit. It will not now nor for a long time, unless steps are taken for its education in patience, tolerate any affronts to it. Those who would have foreign militaristic nations believe that it is subdued, cause unbelievable trouble, for they invite incautious treatment of the U. S.

When they hold that labor is averse to war because all profits accrue to the capitalist they show an appalling ignorance. The capitalist is no fool, no matter what else may be said of him. Labor which is beyond the draft age limit can profit, in its own eyes, just as much from a war as can capital.

Were labor educated it would know that its percentage of profit is relatively small and that it must bear the brunt of readjustment when wages revert to pre-war levels. Sadly enough it is not educated to this extent and is just as much a factor in war promotion as capital.

Where then can we look for sanity in all this hopeless mess? Who can be effective against fools and fanatics? The college youth which will furnish the bulk of the junior officer personnel and a good proportion of the ranks in a war are the ones who go through hell. Only when they wake up to the realization of this and have done with their toys of sophistry and indifference will there be a sound group against war. All other classes either are not cognizant of the situation or stand to profit from it.

Now then is the time for the college man to assert his power. Let him continue to ignore his

Stuff and Nonsense

by Roy Lovely

Those of you who do not already know of it may be glad to learn that the makers of Cream of Wheat, under whose auspices Alexander Woollcott performs his radio chores, have prepared a booklet containing four of the stories from The Town Crier's book, *While Rome Burns*. Whether or not they are the four best stories one would have to read the book to determine, but that they are good Woollcott is self-evident. The speed with which you turn in your empty Cream of Wheat cartons will be determined by your appraisal of good Woollcott.

Not even the most jaded among us can complain of too little variety in the presentations of Mask and Dagger. From Barrie to Coward to Shaw, in the space of one short year, is what we would call getting around.

If paintings could be reproduced in this column, and if we could paint well enough, the task of filling this space would be relatively simple. Today, for instance, we would have one picture of the what-d'you-call-ems sprouting by Prexy's Walk. Another would deal with sundry youthful chickens, lambs, calves, pigs, and what-not, in various nearby barns and fields. Still another would depict the sudden, forceful union with earth achieved by one who has not roller-skated since childhood. And if the idea of spring seemed still to be obscure, we would paint a picture of any classroom, on any afternoon this term.

potential part as a forced war machine and he will find himself thus used. Let him resort to sentimentality and beliefs in human nature as good and fine and he will find foreign militaristic nations acting much as our native criminal today.

But let him say to all other classes that he sees through their plans to use him and that he intends to maintain an independent educated personality, that he refuses to be a tool, that he can and will fight for his beliefs as well as for his country, and we will have moved one step at least towards a semblance of peaceful existence.

Contributors' Column

CONGRATULATIONS

The unanimous action of the Student Council in petitioning the administration to dismiss classes at 11 a. m., Friday, April 12, in order to allow the student body to join the national movement against war deserves high commendation, and perhaps it marks the beginning of a new chapter in the history of this body. At last we have a Student Council which is alive enough to act significantly. At last this representative of the student body has accepted its responsibility to express student opinion, and to lead student action. May the good work continue! May the new Council, which is to be elected soon, be yet more alive and intelligent!

the highest honor that can come to an undergraduate member of the Alpha Tau Omega fraternity.

Stewart, the president of Casque and Casket, has been a leader in campus activities throughout his four years at college, and has also taken the lead in many chapter affairs.

Chemistry Teachers Receive Positions

Dawson, Leland, Noonan, and Seymour Given Appointments

Teaching appointments at Columbia University, University of Iowa, and Ohio State University have been received by four chemistry instructors of the University of New Hampshire, it was announced here today by Dr. Harold A. Iddles, head of the Department of Chemistry.

Charles Dawson, Claremont; Hollis L. Leland, Bangor, Me.; Evan C. Noonan, Vergennes, Vt.; and Raymond C. Seymour, Dover, will continue with graduate work for their Ph.D. degrees in addition to their teaching duties. The four members of the University staff will have completed their work for their master's degree by June.

Mr. Dawson, graduate of Claremont High in 1929 and the University of New Hampshire in 1933 was a member of Theta Chi social fraternity and Phi Kappa Phi, national honorary scholastic society. During the year he has conducted a course in qualitative analysis for pre-medical students. He has been assigned at Columbia University.

Mr. Leland, a graduate of Bangor, Me., High in 1929 and the University of Maine, has been assigned a teaching appointment at Ohio State University in Columbus, Ohio. While a member of the Chemistry department here, he has served as a general chemistry quiz instructor and lecture demonstrator.

Mr. Noonan, instructor in the general chemistry laboratory,

ALUMNI GROUP MAKES GIFT TO M. E. DEPT.

Alumni of the University of New Hampshire, who are employed in the Turbine Department of the General Electric Company's plant of Lynn, Mass., have presented the Mechanical Engineering Department of the University a steam turbine with sections of its housing cut away to show the working parts.

The cost of preparing equipment in this way is too great for the University to have work of this kind done. However, this method of showing the operating parts of machines cannot be surpassed.

The alumni who remembered their college so handsomely are H. H. Calderwood, 1909; J. H. Chesley, 1905; S. N. Hedman, 1925; G. A. Lang, 1913; and F. C. Smith, 1914. H. H. Calderwood is a member of the Technology Alumni Advisory committee, which keeps this college in touch with outside professional practice in engineering and chemistry.

was graduated from Vergennes, Vt., High School in 1929 and Middlebury College in 1933. He will join Dawson on the Columbia University faculty.

Mr. Seymour, a graduate of Dover High School in 1929, received his degree from the University of New Hampshire in 1933. He has been associated with the Department of Chemistry as a lecturer. His appointment is at the University of Iowa, Iowa City.

It will be "Hell on Earth" at the Lafayette College (Easton, Pa.) Junior Prom. At least, that's the scene the decorations will depict.

bridge, shouted, "Life is bitter, I can't go on." If it hadn't been for Ballou and "Harold Teen," good old Bannon would be talking the devil out of his just deserts.

The following had better leave town, and there will be no questions answered about the reasons why!!!! Thomas R. Burns, Robert J. McNally, Warren E. Marshall, Robert Lamy, Robert Cochran, Robert Glynn, Walter Brown, Art Jorgenson, Joe Miller, Miah Morrissey, Jock Malone, "Dicky Boy" Mannion, William Stanley, and . . . Olive Thayer.

Lots of meleagris gallopavo around this spring, eh boys?

How about that band for Junior Prom, committee? Are we going to dance by clapping our hands?

And now least but not last, we come to that wart on the coludii muscles of progress, that stench in the nostrils of humanity, that morning after the

Bob and Bud

Well, well and well . . . Here we are as effervescent as ever and filled with the old "joie de vie." We know spring has sprung on account of the buds on the campus trees is dripping sap and the campus saps are dripping still. Boil it down brother, boil it down.

Vacation was lousy 'cause we still had on our red flannels (and the girls won't dance with me, maw. Never mind, son, paw's gonna buy you one of those stumpets). And besides that, all the schools in the United States didn't get out until this week. We wish that they would move the U. N. H. into the United States.

"Harold Teen" McLaughlin, writer of sonnets, was heard the other day giving vent to his springtime emotions. He was discovered warbling, in his whiskey tenor, the newest song hits while locked in his cloistered cloister. The Commons boys, and that includes "Ma" Thompson, are taking up a collection to buy him a mandolin and a pair of short pants . . . Sissy!!!!

"Love in Bloom" Bannon nearly did a Steve Brodie from Dover's Brooklyn bridge. It seems that his love bird found his breath distasteful (not garlic), and bawled him out severely, for no good reason, thought Bannon. Bannon, his heroic three-foot six (every inch a man!) perched on the rail of the

Frosh Practice in Exeter Acad. Cage

35 Candidates Report to Coach Lundholm for Baseball Nine

Holding his opening workouts in the enclosed cage at Phillips Exeter Academy, Coach Carl Lundholm began, early this week, the task of developing a freshman baseball team, the first in two years.

Through the courtesy of Martin Souders, director of athletics at Exeter, the Kittens are enabled to work out in the cage at Exeter until April 9, at which time the academy boys will return from their spring vacation. So far Lundholm has been taking only small groups of infielders over to the Exeter cage, but later on in the week he will include a pitcher or two, and will hold a batting practice. The men have been making the trip in Lundholm's car.

The pitchers and catchers have been working out in the open space next to the barracks, where Coach Lundholm has been carefully bringing them into condition. In all, about thirty-five men have reported to the squad. The athletes who have already participated in Kitten sports are Bull Martin, football and hockey star, and Red Cullen, football and basketball player, both catchers; Bob Kershaw, football and hockey man, pitcher; infielders, Jim Kelliher, a basketball man, John Shea, hockey member, Bob Ahearn, boxer, and Charlie Cotton, basketball man. Other athletes will probably report early next week, while some of those already on the squad have not as yet been able to work out.

SORORITIES START SPRING ACTIVITIES

The regular spring term competition for the inter-sorority activities cup which is already under way will include basketball, bowling, badminton, and ping pong. Extra points will be awarded to sororities having W. A. A. members, Outing Club members, and members with an A grade in posture. The cup will be awarded to the sorority winning the most points in all these contests.

Each basketball team will receive 60 points for entrance and 100 points for winning the tournament. The team consists of six players plus substitutes and must appear at all games. The bowling team is made up of four girls and the same number of points will be awarded.

The badminton team will consist of two representatives from each sorority, and ping pong will require four players. Twenty points will be awarded for each of these sports. Five points will be given for each individual having an A grade posture, and for each member of the W. A. A. and Outing Club.

In the basketball tournament the Phi Mu sorority and the Kappa Delta's have reached the finals by defeating the Alpha Chi Omega and Chi Omega sororities respectively. The final game will be played next Monday night.

Gertrude Stein (a rose is etc.) recently had her first experience as a debate chairman at the University of Chicago.

by Jimmy Dunbar

"Now is the time when all sports editors (good or bad, big or little, plus or minus) go crazy." The good, big, plus ones find that with the winter season dead, and the spring season just popping up, things are more than a bit dull. There are almost no all-American teams to be chosen. America as a sporting group has little use for any but football all-Americans. The novelty of spring training has worn off, and fans are impatiently awaiting the arrival of their teams in the north country. About all the good, big, plus editors and columnists are doing at present, is to discuss the prospects of their pet entry as a pennant winner, or rating the clubs in their league.

The bad, poor, minus editor finds himself in the same spot, relatively speaking, as his big brother. With him the winter is both dead and buried. And with this one in particular the spring is a bit far ahead. And so it behooves him to follow in the footsteps of his good, big, plus brother and do a bit of general discussing with maybe a prophecy thrown in.

Durham phan, we hear that you are in for a long, dull season. Of course you'll have your thrills, you'll see some real stars, and some swell battles, as local battles go, but if you are one of those numerous normal individuals who play to win, and like to watch other people do likewise, then you are in for a disappointment or two.

In the first place you will have to pack up your little bag, oil up the model T, or the thumb, depending upon your status in the community, and travel out of town to see two of the teams perform. Having done so, the chances just may be that you'll cheer, rave, and threaten in a lost cause. In plain English the varsity nine doesn't seem to have the best of material, and a lot of good frosh ballplayers do not seem to have the stuff to stand the jolting ride to Exeter, Newmarket, and nearby communities. Something may happen, but I refuse to bet on it.

Lacrosse draws a bit smaller frown as we watch the boys work out. There is a lot of enthusiasm, a local practice field, and several good men. However the team will miss those great stars which did so well for the school last year. It's one of your best bets, nevertheless, and if you don't know what it's about, then check up. There'll be a frosh team, too.

Track lacks the balance for success. Brilliant in some events, sure of giving a good battle to all opposition, there is a doubt in the minds of the coaches as to whether the team will have enough extra strength to pull through. Three wins will be a great performance. New material will be necessary to pull them through.

Sweet's freshmen seem to be the outstanding group to compete this spring. That powerhouse which was so effective in cross country, and on the boards, should continue to prove a winner this spring. However, these

KITTEN TRACK TEAM STARTS STEADY WORK

After a week of preliminary conditioning work, the freshman team began its regular practice this week under the direction of Coaches Sweet and Miller. The method used arranges for all the men reporting for a certain event to work together.

To date it has been necessary for the coaches to spend most of their time with the field events, mainly because cross country and winter track provided opportunities for the runners but not for the weight men and jumpers.

On Saturday afternoon time trials, at a modified distance, will be held for all running events in order to give the coaches some idea of the ability of the runners, and also to give the men some experience in competition.

The hope is that, although much material is still needed, especially in the field events, Saturday's results will show that the prospects for a good team are in evidence.

WRITING ON CAMPUS DISCUSSED AT FOLIO

At the last meeting of the Folio Club, the group was first concerned with the reading of some of the pieces written by people on campus. The discussion last Sunday centered around a piece by Granville Hicks, author of *The Great Tradition*, entitled "Literature and Revolution" published in the March issue of the *English Journal*.

boys will perform only twice for your local entertainment.

Maybe you'd better be a "Braves booster" or a midnight bleacherite. However, keep in touch. We might happen to retract these, yer words.

Varsity Ball Team Developing Slowly

Swasey Selects Pitching Nucleus—Some Batting Practice Needed

Handicapped by lack of sufficient time and space for practice in the gymnasium, Coach Henry Swasey reports that progress on the job of selecting his varsity baseball team is not very rapid at present.

Still unable to get outdoors, Swasey has confined his activities to working with his pitchers and giving informal infield drill. This latter activity is not particularly effective, because of the lack of space and the poor lighting conditions. Therefore the job of cutting his large squad down to the season's size, probably 20, will not be approached until warm weather and dry fields enable him to take his team out behind the fraternities on Madbury road for some batting practice.

The only new addition to the squad is McLeod, a southpaw, who had some experience pitching for his freshman club three years ago. He reported for the varsity two years ago, but an injured wrist forced him to withdraw. If he can retain his old form, he may be of considerable use to the team.

At present Swasey is expecting to use four men to do the major portion of the twirling. They are the veteran Weir, the lanky Collins, Deacon Churchill, fast ball pitcher, and Mose Saliba, somewhat of an unknown quantity so far. Crawford, Welsh, Farrington, McLeod, and Thompson are working hard to earn the remaining two positions on the staff.

The Lucky Strike radio programs, which have been one of the outstanding air features since the inception of broadcasting, will resume within a month, according to a statement made today.

SOCIETY

Kappa Sigma—Hell Week for Kappa Sigma pledges will begin Sunday night and continue until next Saturday. The annual dance will be staged on the house lawn next Friday at one o'clock. Recent alumni guests were William Nelson, '28, of Boston; Justin D. Flanigan, '32, of Boston; Frederick Martineau, '34, of Portsmouth; Lyle Farrel, '30, and Holland Dresser, '30, both of Andover.

Lambda Chi Alpha—Robert Chase, ex-'36, has been at the house quite frequently during his spring recess from Dartmouth.

Alpha Gamma Rho—Omega of Alpha Gamma Rho takes pleasure in announcing the initiation of three pledges: Doug-

las Newcomb Grant, '38, of South Windsor, Conn.; Donald Guy Kennison, '38, of Rumney; and Winthrop Charles Skoglund, '38, of Lynn, Mass.

Theta Kappa Phi—Austin J. McCaffrey of Lincoln was elected president for the coming year at Tuesday night's meeting. Francis T. Ahern was chosen vice president; Ernest Maynard, secretary; Lucien Dancause, treasurer; Robert Jeannotte, sergeant-at-arms; Walter Eldredge, chaplain; and Robert Belliveau, historian.

Brother Alexander "Duke" Maynard was a week-end visitor at the chapter house.

Major Donovan Swanton was a dinner guest Sunday noon.

Theta Upsilon—On Friday evening the following officers of Tau chapter were elected: Presi-

dent, Isabelle Hermes; vice president, Millicent Sleeper; secretary, Mary Mead; treasurer, Jessica Allen; alumnae officer, Dorothy Grimes; editor, Gloria Marcy; chaplain, Anne Corson. The new house officers are: President, Lynette Caverly; house manager, Dorothy Halladay; board manager, Ruth White.

Mrs. Larrabee spent the early part of this week in Boston.

Dr. and Mrs. Ekdahl recently visited in Evanston, Ill., where Peggy Ekdahl is attending Northwestern University.

MOVIES PRESENTED AT DEMERITT HALL

On Saturday, March 30, at 11:10 a. m. a film entitled "Modern Manufacturing with a Stable-Arc Welder," was presented by the Lincoln Electric

Co. This was shown in room 106 in DeMeritt Hall under the auspices of the A. I. E. E.

Committee on Foods Accepts Hayden's Milk

Word has just been received from the Committee on Foods of the American Medical Association that W. D. F. Hayden Dairy's Irradiated Vitamin D Milk has been accepted by the Committee on Foods. The announcement is published in the current issue of the Journal of the American Medical Association, and Hayden Dairy's Irradiated milk will also be included in the Book of Accepted Foods.

The officials of W. D. F. Hayden Dairy Co. are elated over the announcement inasmuch as acceptance by this committee indicates the high regard in which products may be held by the people of this community.

There's something about a Chesterfield —

There's one thing I especially like about Chesterfields — entirely aside from the fact that it's a milder cigarette — and I've heard a number of people say the same thing ... While I'm smoking Chesterfield I

never get little crumbs of tobacco in my mouth — the tobacco doesn't spill out and that adds a lot to my pleasure of smoking them ... I notice more and more of my friends smoke Chesterfields.

Chesterfields are Milder Chesterfields Taste Better
